IF YOUR BMW DISAPPEARS, BMW TRACKSTAR WILL KEEP TRACK OF IT.

BMW Trackstar*

BMW Trackstar is a small covert electronic device installed in your vehicle which utilises state of the art technology such as GPS, GSM and an integrated motion detector in order to accurately locate your vehicle should it be stolen. When it has been established that your car has been stolen, the unit is activated and tracking can commence.

BMW Trackstar attracts full Thatcham Cat 6 Accreditation.**

BMW Trackstar Advance*

BMW Trackstar Cat 6 Advance utilises an electronic key-tag to provide an advanced level of theft prevention. Issued alongside the car key, the key-tag connects with the in-car system and recognises the driver as the owner of the car and must be present alongside the car key in the vehicle in order for the ignition to start.

BMW Trackstar Advance attracts full Thatcham Cat 6 Accreditation.**

BMW Trackstar 5*

The BMW Trackstar 5 unit operates in the same way as the BMW Trackstar unit but incorporates the added benefit of a Driver Authentication Device. If the device is present the BMW Trackstar 5 unit can detect that the person driving the vehicle is authorised to do so, therefore in the event of a theft where the thief does not have the Driver Authentication Device, the Control Centre is alerted.

Reports have shown that an increasing trend amongst car thieves is to steal the vehicle's keys. Thus without the Driver Authentication Device, the theft will be identified promptly and ultimately increase the likelihood of a successful recovery.
