Print perfect checklist

- ☐ Add your custom artwork to **your design here layer**.
- ☐ In order to ensure your custom packaging cuts correctly, it is very important that the unique structural dieline we send you is included as part of the print file. Please **do not delete, rotate or change the colors** of the structural dieline.
- ☐ For full background design, make sure to extend your background to fill the bleed area to avoid a white border. We require **5mm** of bleed all around.
- ☐ We recommend using **1mm font size** or larger.
- ☐ Lines and stroke weight should be no less than **0.2mm** if reversed out.
- ☐ All artwork should be converted to **Coated or Uncoated Pantones**. Please take note that we can only print up to **4 Pantone colors** only.
- ☐ For best results, all artwork should be strictly **vectorized**.
- ☐ In order to ensure your custom pizza box prints correctly, we require that **all fonts be converted to outlines**.
- ☐ For optimal scanning, ensure **QR codes have high contrast** and measure **20x20mm or above**. Do not scale the QR code below a **minimum of 16x16mm**.
