Welcome to your course

Welcome to your 11+ course! Are you ready to become a fearless exam taker?

Throughout this course, we're going to help you build the skills you need to tackle all the subjects needed for your test and get you in the mindset to tackle your exams with confidence. We just need one thing from you to start with: to **believe in yourself like we believe in you**. And if you get stuck, we're here to help every step of the way.

This book is your course companion. It gives you all the information you need, as well as being one place for all your tests, scores and reflections. There's even a vocabulary log at the back for new words you pick up along the way.

You may come across questions that are tricky, and sometimes you'll get them wrong, but don't worry, that's how learning works! Being a fearless, confident learner doesn't mean getting everything right the first time; it means having a go, asking for help when you need it, and trying again.

The next few pages will explain how everything works, and give you a breakdown of what you need to know. If you have any questions, don't hesitate to reach out to your manager team or tutor. We are here to help.

Let's get started!

Registering for your 11+ exam

Explore Learning does not register or apply for 11+ or entrance exams on behalf of families. Please check registration deadlines directly with your chosen school(s) or local authority. Your manager team can point you in the right direction if you're not sure where to start.

How your course works

Your weekly sessions

You'll be given a course plan and each week, you'll attend a lesson that covers one or two topics across Maths, English, Verbal and Non-Verbal Reasoning. Depending on your package, you will also attend an additional session in the week working on a mix of these topics on Compass.

Homework

Each week, you'll be given homework to complete before your next lesson. This will usually be practising what was taught in the lesson, or it may be completing a short test. Your tutor will tell you what to complete, and you can also see the homework in your course planner.

Make the most of Compass

Alongside your homework, we strongly recommend you practise on Compass as much as possible between lessons. Compass is our smart learning platform and has two spaces to help you.

My Learning Programme

Your tailored learning pathway. It mixes topics using our spaced learning approach, and if you complete it, you'll have covered everything you need to prepare for your test. This is also where most of your progress reporting comes from, so it's the best place to focus most of your practice time.

Topic Practice

This is for drilling down into specific topics you're finding tricky or want more of. This is useful, but shouldn't take over from My Learning Programme - balance is key!

Levels

At Explore, we split 11+ work into six levels. This book covers levels 4-6 aimed at Year 5 students scaffolding up to level 6, which is exam-level. You may also see some level 6 work appear in a test before you've formally reached it - but don't worry! That's expected, and it's why regular practice with your tutor on Compass will help you get there.

How to use this book

Your lessons and day-to-day practice will happen on Compass with your tutor. This book is where you'll find your tests and keep your results and reflections.

1 Find your test

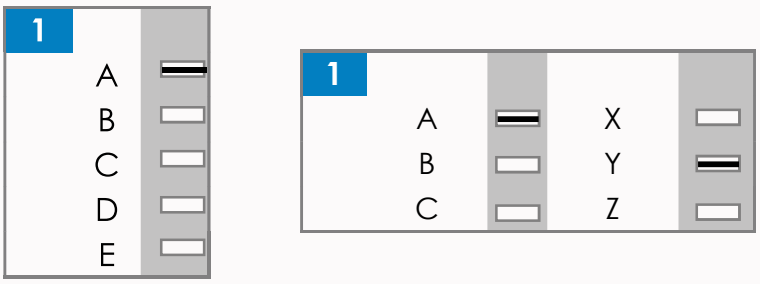

Use your course planner to find out when you will be doing a test. Make sure you bring your book in for marking.

2 Tear out your answer sheet

At the end of each test, there will be a perforated answer sheet per subject to mark the correct answer. These pages can be torn out and placed alongside the test paper to mark answers as you're working.

3 Answer questions accurately

Boxes should be marked with a **thin horizontal line**, as shown in the example below. When **two answers are required** for a question, mark an answer from each column of the box with a thin horizontal line.

The 11+ test will be marked by a computer, but it is important to learn how to use the answer boxes correctly in preparation for the exam. **Mistakes should be rubbed out** carefully, not crossed out, since in the real test this would not be recorded properly by a computer.

4 Reflect on how you did

Use the pages after each test to think about how it went and what you want to work on next. Refer back to these pages regularly.

5 Record your results

Mark your work with your tutor and record your score in your results table (page 8).

Understanding your tests

There are three types of tests as part of your course. Two types are in this book; the final type is separate. All tests are broken into 4 papers (Maths, English, VR, NVR) and should only be completed AT HOME when directed to do so by your tutor.

Interim Tests

You will complete three interim tests throughout this course. They're designed to check for learning of concepts covered, highlight areas of strength and areas for additional practice, and let you practise exam techniques learnt in lessons under exam conditions.

Subject Review Tests

These test papers are completed nearer the end of the course and are designed to be a broader test of the subject from across the year. They allow you to identify gaps before your exam and are a great way to revise subject content.

Mock Tests

You will be invited to attend a 'Mock Test Day' in your nearest centre to give you an experience of what a real test might be like. These tests have never been seen before and are not in this book; you will be given real mock-style papers on the day.

Which sections should I complete?

Your tutor will direct you to the relevant sections depending on your course plan and the exam you're preparing for. If a subject isn't part of your plan, you won't need to complete the tests linked to it. You may meet questions you haven't been taught yet - that's normal! Have a go and use Topic Practice on Compass afterwards for more work on those topics.

Marking, feedback and reflection

After completing a test at home, you'll then mark it together with your tutor and add your scores on page 8. Reflecting helps you develop skills and review how effective they are. Being self-aware means you are always improving while keeping a positive mindset. You'll get time after each test to reflect, and use Compass to work on target areas.

Exam top tips

Before your test, make sure that you:

- [ ] Have your equipment ready.
- [ ] Listen to instructions carefully.
- [ ] Check how much time you have.
- [ ] Know who to ask for help if you get stuck.

Look after yourself!

A good night's sleep and regular meals help your brain and body feel ready to learn. Before a test, try to get plenty of rest, eat something you enjoy and have some water. Looking after yourself is part of preparing, too!

Work smarter, not harder!

- **Work accurately!** You may have optional answers, so choose the most reasonable answer if you don't know for sure.
- **Move on if stuck.** If you are stuck on a question, move on! Remember to complete enough questions to score well.
- **Work speedily!** Often the biggest challenge in the exam is completing enough questions to gain top marks.
- **Don't stop!** Use all the time you are given. If you finish before the time, use this time to check your answers are accurate (if instructions allow).

Exam techniques:

1 **Process of elimination** - can you rule out any answers that definitely can't be right to help you narrow down your choices?

2 **Spot key words** - underline important words in the question.

3 **Work backwards** - check your answer by putting it back into the question. Does it work?

My notes:

We are here to help.

How you feel is important. If you're feeling worried, pause and take a few slow, gentle breaths. Talk to a grown-up you trust, like your tutor, parent or carer. You don't have to work through worries on your own.

My Exam Toolkit

Every time you have an Exam Techniques lesson, use this page to complete your toolkit.

INTERIM TEST 1 – ENGLISH

- Interim Test 1 – English test includes 15 questions.
- You have **15 minutes** to complete this test.
- Answers should be marked on the answer sheet provided on Page 29, not on the test paper.

Read the extract then answer the questions that follow.

The Old Gentleman

Here in the deep silence of the sleeping country the only things that went by were the trains. They seemed to be all that was left to link the children to the old life that had once been theirs.

Straight down the hill in front of Three Chimneys the daily passage of their six feet began to mark a path across the crisp, short turf. They began to know the hours when certain trains passed, and they gave names to them. The 9.15 up was called the Green Dragon. The 10.7 down was the Worm of Wantley. The midnight town express, whose shrieking rush they sometimes woke from their dreams to hear, was the Fearsome Fly-by-night. Peter got up once, in chill starshine, and, peeping at it through his curtains, named it on the spot.

It was by the Green Dragon that the old gentleman travelled. He was a very nice looking old gentleman, and he looked as if he were nice, too, which is not at all the same thing. He had a fresh-coloured, clean-shaven face and white hair, and he wore rather oddshaped collars and a top-hat that wasn't exactly the same kind as other people's. Of course the children didn't see all this at first. In fact the first thing they noticed about the old gentleman was his hand.

It was one morning as they sat on the fence waiting for the Green Dragon, which was three and a quarter minutes late by Peter's Waterbury watch that had been given him on his last birthday.

"The Green Dragon's going where Father is," said Phyllis; "if it were a really real dragon, we could stop it and ask it to take our love to Father."
"Dragons don't carry people's love," said Peter; "they'd be above it."
"Yes, they do, if you tame them thoroughly first. They fetch and carry like pet spaniels," said Phyllis, "and feed out of your hand. I wonder why Father never writes to us."

"Mother says he's been too busy," said Bobbie; "but he'll write soon, she says." "I say," Phyllis suggested, "let's all wave to the Green Dragon as it goes by. If it's a magic dragon, it'll understand and take our love to Father. And if it isn't, three waves aren't much. We shall never miss them."

So when the Green Dragon tore shrieking out of the mouth of its dark lair, which was the tunnel, all three children stood on the railing and waved their pocket-handkerchiefs without stopping to think whether they were clean handkerchiefs or the reverse. They were, as a matter of fact, very much the reverse.

And out of a first-class carriage a hand waved back. A quite clean hand. It held a newspaper. It was the old gentleman's hand.

INTERIM TEST 2 – ENGLISH

- Interim Test 2 – English test includes 15 questions.
- You have **15 minutes** to complete this test.
- Answers should be marked on the answer sheet provided on Page 53, not on the test paper.

Read the poem then answer the questions that follow.

***I Wandered Lonely as a Cloud* by William Wordsworth**

I wandered lonely as a cloud
That floats on high o'er vales and hills,
When all at once I saw a crowd,
A host, of golden daffodils;
Beside the lake, beneath the trees,
Fluttering and dancing in the breeze.

Continuous as the stars that shine
And twinkle on the milky way,
They stretched in never-ending line
Along the margin of a bay:
Ten thousand saw I at a glance,
Tossing their heads in sprightly dance.

The waves beside them danced; but they
Out-did the sparkling waves in glee:
A poet could not but be gay,
In such a jocund company:
I gazed – and gazed – but little thought
What wealth the show to me had brought:

For oft, when on my couch I lie
In vacant or in pensive mood,
They flash upon that inward eye
Which is the bliss of solitude;
And then my heart with pleasure fills,
And dances with the daffodils.

1. What word in the first stanza tells you there are a lot of daffodils?

The Incredible Machine

Everyone has a favourite attraction at an amusement park, and I am no different. However, unlike most people, who seem to prefer roller coasters, my favourite ride is a little more gentle. Every time I go to an amusement park, I absolutely have to ride the Ferris wheel.

The Ferris wheel is simple and yet also quite complex. That is, riding it is easy, but how it works is complicated. A series of carts are attached to a wheel, which is attached to a rim. That rim rotates vertically around an axis, and gravity keeps the carts upright. As simple as the ride seems, only advanced engineers can make Ferris wheels that are both safe and fun.

What it Lacks in Thrills…

While the Ferris wheel is not as thrilling as a roller coaster, it is still very exciting. The fact of being high in the air makes it so much more entertaining than a lot of rides. I mean, how often do you hang that high up in daily life?

Nevertheless, I have to admit, I don't seek Ferris wheels out because of their excitement. Rather, I find them very relaxing. At the top of the Ferris wheel you get beautiful sights of the park. You also get a sense of calm that you don't get in the hustle and bustle of the park below.

It Happened at the World's Fair

The first Ferris wheel was made by and named after George Washington Gale Ferris, Jr. He designed it for the Chicago World's Fair in 1893. It was the tallest attraction there, standing 264 feet high.

However, visitors to the fair were impressed by the size of the ride, as well as the mechanics of it. In 1893, anything that was not turned by hand was considered a sight to see. And the wheel, which was a machine, was truly incredible to see. Furthermore, as one visitor put it, the wheel was amazing because it seemed to be missing support. That is, it did not look like it could stand on its own. And yet it did and even rotated!

They Keep Reaching Higher and Higher

Ferris wheel technology has only improved since then. Most of today's Ferris wheels are much larger than that first one. The largest in the world is Ain Dubai, which stands approximately 820 feet (250 metres) high, more than three times as tall as George Ferris's wheel.

Today, the Ferris wheel is the most common amusement park ride. But that does not mean you should take them for granted. Instead, be thankful for Ferris's invention. The next time you're at an amusement park, don't just look up at the impressive wheel in the sky on your way to a newer attraction, take it for a spin!

1. Choose a synonym for the word 'attraction'. (Line 1)

Review Paper A – English

Read the instructions carefully.

1. You have a passage to read and then answer some questions about it. You can look back at the passage to check your answers as many times as you want.
2. There are three sections of spelling, punctuation and grammar exercises to do.
3. This is a multiple-choice paper in which you have to mark your answer to each question on the separate answer sheet.
4. Draw a firm line clearly through the rectangle next to your answer like this  . If you make a mistake, rub it out completely and put in your new answer.
5. You have **50 minutes to answer 56 questions.**
6. You may find some of the questions difficult. If you cannot do a question, do not waste time on it, but go on to the next questions. If you are not sure of an answer, choose the one you think is best.
7. Work as quickly and as carefully as you can.
8. Make sure you can see a clock.
9. Allocate enough time to check your answers at the end.

Read the extract then answer the questions that follow.

Schools' Step-By-Step Guide to Fairtrade

Fairtrade is a way of buying and selling products that help make the world a better place. It is a system that ensures that the people who produce the products we buy are treated fairly. It started in the 1960s when people became concerned about the way farmers and workers were being treated in developing countries. Fairtrade helps these farmers and workers get a fair price for their products, so they can have better working conditions and a better life for themselves and their families. When a product is labelled as 'Fairtrade', it means that the farmers or workers who produced it were paid a fair price for their work. This price is determined by the Fairtrade organisation, and it takes into account the cost of living in that country. Fairtrade also ensures that the workers have safe working conditions and that they are not being exploited. According to the Fairtrade Foundation's annual report for 2019–2020, sales of Fairtrade products in the UK reached £1.7 billion, representing a 20% increase from the previous year. We've made a great start towards a better trade system for farmers in the developing world. But we've still got a long way to go, and we need more people to come with us in making the small steps towards a fairer world.

The World's Biggest Fairtrade Breakfast

Did you know that your breakfast has travelled a long way before it reaches your plate? Every year, people all over the world come together to celebrate Fairtrade by participating in the 'World's Biggest Fairtrade Breakfast'. This event is a way for people to enjoy a delicious breakfast while supporting Fairtrade products. By participating in this event, people can show their support for Fairtrade and help raise awareness about the importance of fair trade practices. World Fair Trade Day is the annual celebration for the whole Fairtrade movement internationally and is held on the second Saturday in May every year. We will be taking part in the World's Biggest Fairtrade Breakfast and we hope you will too! Start your day of Fairtrade as soon as you get up, with as many Fairtrade products as possible for breakfast! You could include products such as Fairtrade certified coffee, tea, sugar, juice, jams, chocolate spread and honey.

Fairtrade in School

Fairtrade is not only important for farmers and workers in developing countries but also for students like you! Many schools across the world have become Fairtrade schools, which means they have made a commitment to support Fairtrade products. By supporting Fairtrade in schools, students can help promote fairness, social responsibility and sustainable farming practices. School uniforms are a requirement for many students around the world, but have you ever thought about where they come from? By choosing to buy Fairtrade school uniforms, we can ensure that the cotton used to make them was produced in a fair and sustainable way. Cotton is one of the most widely traded commodities in the world, but cotton farmers often face challenges in getting a fair price for their products. Many cotton farmers live in developing countries and approximately 75% live in poverty. Fairtrade helps cotton farmers to reduce their environmental impact and increase their yields. Fairtrade supports farmers in reducing the use of harmful pesticides and adopting more sustainablefarming practices.

Some schools have even made a commitment to use Fairtrade uniforms, helping to create a more socially responsible and sustainable learning environment for students. School uniforms with Fairtrade cotton are now in many stores. But we can do more:

- Make a display about the difference Fairtrade makes to the lives of producers. Put it somewhere prominent so students, staff, parents / carers and visitors can see it.
- Ask your local uniform shop or retailer to stock Fairtrade cotton uniforms.
- Show them your school is interested in Fairtrade. You could do this with letters, a visit or even a presentation, to explain to them what Fairtrade means and how important it is to you.

Review Paper B – English

Read the instructions carefully.

1. You have a passage to read and then answer some questions about it. You can look back at the passage to check your answers as many times as you want.
2. There are three sections of spelling, punctuation and grammar exercises to do.
3. This is a multiple-choice paper in which you have to mark your answer to each question on the separate answer sheet.
4. Draw a firm line clearly through the rectangle next to your answer like this  . If you make a mistake, rub it out completely and put in your new answer.
5. You have **45 minutes to answer 56 questions.**
6. You may find some of the questions difficult. If you cannot do a question, do not waste time on it, but go on to the next questions. If you are not sure of an answer, choose the one you think is best.
7. Work as quickly and as carefully as you can.
8. Make sure you can see a clock.
9. Allocate enough time to check your answers at the end.

Read the extract from *Jo's Boys* by Louisa M. Alcott then answer the questions that follow.

This was the beginning of the summer holiday, and it was curious to see what a pleasant little stir Dan's and Emil's coming made in the quiet life of the studious community; for they seemed to bring a fresh breeze with them that enlivened everyone. Many of the collegians remained during vacation; and Plumfield and Parnassus did their best to make these days pleasant for them, since most came from distant States, were poor, and had few opportunities but this for culture or amusement. Emil was hail-fellow-well-met with men and maids, and went rollicking about in true sailor fashion; but Dan stood rather in awe of the 'fair girl-graduates', and was silent when among them, eyeing them as an eagle might a flock of doves. He got on better with the young men, and was their hero at once. Their admiration for his manly accomplishments did him good; because he felt his educational defects keenly, and often wondered if he could find anything in books to satisfy him as thoroughly as did the lessons he was learning from Nature's splendidly illustrated volume. In spite of his silence, the girls found out his good qualities, and regarded 'the Spaniard', as they named him, with great favour; for his black eyes were more eloquent than his tongue, and the kind creatures tried to show their friendly interests in many charming ways.

He saw this, and endeavoured to be worthy of it—curbing his free speech, toning down his rough manners, and watching the effect of all he said and did, anxious to make a good impression. The social atmosphere warmed his lonely heart, the culture excited him to do his best, and the changes which had taken place during his absence, both in himself and others, made the old home seem like a new world. After the life in California, it was sweet and restful to be here, with these familiar faces round him, helping him to forget much that he regretted, and to resolve to deserve more entirely the confidence of these good fellows, the respect of these innocent girls.

So there was riding, rowing, and picnicking by day, music, dancing, and plays by night; and everyone said there had not been so gay a vacation for years. Bess kept her promise, and let the dust gather on her beloved clay while she went pleasuring with her mates or studied music with her father, who rejoiced over the fresh roses in her cheeks and the laughter which chased away the dreamy look she used to wear. Josie quarrelled less with Ted; for Dan had a way of looking at her which quelled her instantly, and had almost as good an effect upon her rebellious cousin. But Octoo did even more for the lively youth, who found that her charms entirely eclipsed those of the bicycle which had been his heart's delight before. Early and late he rode this untiring beast, and began to gain flesh—to the great joy of his mother, who feared that her beanstalk was growing too fast for health.

Demi, finding business dull, solaced his leisure by photographing everybody he could induce to sit or stand to him, producing some excellent pictures among many failures; for he had a pretty taste in grouping, and endless patience. He might be said to view the world through the lens of his camera, and seemed to enjoy himself very much squinting at his fellow beings from under a bit of black cambric. Dan was a treasure to him; for he took well, and willingly posed in his Mexican costume, with horse and hound, and all wanted copies of these effective photographs. Bess, also, was a favourite sitter; and Demi received a prize at the Amateur Photographic Exhibition for one of his cousin with all her hair about her face, which rose from the cloud of white lace draping the shoulders. These were freely handed round by the proud artist; and one copy had a tender little history yet to be told.

SELF REFLECTION

Take some time to reflect on your review test experience. Although they may sometimes feel stressful, exams can also be valuable learning opportunities.

Your preparation

How confident did you feel going into the exam?

Did you prepare / revise for the test in any way?

_____

_____

Your performance

Did you understand and follow the instructions given for the exam? ☐ yes ☐ no

Did you have enough time to answer all the questions in the exam? ☐ yes ☐ no

Which topics were you most confident answering?

_____

_____

Which topics were you least confident answering?

_____

_____

What emotions did you feel during the exam?

_____

_____

What might you do differently next time?

In preparation for your next exam, write down one thing you will keep doing and one thing you will change for next time.

Keep	Change
