Print perfect checklist

- ☐

Add your custom artwork to a **new layer**.
You may choose between an **expandable** or **flat mailer**.
- ☐

We recommend using **2.5pt font size** (1mm height) or larger.
- ☐

Lines and stroke thickness should be no less than **0.2mm**.
- ☐

We offer CMYK and Pantone printing. If you want to print using Pantone, we allow **1 or 2 Pantone colors** only. We can print Pantone metallic & neon colors but only with 1 color designs.
- ☐

If your design has multiple colors, we can print using **CMYK**, meaning you can print any design and unlimited colors you want!
- ☐

Colors may appear differently on brown kraft paper. You have an option to use **white kraft paper** instead. Just change the brown background to white on your design file.
- ☐

When choosing kraft paper, **white** elements should be on a **separate layer**.
- ☐

For best results, your design should be in **vector** format, but if an image will be used, it should be no less than **300 DPI**.
- ☐

In order to ensure your custom kraft mailer prints correctly, we require that all fonts be converted to **outlines**.
- ☐

For optimal scanning, ensure **QR codes have high contrast** and measure **20x20mm or above**. Do not scale the QR code below a **minimum of 16x16mm**.
