Custom Multi Colored Tissue Paper

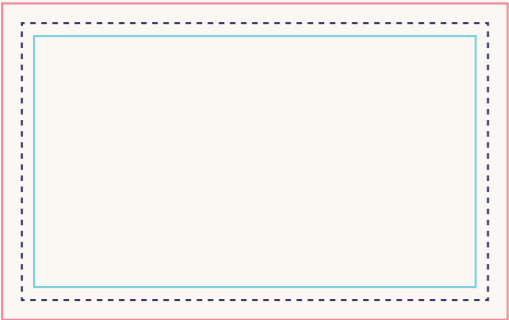

Size
500 x 500 mm (20" x 20")

Color
CMYK

Sustainability
Recycled, Compostable,
FSC Certified, Acid Free Paper,
Soy-based Inks

Print perfect checklist

☐ Add your design to the template available on the next page.

- **Bleed Area**
Make sure to extend your background to fill the bleed area to avoid a white border. We require **1cm** of bleed all around.
-

Trim Line
This is a guide where the design will be trimmed.
- **Safe Area**
Keep important text or graphic elements within the safe area which is **6mm** from the trim line. This is to prevent it from being cut off, or from being too close to the edge, which does not look nice.

- ☐ We recommend using **12pt font size** (2mm height) or larger.
- ☐ Thickness of lines, strokes and gaps should be no less than **0.3mm**.
- ☐ All **Pantone Colors** will be converted to CMYK Colors.
- ☐ Metallic, Neon, and Pastel colors are **not allowed**.
- ☐ For your Multi-Colored Tissue Paper, gradients and tints are allowed. However, if your design includes a black color, it needs to be set to **K:100** value.
- ☐ For best results, your design should be in **vector** format, but if an image will be used, it should be no less than **300 DPI**.
- ☐ In order to ensure your custom tissue prints correctly, we require that **all fonts be converted to outlines**.
- ☐ For optimal scanning, ensure **QR codes have high contrast** and measure **20x20mm or above**. Do not scale the QR code below a **minimum of 16x16mm**.

- 1

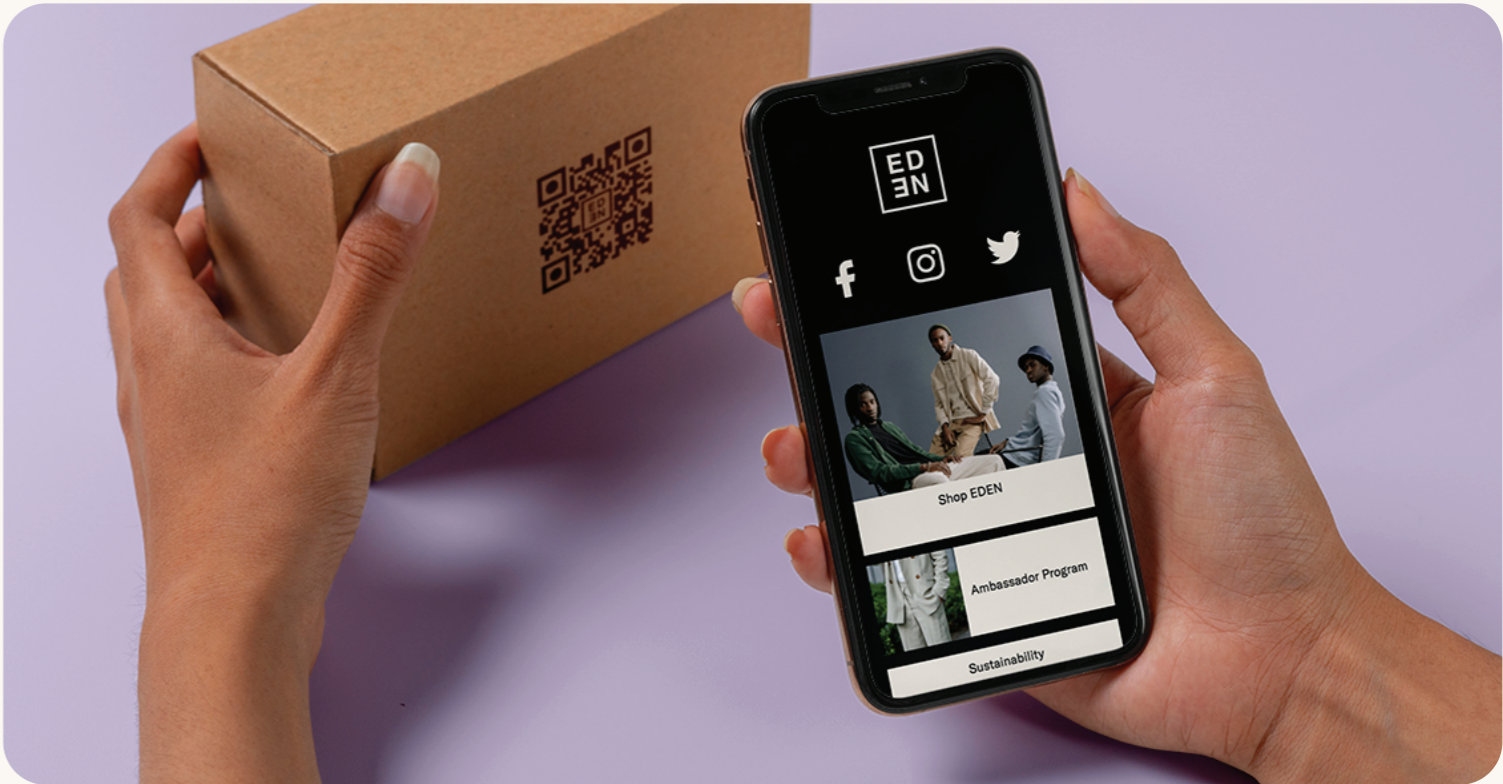

Download dieline
Ensure you have downloaded the correct sized dieline. Dielines can be found on the **noissue website**.
- 2

Complete your design
Use the Print Perfect Checklist as a guide to get the best print results. Export as **CMYK PDF**. No crop marks needed.
- 3

Upload artwork and order
Complete your order, upload your artwork and checkout. To guarantee print satisfaction, we'll review your file and send you a final proof to approve before going to print.
