OUR IDENTITY

With more than 76 years of activities, Usiquimica has evolved to become one of the most respected companies in the industry. Our success is a result of the strength of innovation and perseverance, of our achievements and team spirit.

Usiquímica focuses on having a strong presence in the markets in which it operates, always standing out by a constant search for improvement through modern operational processes and an efficient logistics chain.

Usiquimica has the most modern Ammonium Hydroxide production plant in Brazil, being the main supplier of this product in such market. Beside that Usiquímica became one of the main players in the Ad Blue market. It is also one of the main distributors of the Soda-Chlorine chain and the largest Brazilian Hydrofluoric Acid importer.

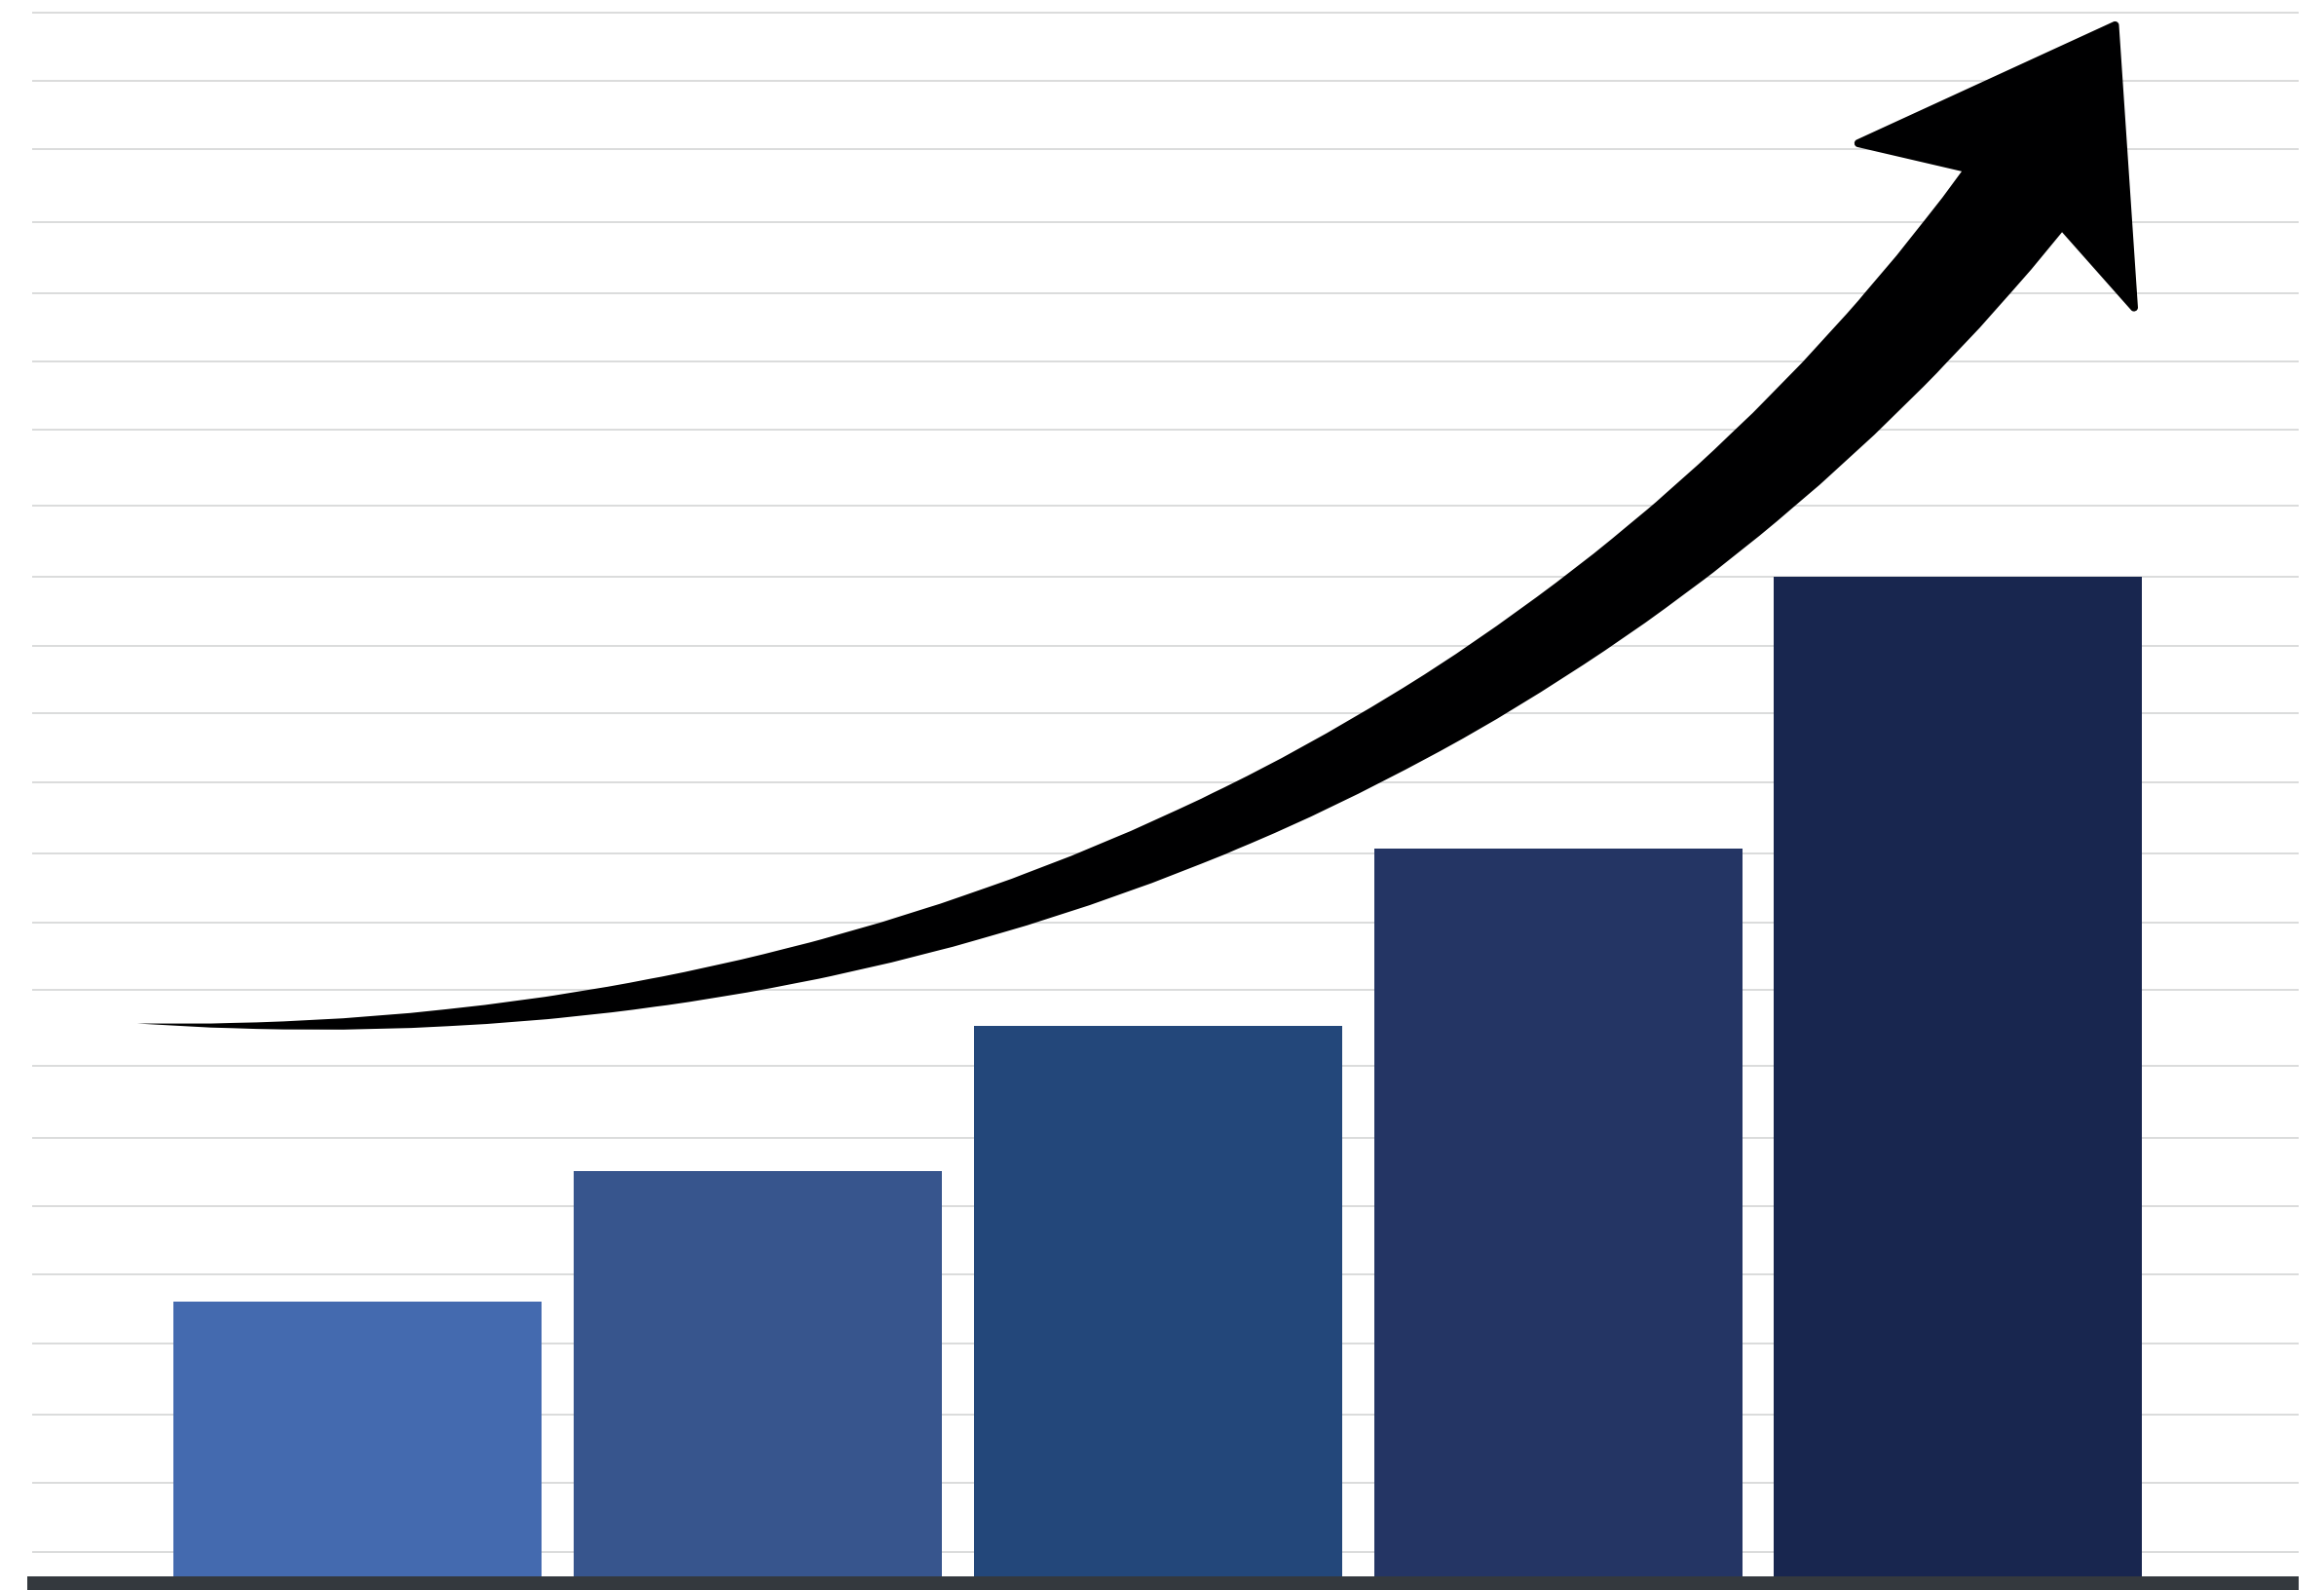

FINANCIAL PERFORMANCE

Usiquímica growth was 23% CAGR in the last 5 years. This growth is based on a continuous search for opportunities and new business development

Usiquímica is a company with no revealing debts. All investments are made with your own cash generation

Usiquímica seeks businesses with healthy margins and opportunities that can improve shareholder results

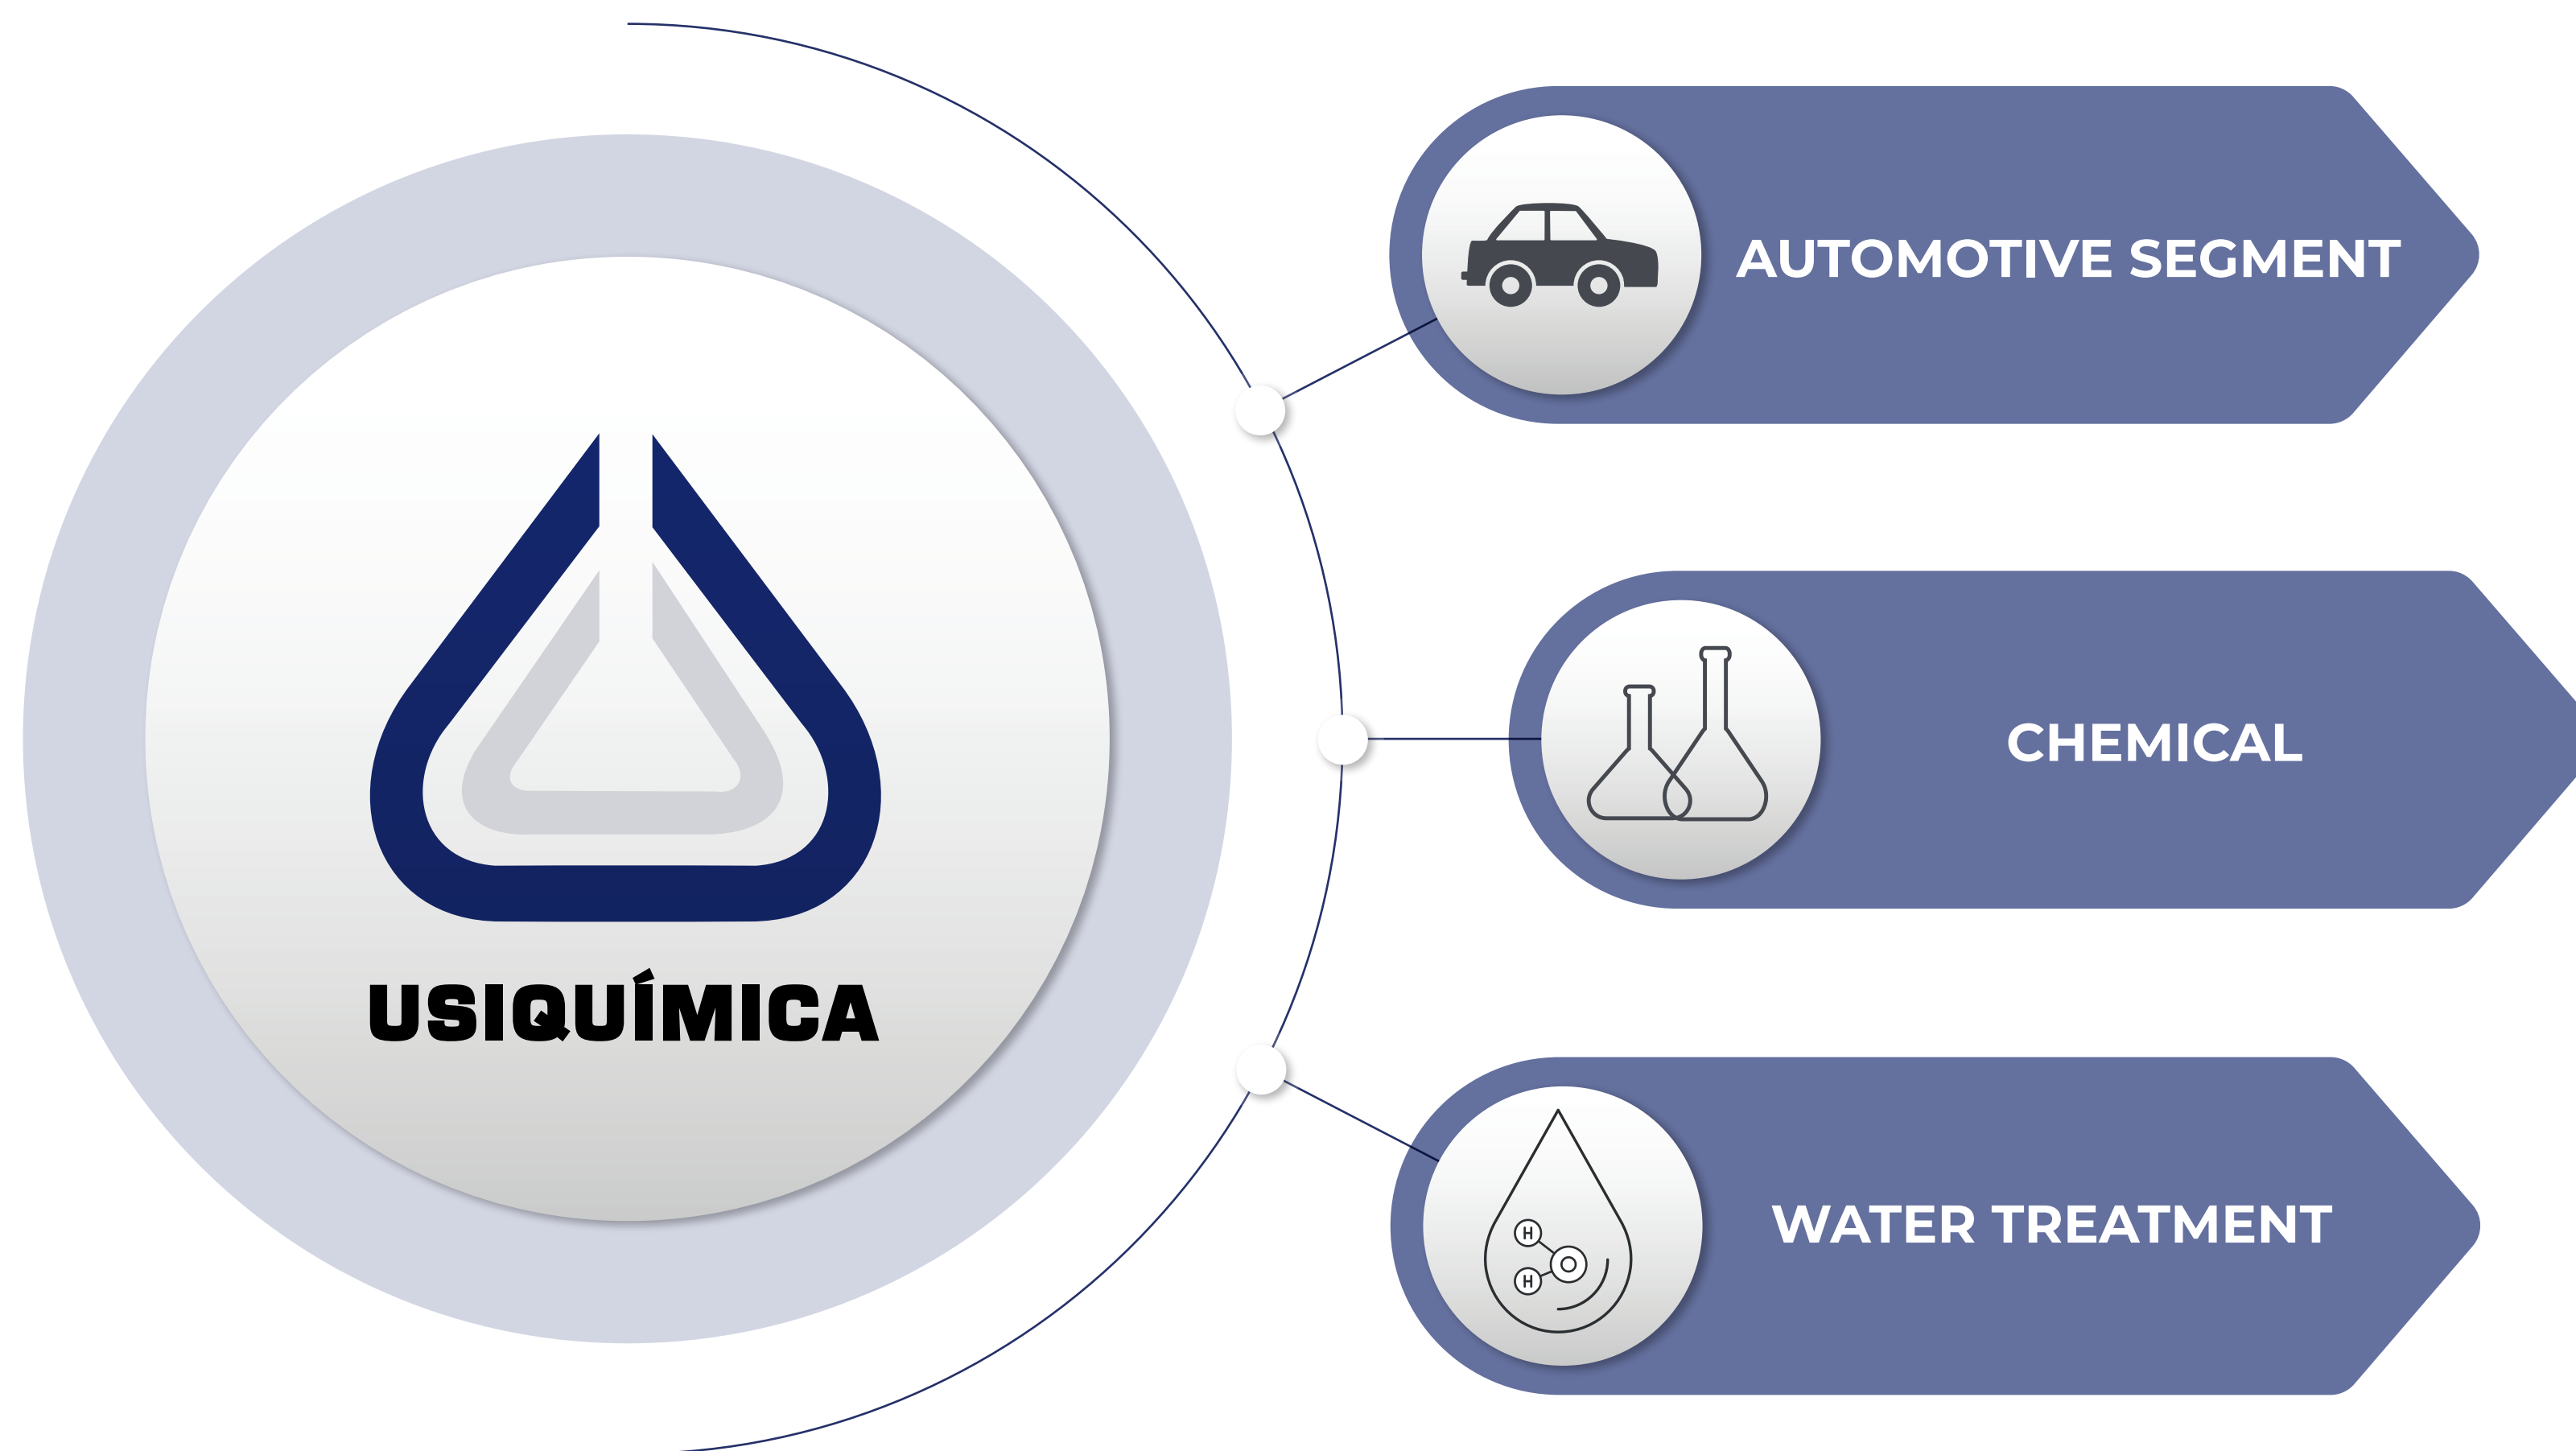

The company focuses on continuous cost reduction to ensure competitive margins
