Print Perfect Checklist

- Add your design to the template available on the next page. We can't print **edge-to-edge design** for both front and back side of the mailer. Except for the background color, any design elements placed outside the safe area will get cropped.
 - If you have a full-page design for the back of your bag, please consider the parts that will be covered by the flap.
 - We recommend using **9pt font size** (1.5mm) or larger for the text height. For reference, they should have a similar size to this text.
 - Lines and stroke thickness should be no less than **0.2mm**. This is how a 0.2mm thick line looks like: - - - - -
 - We can print up to **2 Pantone Formula Guide and Pastel Colors**. If your design was set in CMYK or RGB colors, we can help you convert them to the closest Pantone colors.
 - Colors should be solid **100% opacity**, no gradient or tints.
 - In order to ensure your custom mailer prints correctly, we require that design should be converted to **vector** and all fonts converted to **outlines**.
- Please export as a **'CMYK' PDF**. No crop and bleed marks needed.
