Print perfect checklist

- Add your design to the template available on the next page.

**Design Area**

Design can only be placed inside the dotted area.

There's no bleed or safe area included, but the design should be **1 cm or 10 mm away from the edges**. Full bleed printing is not available at the moment.**Note:** There is a 1 cm or 10 mm white border for your poly mailers.

- We recommend using **16pt font size** (6mm height) or larger.
- Thickness of lines, strokes and gaps should be no less than **0.25mm**.
- Design with **1 color only will be converted to Pantone color** and will be printed using the Screen Printing method. Designs with **2 or more colors will automatically be printed in CMYK** mode through Digital UV Printing method.
- Metallic Colors and Neon Colors are **not allowed** for Poly Mailers.
- We **do not recommend Pastel** or light colored design elements as it might look subtle on print.
- Designs with 1 color only should have 100% opacity, no gradient or tints. Gradients and tints are allowed in CMYK printing.
- Designs with 1 color only should be in **vector format**, image with no less than **300 DPI**, is allowed for CMYK printing.
- In order to ensure your custom poly mailer prints correctly, we require that **all fonts be converted to outlines**.
- For optimal scanning, ensure **QR codes have high contrast** and measure **20x20mm or above**. Do not scale the QR code below a **minimum of 16x16mm**.
