FSC, Compostable

Print perfect checklist

- ☐ Add your design to the template available on the next page.
- ☐ We recommend using **6pt font size** (0.8mm height) or larger.
- ☐ Thickness of lines, strokes and gaps should be no less than **0.2mm**.
- ☐ All colors should be converted to **CMYK**.
- ☐ For designs with lots of texts, we recommend to place the the text layout **following the curve of the dieline**. This ensures the texts will appear straight.

The texts will appear distorted when assembled.

The texts will appear more upright because it follows the curve.

- ☐ For best results, your design should be in **vector** format, but if an image will be used, it should be no less than **300 DPI**.
- ☐ In order to ensure your custom cup prints correctly, we require that **all fonts be converted to outlines**.
- ☐ For optimal scanning, ensure **QR codes have high contrast** and measure **20x20mm or above**. Do not scale the QR code below a **minimum of 16x16mm**.

1

Download dieline
Ensure you have downloaded the correct sized dieline. Dielines can be found on the **noissue website**.

2

Complete your design
Use the Print Perfect Checklist as a guide to get the best print results. Export as **CMYK PDF**. No crop marks needed.

3

Upload artwork and order, or share with your Account Manager
Complete your order, upload your artwork and checkout. To guarantee print satisfaction, we'll review your file and send you a final proof to approve before going to print.
