

Cadence

The Future of Ride Tracking

The Future

Cadence comes in at just 7cm diagonally making it extremely portable.

With a slim form factor, backlit OLED display and touchscreen, Cadence is sleek, streamlined and comfortable all day and night.

Cadence is made of a premium, comfortable textured silicone (similar to that used in many sport watches)

For Cyclists

Cadence's GPS lets you track real-time pace and distance during walks, jogs, hikes and bike rides.

Choose from 20+ exercise modes to get real-time stats during your workouts—or let Cadence's machine learning automatically recognize and record your exercises.

The On-board sensors also let you track elevation and speed data. Once the machine learning models recognize you've ended a workout, all the data is sent to your phone/tablet to analyze.

Adaptive

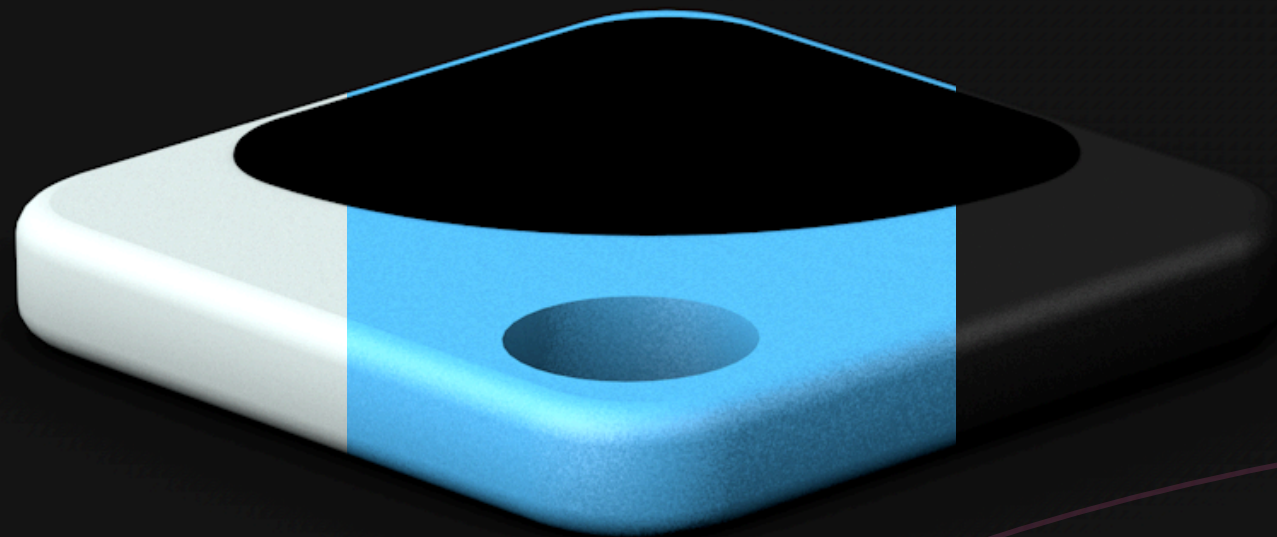

Cadence can adapt to your needs, attach it to your bike, bike keys, hook it or even wear it as a smart-watch.

Customize

Cadence comes in three beautiful colors, to match your vibe.

Cadence app let's you choose your favorite clock face and layout options—there's something for every occasion and style.

Charge

With a battery life up to 10 days, Cadence keeps the inspiration coming day and night without having to stop for a charge.

You can charge it on any standard, Qi wireless charger. Cadence supports upto 25watts of fast charging.

Charge time (0-100%) : 15 mins

Syncing

The Cadence app is compatible with most popular phones and tablets.

All the collected data can be accessed and visualized using the app.

- Syncing range: Up to 30ft
- Certain features like smartphone notifications may require Android 7.0+
- Syncing requires Bluetooth® LE and internet connection.
