noissue.

Custom Clamshell Takeout Containers

SIZE
8″ x 8″ x 3"

MATERIAL
Unbleached Sugarcane
Natural

PRINT COLOR
CMYK
No white color

Step by step...

1. **Download the template.**
You can find the template on the noissue website.
Choose the size you wish to order.

2. **Choose the material.**
We offer three options for clamshell takeout containers: sugarcane (white base), unbleached sugarcane (natural base), and farmer's fiber (kraft base).

3. **Start designing!**
You may now start designing your noissue clamshell takeout containers! Use the **Print Perfect Checklist** as a guide to get the best print results.

4. **Once done, you may upload as a finished artwork.**
Upload your design in PDF file. Fill in the necessary fields: material, size, quantity and eco-badge.

5. **Add to cart and order!**
We want to make sure you're happy so before we print anything, we'll send you a visual of your custom design to sign off.

Print Perfect Checklist

- Add your design to the template available on the next page.
- Avoid placing large shapes on print seam and no large background colors covering template. This causes streaking in our process and creates unnecessary product waste.
- The more variation in color and line, the better hence outline logo versions preferred.
- Small text/fine detail elements in black only. Color is doable but there is a high possibility of misalignment.
- We recommend using **8pt font size** or larger.
- Lines and stroke thickness should be no less than **0.5pt**.
- We print in CMYK mode, however, we do not offer white ink. (This applies to all material available for clamshell takeout containers.)
- In order to ensure your custom clamshell takeout container prints correctly, we require that design should be converted to **vector** and all fonts converted to **outlines**.
- For our color recommendations, kindly use the following:
  GOLD: less value in cyan and more black/magenta, otherwise gold color will print towards green hue
  RED: kindly use ***C:0 M:100 Y:85 K:10*** as your CMYK value
  BLUE/PURPLE: try to keep 30 value difference between cyan and magenta otherwise your blue may look too purple and vice versa
  GRAY: best to not use a color build and adjust black value
  RICH BLACK: kindly use ***C:30 M:30 Y:40 K:100*** as your CMYK value
  BLACK LINES: kindly use ***C:0 M:0 Y:0 K:100*** only as your CMYK value

→ Please export as a '**CMYK**' **PDF**. No crop marks needed.

LEGEND:

Design should not exceed the broken lines

Print Seam - Avoid placing large shapes on print seam

Note:
Do not remove the compostable label.
A compostable label is required on each product for responsible disposal, so this should always show in each design.
