

Ring Access Controller Pro

Available in Cellular & Ethernet

Ring Access Controller Pro is Ring's first-ever entry into the access control space. This all-new device is professionally installed and allows users to remotely operate their electronically-controlled gate directly from their Ring App when paired with a Ring Video Doorbell or Cam, as well as receive secure, in-gate deliveries from Amazon via Key by Amazon.

When paired with a Ring Video Doorbell or Cam, users can open their live view, see who is at the gate, and securely let them in right from the Ring App.

Ring Access Controller Pro

*Professional installation required.
