**The professional speakers for an unprecedented audio experience on the motorcycle are born from Midland technology and RCF sound.**

Two Italian concerns of excellence, leaders in motorcycle communication and professional audio, for over 65 years. Continuous research and development of innovative products has led to a product that guarantees maximum performance in any condition of use. The best possible technology, for an audio quality never achieved before.

**Midland & RCF laboratories bring a concert directly into your helmet.**

## **TWICE AS MANY BASS TONES**

A new custom speaker driven by power and processing.

## **50% MORE**

Speech understanding, in noisy conditions.

## **PROFESSIONAL SOUND**

Carefully optimized DSP for perfect low frequency extension and linearity.

## **PEEK MEMBRANE**

Designed to achieve maximum sound clarity and definition.

## **COMPLIANT SPEAKERS**

The RCF speakers comply with the ECE 22.06 standard

## **EAR CUSHIONS**

Memory foam core and protein leather coating improve sound performance and low frequency perception.

# UNIVERSAL Connectivity

Midland has developed a new protocol that enables native Bluetooth systems to communicate with Cardo and Sena devices.

We have always championed sharing and the freedom to choose between our products and those of other leading brands regardless of the make of your intercom, without the loss or compromising of any features.

The Open Bluetooth Intercom (OBI) connection system developed in collaboration with Cardo is into Universal Connectivity.

## ECE 22.06 Approved

**ECE 22.06**

**APPROVED**

### **Midland: the world's first and only 22.06-compliant manufacturer**

From a manufacturing perspective, the evolution of the motorcycle helmet has led to a necessary introduction of a regulation that, through testing, certifies the safety and quality of the device tasked with protecting your head when travelling on a motorcycle or scooter. Together with the other intercom manufacturers, Midland has been working for over two years at drafting the 22-06, with regard to the technical requirements relative to helmet accessories. This has led to us becoming the first and only manufacturer to offer a complete range of 22.06-approved intercoms.

# R1 Mesh: the Mesh & Bluetooth intercom at the best quality-price.

ECE 22.06  
APPROVED

New look & feel, top technology, **simplified user interface**, Magiclock magnetic fastening system, RCF audio experience and **best quality-price** all in one model.

It will be possible to talk to one or more motorcyclists in a dynamic way, overcoming the "chain" configuration typical of the Bluetooth conference. The presence of a **dual processor** guarantees great connection stability with the multimedia displays of the vehicles. **R1 Mesh** is compatible with the main satnav systems (Garmin Zumo and TomTom Rider), as well as connectivity and control systems integrated by motorcycle manufacturers in the dashboards of many of their models (BMW, KTM, Honda, Ducati...).

# BTR1 Advanced X: Bike-to-bike communication up to 1200 m.

**BTR1 Advanced X** features a **new intuitive interface** and the **Multintercom** function, which replaces Conference mode, making group communication even more immediate.

Featuring market-leading audio quality too, the sound reaches your ears through a dedicated system developed by the **RCF** R&D team – your assurance of outstanding performance.

**The BTR1 Advanced X** allows an outstanding 23 hours of battery life – enough for an entire weekend's use – and is compatible with devices from other brands, dual smartphones, satnavs such as the Garmin Zumo and TomTom Rider, as well as TFT multimedia systems from major motorcycle manufacturers (BMW, Ducati, KTM, etc.).

Thanks to the **Parallel Audio** technology, the Intercom can be used while keeping other functions, such as listening to the music and satnav directions, active.

It shares the same innovative DNA as models like the **R1 Mesh** and **BTR1**, winner of the prestigious **Red Dot Design Award**, and boasts the very best of Midland's design and technology, **and is entirely Made in Italy**.

# BTR1: the new frontier in motorcycle communication.

ECE 22.06  
APPROVED

The **BTR1** is the successor to the **BTX1 Pro S**, featuring conference communication up to 4 people and bike-to-bike connection up to 800 metres, satisfying the needs of the most demanding motorcyclists. With the **simplified interface** and the **Multintercom** function, group communication is more immediate, thus replacing Conference mode with a more efficient and intuitive system. By partnering with **RCF**, leader in professional audio quality – the **BTR1** guarantees a high-quality sound experience.

The **BTR1** is compatible with major devices such as satnavs and TFT systems from major brands, and features the **Universal Connectivity** function.

**Parallel Audio** technology allows you to listen to music or GPS while using the intercom, providing you with a seamless experience. Winner of the **Red Dot Design Award**, the **BTR1** is designed in Italy combining style and reliability.

With the **BTR1**, motorbike communication becomes simple and efficient.

## BT TALK and BTT button: boost your intercom and extend the boundaries of distance and number of riders.

**The system that allows communication without limits and in total safety, wherever your bike takes you.**

You place your button on the handlebar, connect it to your mobile phone and speak/listen from your intercom.

A system designed to communicate safely, without taking your hands off the handlebars.

Compatible with **all latest generation smartphones** (iOs and Android).

BLE (Bluetooth Low Energy) technology guarantees a constantly stable connection and extremely low battery consumption (up to 2 years). The battery can be replaced.

**Waterproof and very low consumption.**

Fully waterproof, **BTT Button** does not fear bad weather and mud. Also, the very low power consumption guarantees almost unlimited use without having to recharge the battery!

**Packaging and codes**

Communication button with silicone strap for handlebar fixing/release.  
**code C1238.01**

## BTTalk APP

**The app for unlimited group communication.**

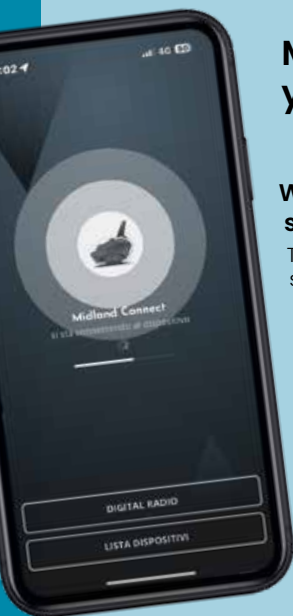

With **BTTalk** (for iOS and Android) you can create groups of friends without limit of number and distance\*, talking to them wherever they are and checking their position on the map. Find out how easy it is to use and set up the **BTTalk** app: download **BTTalk** to your iOS or Android smartphone, create a group, select participants from your address book and communicate in total safety.

**Functions:**

- Audio adjustments
- Administrator priority
- Two PTT modes
- Map zoom
- Location of your friends on the map
- 7 Languages (Italian, Hebrew, French, Japanese, English, Spanish, German)

## Midland Connect APP to customize your intercom.

### With Midland Connect you can manage your Midland\* intercom system via smartphone.

The simple and intuitive interface allows you to customize your device by setting the various functions while you are riding your motorcycle. Just pair the phone with the Midland intercom via Bluetooth and the two devices, both switched on, will be immediately connected.

You can configure the settings of: intercom, telephone, music, FM radio, volumes directly from your smartphone.

#### Active sections:

- Configuration
- Digital Radio
- Remote Control (New)
- Pairings

#### Configuration

In the Configuration section you can:

- adjust the AGC
- adjust the Vox
- activate the Noise Gate
- set the volumes

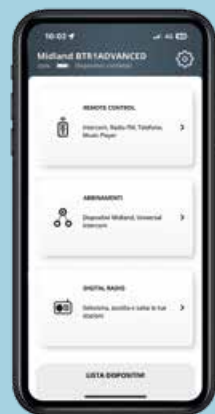

### Digital Radio on Midland Connect: over 70,000 radio stations on your intercom.

It is possible to listen to the best radio stations from over 150 countries in high quality directly on your intercom, just access the "Digital Radio" section.

### Midland Connect can act as an intercom remote control.

Use **Midland Connect** to

- open all intercoms/OBI/universal intercoms directly from the application
- configure mesh
- control the FM radio (select your favourite station among the 6 saved in the intercom, go forward/backward through the various frequencies, - save the station you are listening to)
- play/pause/go forward/backward for music, activate voice dialling, call the last number and share music
- raise/lower the intercom volume

#### Pairings

In this section you can pair with other intercoms directly from your smartphone.

#### Support

In the Support section on [midlandeurope.com](https://support.midlandeurope.com) you can view the updated quick-start guide for your intercom model:

<https://support.midlandeurope.com>.

Technical and specialized staff will answer you quickly.

\* Only for intercoms that support Midland Connect
