OXFORD ROAD CORRIDOR

By choosing Citylabs 4.0 you'll be located within Manchester's innovation district - the Oxford Road Corridor, one of Europe's top 5 innovation districts and the largest clinical academic campus in Europe.

The Oxford Road Corridor is home to one of the UK's most densely concentrated cluster of life sciences and tech businesses, accounting for 49.6% of such companies in Manchester and 22.8% in Greater Manchester.

There are a total of 8,800 businesses on the Corridor, generating 20% of Manchester's GVA - over £3.9bn a year and this is due to increase by an additional £2bn by 2025.

You'll also be part of the Bruntwood SciTech network in Manchester, gaining access to the facilities and communities at Manchester Science Park and Circle Square.

ACCESS TO THE UK'S LARGEST NHS TRUST

Citylabs sits at the heart of the city's health and life science cluster and is surrounded by world-class research centres including the Stoller Biomarker Discovery Centre, the Biomedical Research Centre, Manchester Centre for Genomic Medicine, the Farr Institute, the University of Manchester Faculty of Biology, Medicine and Health, and the Wellcome Trust Clinical Research Facility. The University of Manchester's Health Technology Research Hub - the Pankhurst Institute is also set to join the Citylabs community at Citylabs 4.0.

Bruntwood SciTech has a unique partnership with the UK's largest NHS Trust - Manchester University NHS Foundation Trust. By choosing Citylabs 4.0 you can gain access to a unique, accelerated pathway to partnership, with opportunities available to collaborate and gain direct access to MFT clinicians, resources and patients, and the potential reach of

Greater Manchester's +3m population.
You will also be connected with Health
Innovation Manchester; Manchester's
single umbrella health science and
innovation system which enables
products and services to be accelerated
into the health system at pace and scale.

Current customers are already connected into MFT through joint clinical trials, sample supply, diagnostic collaborations, medtech adoption and research.

CITYLABS - WHERE WE ARE NOW

The Citylabs campus includes
3 buildings totalling 317,000 sq ft
and is on its way to becoming known
as a world-class health innovation
and precision medicine campus. Since
the first Citylabs building - Citylabs 1.0,
opened in 2014, it quickly became
known as a biomedical centre of
excellence and was fully let within
15 months of opening. Citylabs 1.0 is
the hub of the Citylabs campus and
is where many of the shared facilities
for the campus are located; the cafe,
large event space, and meeting rooms.

CITYLABS EXPANSION

Due to its popularity, the campus has been undergoing a significant expansion, and in 2016 a £60m expansion was announced to create the 92,000 sq ft Citylabs 2.0 new build and 128,000 sq ft Citylabs 3.0 redevelopment of the Old St Mary's Hospital and derelict chapel. Citylabs 2.0 completed construction in July 2020 and in autumn 2021 became home to global diagnostics company QIAGEN and their Global Centre of Excellence for Precision Medicine, having been 100% pre-let and announced in the Life Sciences Industrial Strategy. QIAGEN's expansion in Manchester will create and support more than 1,500 jobs for Manchester and add £150m economic value within the next decade.

In 2019 a further 125,000 sq ft, £35m expansion was announced to create Citylabs 4.0 which received planning consent in 2020 and will be the next phase of development for the Citylabs campus and is due to begin construction.

CITYLABS 4.0

The £35m creation of Citylabs 4.0 is the newest phase of the masterplan for the Citylabs campus, and will offer 125,000 sq ft of world-leading sustainable office and lab space and breakout space.

Citylabs 4.0 will provide seven floors of workspace specifically designed for companies working in medtech, diagnostics, digital health, genomics, and precision medicine, building on the region's internationally-recognised life sciences and health cluster driving the future of healthcare.

Lab space capability and infrastructure is available at Citylabs 4.0, enabling you to specify your own lab. Biosafety Levels 1 and 2 (BSL-1 and BSL-2) labs can be accommodated, and the upper floors can be enhanced to accommodate screeding if required. We can also work with you to design hybrid lab and office space, or if you solely need office space Citylabs 4.0 is again the place to be.

Part of the Manchester University NHS
Foundation Trust campus, Citylabs 4.0
offers the perfect location for companies
looking to grow and scale, with
direct access to the NHS and over
20,000 STEM graduates each year.

Already confirmed to be locating to Citylabs 4.0, the Christabel Pankhurst Institute for Health Technology and Innovation is a new multimillion pound research and innovation institute that will build on Manchester's academic strengths in digital health and advanced materials to discover and develop innovative products and services for the health care sector, and will provide additional collaboration opportunities between the NHS, researchers and industry, including those based at Citylabs 4.0.

Citylabs 4.0 will contribute to the growth of the city's knowledge economy, helping to support the creation of over 300 high value jobs.

WHAT YOUR FUTURE FELLOW COMMUNITY THINKS

The Citylabs campus is home to over 25 innovative health innovation, diagnostics, digital health and genomics businesses who you'll be able to call your neighbours if you choose to be located at Citylabs 4.0. Here's just a few of them and what they think about being based on the campus.

Invaluable for our business.
There's almost endless supply, and the logistics like receiving shipments inwards and outwards and access to the airport means we can have a direct flight to anywhere in Europe within a few hours. For us to work so closely with our European network of distributors means it has been the best place for us to be.

ALAN TEMPLE

EUROPEAN SALES MANAGER, TAKAGI

Being located at Citylabs is a fantastic place to be; it's close to the universities, it's close to the hospitals, it's easy to get to, and very vibrant. I think as you grow in a business it's important to make sure you have the right partnerships and the right collaborations. Being located where we are has given us a great opportunity to collaborate with hospitals, universities and local businesses - some more established and much larger than us and some smaller that we've helped. It creates a lovely incubator network of growing relationships on which to create value for your organisation. //

LYN REES

CEO, YOURGENE HEALTH

Citylabs' partnerships leverage Qiagen's rich expertise in Manchester to accelerate innovation as a basis for the development of valuable molecular tests. This is a true win-win situation, bringing together Qiagen, the global leader in Sample to Insight solutions, with important intellectual assets in the UK to accelerate molecular biomarker research and subsequent development of new and promising diagnostic assays. //
