Custom Clamshell Takeout Containers

SIZE
9" x 6" x 3"

MATERIAL
Farmer's Fiber
Kraft

PRINT COLOR
CMYK
No white color

Step by step...

1

Download the template.

You can find the template on the noissue website.
Choose the size you wish to order.

2

Choose the material.

We offer three options for clamshell takeout containers:
sugarcane (white base), unbleached sugarcane (natural base),
and farmer's fiber (kraft base).

3

Start designing!

You may now start designing your noissue clamshell
takeout containers! Use the **Print Perfect Checklist** as a
guide to get the best print results.

4

Once done, you may upload as a finished artwork.

Upload your design in PDF file. Fill in the necessary fields:
material, size, quantity and eco-badge.

5

Add to cart and order!

We want to make sure you're happy so before we print
anything, we'll send you a visual of your custom design
to sign off.

Print Perfect Checklist

- Add your design to the template available on the next page.
- Avoid placing large shapes on print seam and no large background colors covering template. This causes streaking in our process and creates unnecessary product waste.
- The more variation in color and line, the better hence outline logo versions preferred.
- Small text/fine detail elements in black only. Color is doable but there is a high possibility of misalignment.
- We recommend using **8pt font size** or larger.
- Lines and stroke thickness should be no less than **0.5pt**.
- We print in CMYK mode, however, we do not offer white ink. (This applies to all material available for clamshell takeout containers.)
- In order to ensure your custom clamshell takeout container prints correctly, we require that design should be converted to **vector** and all fonts converted to **outlines**.
- For our color recommendations, kindly use the following:
 - GOLD:** less value in cyan and more black/magenta, otherwise gold color will print towards green hue
 - RED:** kindly use **C:0 M:100 Y:85 K:10** as your CMYK value
 - BLUE/PURPLE:** try to keep 30 value difference between cyan and magenta otherwise your blue may look too purple and vice versa
 - GRAY:** best to not use a color build and adjust black value
 - RICH BLACK:** kindly use **C:30 M:30 Y:40 K:100** as your CMYK value
 - BLACK LINES:** kindly use **C:0 M:0 Y:0 K:100** only as your CMYK value

Please export as a '**CMYK**' **PDF**. No crop marks needed.

LEGEND:

- Design should not exceed the broken lines
- Print Seam - Avoid placing large shapes on print seam

Note:

Do not remove the compostable label.
A compostable label is required on each product for responsible disposal, so this should always show in each design.
