CMYK
-  **Sustainability**  
noissue Stickers are compostable,  
and the release liner is curbside recyclable.

## Print perfect checklist

-  Add your design to the template available on the next page.

### Bleed Area

Make sure to extend your background to fill the bleed area to avoid a white border. We require 5mm of bleed all around.

### Trim Line

This is a guide where the design will be trimmed.

### Safe Area

Keep important text or graphic elements within the safe area which is **1.5mm** from the trim line. This is to prevent it from being cut off, or from being too close to the edge, which does not look nice.

-  We recommend using **6pt font size** (0.8mm height) or larger.
-  Thickness of lines, strokes and gaps should be no less than **0.2mm**.
-  All colors should be converted to **CMYK**.
-  For best results, your design should be in **vector** format, but if an image will be used, it should be no less than **300 DPI**.
-  In order to ensure your custom sticker prints correctly, we require that **all fonts be converted to outlines**.
-  For optimal scanning, ensure **QR codes have high contrast** and measure **20x20mm or above**. Do not scale the QR code below a **minimum of 16x16mm**.

1

### Download dieline

Ensure you have downloaded the correct sized dieline. Dielines can be found on the [noissue website](#).

2

### Complete your design

Use the Print Perfect Checklist as a guide to get the best print results. Export as **CMYK PDF**. No crop marks needed.

3

### Upload artwork and order, or share with your Account Manager

Complete your order, upload your artwork and checkout. To guarantee print satisfaction, we'll review your file and send you a final proof to approve before going to print.
