

Cloud-first, rich web-based application, enabling users to quickly setup policies and package sources.

Easily govern large deployments of the Studio Family products, and keep your automations under control, while at the same time allowing your developers the freedom of designing their very best work.

Governance

UiPath Automation Ops has as a first component a web portal capable of hosting Studio experiences, granting **access control** and **role assignments**.

Implement development rules across the organization, tailor them to individual needs or departments, allow flexibility for advanced users and restrict access to beginners.

Coding standards

Design time security

Runtime security

Access to features and licenses of UiPath services

Access to artifacts

The screenshot displays the UiPath Automation Cloud web portal. On the left is a navigation sidebar with icons for Home, Apps, Admin, and Help. The main content area is titled 'Automation Ops' and includes tabs for Policies, Deployment, and Settings. The 'Policies' tab is active, showing a list of governance policies. Below the list are controls for 'Items per page' (set to 10) and pagination (1 - 5 / 5).

Name	Description	Product	Prio...
StudioX beginne...	Limited access to package streams	StudioX	1
RPA developers	Full access to all automation features	Studio	1
CoE	Center of Excellency - full access	Studio Pro	1
Test Automation	QA engineers and Test Automation develop...	Studio Pro	2
StudioX Advanced	Advanced Citizen Developers	StudioX	2

Why UiPath Automation Ops?

RPA developer and center of automation excellence leads have business requirements tied into automation development that surpass our previous UiPath Platform and Cloud offering. These needs stem from the fact that automation development, no matter how simple or user-intuitive, is ultimately still development.

Studio, StudioX, Apps, Assistant as well as future authoring tools produce automation code across the organization at dazzling speed. Managing large automation development teams requires dedicated software to ensure standards, reliability and consistency across projects, departments and release versions.
