VESA-adapter for 8000-series

Today many broadcast environments and post-production studios have changed the way of installing video monitors. Instead of using 19" rack systems such LCD /Plasma screens are now placed in so-called flat “media walls”. All of them feature the international mechanical mounting system called VESA standard.
We all know pictures need to be completed with sound, and therefore we have made a simple adapter fitting Genelec 8010-8050 and 8331-8351 speakers. With this small adapter one can mount 8000 series monitors into any kind of VESA 75/100 based accessories.

Floor stands

Design floor stand

After a long development journey together with K&M, we can finally offer the “Genelec designed floor stand” for the 8000 Series loudspeakers. Harri Koskinen, industrial designer and partner in the design of the 8000 Series loudspeaker made the first drawings several years ago.
This very stable and elegant steel stand has a 420 x 420 mm cast base with an oversized rod combination. Gradual height adjustment is made by a superior positioning and clamping knob. Quick, uncomplicated mounting of the monitor is accomplished using the suspension device. This floor stand is mainly designed for 8040, 8340, 8341, 8350 and 8351. Weight: 13.4 kg, Height: variable between 1100/1700 mm.

After a long development journey together with K&M, we can finally offer the “Genelec designed floor stand” for the 8000 Series loudspeakers. Harri Koskinen, industrial designer and partner in the design of the 8000 Series loudspeaker made the first drawings several years ago.
This very stable and elegant steel stand has a 420 x 420 mm cast base with an oversized rod combination. Gradual height adjustment is made by a superior positioning and clamping knob. Quick, uncomplicated mounting of the monitor is accomplished using the suspension device. This floor stand is mainly designed for 8040, 8340, 8341, 8350 and 8351. Weight: 13.4 kg, Height: variable between 1100/1700 mm.

VESA-adapter for 8000-series

Today many broadcast environments and post-production studios have changed the way of installing video monitors. Instead of using 19" rack systems such LCD /Plasma screens are now placed in so-called flat “media walls”. All of them feature the international mechanical mounting system called VESA standard.
We all know pictures need to be completed with sound, and therefore we have made a simple adapter fitting Genelec 8010-8050 and 8331-8351 speakers. With this small adapter one can mount 8000 series monitors into any kind of VESA 75/100 based accessories.

VESA-adapter for 8000-series

Today many broadcast environments and post-production studios have changed the way of installing video monitors. Instead of using 19" rack systems such LCD /Plasma screens are now placed in so-called flat “media walls”. All of them feature the international mechanical mounting system called VESA standard.
We all know pictures need to be completed with sound, and therefore we have made a simple adapter fitting Genelec 8010-8050 and 8331-8351 speakers. With this small adapter one can mount 8000 series monitors into any kind of VESA 75/100 based accessories.
