LED Downlight

Commercial Lighting

Signcomplex commercial lighting products are designed based on scene and mood lighting, different light efficiency, maximum up to 160lm/W, can meet general illuminance requirement. CCT 3000K, 4000K, 5000K, 6000K, and 2700K, minimum CRI80, maximum CRI97. No matter glorious hotel or warm and sweet coffee shop, you can find suitable lamp from Signcomplex.

It's time to replace them with LED lamp. LED is solid light source, UV free, mercury free, and it is healthy and green lighting; at the same time it is more energy-saving, up to 90%. Since 2006, Signcomplex supply thousands of our products to brand company like Louis Vuitton, Burburry, Sheraton, Four-Seasons, Marriott, Marlboro, NIKE, Walmart, etc, and Signcomplex is the vendor of Schneider, Simon, SLV, Philips and Electrolux.

Application: widely used in hotels, meeting rooms, factories, offices, commercial purposes, residential, institution buildings, schools, hospitals, places which needs energy saving and high color rendering index lighting.

LED Panel Light

LED Panel Light can perfectly replace traditional downlight. Using Light Guide Plate, it has the feature of uniform and smooth light beam, low glare rating, low light pollution, and excellent protection from eyestrain. It can be widely used as interior lighting in shops, supermarkets, malls and hospitals, etc

Three CCT and three power adjustable

Three CCT and three power adjustable, save stock cost.

CCT Dip switch	Power Dip switch
3000K	30W
4000K	36W
6500K	40W

3CCT lourves light
GLM series

The product has simple appearance, soft light, and uniform luminance. The lighting effect includes diffusion type and grille type, with adjustable color temperature through dip switch, widely used in office buildings, factories, department stores and other indoor sites.
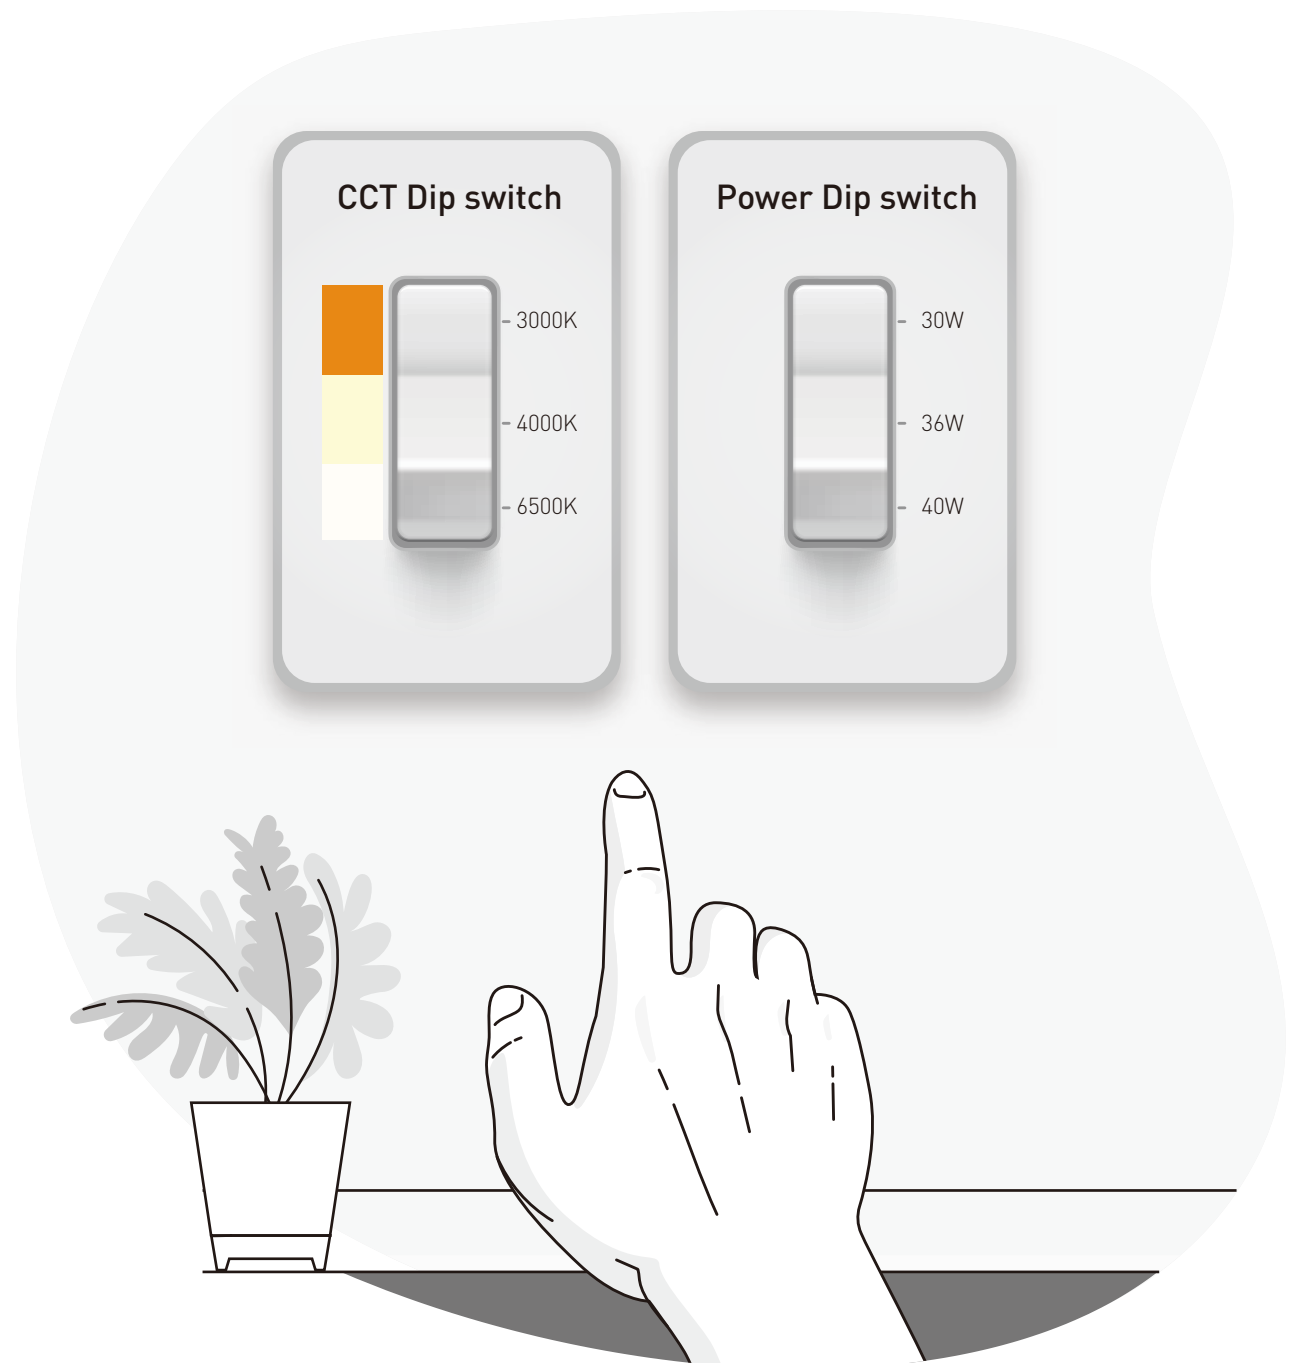

Three lens optional

Three lens version for optional: lourves lens, opal lens and micro prisma lens.

Micro prisma lens

Lourves lens

Opal lens
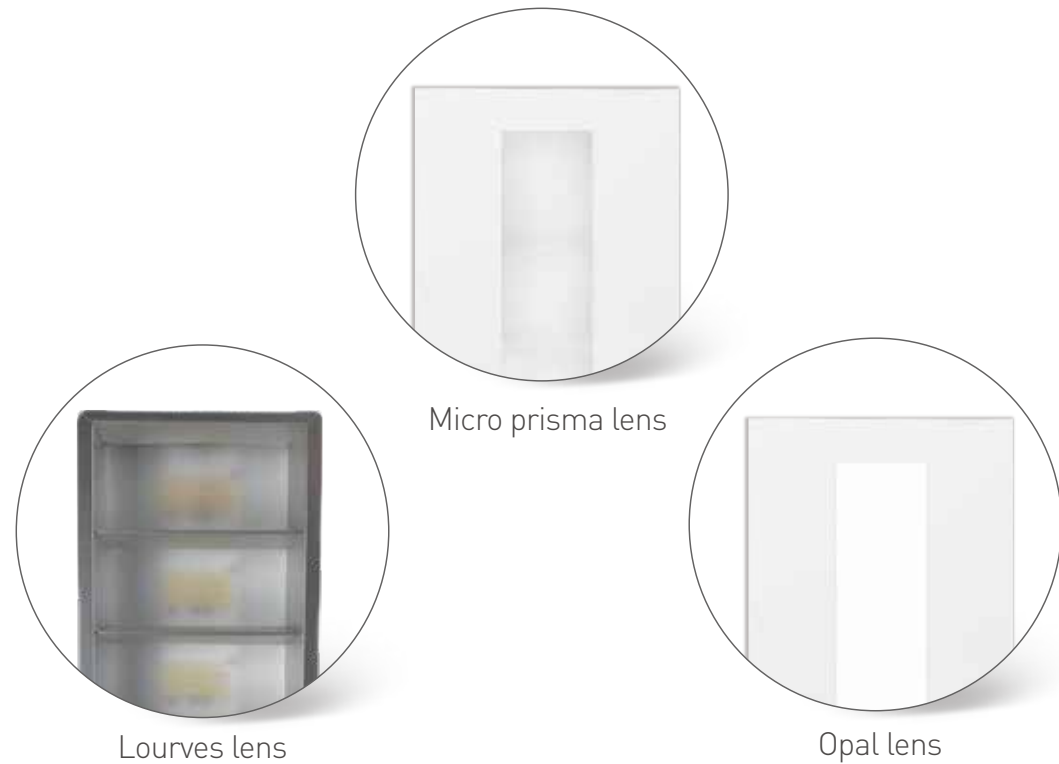

Three beam angles

Three beam angles: 80° (lourves version) / 90°
(micro prisma version) / 110° (opal version)

Smart panel light
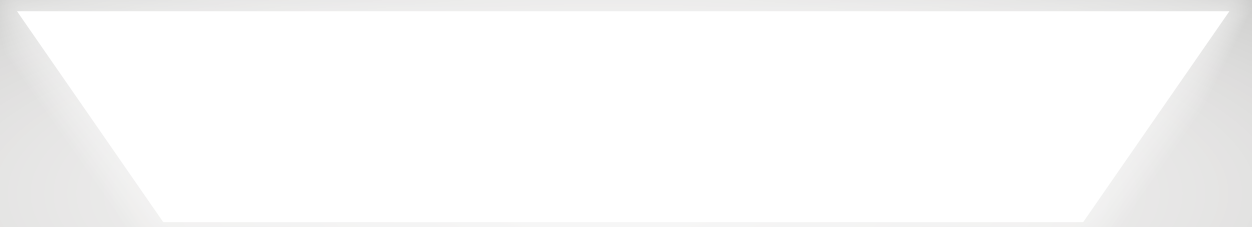

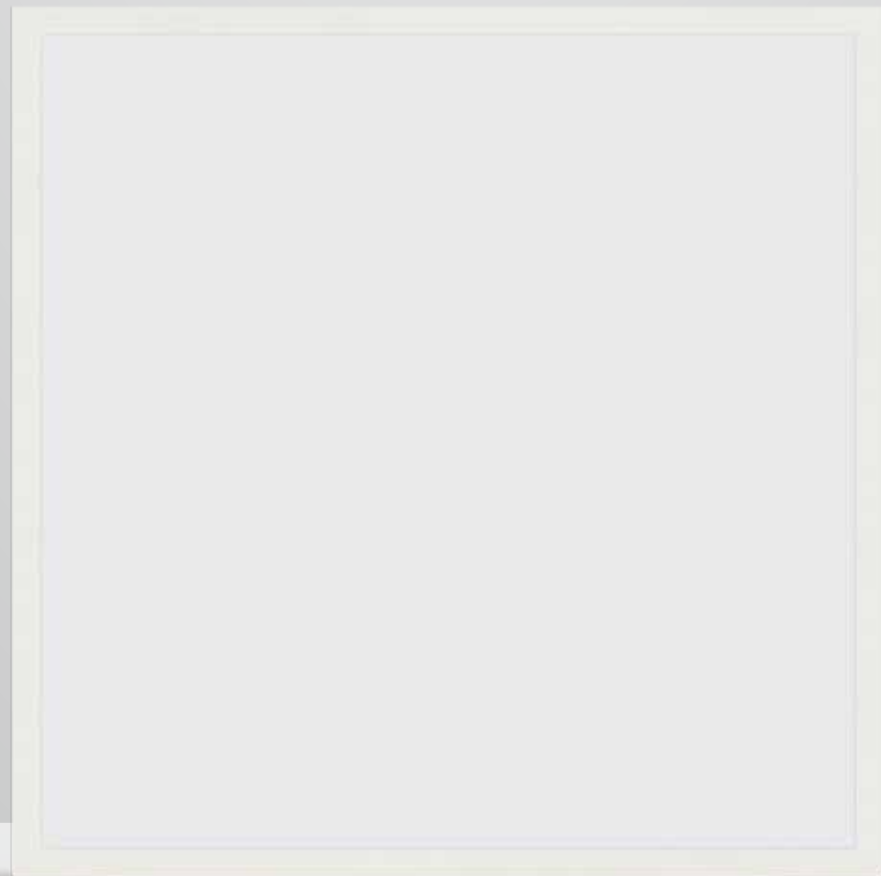

Different smart control methods

Connect bluetooth and WIFI to control the lights.
- APP control — works with Tuya Smart APP
- Voice control — works with Amazon alexa
- Group control — works with Google Assistant
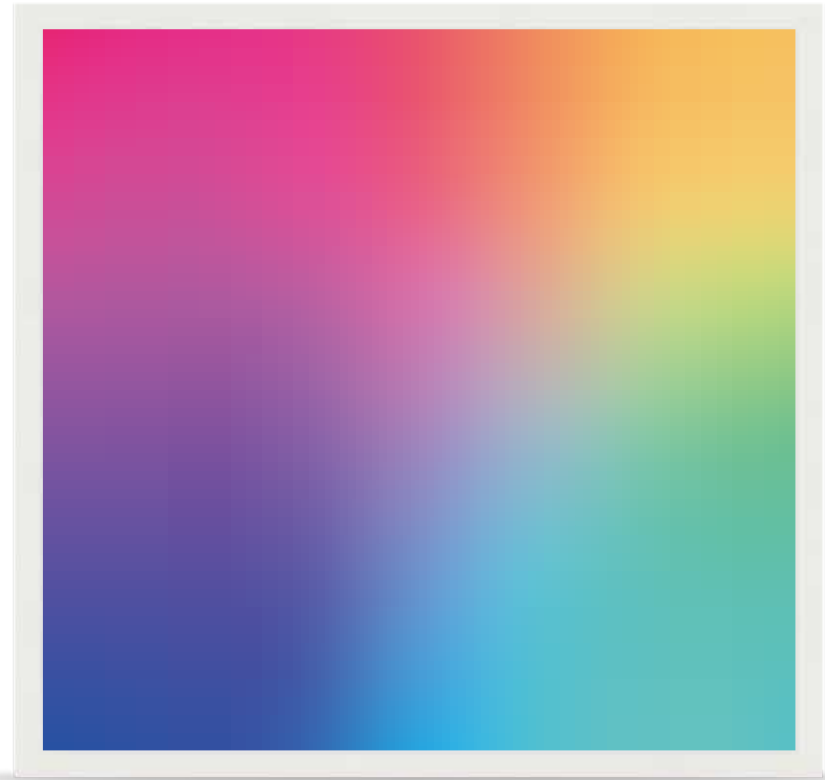

Never yellowing, long lifespan

LEDs covered with lens, never turn dark or yellowish at the middlepart.

Processed by electrostatic dusting

Bottom of the back cover is produced by stamping structure, which can effectively guarantee the appearance of the product, the surface is processed by electrostatic dusting.

Energy savings of up to 90%

Energy-saving percentage (compared with traditional type)
With energy savings of up to 90% than incandescent light.

DIY colors + CCT adjustment

The smart panel light supports warm white and cool white from 3000K to 6500K, and R,G,B mixed colors, totally can provide 16 million different colors.

16 Million Colors

Warm White to Daylight

Brightness adjustment

5%-100% smooth dimming, infinitely switchable.

Optional sensor and non-sensor.

Customers can choose sensor or non-sensor, easy to switch.

PIR sensor
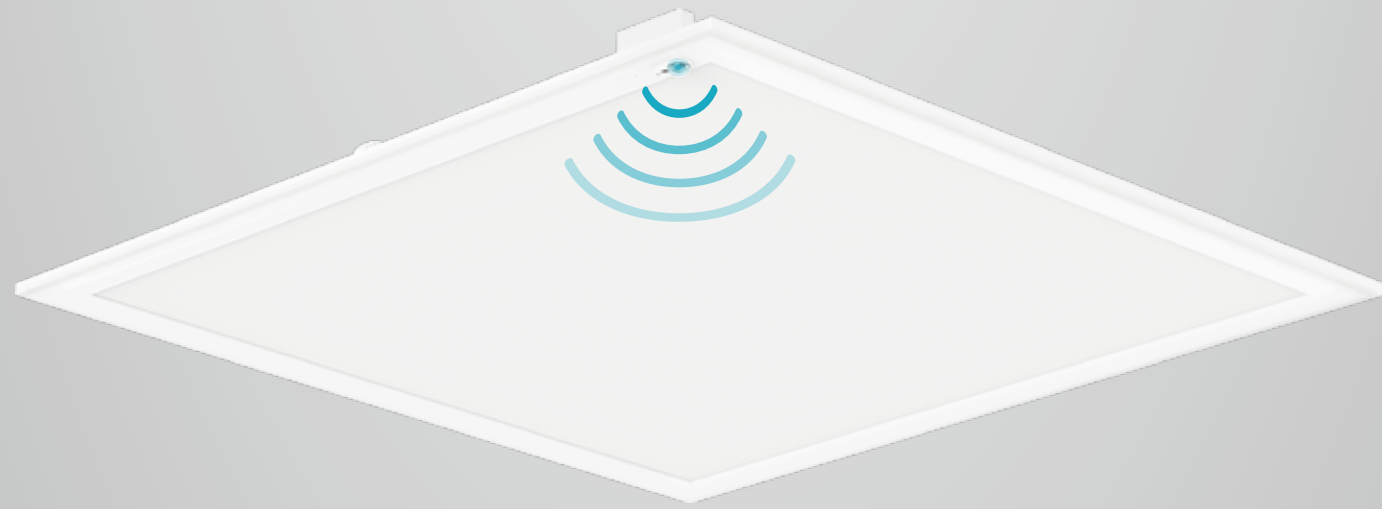

Non-sensor

PIR sensor panel light
edge-lit series

PIR sensor panel light, with beautiful and generous appearance, and PIR sensor, realizes intelligent power reduction. Sensor can be easily disassembled and assembled due to the structural design, so customers can choose and match freely.
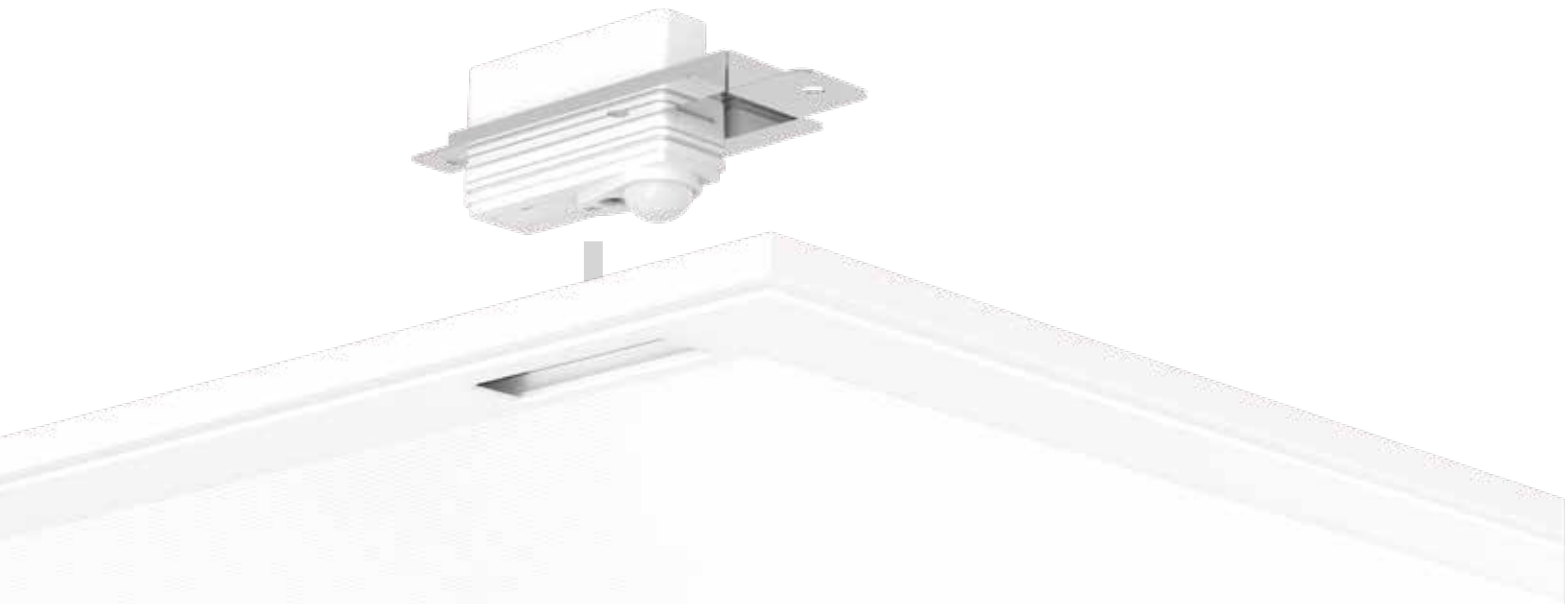

High-efficient thermal design

High-efficient thermal management design, LEDs and power supply work in low temperature, high stability of continuous working.

Easy sensor installation

It's easy to switch between sensor and non-sensor because of the upper and lower clamping structure and notches on both ends of the cover.

Anti-yellowing

PMMA LGP, Edge-lit structure, more uniform and softer light.

RAL9003 white lamp body

RAL9003 white lamp body, modern and simple design.

Intelligent control

The IR remote control can be used for light setting.

Daylight harvesting function

Intelligently lower the power to ensure the constant lux, power saving.

PANEL LIGHT
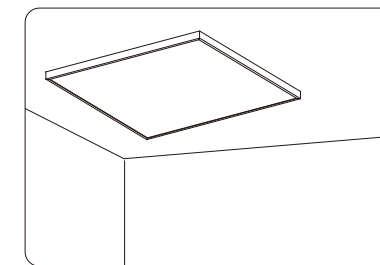

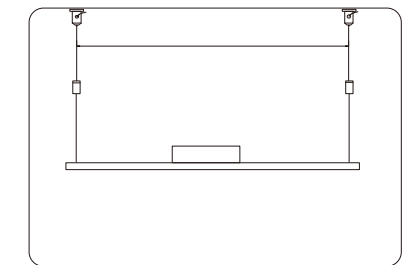

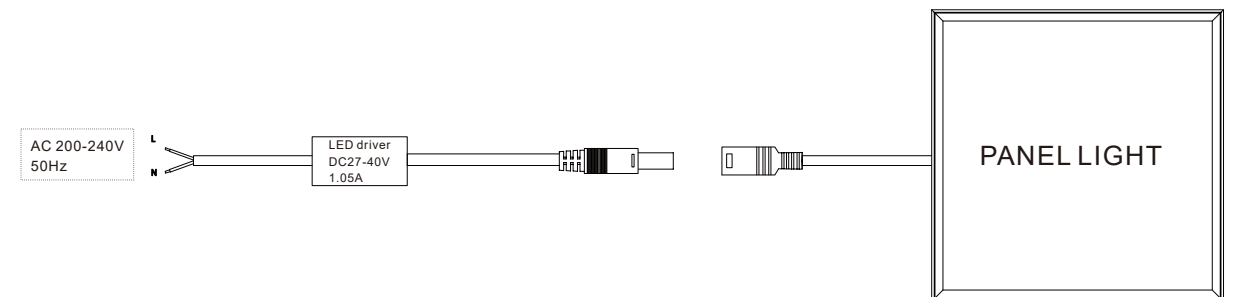

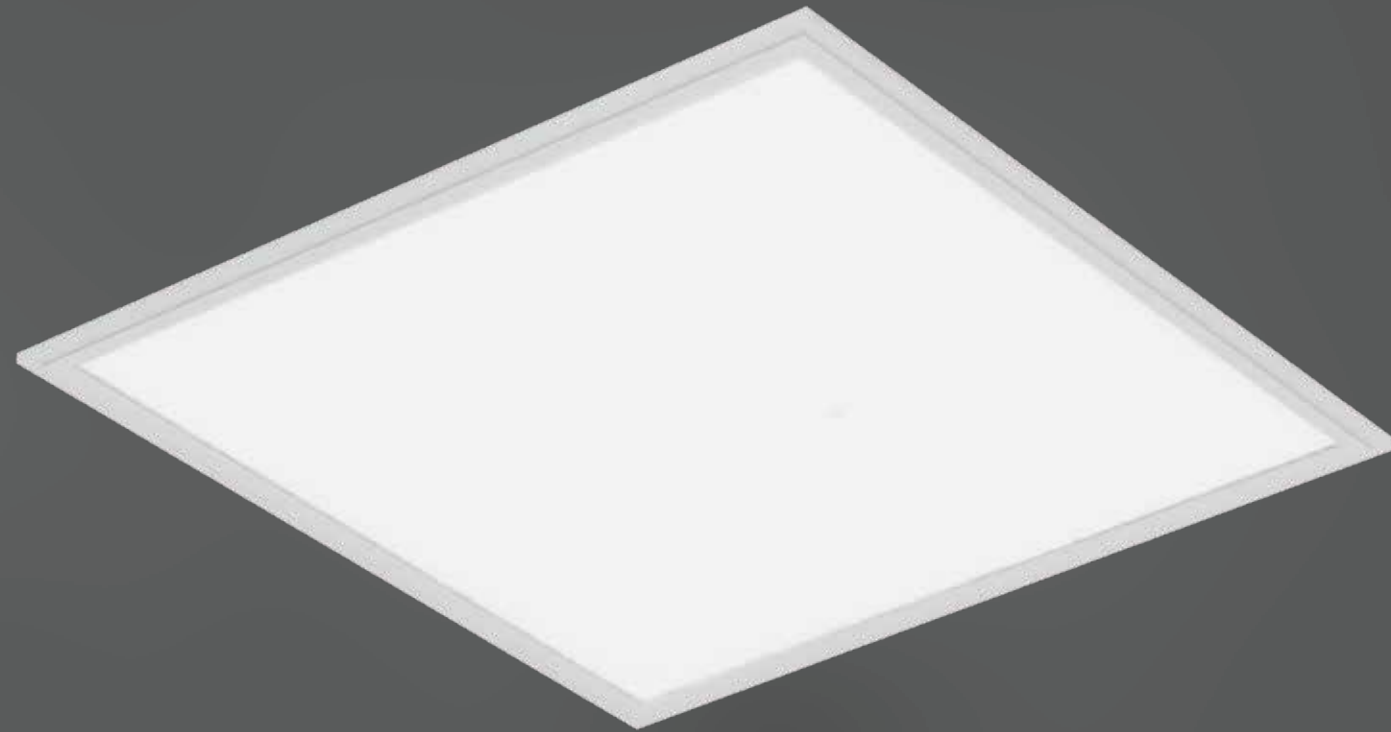

Wattage adjustable & 3CCT tunable panel light

Edge-lit series

It is the latest new generation of edge-lit lighting fixture, which has the uniform and smooth lighting effect and elegant appearance design. Each fixture is 15 SKUS in 1 unit design, so the users can easily set the wattage and color temperature that they want.

Power adjustable

Simply open the driver cover, you can set the different current by dialing the buttons inside the driver, power adjustment 20W-60W.

Color tunable

Adjust the 3-position slide switch with your fingers for different color temperature, color temperature setting: 3500K, 4000K, 5000K.

High transmission LGP
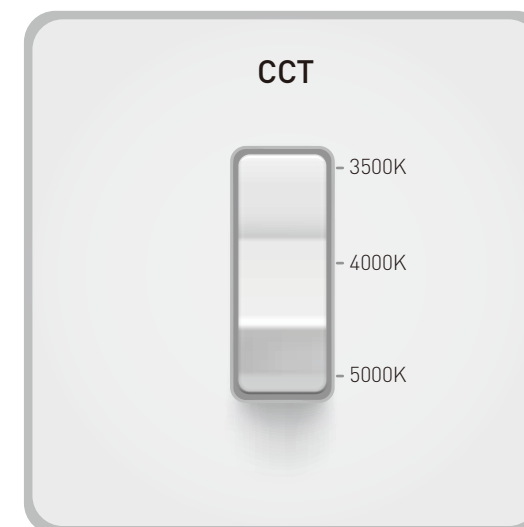

transmission >90%

High transmission LGP (more than 90%), high lumen LED efficacy paired with high power factor drivers.
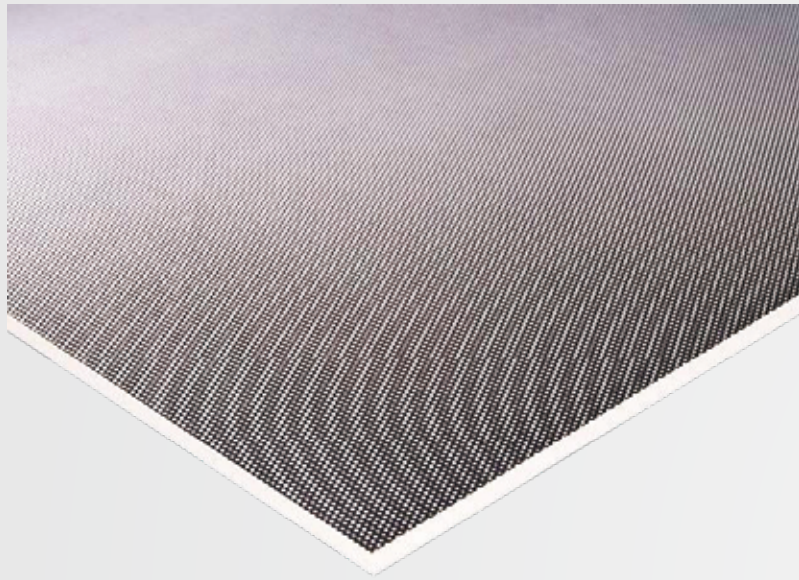

Visual uniformity

uniformity >85%

Using high quality LGP with silk printing technology, the light uniformity rate is greater than 85%. No yellow edge and dark area, prefect lighting effect.

High efficiency up to 130LPW

High efficiency up to 130LPW, different versions available.

3-in-1 dimming

3-in-1 dimming mode:0-10V, PWM, Rx. Smoothly dimming 0-100%,can dim to off.

Flicker free LED driver

Constant current design, PF>0.9,THD<15%.

1KV surge protection

Short circuit, open circuit protection,and 1KV surge protection.

Installation

Each panel with standard clips for recessed and suspending installation.
Optional surface mounted kit available.

1. Drill Holes
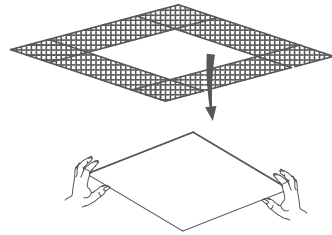

2. Open the power supply
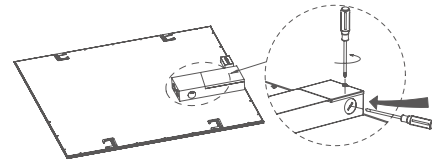

3. Rotate the hook
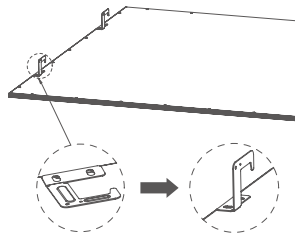

4. Connect the input wire and fix cover of power supply
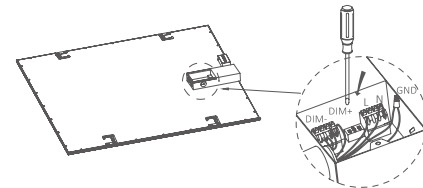

5. Swipe the DIP switch on the back to position of corresponding color temperature

DIP color temperature switch
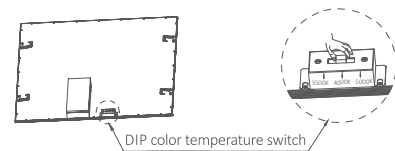

6. Top cover of power supply
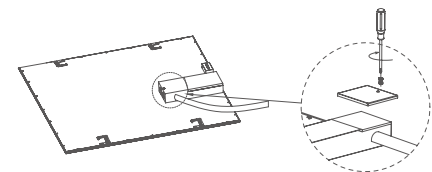

7. Put the lamp into the ceiling
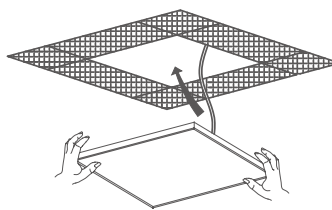

8. Finish installation

Super slim back-lit series

Produced by stamping structure

Bottom of the back cover is produced by stamping structure, which can effectively guarantee the appearance of the product.

Super slim driver

With super slim 0-10V driver, assembled at the side of the frame, freight cost saving.

ETL for US

Replaceable power supply

Lamp and power supply is connected by pulling-resistant male connector and female connector to facilitate the replace of power supply.

CE for EU

Application

The product can be used in office, hotel, shopping mall, office building, hospital and other places that require long warranty period.

Aluminum alloy material

Lamp body material: Aluminum alloy + iron + PS.

Energy savings of up to 90%

Energy-saving percentage (compared with traditional type) With energy savings of up to 90% than incandescent light.

Hight efficiency up to 125LPW

Lighting effect: Hight efficiency up to 125LPW, different versions available.

More uniform light

High-haze diffusion plate effectively breaks up the light sent forth from the lamp, making the light more uniform.

Parameters ETL for US

Super slim
edge-lit series
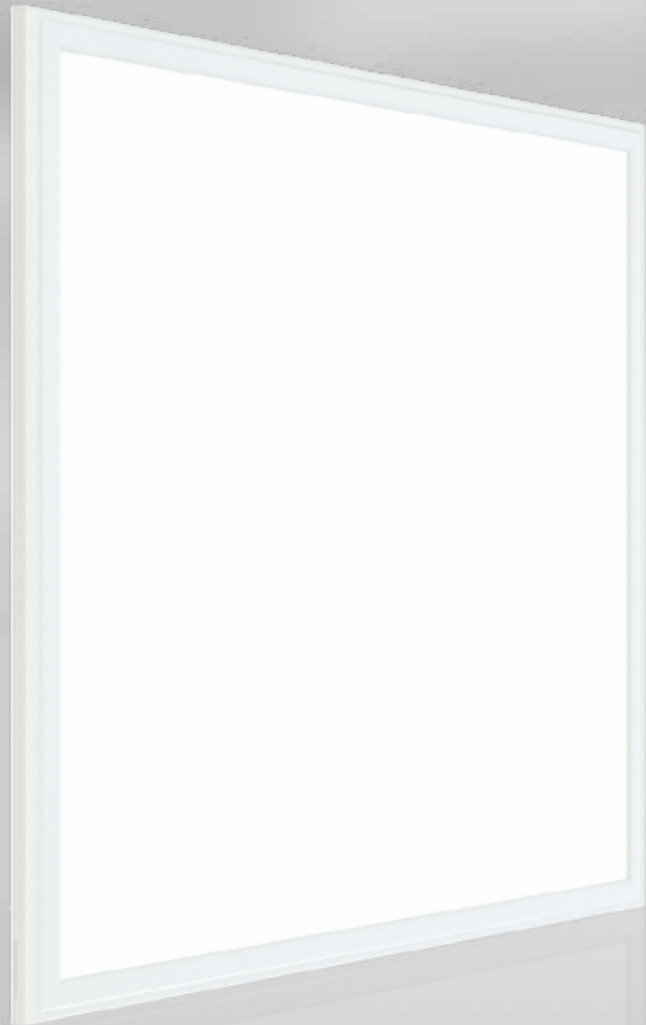

Super slim and lighter

Around 0.39inch lamp body with very light weight, space and transportation cost saving

120%

Cost savings

Visual uniformity

The edge-lit LED panels blend with various ceiling details and produce soft natural light.

Aviation frosted thickening pure aluminum

Taiwan Epistar Chip
Higher Brightness
Longer life-span

Diffuser Plate

LGP

Reflective Sheeting

Spongy

Alloy Baseboard
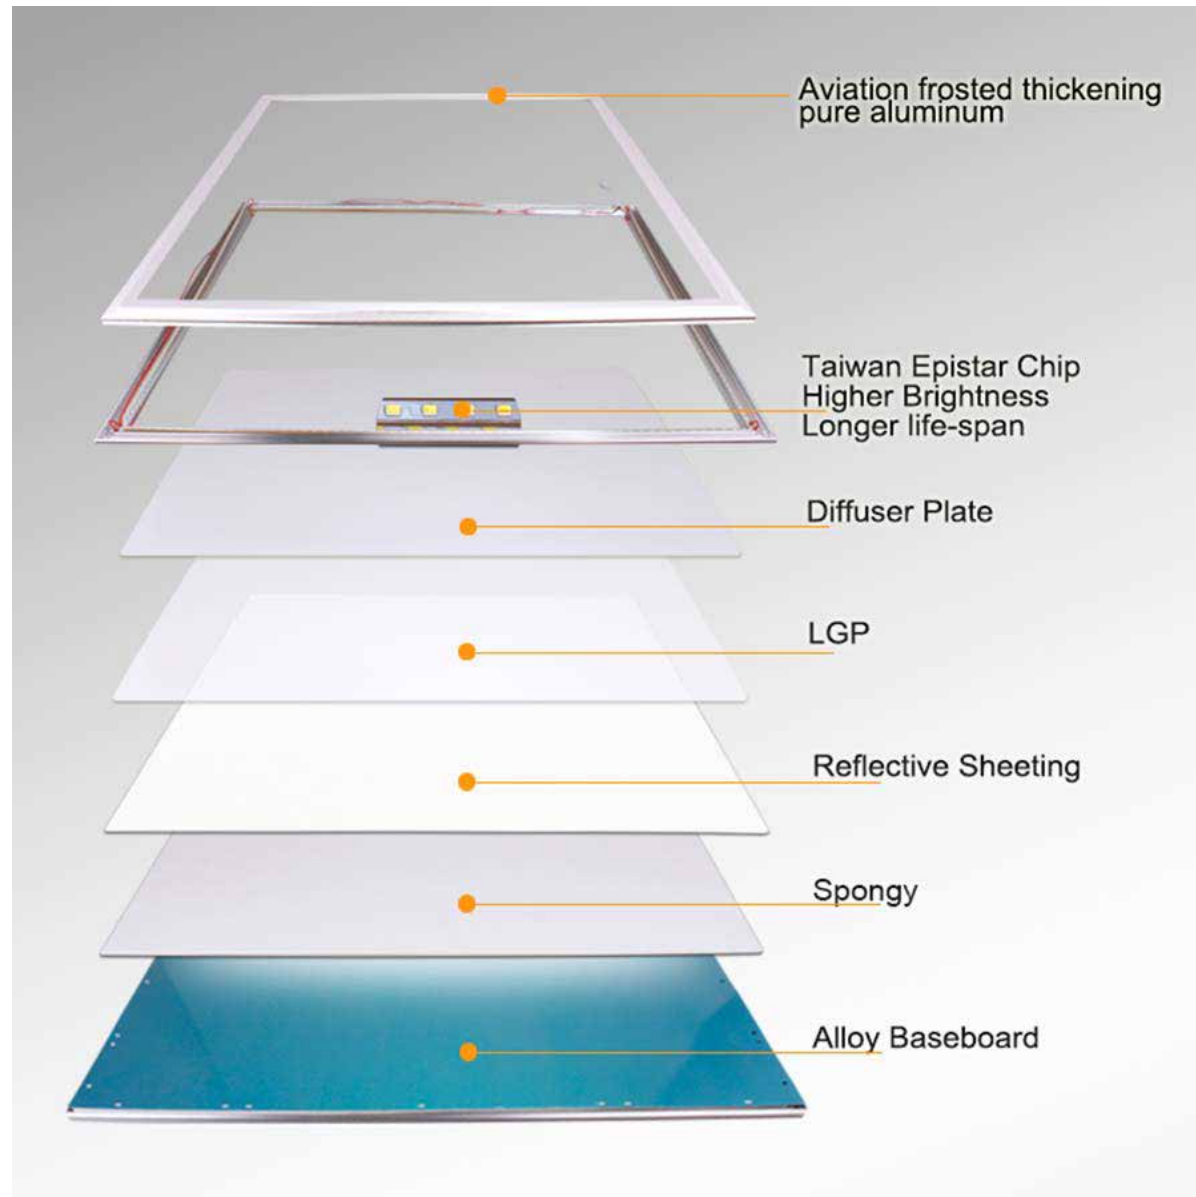

Luminaire construction

A powder coat painted extruded aluminum frame encompasses the perimeter of multi-layered acrylic panelsystem.The fireproof metal junction box is attached at the backside of the panel light.

Low glare lighting

The edge mounted LEDs give even glare free special illumination.It produces a comfortable lighting environment.

High lumen

High lumen LED efficacy paired with high power factor drivers reduce operating cost.

Long life span

More than 50,000 hours life time and 5 years warranty.

Cost and energy saving

50% more energy saving effect than fluorescent tubes

Low heat generation, extra energy saving effect through reduction of HVAC load.

Easy installation: only 3 steps in 2 minutes, labor cost saving.

Installation

① Drill hole

Remove plasterboard of matching dimension   Plasterboard

② Power on

Open upper cover and side hole of power supply

③ Rotating buckles

1.Unbend the bracket, make it perpendicular to the lamp;
2.Rotate the bracket by 90 degree

④ Connect input wire

1.Insert dimming wire of input end into DIM+ and DIM- connectors respectively;
2.Insert L polarity and N polarity into corresponding connector of L polarity and N polarity;
3.Connect input ground wire and lamp ground wire;

⑤ Cover top cover of power supply

Cover the top cover of power supply and fix the top cover of power supply on power supply box via screws.

⑥ Put the lamp into ceiling

LED lamp

⑦

PANEL LIGHT

IP65 waterproof series
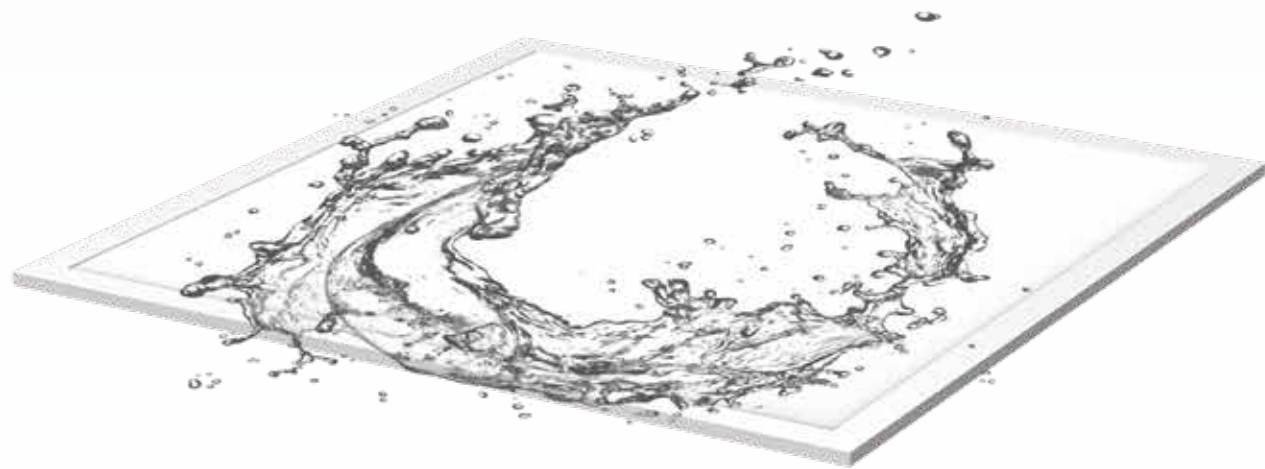

Unit:mm / inch
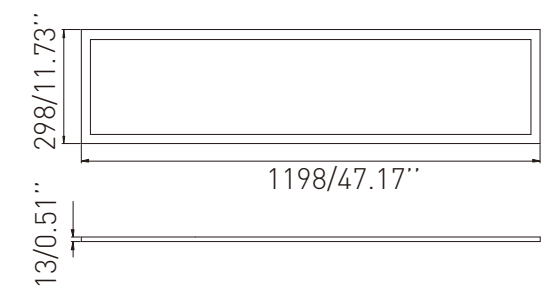

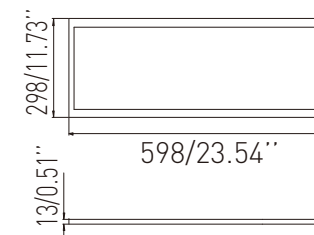

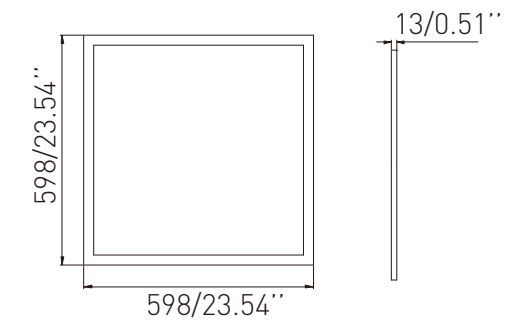

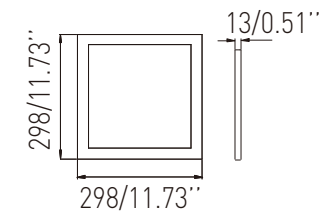

IP65 waterproof

Adopt IP65 waterproof power supply and connector, the panel light can reach IP65 waterproof grade.

Special waterproof foem

Special waterproof foem installed at the front side between aluminum housing and diffuser, also at the back side between the back cover and LGP, to achieve the waterproof effect.

AL6063 aluminum housing

AL6063 aluminum housing,13mm thickness,very stronge stuctrure, not easy to bend during using.

Without any gap at 4 corners

Flat frame design, without any gap at 4 corners.

Anti-leakage

Bending back cover design to prevent light leakage from back side.

# Installation

Three installation types : recessed, surface and suspension.
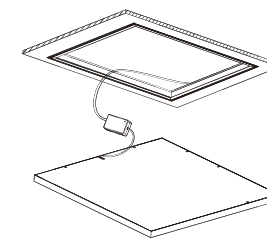

Recessed installation   Surface installation   Suspension installation

Application

The product is suitable for installation at damp environment for use such as bathrooms, kitchens, indoor swimming pools, operation rooms of hospital, etc.
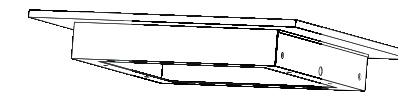

FLOAT series round suspending panel light

FLOAT round suspending panel light is designed with stylish and fashionable lamp body, and with edge-lit led emitting technology. It has the feature of uniform and smooth light beam, and can be widely used as interior lighting in shops, showrooms, offices, hotels and so on.

Only 17mm

Ultrathin and beautiful

Compact appearance, ultrathin, simple and beautiful.

No UV, no IR or mercury free

Energy-saving, eco-friendly, no UV, no IR or mercury free, RoHS compliant;

Better for heat dissipation

Round frame adopt extrusion aluminum, better for heat dissipation, higher hardness, strong structure, have big advantage in large dimension lamp.

90LPW High lighting effect

High lighting effect, uniform light-emitting surface, no ripple.

Brand power supply

Brand power supply, quality assurance.

Can be customized

Lamps of different diameters can be customized, various shapes can be posed to present art of lamps.

17mm
Ø600mm
Ø548mm

LED Linear Light

LED linear light is exclusively designed for designer and architect with imagination and personal style. LED linear light adopt premium aluminum profile, different dimension and size,easy to install. 3 types installation method: ceiling mounted type, suspended type, and different customized dimensions are also acceptable, which can meet installation requirement of different fields and occasions.

25%
Brightness

75%
Brightness

SL8055

The product has two types: direct lighting and direct/indirect lighting. The indirect lighting module is an integrated design with a quick coupling structure, which can be used as accessories for delivery, and customers can choose to install/purchase.

Plug and play design

Indirect lighting module is optional as an extra accessory, save SKU, easy to install.
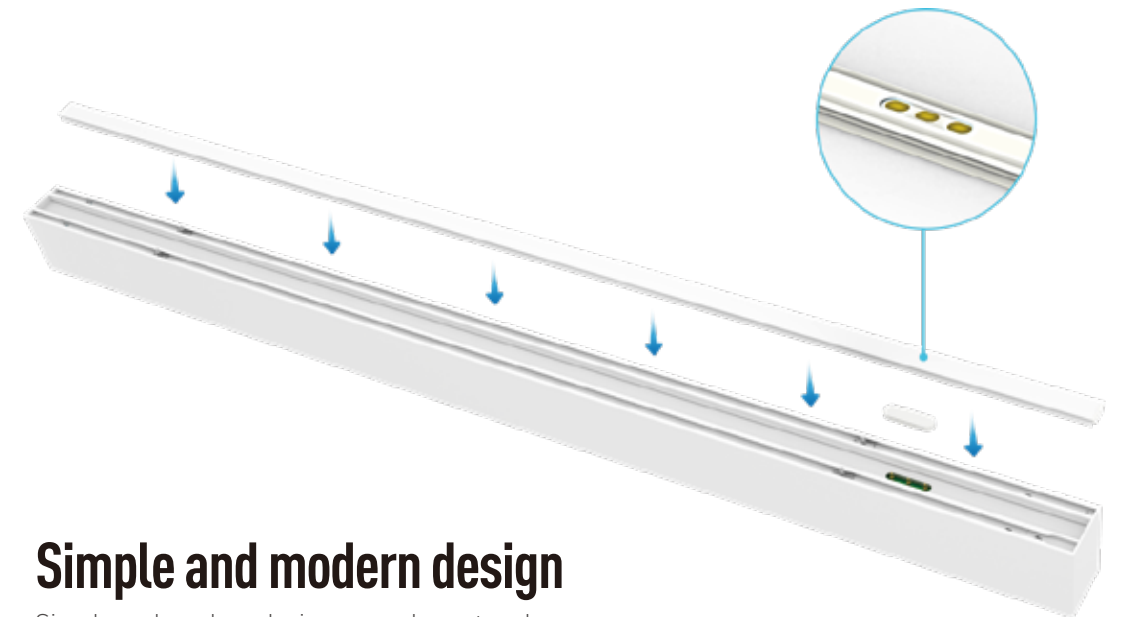

Simple and modern design

Simple and modern design, screwless at end cap, RAL9300 white lamp body.

Anti-UV and anti-yellowing

Extrusion aluminum lamp body and PC cover, anti-UV and anti-yellowing.

Visual uniformity

Smooth and soft lighting effect, no dark dot and shadow at the lighting area.

Max. connection: 900W

Product can be used individually or seamlessly spliced. under the 220V circuit, the longest connection can be 900W.
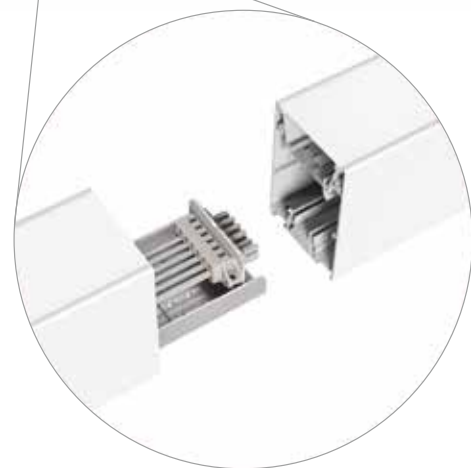

6063-T5 extruded aluminum

The outer frame adopts 6063-T5 extruded aluminum, light weight and good heat dissipation. Various colors can be sprayed to meet customer requirements.
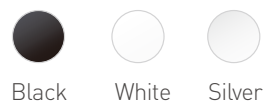

Black   White   Silver
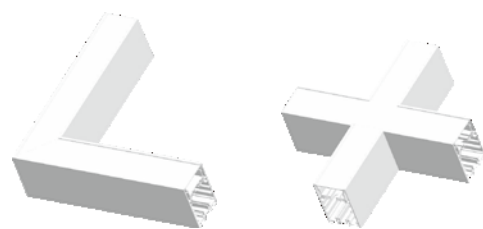

Various shapes

The product can be connected in various shapes through the L shape, cross shape and other connection accessories.

built-in sensor in the middle section of the lamp

Motion sensor version

Built-in sensor, remote control dimming, invisible from the outside, beautiful and generous, remote upload range up to 15 m (50 ft.)

PIR sensor version

PIR sensing, intelligently adjusts brightness, energy saving.
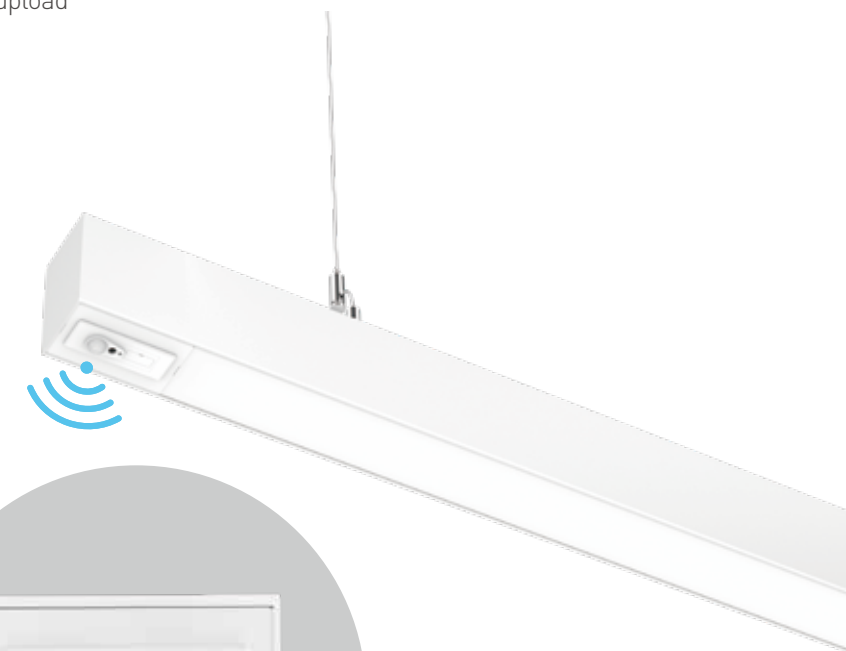

Remote control

SL8050

Microwave sensor

Linear light with built-in microwave sensor, intelligent sensing and power saving. Simple and beautiful appearance, delicate and uniform light, strong functionality. It can not only play the role of lighting, but also beautify the whole space environment.

Microwave induction function

Microwave induction function, intelligently adjusts brightness, energy saving.

Remote control dimming

Built-in sensor, invisible from the outside, beautiful and generous, remote upload range up to 15 m (50 ft.)
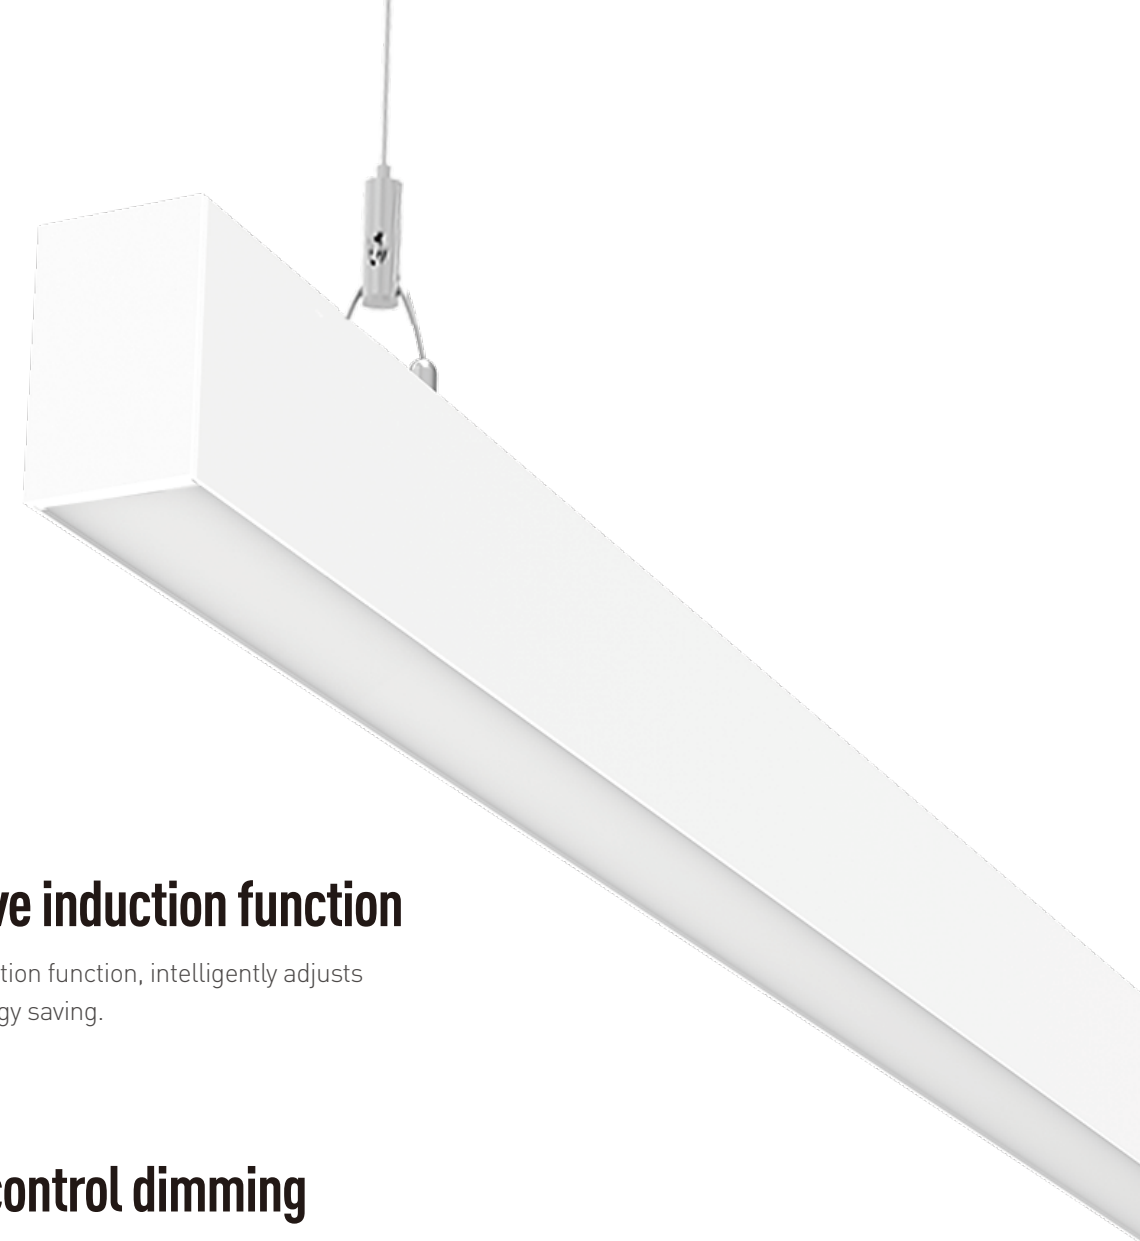

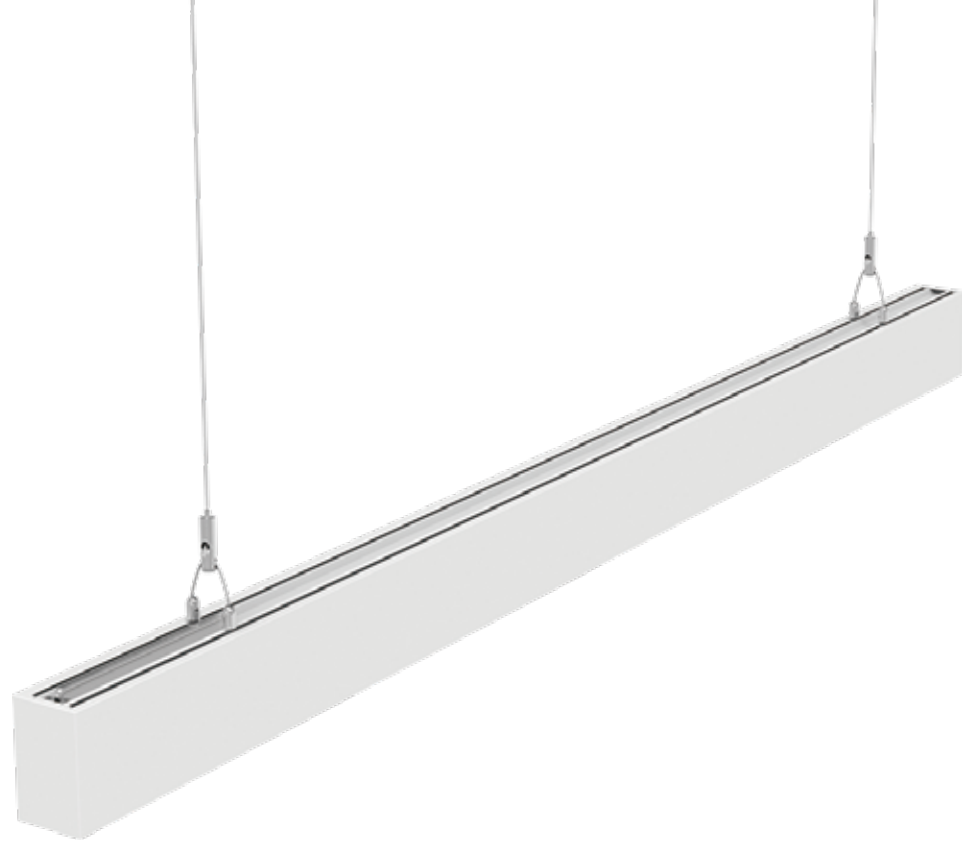

Simple and modern design

Simple and modern design, screwless at end cap, RAL9300 white lamp body.

Anti-UV and anti-yellowing

Extrusion aluminum lamp body and PC cover, anti-UV and anti-yellowing.

Visual uniformity

Smooth and soft lighting effect, no dark dot and shadow at the lighting area.

Easy to install & replace

Light area and power supply is connected by electronic wire with male and female terminal, simple structure facilitating the dismantling and replacing of light area and power supply.

SL3668

According to length, the product has 3 series, 1.2m, 1.5m and 2.4m; according to luminous surface cover, the product also has 3 series, full PC cover, fully anti-glare kit(RC01) and anti-glare kit and non-luminous area alternation(RC02).

15°   30°   45°

Suspension   Ceiling
installation   installation
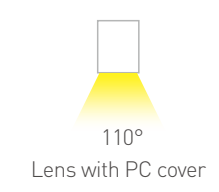

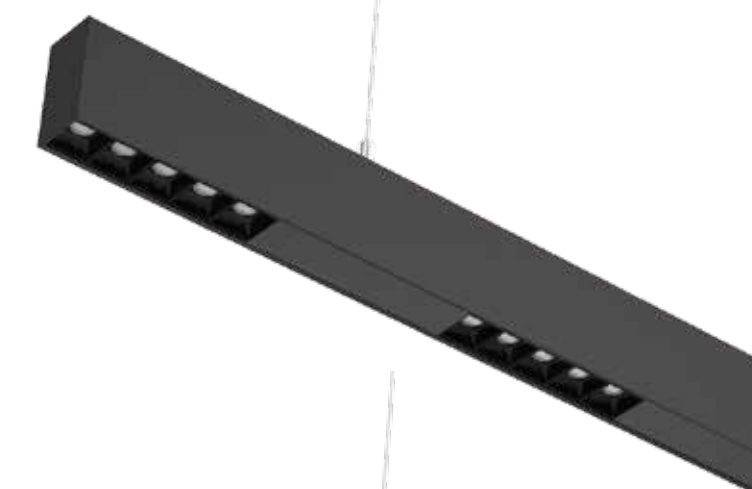

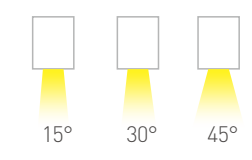

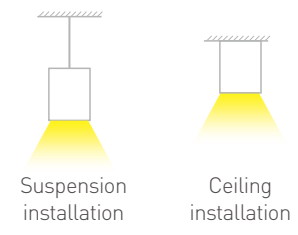

The anti-glare kit is equipped with 3030 assembled LEDs while the PC cover is equipped with 2835 assembled LEDs. The product features small size, low power consumption, long service life, low glare value, low heat, etc. This linear light is made up of an independent split type structure, which facilitates the dismantling, replacing of power supply and replacing of light panel. It sends forth linear light and available beam angle has 15°, 30°, 45° and 120°. The product looks simple, exquisite and graceful and can realize multiple jointing. The product can be widely used in home, school, shopping mall, hotel and other indoor public places. It's mainly made of aluminum alloy and PC.
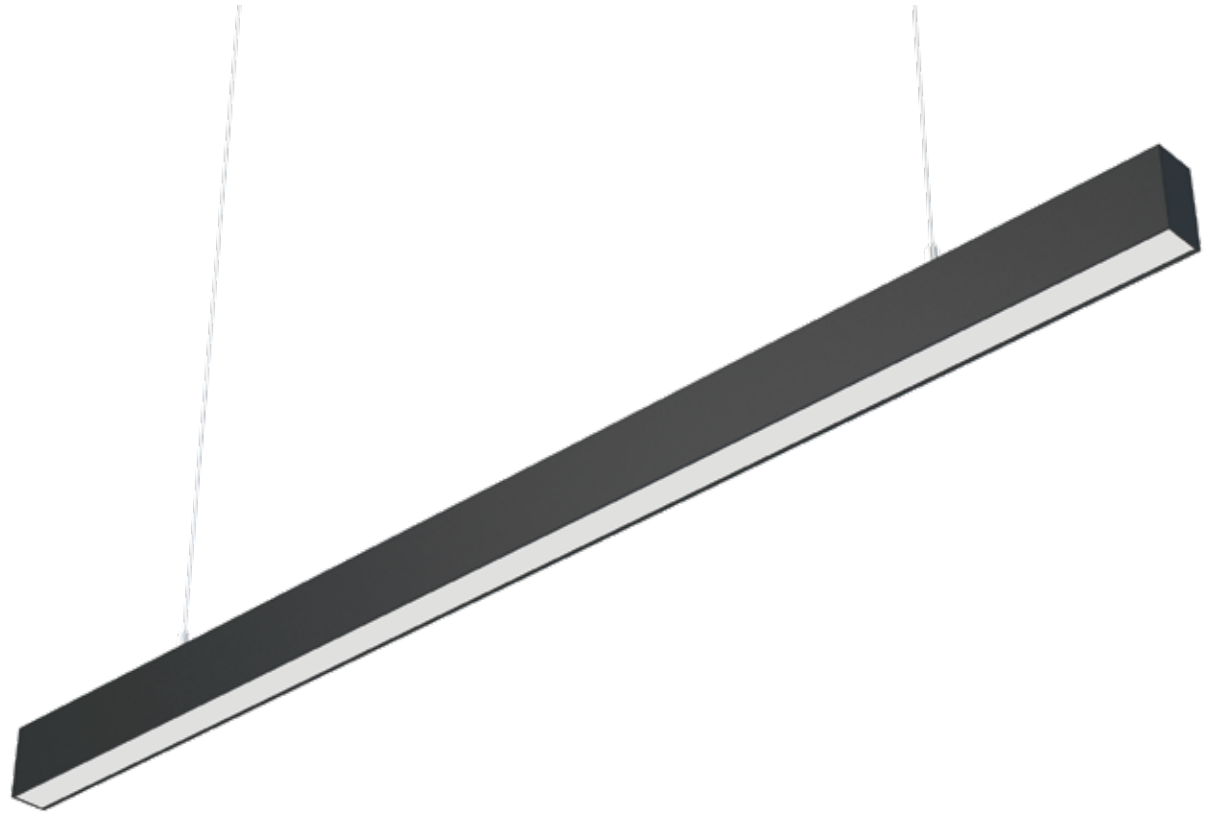

110°
Lens with PC cover

Seamless jointing

The product can be used in single piece or multiple pieces with seamless jointing and both of them share the same article number, facilitating preparation of goods and production. When the input voltage is AC220V, total power is ≤900W.

Heat dissipation design

The effective heat dissipation design and slow temperature rise of LEDs and power supply ensure high stability for continuous working.

Eco-friendly, UGR<10

Eco-friendly, no UV, IR and mercury pollution. The cover of anti-glare kit has low glare rating, UGR<10

Non-flickering driver

The LED driver ensure high stability for continuous working. Can on/off frequently, non-flickering, high CRI

Black   Gray   White

Easy to install & replace

Light area and power supply is connected by electronic wire with male and female terminal, simple structure facilitating the dismantling and replacing of light area and power supply

Application

The product can be widely used in home, school, shopping mall, hotel and other indoor public places.

SL8456

110 LPW

SL8456 linear light is combination of separated structures, which is convenient to dismantle and maintain because of its replaceable power supply and lighting emitting parts(PCB+LEDs), simple shape and random jointing can be realized. IP40 waterproof, it can be widely used in home, school, shopping mall, hotel and other indoor public places and it is mainly made of aluminum alloy, PC.
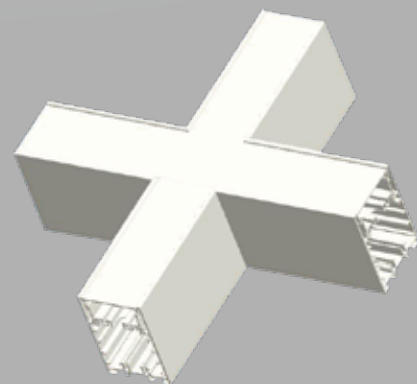

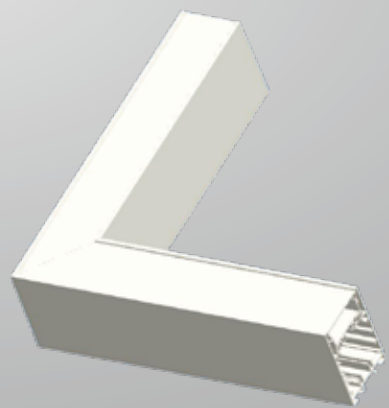

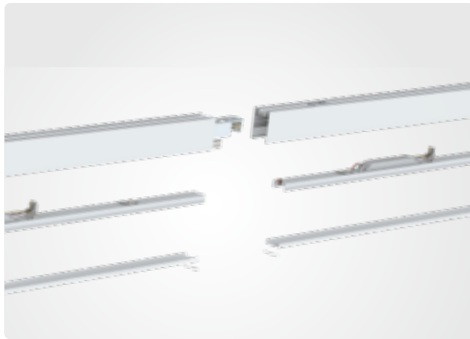

Seamless jointing

The product can operate in single run or continuous runs seamless, when input voltage is AC277V, Max 3600W(350feet) can be connected; when input voltage is 110V, Max 1500W(150feet) can be connected.
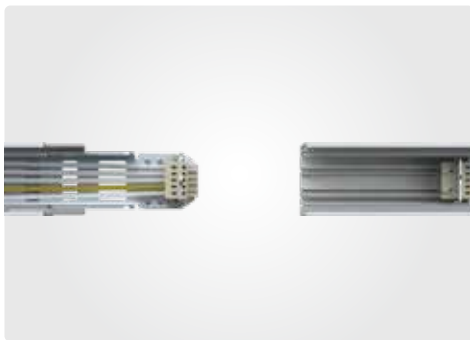

Easy to install & replace

The lamp and power supply is connected with high-voltage live part via connector; it is very convenient to install and disassemble, and it is also safe and reliable to use.
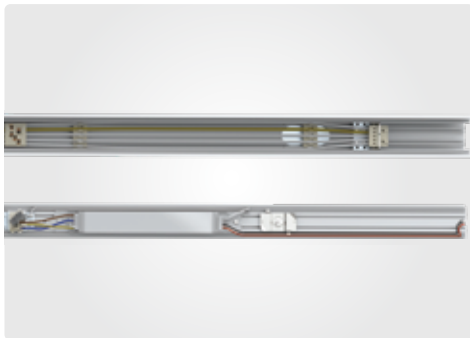

Convenient to maintain

The end cap, power supply, emitting parts can be disassembled, convenient to maintain.

Black   silver   White
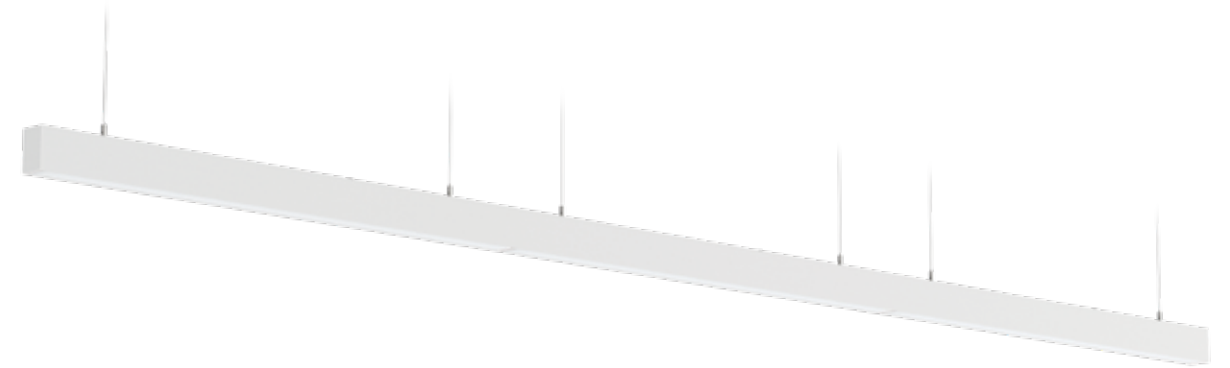

6063 aluminum profile

Lamp body adopt 6063 aluminum profile, optional white, black and silver.

SL5550

The lights are mainly used in site that requires continuous lighting and different irritation angle. The light body has simple appearance with soft light. With multiple irritation angles for selection, it is widely used in large department stores, workshops, supermarket, warehouse, parking lots and so on.

140 LPW

Seamless splicing design

CE for EU

The track adopts splicing design, which allows continuous connection. The track is tensioned with spring buckles to realize seamless connection.

Suspension installation

Ceiling installation
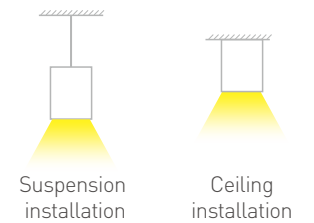

Beam angle: 30°, 60°, 90°, available.
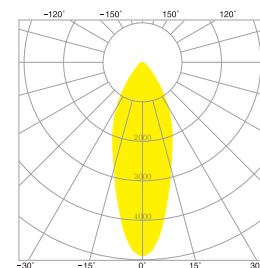

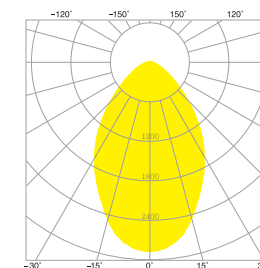

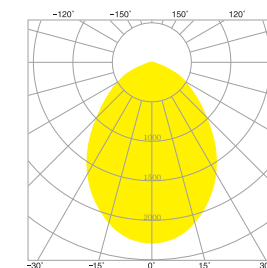

30°   60°   90°
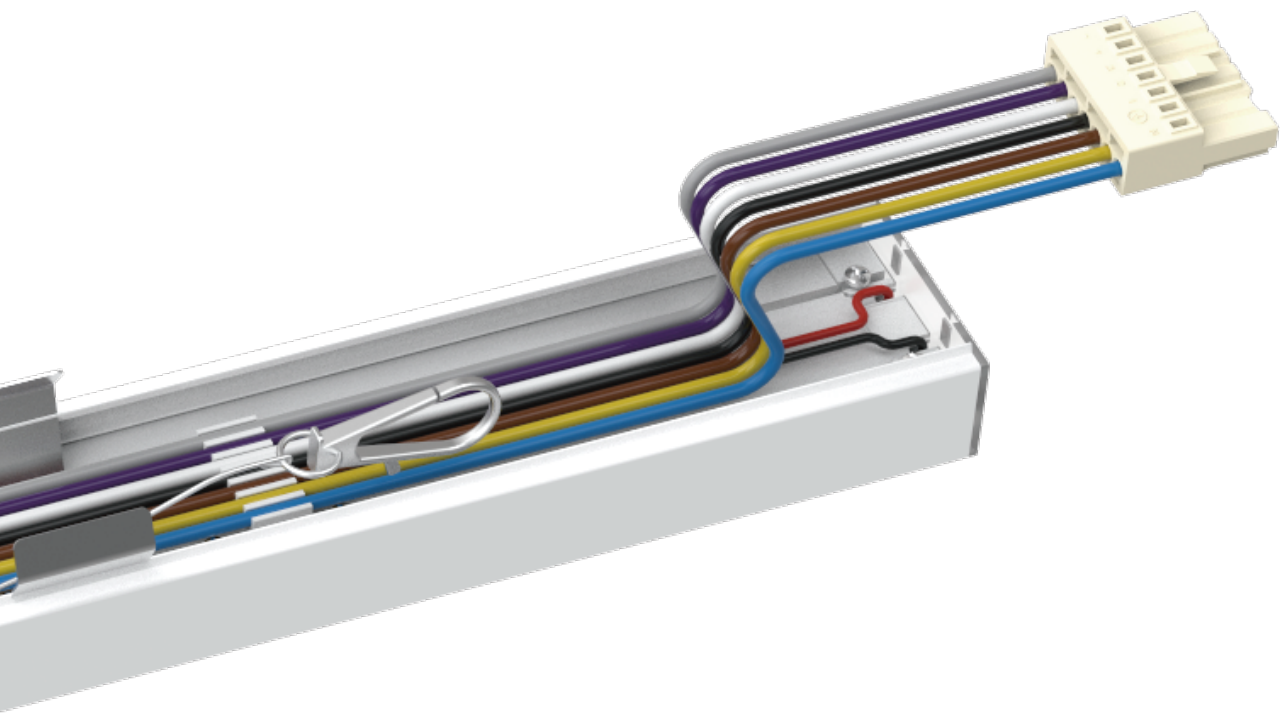

Quick connection

The inside of the light adopts 1.5mm² multiple-core copper wire and WAGO male and female of terminal of plug-in connectors to realize quick connection among lights.

Flame retardant PC wire

The wires adopt inflaming retarding PC wire clip so that the wire inside the light is neat and orderly.

Aluminum + PMMA lens

Adoption of aluminum alloy section + PMMA lens, surface powder coating technology, exquisite overall appearance, simple structure, light weight, good heat dissipation and optical property.

Safe and reliable

The push type hoisting buckles adopt stainless steel 301 materials and reverse buckle structure, which allows quick installation and is safe and reliable.

Dimming function

With the dimming function, it may provide DALI and 0-10V dimming.

Black   Gray   White
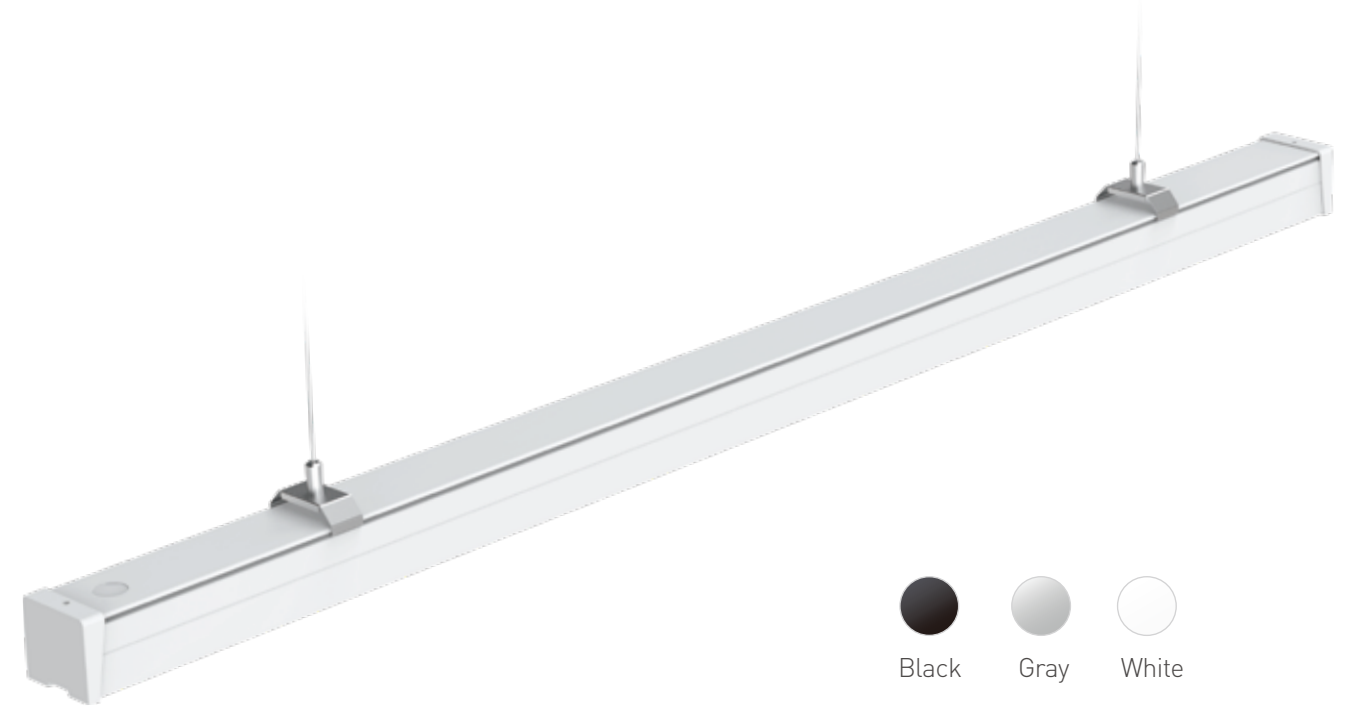

Spring buckles to connection

The light body adopts split type design. The light body and track use stainless steel 301 Shrapnel for connection. It is designed with auxiliary safety rope, making it convenient to install and dismantle the light and track and maintenance.

Installation

Two installation methods, suspension installation and ceiling installation.

It is exclusively designed for designer and architect with imagination and personal style. Adopt premium aluminum profile, different dimension and size, easy to install. And different customized dimensions are also acceptable, which can meet installation requirement of different fields and occasions.

105 LPW

Seamless splicing design

CE for EU

The track adopts splicing design, which allows continuous connection. The track is tensioned with spring buckles to realize seamless connection.

Energy saving up to 90%

Energy-saving percentage (compared with traditional type) with energy savings of up to 90% than incandescent light.

Easy to install & replace

Light area and power supply is connected by electronic wire with male and female terminal, simple structure facilitating the dismantling and replacing of light area and power supply;

High efficiency

High efficiency up to 105LPW, DLC standard for optional.

Black   Gray   White

Simple structure

Simple and modern design, screwless at end cap, extrusion aluminum lamp boby and PC cover.

Visual uniformity

Smooth and soft lighting effect, no dark dot and shadow at the lighting area.

SL11070

SL 11070 with excellent 6063 extrusion aluminum, reliable LEDs and PC diffuser, it has high light efficiency and uniform light distribution. It provides up-and down lighting and allows 2 ways of installation: wall mounted and suspension. It can be widely used as wall lighting for decoration and also main lighting for office, shops, hospital, school and so on.

RL4932

LED linear light is exclusively designed for designer and architect with imagination and personal style. LED linear light adopts premium aluminum profile, different dimension and size, easy to install.
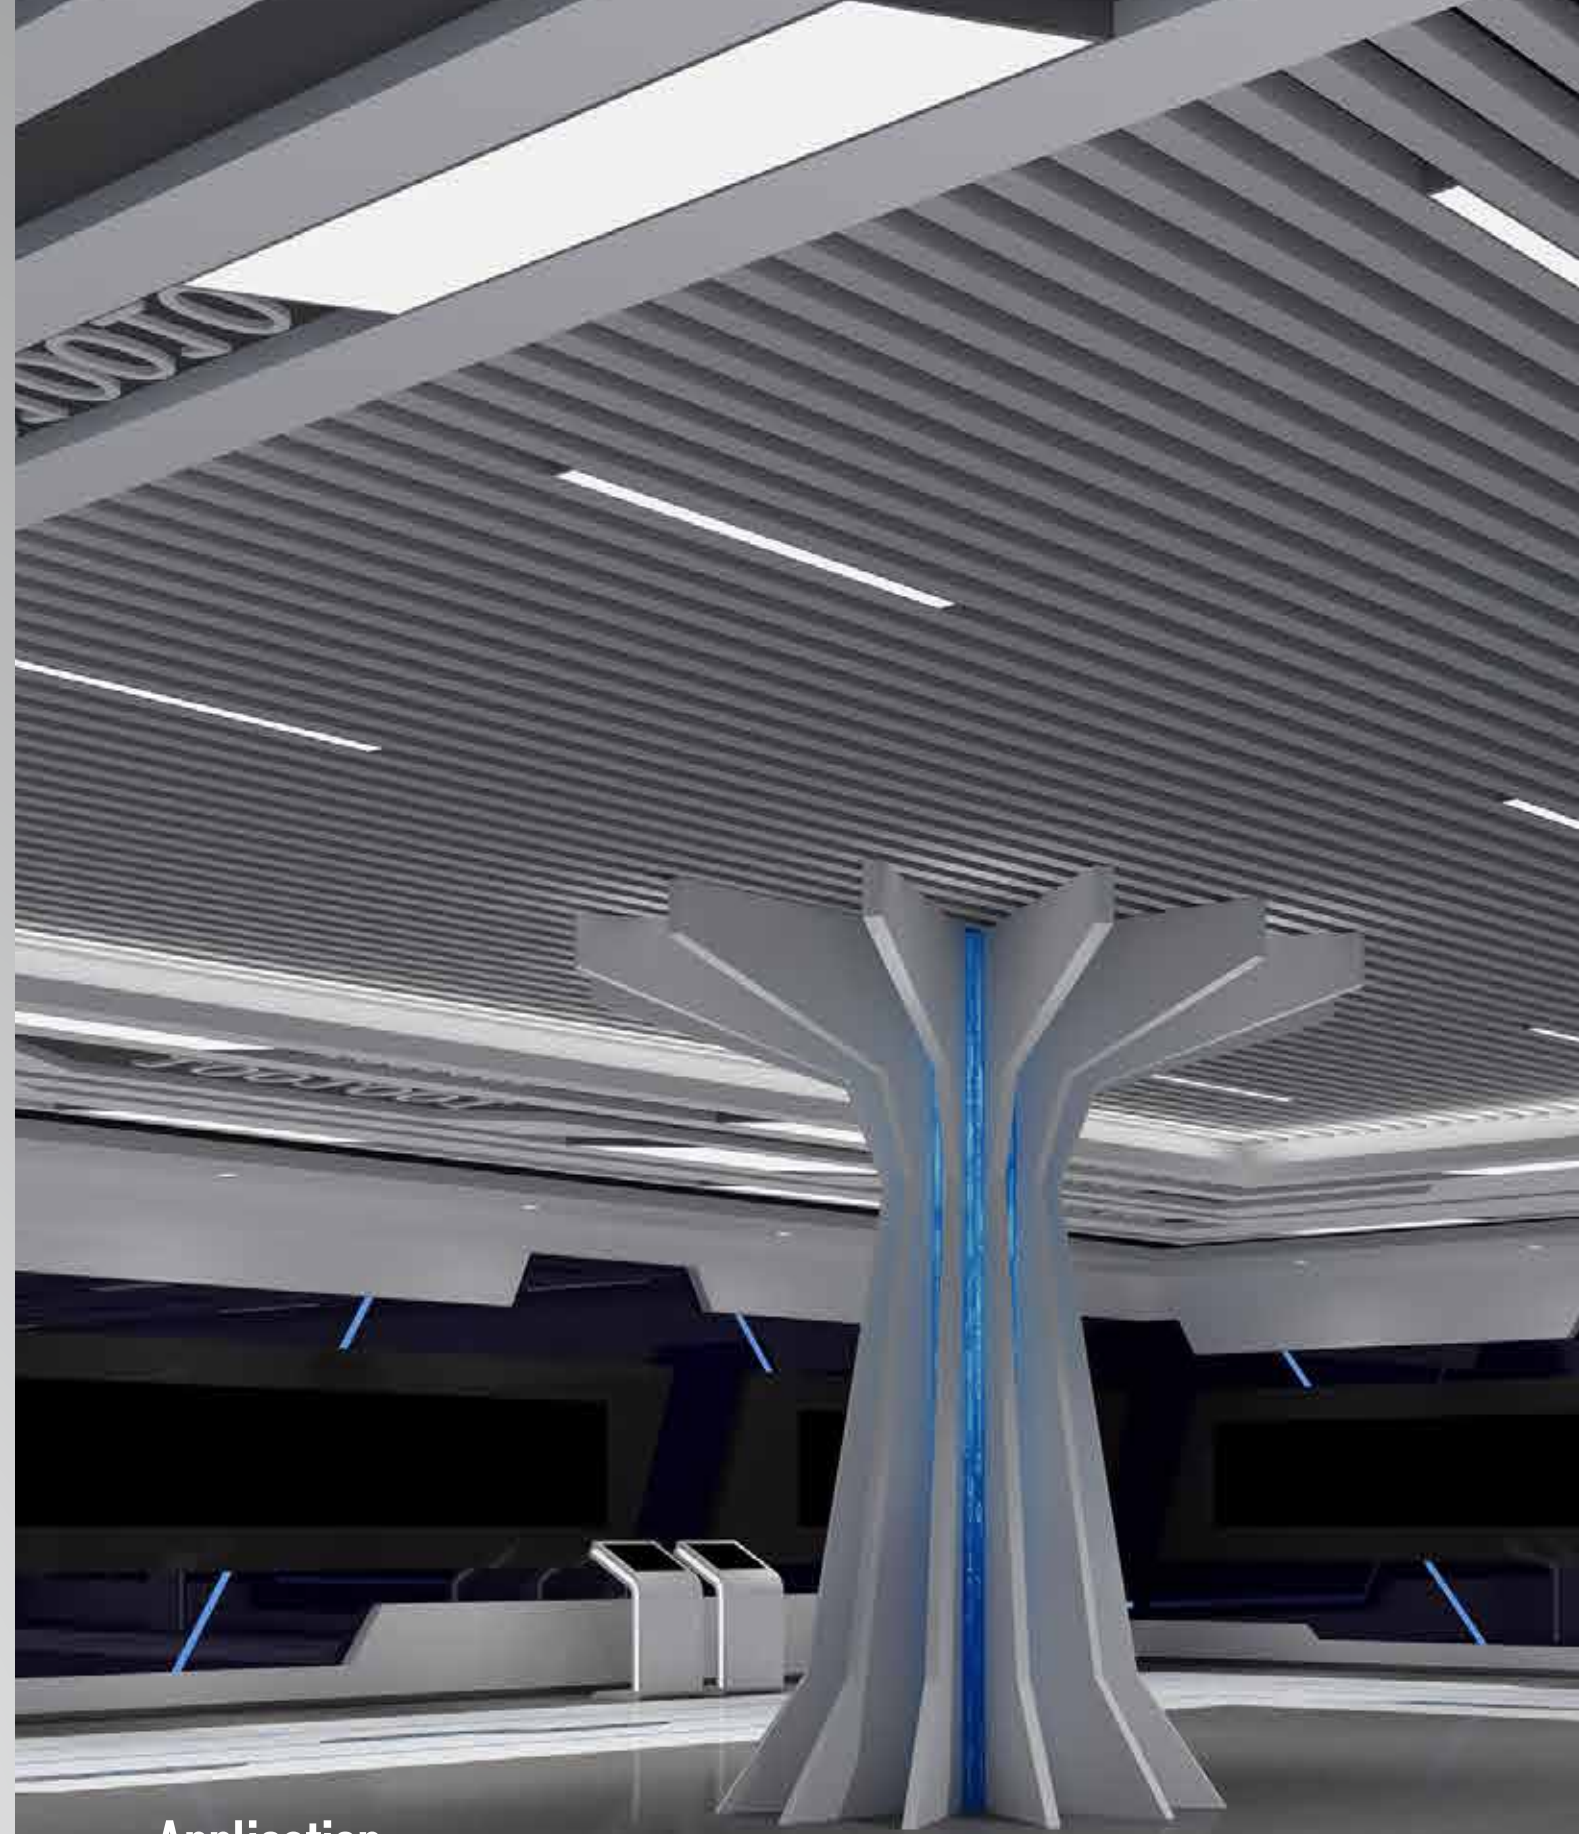

Application

Widely used in hotels, conference/meeting rooms, factories and offices, commercial purposes, residential / institution buildings, schools, colleges, universities and hospitals, places which needs energy saving and high color rendering index lighting.

- Color: CW(5000-6500K), NW(3700-4500K), WW(2700-3200K)
- Power factor>0.95
- Beam angle: 110 Degree
-Saving energy: 50%
- Life span more than 50,000Hrs
- IP code: IP40
- Standard warranty: 3years
- CE Certified.
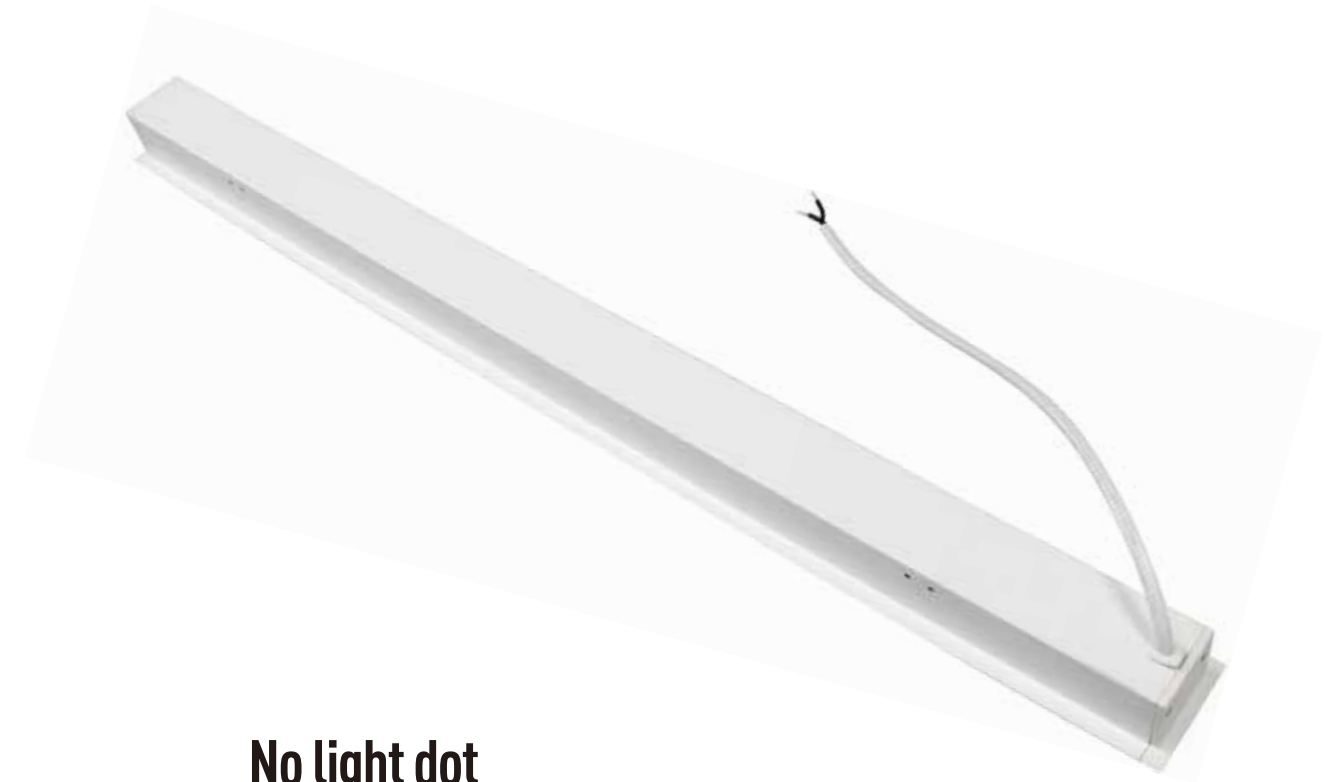

No light dot

Uniform lighting effect, no light dot.

Slim body

With slim body made of extrusion aluminum-6063.

High efficiency up to 85%

Built-in driver, PF>0.9, isolated, high efficiency up to 85%.

Customized size

Standard size: 0.6m,1.2m and 1.5, customized size
also acceptable, Max 2.4m.

RL7035

U-shaped bracket type

Spring buckle type
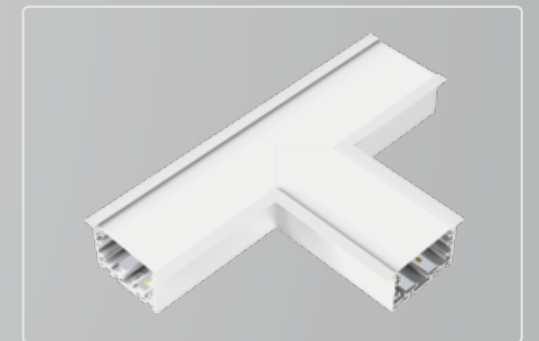

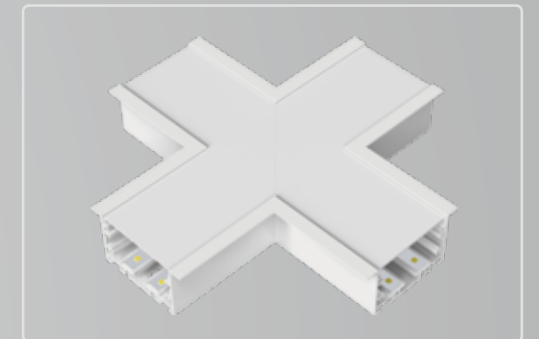

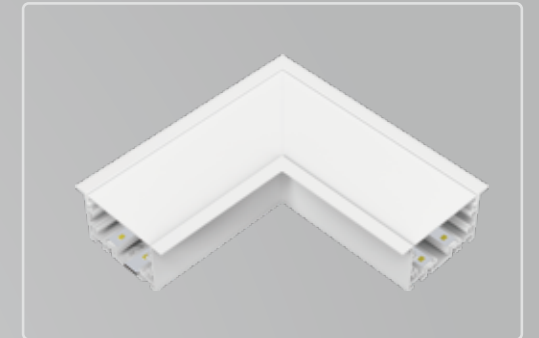

RL7035 linear light is mainly designed for recessed installation or continous lighting, the light body has simple appearance with soft light continous connection and it is widely used in shopping malls, office and so on.
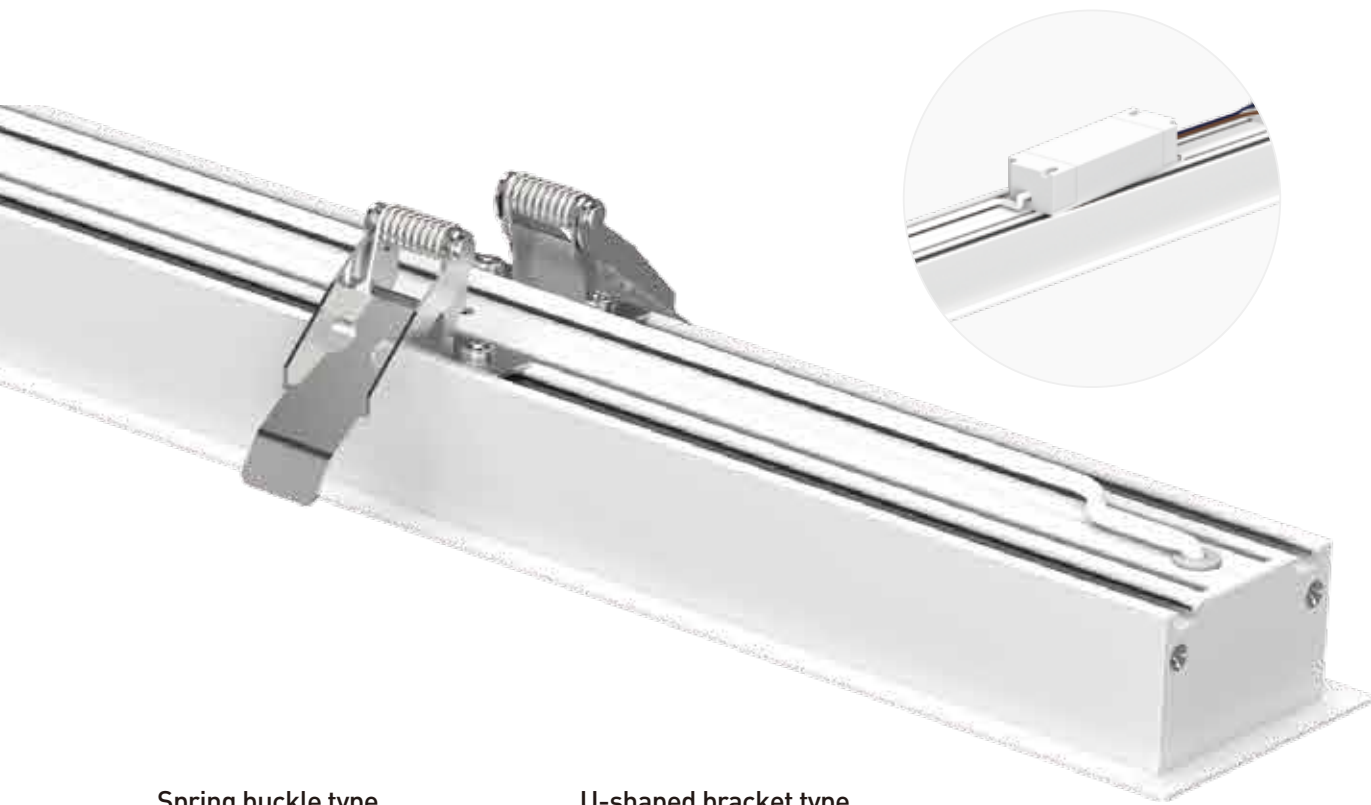

Mounting accessories

Adoption of U-shaped support and spring buckle type installation for optional.

Aluminum alloy+PC materials

The whole lamp is aluminum alloy+PC materials with surface oxidation silver process.

Good heat dissipation

Allowing reliable and solid structure. Good heat dissipation and optical performance.

Spring buckle type   U-shaped bracket type

RL13054

Rl13054 linear light is specially designed for recessed installation for offices, schools, shopping malls hotels and so on. It has the excellent heat dissipation system and very uniform lighting effect. People can install the lights very easily under the ceiling.

Good heat dissipation

The whole light is cold-rolled plates and PC materials with surface painting, allowing reliable and solid structure and good heat dissipation and optical performance.

Large light emitting area

Large light emitting area reaches 100MM, the high lumen output can meet the general lighting requirements.

Simple installation

The adoption of U-shaped support and threaded rod embedded installation enables simple installation and dismantling
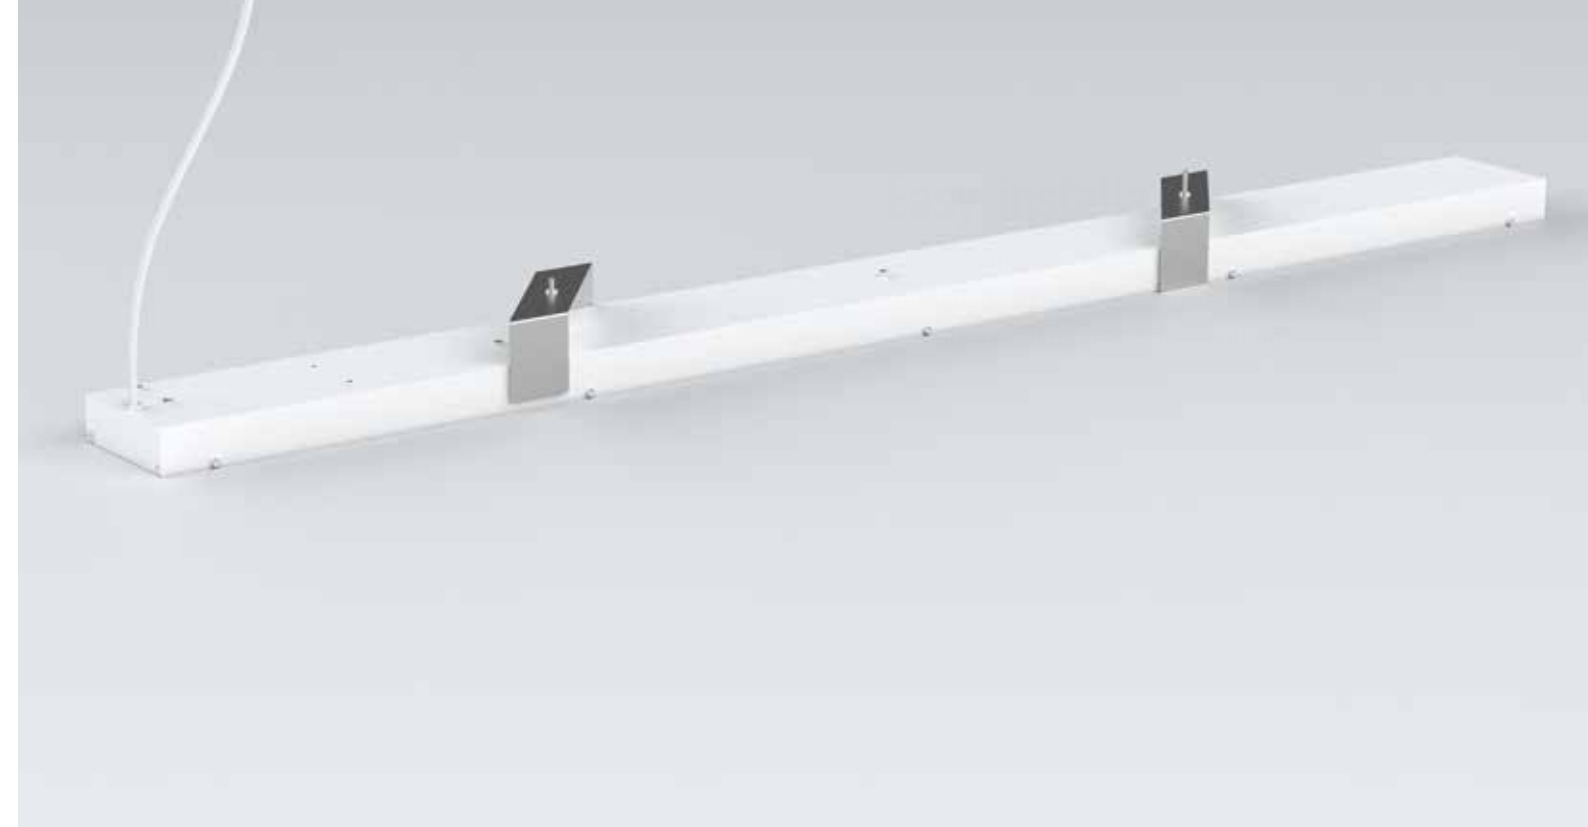

Installation cost saving

Can install the lights very easily under the ceiling, no need to go into the ceiling, installation cost saving.

Non-flickering driver

Flicker-free driver with high PF>0.95

0-10V and DALI dimmable

Dimmable version for optional, 0-10V and DALI.

Installation

Embedded installation
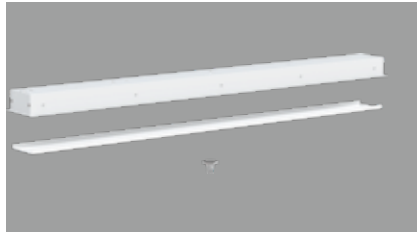

1. Dismantle PC lampshade of the light
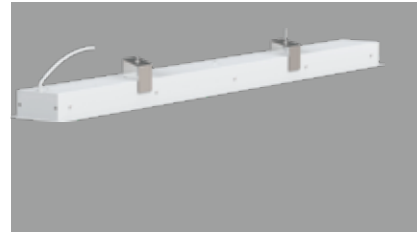

2. Install the embedded installation bracket

3. Connecting AC wires

4. Install the light body into the safety holes

5. Lock the installation bracket tightly
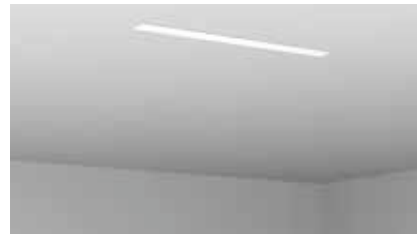

6. Install PC lampshade, installation finished.

SL8456
direct and indirect lighting
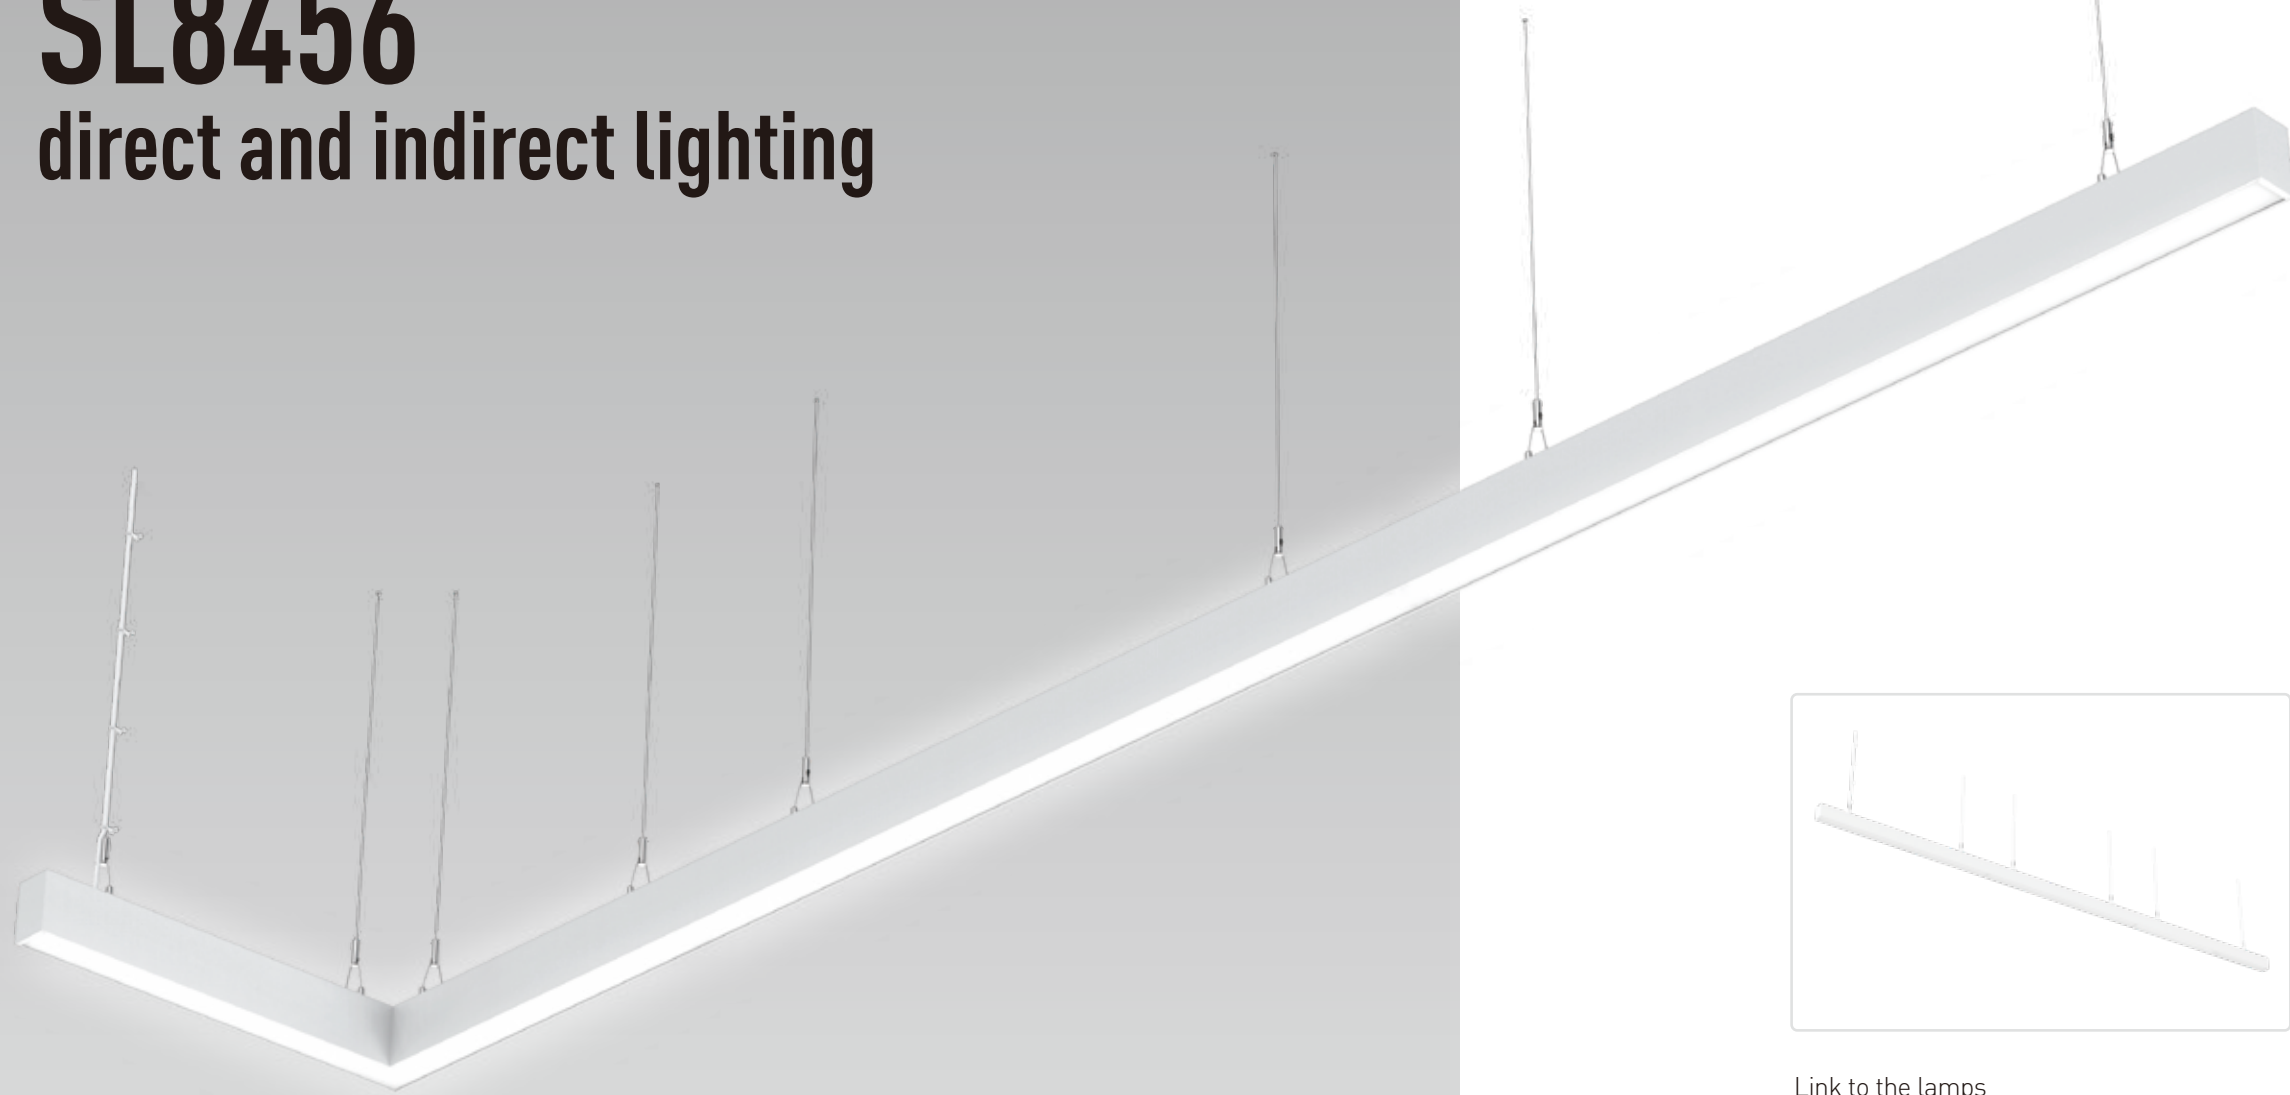

single lamp
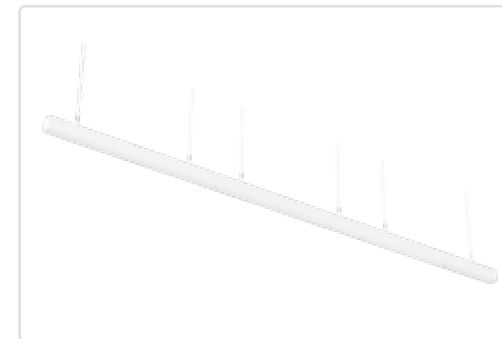

Link to the lamps

L-shaped lamp

P≤
900W

SL8456 linear light is combination of separated structures, convenient to dismantle and maintain because of its replaceable power supply and lighting emitting parts(PCB+LEDs), simple shape and random jointing can be realized.
IP40 waterproof, so it is can be widely used in home, school, shopping mall, hotel and other indoor public places, and it is mainly made of aluminum alloy, PC.

Good heat dissipation

The whole light is cold-rolled plates and PC materials with surface painting, allowing reliable and solid structure and good heat dissipation and optical performance.

Simple installation

The adoption of L-shaped installation enables simple installation and dismantling

Non-flickering driver

Flicker-free driver with high PF>0.9

Emergency/No dimming/DALI dimming

Dimmable version for optional, DALI dimming, No dimming, Emergency.

Installation cost saving

Can install the lights very easily under the ceiling, no need to go into the ceiling, installation cost saving.

30% Indirect Lighting
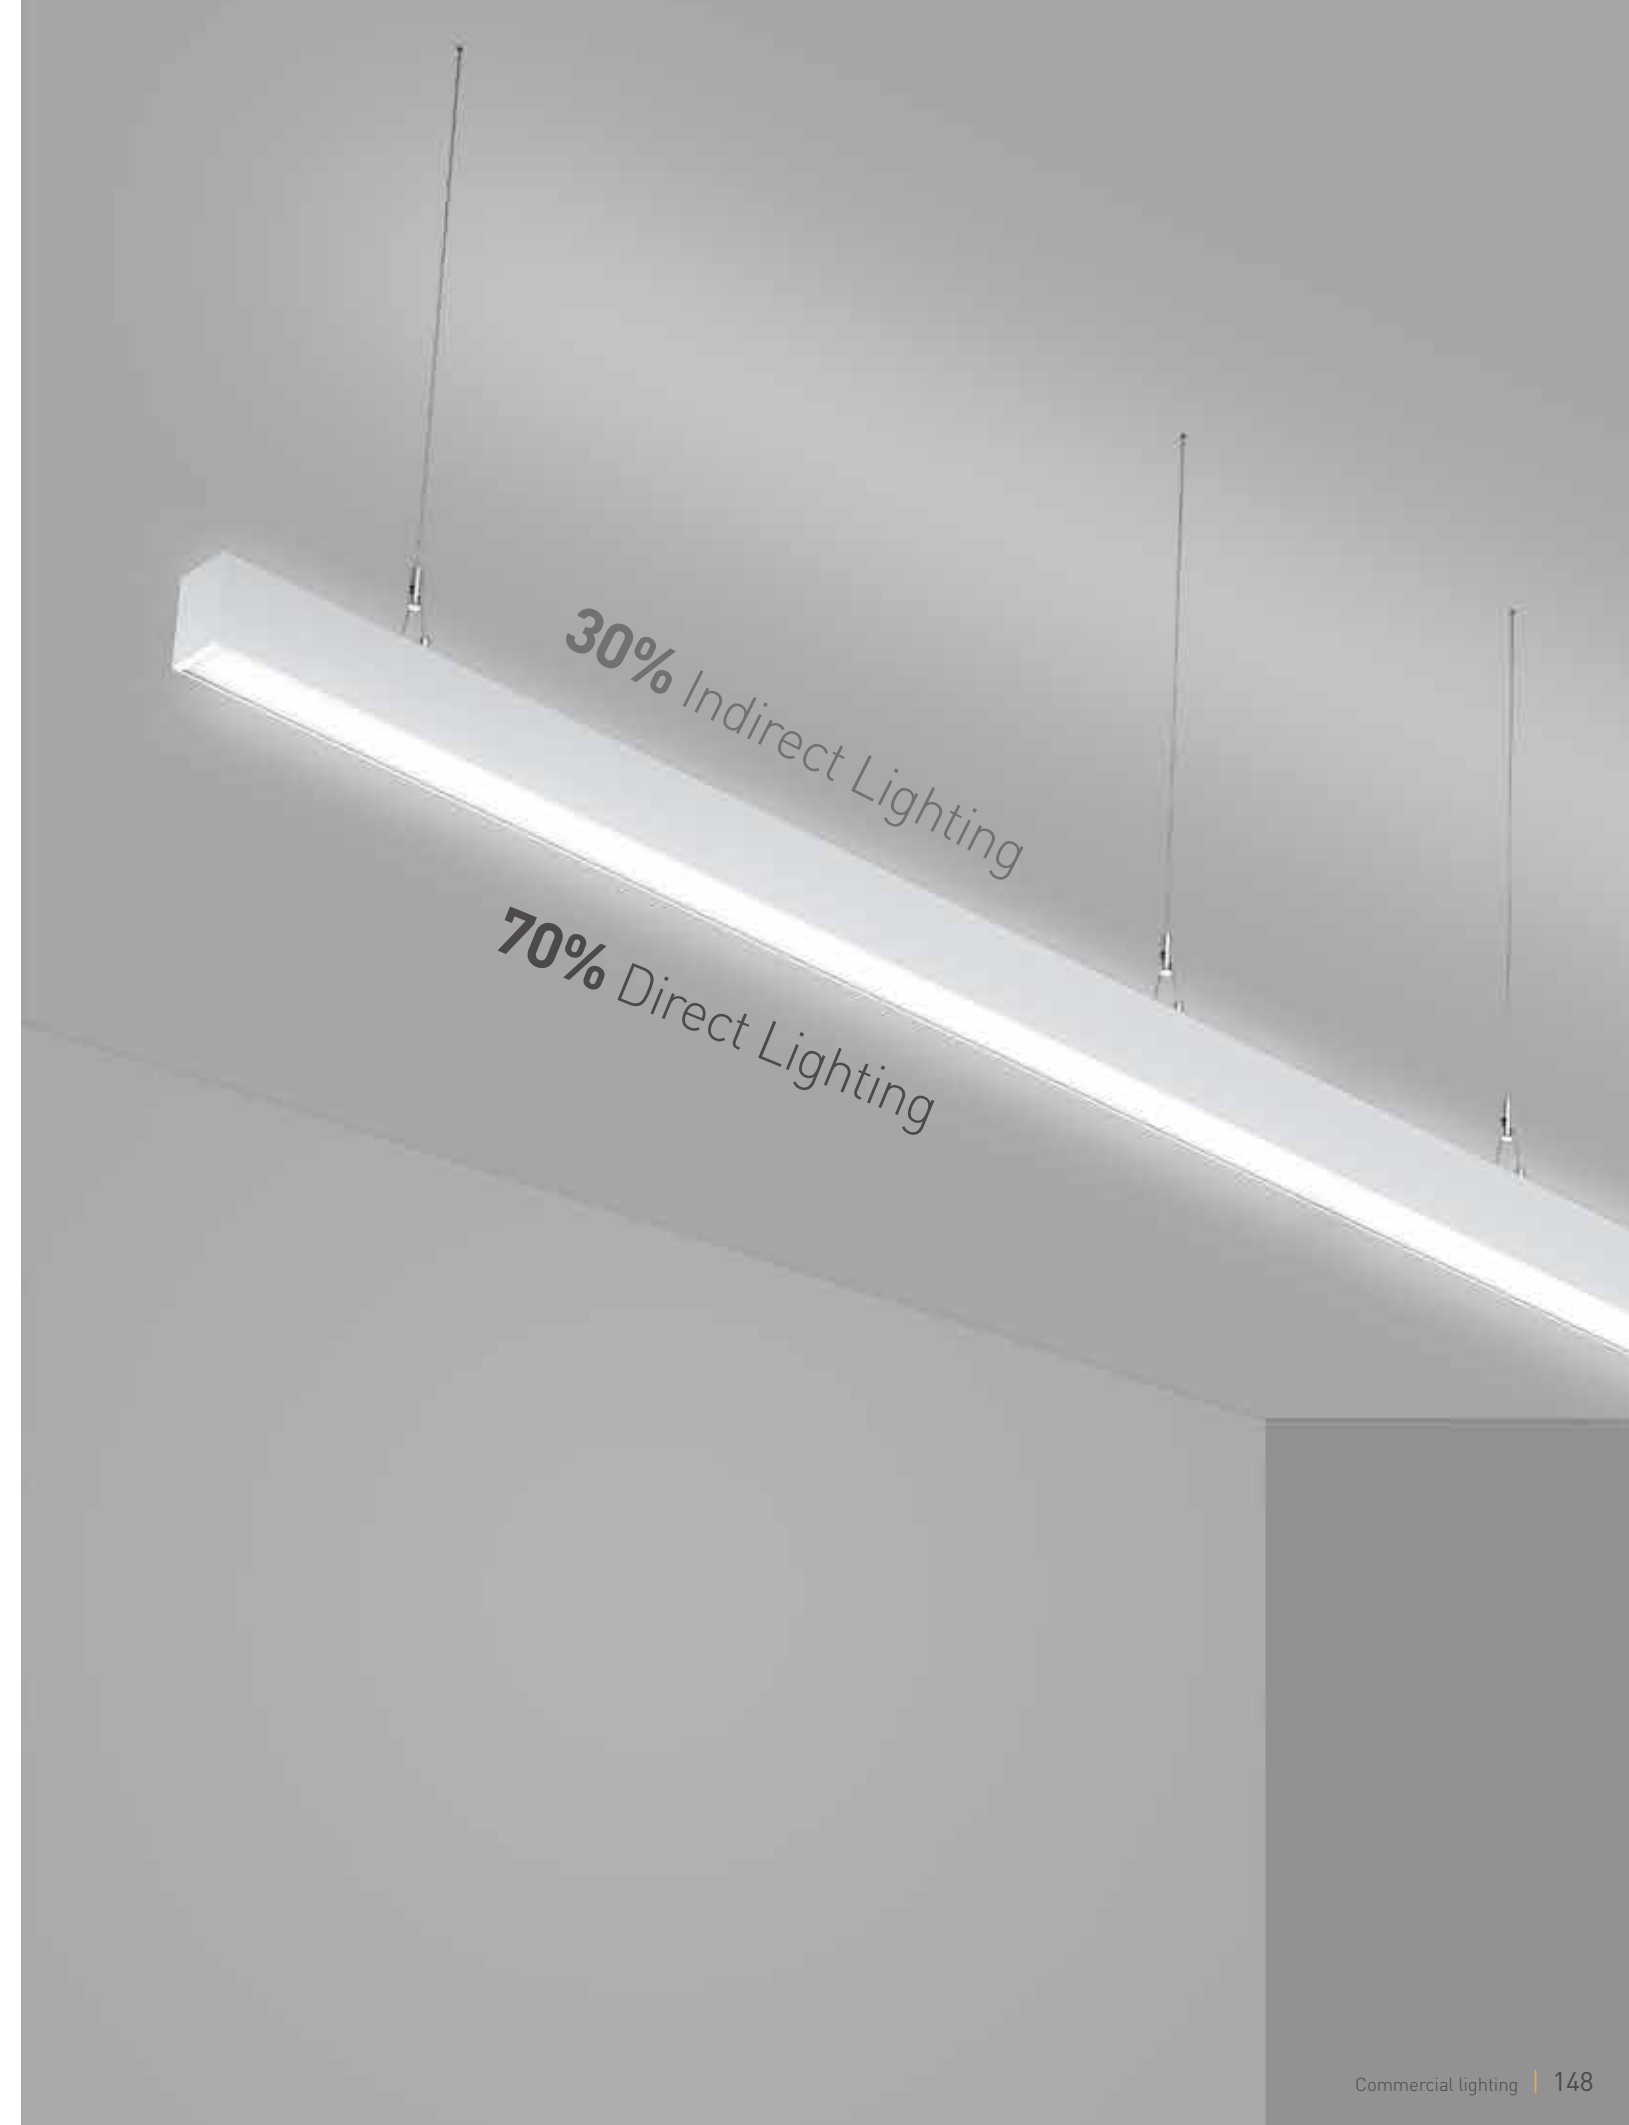

70% Direct Lighting

Installation

Two installation methods,

1. Single Lamp Installation of SL8456 Linear Light on Indirect and Direct Lighting.
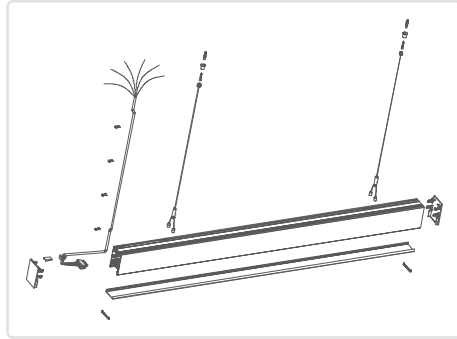

2. The Suspending Installation Instruction for Continuous run
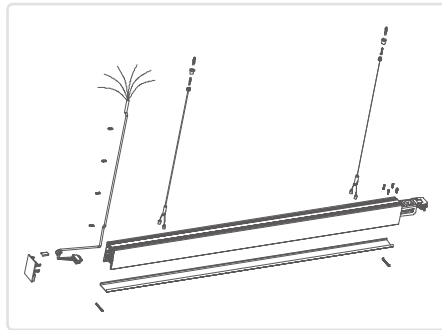

The first section explosion diagram of Suspending

LED Downlight

LED Down light features integration design of radiator and outer design, which realize optimal cooling effect and lighting effect.Transparent cover or frosted cover for customer's option. CRI80, CRI90 and 100 LPW lighting effect.
Patent design, unique radiator shape design ensure high cooling performance and work in low temperature.

DISC Series

DISC downlight for 120V AC ,10W/15W. Available triac dimmable and non dimming.

DISC downlight can fit 4" & 6" junction box and replace of most 4" and 6" surface mount downlights;

DISC downlight can fit 5" & 6" downlight housings and replace of most 5" and 6" recessed downlights;

This product is ideal for use in many residential and commercial lighting applications with E26 base.

Unique appearance and even luminous effect

Beautiful design and gorgeous, no flickering, even luminous effect.

Good heat dissipation

Adopt spinning iron as heat sink.

Commercial Downlight

The ML commercial LED Downlight is designed for new or remodel applications. It offers remote J-box dimming compatibility using 0-10-volt controls and is quick and easy to install into existing recessed frames without removing the housing, and the recessed fixture mounts directly into the ceiling.

High efficient design

Adopt metal reflection cup with high reflectivity and transparent toughened glass with high photosynthesis, high luminous efficiency and uniform light.

Better heat sink

The lamp body adopts aluminum alloy stamping forming process, which has good heat dissipation and longer service life.

Energy-saving

ML retrofits is a highly efficient option for upgrading existing incandescent, fluorescent and Metal Halide downlight fixtures to energy saving LED.

Easy to install

Quick and easy to install into existing recessed frames without removing the housing, and the recessed fixture mounts directly into the ceiling.

0-10V Dimming

It offers remote J-box dimming compatibility using 0-10-volt controls.

5CCT Adjustable Downlight

This downlight adopts exposed dip switch to adjust 5CCT

so as to achieve the diversity of application.

HTB Series

Color tunable

Achieve selection of five types of color temperature
through five-section dip switch.
Dip switch:2700K-3000K-3500K-4000K-5000K

Optical engine design

The adoption of optical engine design ensures higher integration and smaller volume.

Small electromagnetic radiation

Adopt DOB solution, small electromagnetic radiation.

6 inch

4 inch
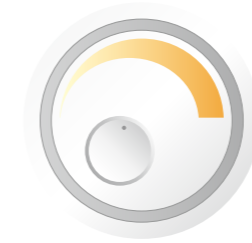

Triac Dimming

Compatible with most US Triac dimmers, good brightness effection, no flicker, Dimming range:10-100%.

Long Lifetime

Excellent thermal management to ensure long lifetime of LED.

50000 hours

Ultra-thin downlight

DL101 series

Ultra-thin design

The product radiator is integrally formed, with a height of 30.2mm, ultra-thin, and white powder spraying for surface treatment.

Uniform light

PC diffuser mask is adopted to give uniform light.
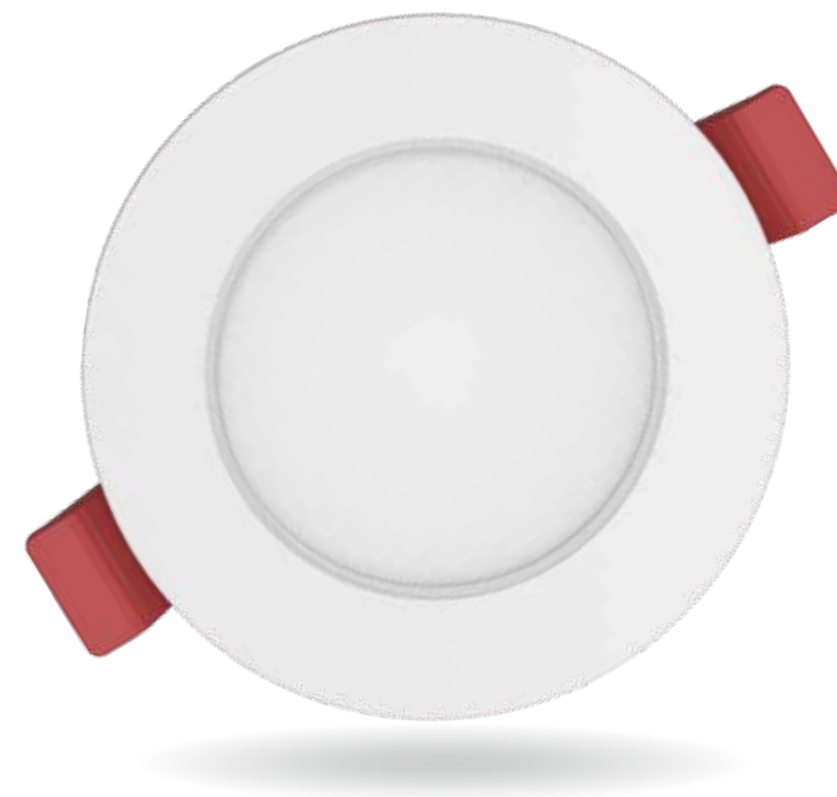

Energy-efficient drive supply

Separate design of power supply and main body, which is more advantageous to ensure the life of power supply and LED.

Snap fit installation

The lamp is snap-fitted for faster installation.

Die-casting processing

The main material of this product is aluminum alloy, and the main process is die-casting processing.

Ultra-thin downlight

DL102 series

Good heat dissipation

Adopt aluminum alloy as material, casting process,heat dissipation is good.
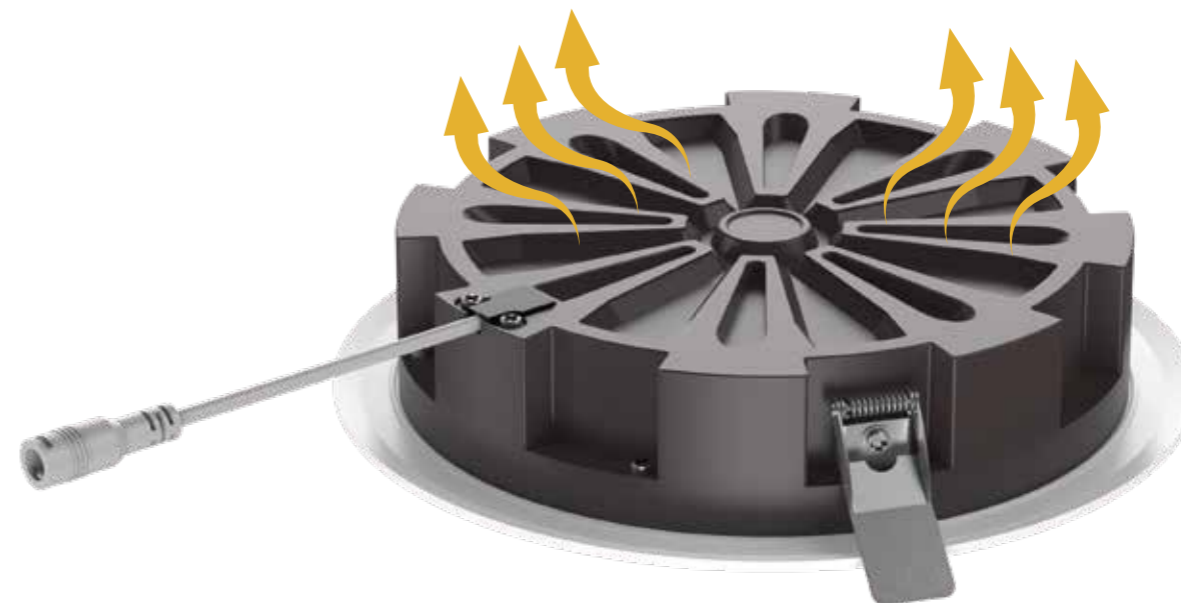

Uniform light

PC diffuser mask is adopted to give uniform light.
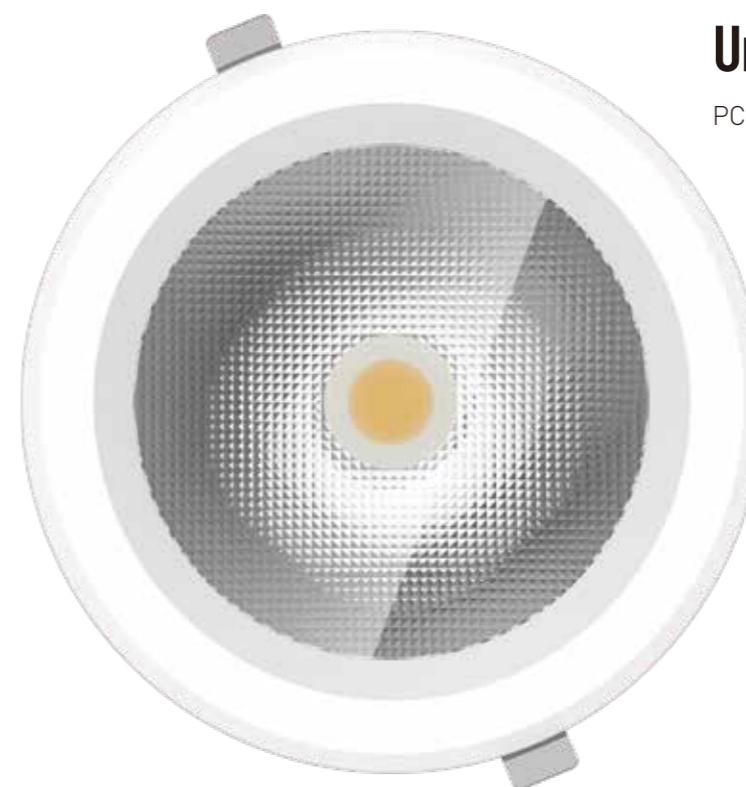

Anti-glare design

High light transmittance, low light loss, anti chord light.

Separate design of power supply

Separate design of power supply and main body, which is more advantageous to ensure the life of power supply and LED.

Snap fit installation

The lamp is snap-fitted for faster installation.

Gimble Series
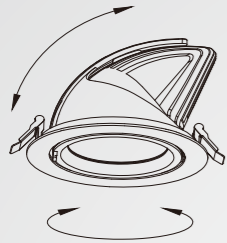

- Use die-casting aluminum alloy as main-body material
- Adoption of Shinland efficient reflection cup + lens. The light spot is evener without overlapped light spots
- Unique and beautiful looking design, beautiful surface treatment with texture
- Good heat dissipation performance guarantee the long life span, small size and large power
- Use external LED driver to make sure low heat dissipation and longer lifetime of LED source, driver brand : Signcomplex, Philips, Osram, Tridonic and so on.
- Can replace traditional downlight

As Flexible As   An Elephant Trunk

Aluminum housing

The housing is made of die cast aluminum as radiator

High efficiency

High efficiency and energy saving LED drivers.

Unique appearance design

Surface treatment beauty with texture.

Shinland efficient reflection cup + lens

Efficient reflector + lens(15°/24°/36°) by west landes, the spot is more uniform, no overlap spot.

CL202 Series

- The lamp body adpot forging design and forming process by pure-aluminum, the surface sprayed with matte white and gray, which offer better heat dissipation with longer service life, also an upscale appearance.

-The lamp body design with Mini-size, make it suitable for more places ,especially the limited space. the smaller, the more delicate, and the more hiding itself.

- Anti glare design, UGR<19, create a comfortable lighting environment atmosphere.

- Narrow angle design, offer 10°, 24°, 40° even 5° or 8°, we can give stronger accent lighting, and more prominent key effects.

Good heat dissipation

The lamp body adpot forging design and forming process by pure-aluminum, the surface sprayed with matte white and gray, which offer better heat dissipation with longer service life, also an upscale appearance.

Long Lifetime

Lifetime reach 50,000 hours.

5 0 0 0 0 hours

UGR<19

Anti glare design, UGR<19, create a comfortable lighting environment atmosphere.

Narrow angle design

Narrow angle design, offer 10°, 24°, 40° even 5° or 8°, we can give stronger accent lighting, and more prominent key effects.

COB LED downlight

DL105 series

Unique structure

Unique structure ensure optimal cooling effect and light effect.

Aluminum alloy housing

Adopt aluminum alloy as material, die-casting process, high-end and gorgeous.
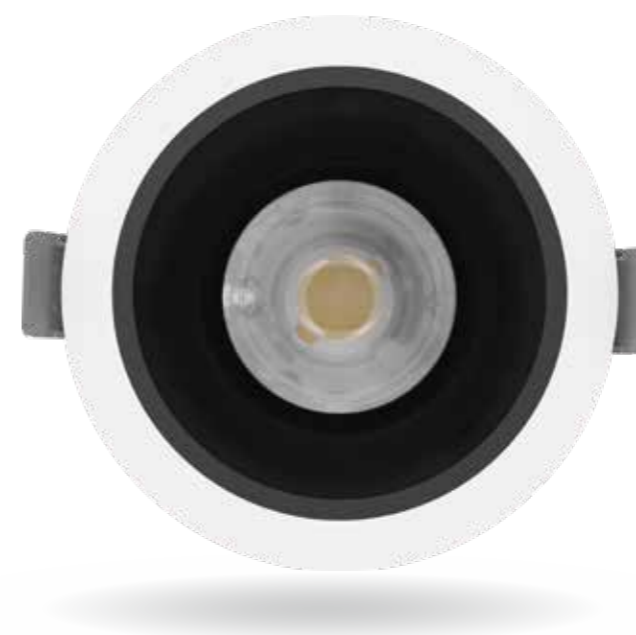

UGR<10

Secondary optical design

PC lens, with secondary optical design, the reject with metal luster to improve light effect and uniformity.

Significant energy-saving

Significant energy-saving, flexible color difference control system, ensure single persistance of light and color.

IP54 waterproof grade

IP54 waterproof grade, applicable to humid environment.

Color of reflector cup is optional

The reflective cup adopts vacuum plating process, with 5 colors available, and easy replacement.

Bright black

Sand silver

White

Silver

Gun black

IP64 waterproof downlight

CL103 series

Aluminum alloy material

Adopt aluminum alloy as material, Casting process,heat dissipation is good.
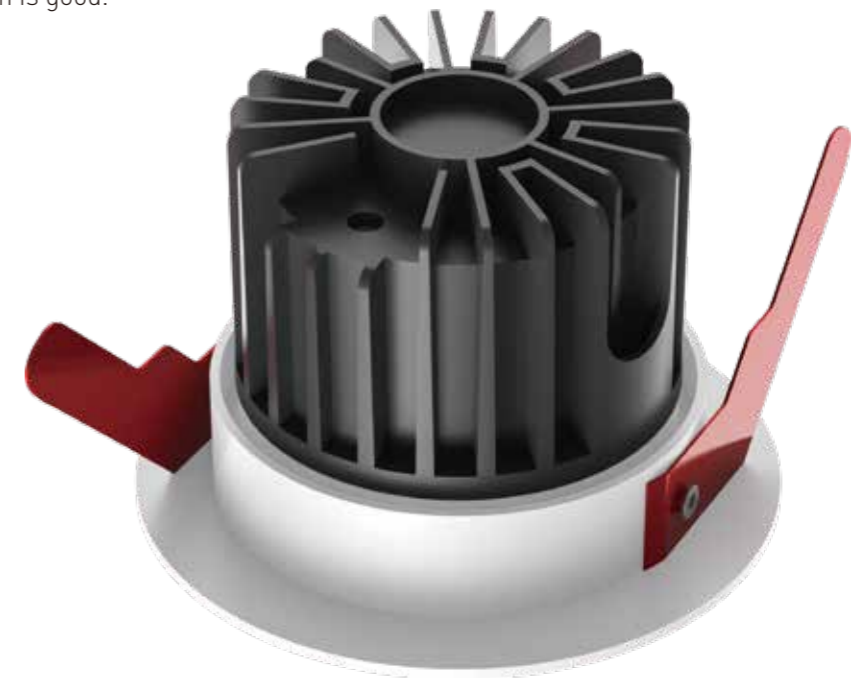

Uniform light

PC diffuser mask is adopted to give uniform light.
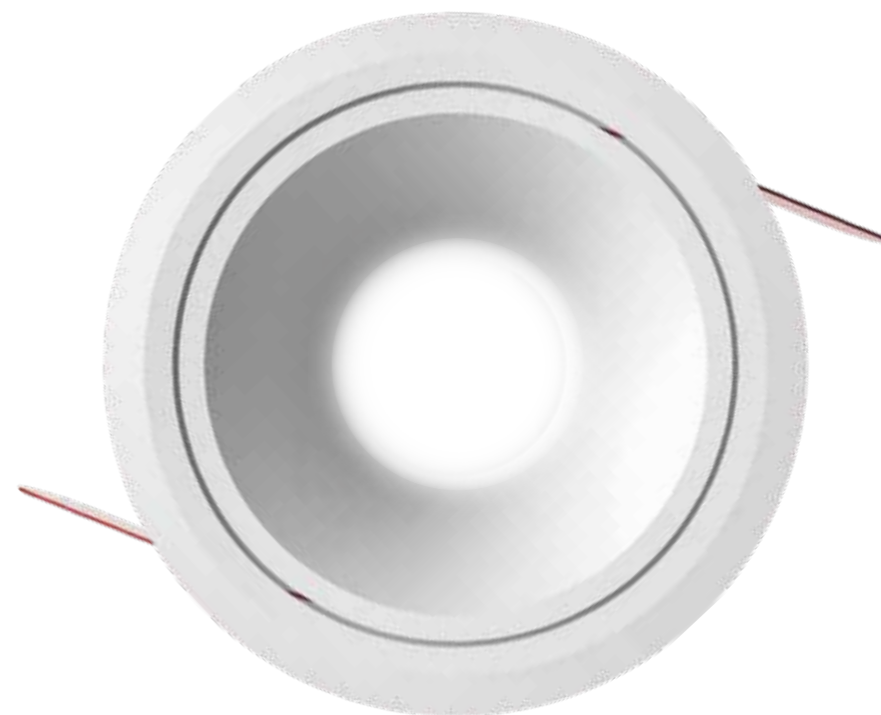

Deep anti-glare design

Professional lens design, high transmittance, small light loss, anti-glare light.

Angle rotatable

Rotatable lighting angle, small light loss, large illumination area.

IP64 water-proof

Suitable for bathrooms, eaves，swimming pools,bathhouses and other water-related areas.

UGR<10 downlight

CL105/106/107 series

Die casting process

Adopt aluminum alloy as material, casting process. The heat sink and surface cover are formed independently.
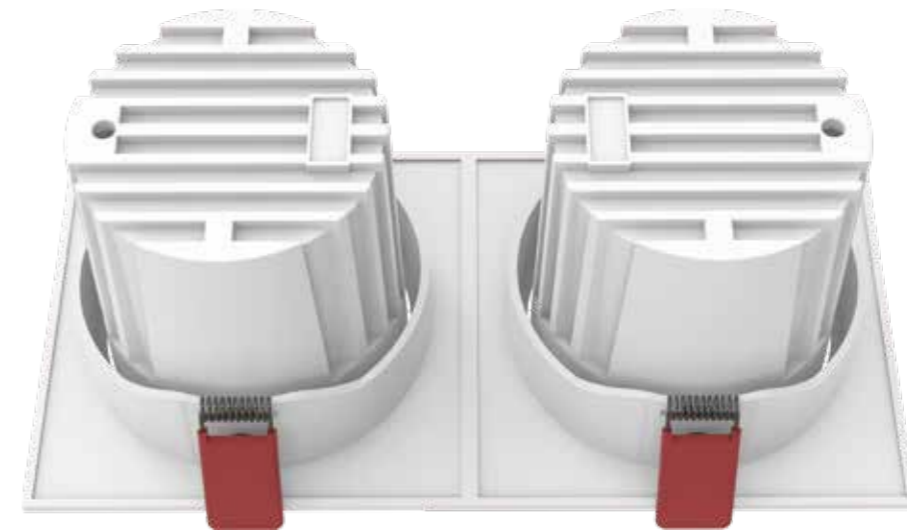

PC diffuser mask

PC diffuser mask is adopted to give uniform light. It is suitable for various anti-glare places.

Deep anti-glare design, UGR<10

Double reflective cups, can be used for deep anti-glare + honeycomb mesh anti-glare double-layer treatrment.
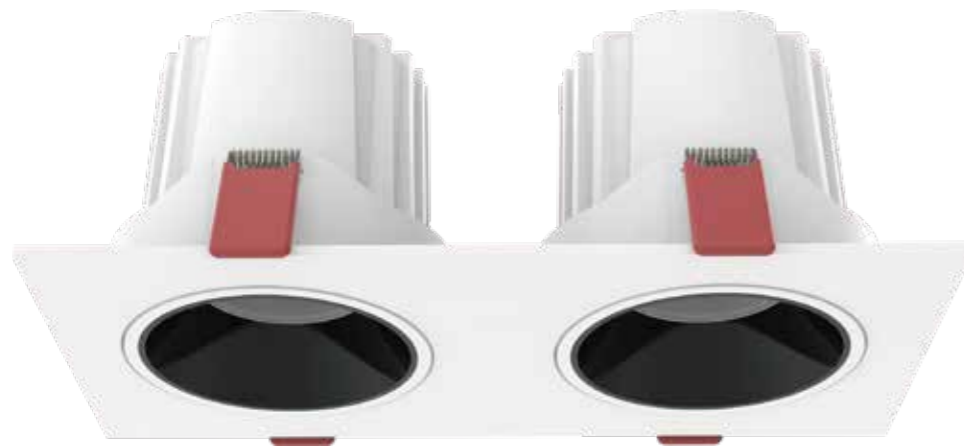

Snap fit installation

The lamp is snap-fitted for faster installation.

Optional reflection cup colors

Optional reflection cup colors (bright white, gun black, bright black), suitable for different needs.

Gun black   Bright white   Bright black

CL108 series

Die casting process

Adopt aluminum alloy as material, casting process. The heat sink and surface cover are formed independently.

Triple optical design

Professional optical lens, combined with reflection cup for three times of optical reflection, more uniform light.

Snap fit installation

The lamp is snap-fitted for faster installation.
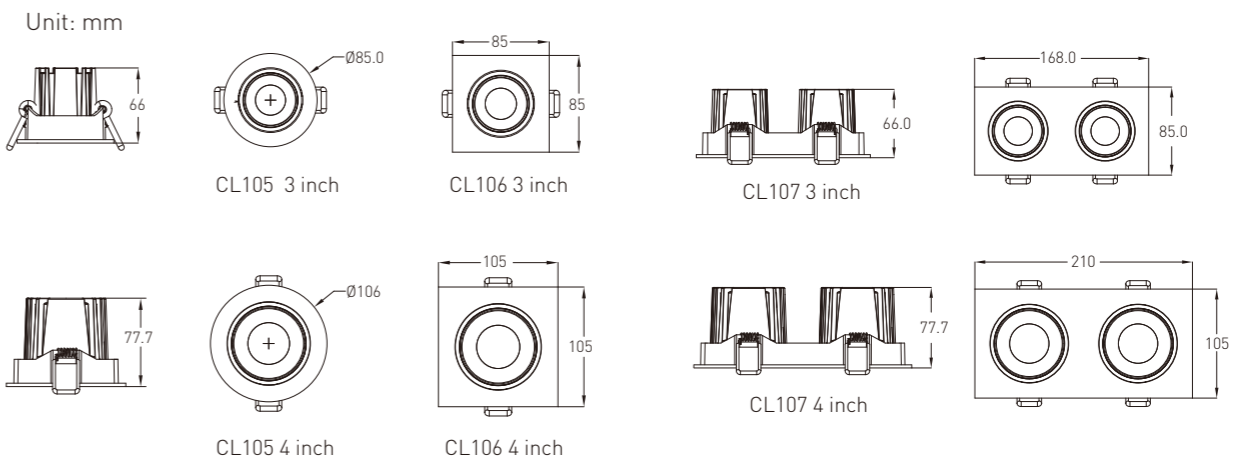

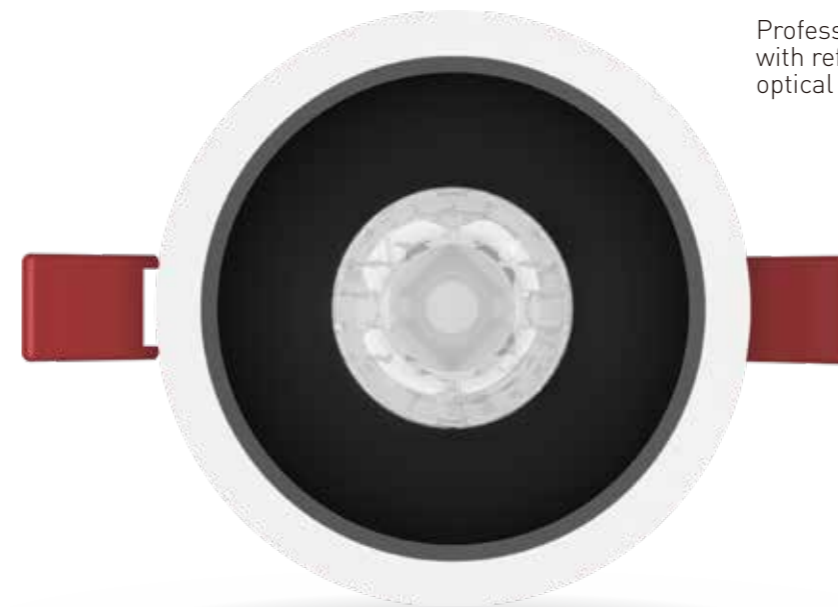

Optional reflection cup colors

Optional reflection cup colors, suitable for different needs.

Black   White

Three beam angles

Three beam angles: 10° / 23° / 36° for optional.
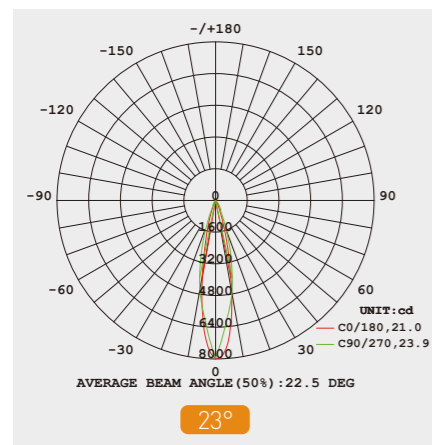

AVERAGE BEAM ANGLE (50%):22.5 DEG

23°

IP65 waterproof downlight

DL107 series

IP65 Waterproof

IP65 waterproof structure, you can install it to most wet location, like outdoor corridor, bathroom, ceiling of pookpak, saunas, etc.

Good heat dissipation

With aluminum alloy body, led feet temperature lower than 80° and improving the lamp service life.

UGR<19

Anti-glare design to efficiently reduce glare and create comfortable lighting environment.

3 seconds disassembly

Separate design of power supply and lamp body, easy disassembly and replace without any tools

LED Track Light

LED Track Light, as its name, is installed on track. As its adjustable beam angle, it is mainly applied in commercial places needing accent lighting, such as shopping mall (clothing store, furniture store and other brand shops), car showroom, jewelry, stars hotel, brand clothing, upscale club, culture relics exhibition hall, chain store, brand business hall, professional cabinet, counter and other accent lighting places.

TL301

TL102
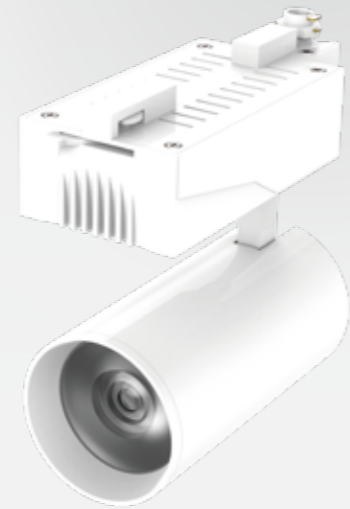

Good heat dissipation

High efficient heat dissipation.

Movable track

Movable track, convenient to adjust its places for different lighting purposes.

High transmittance

High transmittance, uniform luminous surface, no dark spot, non grainy;

Good color rendering performance

Can on-off frequently, no flicker and flare, good color rendering performance.
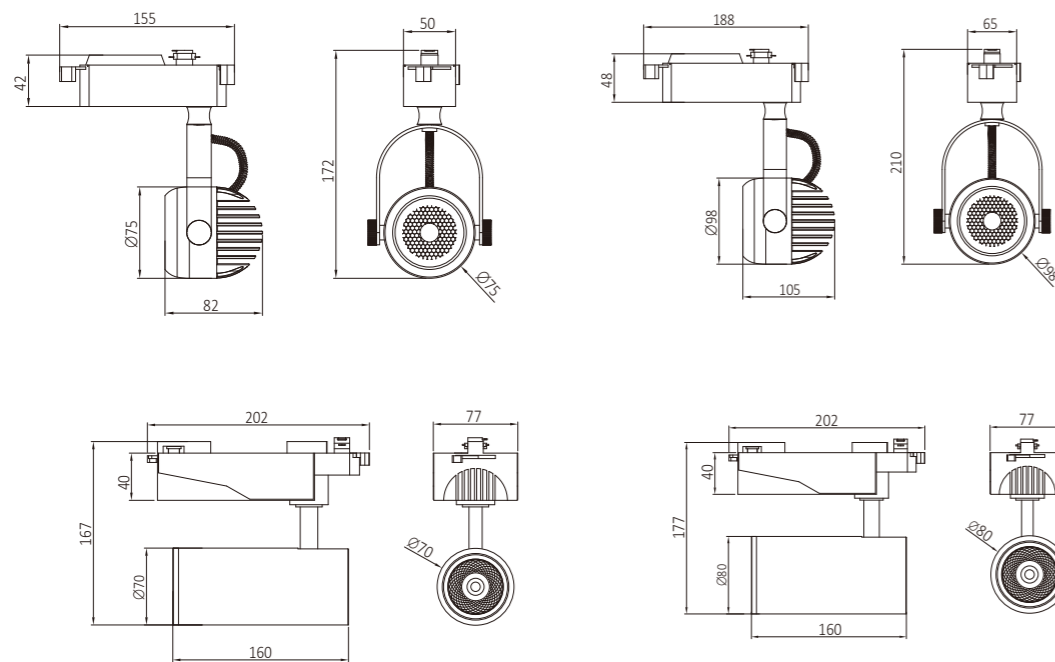

Color tunable

Three color temperature can achieve three-stage dip switch:2700K-4000K-600K.

CCT Dip switch

- 2700K
- 4000K
- 6000K

LED Cabinet light

LED cabinet lights will add value to kitchens and any room where extra light is needed, seamlessly enliven both the beauty and the functionality of any room.

CE 3CCT ultra-thin series | P273-278

**ETL** 5CCT tunable series | P279-284

LED cabinet light

3CCT ultra-thin series

Ideal for cabinets, closets, basements, stairwells, indoor garages and so on.

Soft and uniform light

High quality PC milky white diffuser, acrylic LGP, laser dotting technology , soft and uniform light, protecting eyes, no yellow, long life span.

LGP

PC cover

High quality anodized aluminum

Made of high quality anodized aluminum, sturdy and sleek, much longer lifespan than other items on market.

3 CCT adjustable

Warm white, natural white, and pure white can be switched easily, no flickering, protecting eyes.

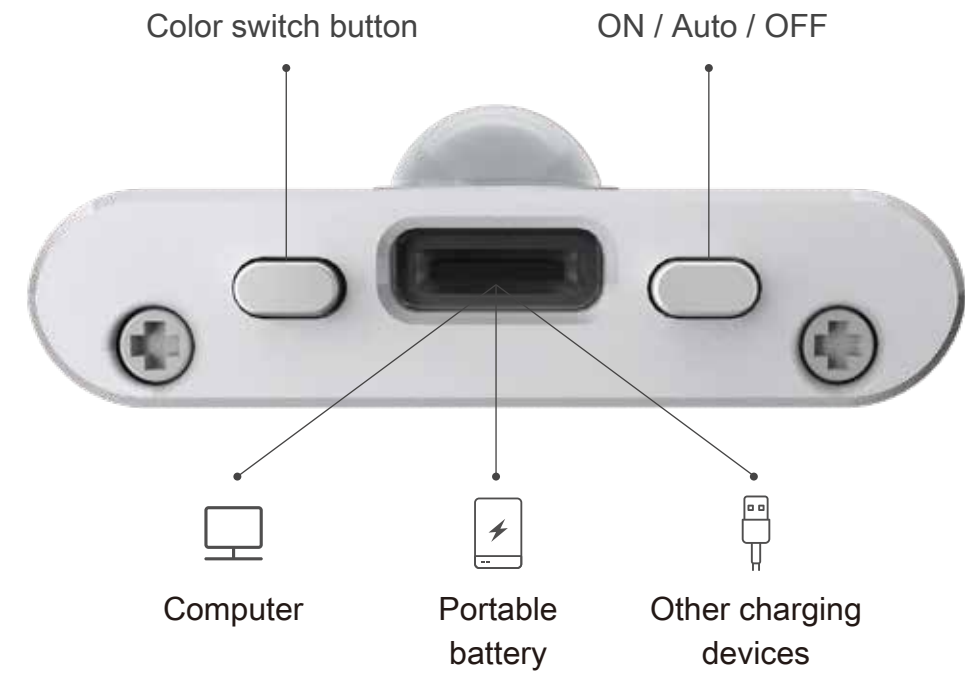

Warm white   Natural white   Pure white

Brightness adjustable

hand scanning version, brightness can be adjusted by hand hovering for two seconds with memory function.

Multi-function charging interface

Input DC5V, android USB charging port, computer, charge pal, etc.

Color switch button   ON / Auto / OFF

Computer   Portable battery   Other charging devices

Good vibration & touch button

Color temperature and function buttons are made of mechanical button, good vibration and touch.
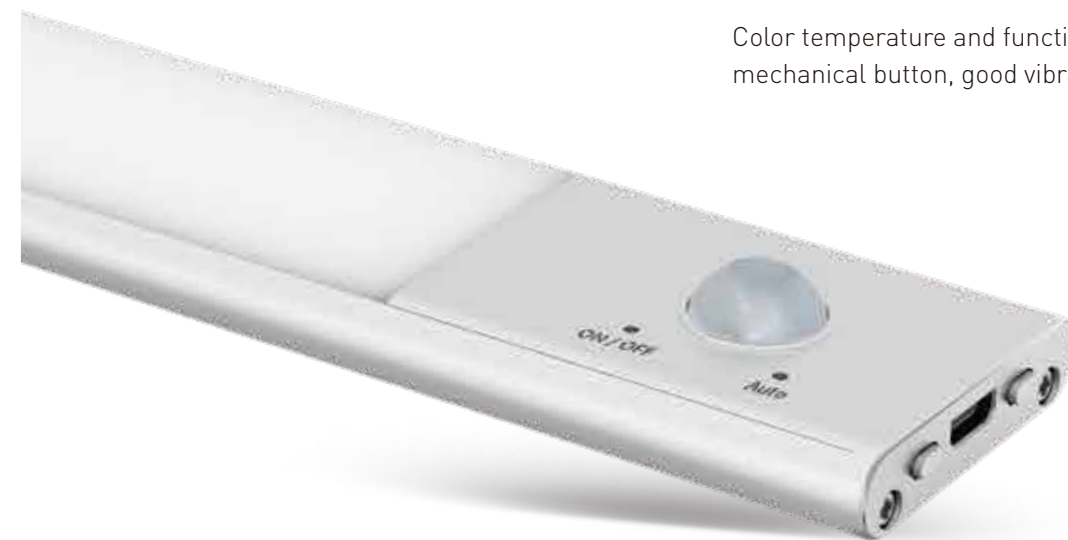

Ultra-thin thickness

9.5MM ultra-thin thickness, equivalent to the thickness of a mobile phone.

9.5mm

Two versions are available

PIR sensor version and hand scanning version are available.

Power adjustment

3-speed switch to control different levels of brightness, Full power, 50% power or off.
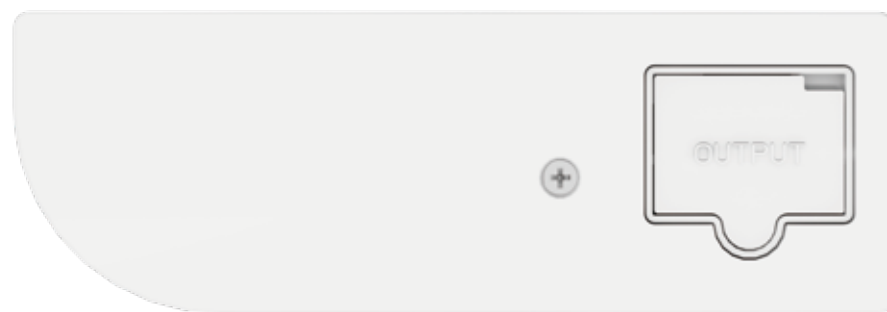

Rotatable 90 degrees

The rotatable luminaire faces the direction that suits your space, and the maximum can be adjusted to 90 degrees.

90°

Protective cover design

Prevent electric shock, ensure safety.

OUTPUT

Splicing function

Multiple lamps can be connected together by connecting wires or connectors, the maximum power is 300W.

Aluminum alloy shell

Good heat dissipation, ensuring the product lifetime durability.

Push-pull protective cover

Built-in switch, transparent push-pull protective cover, dustproof, antifouling, easy to clean.

Compatible with most dimmers

Ensuring the product lifetime durability, dimmable with most wall/box dimmers.

Security light

LED security light is made with highbrigness white light-emitting diode light source, it match a motion sensor, detect distance adjustable up to 70ft, and integrated dusk to dawn photocell.

Camera Motion Security Lights

SEC101P series

The product uses PIR sensor to detect infrared signal, which is transmitted to the camera for processing to control LED lamps.
If someone walks into the detection area, the light will be turned on automatically.

1080P camera

HD real-time video recording, viewable anywhere and anytime via APP,
local storage and cloud storage optional

Intercom function

Hear and speak to people on your property with two-way talk.

Prompt and alarm

Sound the security alarm on suspicious activity.

Night vision fuction

Two 850nm high-power infrared night vision fill lamps, automatic light sensing day and night.

WORKS WITH
amazon alexa

works with the
Google Assistant

amazon

Color temperature optional

Single color temperature version: adjustable brightness 1-100%, non adjustable color temperature.
Dual color temperature version: adjustable brightness 1-100% and color temperature (3000-5000K).

Directional lighting

Adjustable motion sensor and camera
Pivoting arm allows directional lighting.

Large sensing angle

Adopt 125 degree Fresnel lens, larger PIR detection angle.

Dual CCT version can adjust the white/warm white with Tuya App

High quality SMD2835 LEDs with uniform illumination

30°

350°

90°

Pivoting arm allows directional lighting
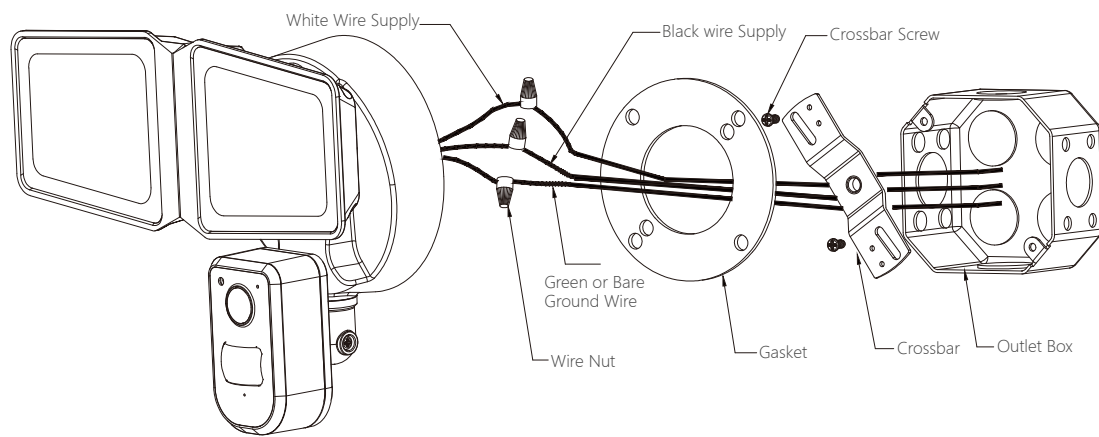

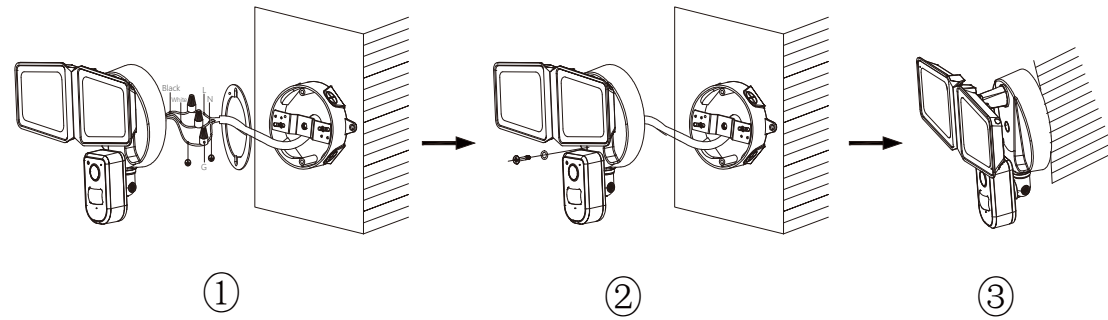

Non-isolated drive, PF>0.9, energy-efficient

3-in-1 detection design

Advanced PIR and motion sensors+portrait recognition technology intelligently recognize people's movements, improving detection quality and reduce false alarms.
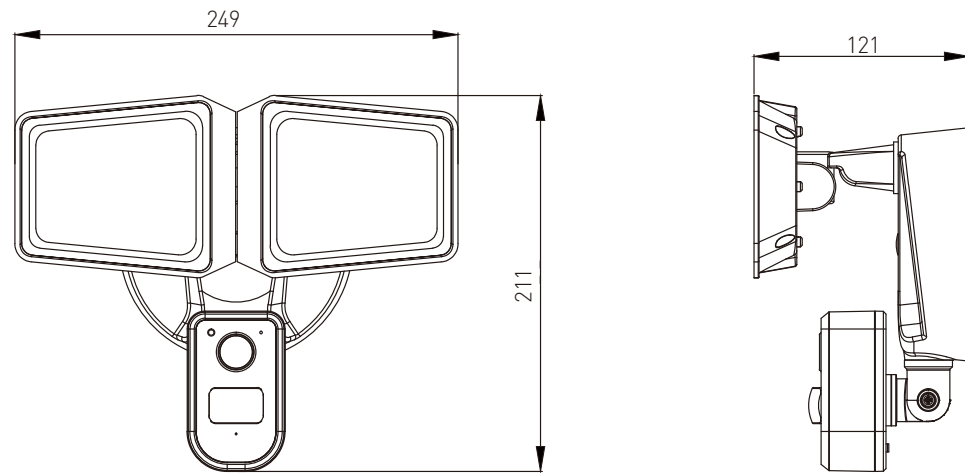

Max.8m
Detection Area

Support two video storage methods: MAX. 128G TF memory card and cloud storage (Payment required)

Night vision fuction

The camera uses two high-power 850nm patch
infrared night vision fill lamps,full-color
recording even at night.
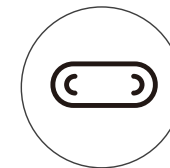

Integrated mask design

Full plastic shell design, full screen light
emitting surface floodlighting design,
greater illumination angle.

High efficiency

>3000LM Lighting Effect，30W
power, soft light is not dazzling.

Camera Motion Security Lights

SEC401P series

The product can remotely monitor the camera image on the mobile phone in real time
through the Tuya smart app. The product comes with a memory card or you can purchase
cloud storage. You can also watch the playback video screen via the APP.

WORKS WITH
amazon alexa

works with the
Google Assistant

High sensitivity motion detection

The design scheme of high sensitivity motion detection + human body sensing 2-in-1 is adopted to reduce false triggering and improve detection accuracy.

Directional lighting

Adjustable motion sensor and camera
Pivoting arm allows directional lighting.

IP65 waterproof

The structure adopts special waterproof design, and the waterproof grade reaches IP65.

High quality SMD2835 LEDs,
Full screen luminous mask

Pivoting arm allows
directional lighting

The structural design of the universal head makes it easy to adjust the angle of shooting and sensing.

Intercom function

Hear and speak to people on your property with two-way talk.

Prompt and alarm

Sound the security alarm on suspicious activity.

280

200

166

Mainly used for lighting in the corridors, side walls and portal of retail market, small supermarkets, storage rooms, library, etc.

LED Motion Security Lights
SEC401S series

Two PIR sensing modes

Auto-sensing mode: the light is off if no human movement is detected, the light is on if human movement is detected. Ambient light sensing mode: ambient light >30lux, the light is off, ambient light＜30lux, the light is on.

High brightness LED

High quality SMD2835 LEDs with uniform illumination

Large rotation angle

Large rotation angle, flexible rotation, easy to adjust

LED energy-saving lamp is made of high brightness white light-emitting diode light source. lt matches a motion sensor, detecting distance adjustable up to 40ft, and integrated dusk to dawn photocell. Build-in PIR sensor or no sensor is available.
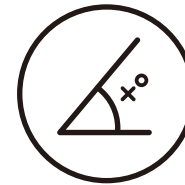

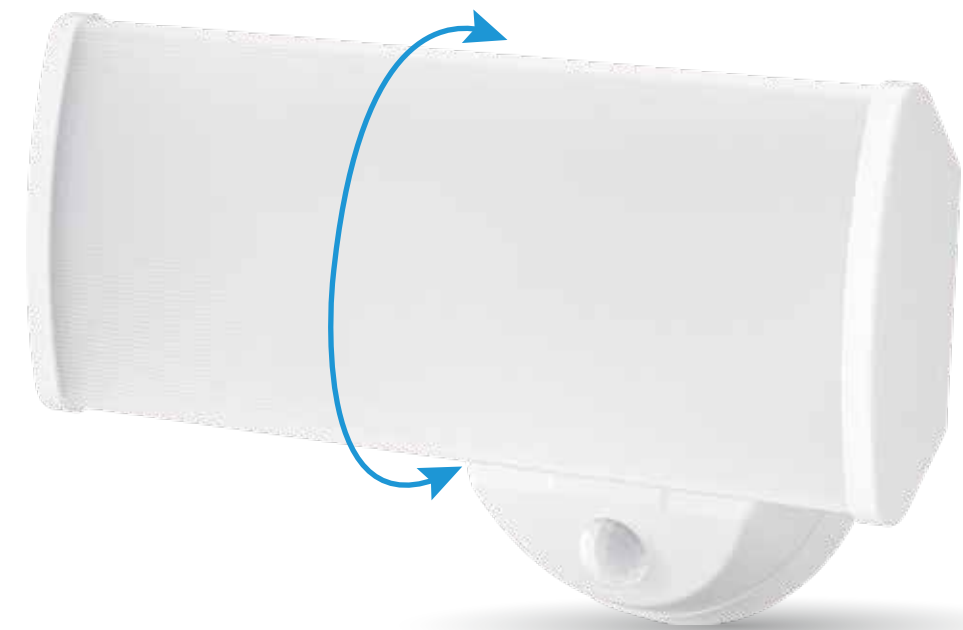

Integrated PC lampshade

Built in high-performance power supply, high efficiency

Rated IP65

Outdoor wet location rated IP65.

Easy to install

Easy to mount with Canopy

①

②

③

Rotation adjustment angle

Directional lighting

Pivoting Arm allows directional lighting.

Removable lamp cap

The lamp cap can be disassembled, the color temperature of the lamp cap can be changed, and the transportation is convenient.

High temperature and aging resistance

The lampshade adopts an integrated PC lampshade, which is high temperature resistant, aging resistant and uncoated.

Mainly used for lighting in the corridors, side walls and portal of retail market, small supermarkets, storage rooms, library, etc.

LED Motion Security Lights
SEC101S series

LED energy-saving lamp is made of high brightness white light-emitting diode light source. It matches a motion sensor，detecting distance adjustable up to 40ft,and integrated dusk to dawn photocell. Build-in PIR sensor or no sensor is available.

Adaptive D2D mode

When the ambient light is below 30lux, the light will be on for a long time, and when the ambient light is above 100lux, the light will be turned off automatically.

Large sensing angle

Adopt 180 degree Fresnel lens, larger PIR detection angle.

High-performance power supply

Built in high-performance power supply, efficiency up to 92%, no noise, reduce loss and improve luminous flux.

Optical PC lampshade

The lampshade adopts optical grade PC lampshade, which is resistant to high temperature, aging and easy to damage.

Optical grade PC lampshade, anti-aging

High thermal conductivity aluminum alloy material

Adjustment arm for aiming motion sensor

Rated IP65

Outdoor wet location rated IP65.

Directional lighting

Pivoting arm allows directional lighting.

Large rotation angle

Large rotation angle, flexible rotation, easy to adjust

Application

With its wide range of application, it's mainly used for lighting in the corridors, side walls and portal of retail market, small supermarkets, storage rooms, libraries, etc.

8m /26FT

13m / 51FT

5759

SENS Knob:

The knob for adjusting sensitivity, namely the detection distance, 8m at the maximum and within 1m at the minimum.

SENS

TIME Knob:

The knob for adjusting the time of keeping the light on, 600s at the maximum and 2s at the minimum.

TIME

TIME Knob:

The knob for adjusting the illuminance to trigger the luminaire, 300LUX at the maximum and within 10LUX at the minimum.

LUX

Method of setting the mode of sensing test:

Adjust the TIME knob to the minimum and adjust the LUX knob to the "sun" mark. When test is completed, adjust the 3 knobs to the status of use.

3CCT switch function

Build-in 22pcs 3000K mixed 22pcs 6000K leds per head, customer can choose 3000K,4000K, 6000K by DIP switch based on different requirement before installation. It's convenient and help reduce stocks.
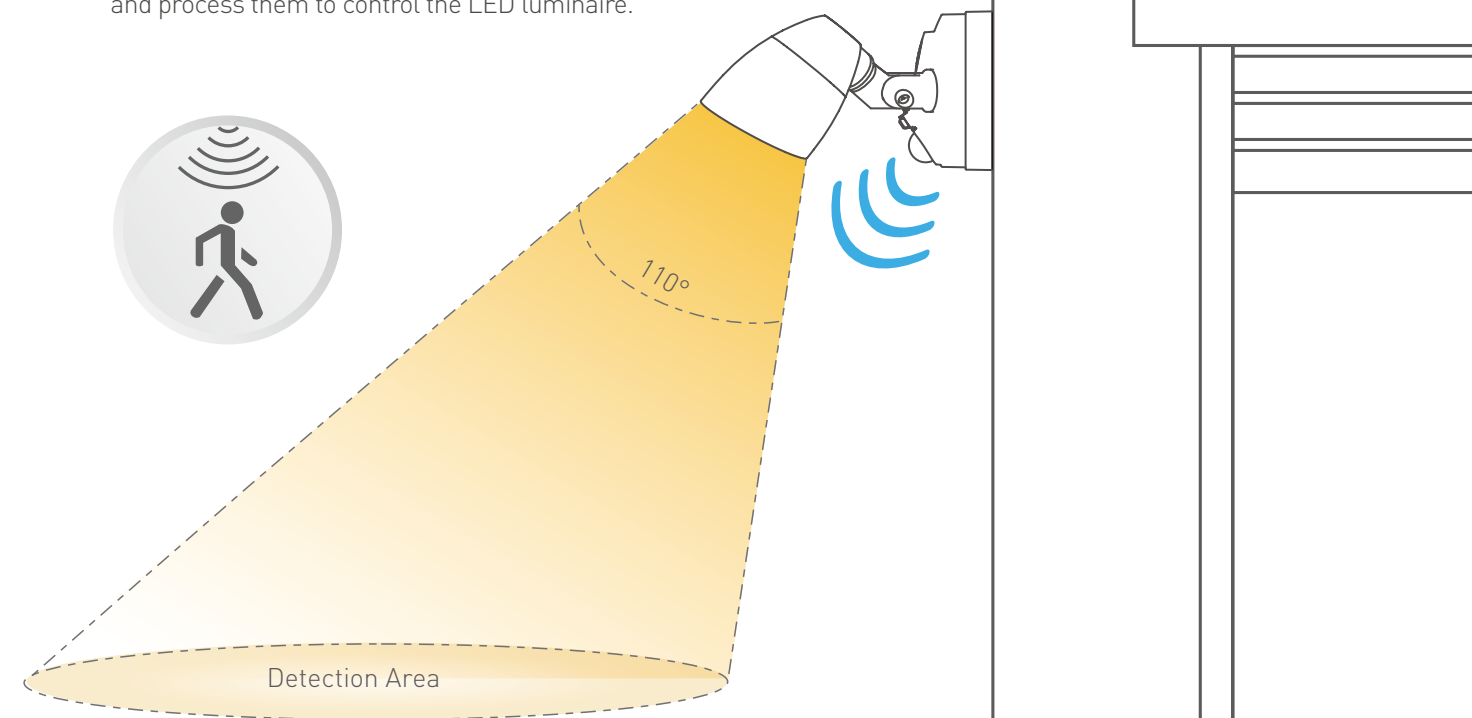

3000K   4000K   6000K
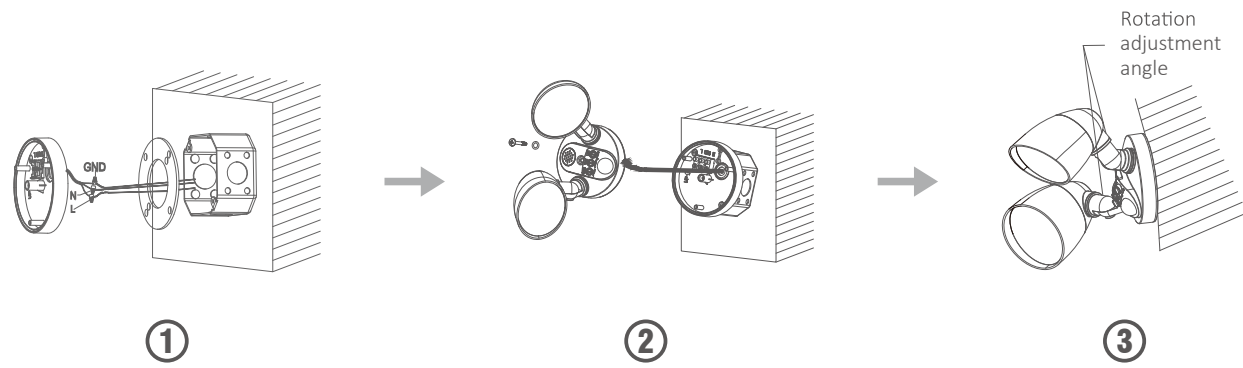

Easy to mount

In just a few simple steps, it can get ready to work in a short time.

PIR sensor
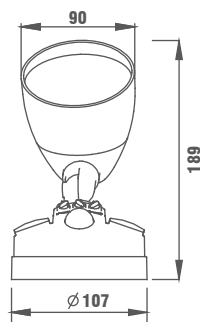

The product uses a PIR sensor to detect infrared signals and process them to control the LED luminaire.

Portable Utility light

The multifunctional portable utility light, eco-friendly, has patent design appearance; the lamp can be used according to customer's requirments; at the same time, the lamp can charge mobile phone, really realize energy-saving, eco-friendly, safe, convenient.

CE Solar rechargeable series | P331-336

CE Protable Utility Light III series | P337-342

CE Protable Utility Light II series | P343-348

Portable Utility light
Solar rechargeable series

360 degree lighting, a camping light can provide enough brightness to illuminate the whole tent or room.
Diffused Milky white PC lampshade is adopted to provide more uniform, exquisite and anti glare light and protect eyes.

Solar charging

Simply place your lantern outside with the solar panel facing up to use sunlight to power your lantern.
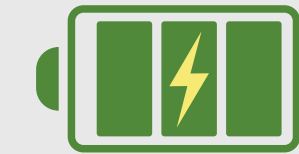

4400mAh large-capacity battery, long-lasting power

Type-c charging

Can be fully recharged via the cable around 5 hours, then one light can last 4-15 hours.

Charge using the USB port output of adapter, computer or power bank.

4 Light Modes

3000-5000-6000K graded color temperature, a variety of brightness, in case of emergency, turn on the SOS flashing light to transmit rescue signals in time.

3000K
5000K
6000K
sos help

RGB colorful atmosphere lights

Make the darknight no longer monotonous, but also according to the preferences of color

IPX4 life waterproof

The camping light is IPX4 water-resistant that no worries for small rainy or splashing water in all directions, perfect for outdoor and indoor usage.

Compact & Light weight

As small as your phone, which could be easily fit in your pocket, backpack and camping supplies, very easy to carry. Each camp light also equipped with a hook, easy to be hung in a tent or tree.

Limited Warranty

The "Warranty Period" will begin at the date of original Product purchase form either Signcomplex , or an authorized Signcomplex Distributor/Dealer. Signcomplex will repair or replace product covered under this warranty with components at Signcomplex's election or discretion. Advances in technology may lead to "better or advanced" products being selected for replacement.

This Warranty is further conditioned on the purchaser contacting Signcomplex during the warranty period between normal business hours to review the issue and initiate the Returned Merchandise Authorization (RMA) process. This must be done prior to the return of any defective product. Only Signcomplex manufactured products may be returned through the Signcomplex RMA process. No defective products, Signcomplex or otherwise, will be returned to purchaser. The Signcomplex RMA form must be legible and completed in detail prior to approval for return. The Signcomplex Warranty is further conditioned and will only apply to Signcomplex products that are properly installed. This includes wiring and connection to proper approved components and product working environments. This Warranty is void and does not apply to products that fail as a result of neglect, mistake, misuse, alteration, improper installation or implementation. This includes but is not limited to: improper wiring, installation under improper and nonapproved operating environments such as temperature, humidity or voltage conditions; improper ins-tallation using components that are not approved or are not Signcomplex manufactured products.

Installation and usage of Signcomplex products should only be completed in association and complete knowledge of all necessary and related codes, standards and instructions of installation. It is the responsibility of the purchaser to obtain all necessary approvals and to understand the product's intended use and all relevant instructions, recommendations, and guidelines for the proper installation, use of any Signcomplex product and related "manufactured products," used in conjunction with . The accuracy and completeness of any statements, technical information and recommendations in any form of product literature or instructions are not guaranteed, are not part of this Warranty, and does not in any way cons-titute a warranty. The purchaser is responsible for suitability of installation and full implementation and must determine potential applications and installations independently.

Warranty Compensation will be based on"usage factors and time in use" and "Technology Value," and will be prorated based on this and information collected via the RMA process.

Product Warranty Matrix

LED downlight	3years/5years
LED panel light	3years/5years
LED linear light	5years
LED security light	3years/5years
LED cabinet light	1year/5years

What is not covered under this Limited Warranty is defects of any kind caused or created by improper installation of any kind; damage caused during shipping to purchaser or beyond "acts of Nature or God." Signcomplex will not cover additional labor costs or Warranty such labor associated with replacement products. This Warranty document represents the only ex-press or implied Warranty – no other Warranties exist.
