

Land and Water

Earth has different kinds of land.

Some land is flat.
A **plain** is flat land.

Some land is very high. A
mountain is very high land.

Some land is higher than
a plain but not as high as
a mountain. This land is
called a **hill**.

1. What is the highest kind of land?

2. What is the flattest land?

3. Which is higher, a hill or a plain?

Earth has lots of water.

Some water runs across the land. This water is called a **river**.

Some water has land all around it. This water is called a **lake**.

These symbols stand for different kinds of land and water. Write a word to tell what each symbol stands for.
