Print perfect checklist

- ☐ Add your design to the template available on the next page.

**Working Area**

Keep the design within the working area.

- ☐ We recommend using **9pt font size** (1.5mm height) or larger.
- ☐ Thickness of lines, strokes and gaps should be no less than **0.2mm**.
For inverted design, keep the line thickness and gaps at **0.75mm**.
- ☐ **Avoid intricate design** as it might not imprint clearly.
We recommend using monolines and avoid complex brush strokes.
- ☐ Design should be in black and white, 100% opacity, and no gradient or tints.
- ☐ Design is strictly in **vector** format.
- ☐ In order to ensure your custom stamp prints correctly, we require that **all fonts be converted to outlines**.
- ☐ For optimal scanning, ensure **QR codes have high contrast** and measure **20x20mm or above**. Do not scale the QR code below a **minimum of 16x16mm**.
