

# WOMEN'S MARCH

# WHY are we Here? BECAUSE we WIN.

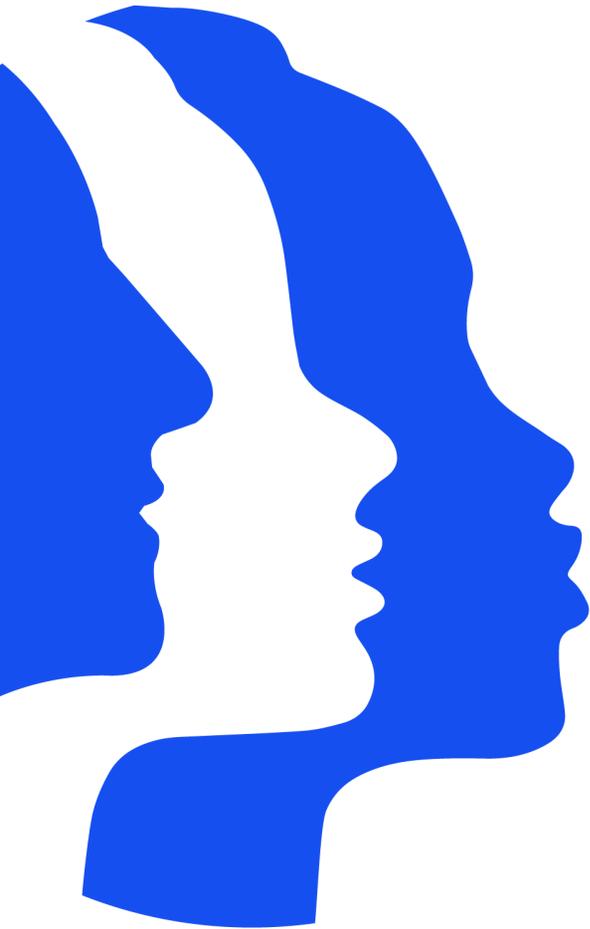

Women's Marchers are everyday women across race and place who are looking for a space to take their first steps or the next of many toward building a better future for women and their families.

# WOMEN'S MARCH 2022 WINS

# **we are undeniably THE Largest mobilizer and base builder on THE Left.**

Women's March is not an organization of political elites. We don't have book deals, we are not Blue Check Twitter. We are simply the women who raised our hands when there was work to be done. Our work is not to advance the will of a small group of people with political, economic and social clout and privilege. Our work is to win for our people, to build up the political power and collective muscle of women to intervene on macro and micro attacks, and to defend democracy from current threats.

Women's March is one of the few organizations focused on building a distributed, national base, and the **ONLY** one that focuses on organizing women across race and place at scale. We are the backbone of political and community power that drives wins. With over 6,500 actions and nearly 10 million people taking action with us since our inception (and over 4,000 in the last calendar year alone), we are undeniably the largest mobilizer and base builder on the Left.
