Pantone Color

**Sustainability**  
Reusable (Organic) / Reusable & Recycled (Recycled Totes),  
Global Organic Textile Standard (GOTS)

## Print perfect checklist

- ☐
- Add your design to the template available on the next page. We can do **edge-to-edge design** for both front and back side so you can extend your design until the edge of the artboard.

However, if the design is not edge-to-edge, please apply the safe area below: **10mm** safe area on left and right, and **2mm** on bottom.

The tote bag has a **2cm** fold with stitch at the top. Designs can go below the stitch to ensure it won't run across the stitching.

- ☐
- We recommend using **12pt font size** (1cm height) or larger.
- ☐
- Lines and stroke thickness should be no less than **1mm**.  
Gaps between lines or dots should be at least **1.5mm – 2mm**.
- ☐
- We can only print **1 color** using **Pantone TPG**. We can help you convert your color to the closest pantone TPG color. White ink is not allowed.
- ☐
- Colors should be solid **100% opacity**, no gradient or tints.
- ☐
- In order to ensure your custom tote bag prints correctly, we require that design should be converted to **vector**.
- ☐
- We also require that **all fonts be converted to outlines**.
- ☐
- For optimal scanning, ensure **QR codes have high contrast** and measure **20x20mm or above**. Do not scale the QR code below a **minimum of 16x16mm**.

- 1

**Download dieline**  
Ensure you have downloaded the correct sized dieline. Dielines can be found on the **noissue website**.
- 2

**Complete your design**  
Use the Print Perfect Checklist as a guide to get the best print results. Export as **CMYK PDF**. No crop marks needed.
- 3

**Upload artwork and order**  
Complete your order, upload your artwork and checkout. To guarantee print satisfaction, we'll review your file and send you a final proof to approve before going to print.
