Print Perfect Checklist

Add your design to the template available on the next page. We can print **edge-to-edge design** for both front and back side of the kraft mailer. However, any design elements placed outside the safe area (pink area) might get cropped.

If you have a full-page design for the back of your mailer, please consider the parts that will be covered by the flap.

We recommend using **5pt font size** (1.8mm) or larger for the text height. For reference, they should have a similar size to this text.

Lines and stroke thickness should be no less than **0.2mm**. This is how a 0.2mm thick line looks like: - - - - -

We can print up to **4 Pantone Colors (Coated and Uncoated)**. If your design was set in CMYK or RGB colors, we can help you convert them to the closest Pantone colors.

White ink is also allowed on your artwork.

Colors should be solid **100% opacity**, no gradient or tints.

In order to ensure your custom mailer prints correctly, we require that design should be converted to **vector** and all fonts converted to **outlines**.

Please export as a '**CMYK**' **PDF**. No crop and bleed marks needed.
