At the beginning of 2021, Groves pledged that we would work towards removing and reducing single use plastic waste packaging from our ranges. We are proud to have completely eliminated any plastic waste packaging from over 8,500 lines and counting.

We continue to work hard to reduce the amount of plastic packaging used, where it cannot be completely eliminated. As a result, we have added another logo to make it as clear as possible to quickly highlight these lines:

Our green logo highlights items that are completely free from any plastic waste packaging. This means that the end product and the pack that it is delivered to you, the retailer, are free from any waste plastic.

Our brand-new purple logo highlights items that are free from plastic waste packaging to the end consumer. These items will feature the green logo on the product packaging, but the pack that is delivered to you, the retailer, may contain plastic packaging. We continue to work hard to remove this waste plastic, however sometimes it is necessary to ensure that your stock is delivered in great condition and at the same great price.

Our website features a live Speedometer showing how many products are completely free of plastic packaging and any of our purple logo items will be added to this count.

We'd love to hear your feedback so please get in touch with us via social media, your local sales rep or our friendly customer service team!
