2025

introduction.

our story.

Established by a dynamic duo of Cambodian architects, MAD Architecture is a boutique design studio based in Phnom Penh. We specialize in creating highly personalized design solutions for a range of projects, including residential, commercial, F&B, retail, and hospitality spaces.

Our portfolio showcases a unique blend of conceptual and built projects, each demonstrating a deep understanding of site contexts, user needs, and construction feasibility. We are committed to achieving refinement and client satisfaction in every project we undertake.

At MAD Architecture, we believe in the power of simple yet thoughtful design to enhance the purpose of one's belongings and surroundings. We strive to create spaces that enable users to experience diverse sensory elements, compelling layouts, and appealing visual impressions. By integrating elements of nature and light, we strive to enhance the intrinsic purpose of space and architecture.
