High-quality outdoor design

The quality of the experience of urban architecture is also influenced by illumination and areas that make people want to stay and spend time in a space. Luminaires and urban furniture for public spaces have to be fit for purpose for many decades to come.

This brochure presents a selection from our complete range of BEGA solutions for designing urban spaces.

Our furniture for public and semi-public spaces transforms open spaces into high-quality places to spend time in.

The exclusive design with unusual components gives urban districts a unique character.

In addition, we can provide you with inspiring insights into the product range from our sister company AUBRILAM. Their decades of expertise guarantee sustainable and durable wood products for outdoor areas. Find inspiration in our extraordinary options for open space design.

The following applies for all products: all our products are manufactured at our sites and fulfil the highest quality standards. The durability, value and the effect in the space will create the perfect look that will last for years to come.

We ensure that our products will last for decades, because we understand the importance of sustainability.

We see this as a journey that never ends, which is why we are constantly developing our products and processes. We never stop researching, looking for the next step, and taking our products to a higher level, in order to find the best possible solution for you.

You can find these products at [bega.com](https://www.bega.com) and [aubrilam.com](https://www.aubrilam.com). Detailed product information can be found by entering the article numbers provided in the search field on the [bega.com](https://www.bega.com) and [aubrilam.com](https://www.aubrilam.com) websites.

Ideas, planning, implementation

On the following pages you will find suggestions for furnishing public spaces.

There are four product categories to choose from:

BEGA Urban Design Elements, **BEGA Modular Furniture**, **BEGA Outdoor Furniture** and the **AUBRILAM collections**.

Each of them has its own focus.

BEGA

BEGA Urban Design Elements complement public space concepts with exceptional design features. Seating cushions, illuminated benches, cycle racks and the BEGA SolarHub create structure, provide orientation and enhance the quality of the urban environment.

BEGA Modular Furniture opens up a public space with a robust, modular system that integrates tables, planters and illumination as well as seating elements. The configurator available on our website will help you to visualise your individual ideas.

Tables, benches and stools in various designs are at the centre of **BEGA Outdoor Furniture**. This category also includes furniture for semi-public outdoor areas such as dividing walls, waste collectors and planters.

AUBRILAM

The **AUBRILAM collections** include urban furniture in various designs and material combinations.

AUBRILAM urban furniture is characterised by fresh combinations of materials and high-quality manufacturing. The company places particular emphasis on the use of timber from sustainable forestry, which is treated to ensure long-term durability.

Here we present a selection from the complete AUBRILAM range. You can also purchase these products from BEGA.

You can find the entire product range at aubrilam.com. You can reach AUBRILAM at the central e-mail address

info@aubrilam.com · aubrilam.com

BEGA Sales is your contact for both product lines. You can reach BEGA by contacting our central e-mail address and telephone number

Design elements of exceptional quality

BEGA street furniture and the AUBRILAM collections enable comprehensive environmental design of the highest quality. High-quality natural materials and durable metal solutions form the basis of the range. Materials used include modified Accoya® timber, laminated timber, aluminium, steel, high-pressure laminate (HPL) and high-performance concrete. Innovative surface and coating technologies ensure maximum weather resistance, corrosion protection, dimensional stability and a lasting, high-quality appearance. This makes them the ideal solution for landscape architects, local authorities and businesses seeking to design outdoor spaces sustainably.

Our pedantic approach to development and manufacture, together with the optimal protection of the materials used, ensure the attractiveness and durability of all our products. The decades of experience gained from developing exceptionally durable BEGA luminaires also shape our outdoor furniture. The result is perfectly formed and functional solutions that withstand even the most demanding weather conditions and retain their quality for decades.

Further information on the materials, finishes and manufacturing processes used can be found in the “Knowledge Centre” section of the BEGA website and on the AUBRILAM information pages.

Urban Design Elements

Exceptional urban furniture
for the highest demands

Public spaces gain their quality through design elements that combine functionality and aesthetics in a convincing way. BEGA Urban Design Elements complement sophisticated spatial concepts with extraordinary solutions that create structure, provide orientation and sustainably increase the quality of the environment. Seat cushions, illuminated benches, cycle racks and the BEGA SolarHub blend harmoniously into their surroundings and give squares, streets and open spaces a clear identity. This creates inviting urban spaces of high design quality that shape the character of public spaces and meet the requirements of modern urban infrastructure in the long term.

Concrete meets **seating comfort**

Seat cushions made from Accoya® timber transform on-site concrete structures into comfortable and durable seating areas. This high-quality timber impresses with its stability, weather resistance and sustainability.

Powder-coated steel frames and aluminium panels ensure additional robustness and a timeless design. Optional backrests and armrests, as well as the ability to combine different models, offer a wide range of possibilities for individual solutions in public spaces.

Light that invites you to linger

Seating with integrated lighting combines a pleasant atmosphere with an atmospheric staging of outdoor spaces. It creates inviting places to linger, adds design accents and also contributes to orientation in the dark. The robust aluminium stools and benches feature a durable BEGA Unidure® coating in graphite or silver.

Seat cushions made from Accoya® timber – a particularly dimensionally stable and durable timber sourced from sustainable forestry, which is permanently protected against the elements – ensure a high level of seating comfort.

Impressive seating furniture

for urban open spaces

This new range of furniture combines impressive design with high functionality, creating inviting places to linger in public spaces. Softly rounded seating surfaces and distinctive supports give the benches and stools a powerful yet inviting design language. The seating surfaces are available either entirely in durable Accoya® timber or complemented by an aluminium element that accentuates the design and subtly supports the orientation of the seating. Made from aluminium and steel, the elements combine high durability with timeless design. A structurally integrated drainage system effectively channels rainwater away from the structure.

Geometric seating furniture with clear design language

Seating is an essential component of high-quality public spaces. The stools and benches in this range combine a clear, geometric design language with high functionality. Precisely proportioned seating units, striking supporting structures and fine shadow gaps characterise the design and lend the furniture a light yet robust appearance.

A distinctive design feature is the asymmetrically supported stool, whose out-of-center support creates a striking, seemingly floating effect. Made from aluminium and steel with seat surfaces in durable Accoya® wood, the seating furniture combines stability, durability and a wide range of design options.

Slim design, **strong support**

With their minimalist design and high-quality finish, BEGA cycle racks offer a durable solution for secure cycle parking. The models, made from hot-dip galvanised steel or aluminium with a BEGA Unidure® coating in graphite, add subtle design accents and blend harmoniously into their surroundings.

Whether mounted directly on ground, on a foundation or with a ground anchor, they allow for flexible adaptation to a variety of outdoor requirements. This creates secure bicycle parking spaces for private, commercial and semi-public areas.

BEGA SolarHub Shade: Self-sufficient energy under one roof

BEGA SolarHub Shade is a self-sufficient lighting and power supply system for sheltered outdoor seating areas. A solar panel, battery and intelligent energy management system are integrated into a compact unit, enabling off-grid operation even in hard-to-reach or sensitive areas.

With its minimalist design, robust construction and restrained integration of all technical components, the system is particularly well-suited for locations where infrastructure needs to be established without external connections – such as in nature reserves or sensitive landscapes where lighting is required.

8 solar panels 3600 Wp · Charge controller
Battery 5376 Wh in the roof structure

BEGA SolarHub Shade

Protected recreation lounge – self-sufficient lighting system

An illuminated shelter in remote locations provides orientation, safety and comfort – even when no power supply is available.

BEGA SolarHub Shade was developed precisely for such situations:

The system uses solar energy to reliably operate a sheltered recreation lounge as well as centrally supplied bollards and pole-top luminaires in the surrounding area, depending on requirements. Robustly designed, discreetly integrated components and a lithium-iron phosphate battery located under the roof ensure safe and reliable operation. This creates sustainably illuminated areas in sensitive landscapes or areas that are hard-to-reach, without affecting the environment in terms of design or infrastructure.

Modular Furniture System

Customised and unique:
modular urban furniture

Public spaces and areas can be complex to design, since their uses can vary greatly. People need to be able to move, interact and relax efficiently. This can be achieved with high-quality furniture that effectively combines function with style. The environment determines the specific requirements that the modular BEGA urban furniture system needs to meet in customised and specific designs.

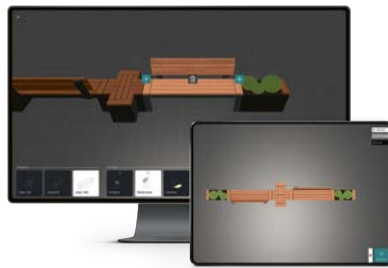

The flexible BEGA system is the ideal solution for anyone who wants to create a standardised design while taking into account different space and furniture concepts. Get everything you need from a single supplier, and expand your setup at any time, or change the design for a new use – that is how we define sustainable space planning. This means you can use the same furniture for decades, with a consistent quality that is sure to meet the needs of everyone using the space.

Modular Furniture System

The robust solution

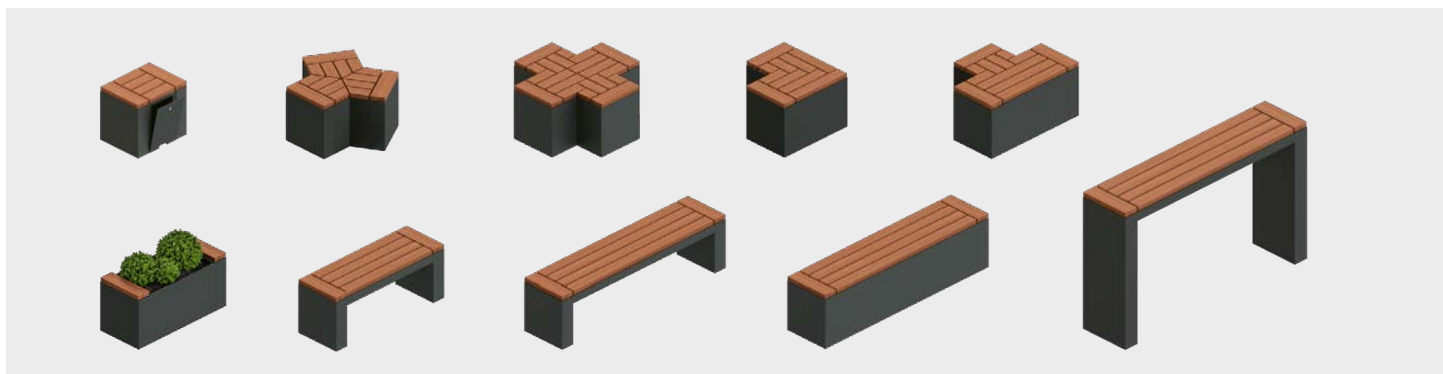

Our modules can be combined as needed to create urban furniture for public areas that blends seamlessly into its surroundings. They create a unique ambience anywhere – from historic old towns, to Mediterranean marinas, or in botanical gardens. There are virtually no limits to the design possibilities.

Use our **online configurator** to create design concepts that fulfil the requirements of people and space. You can then share and coordinate your customised plans with others.

Does everything fit? We will take care of it. With our one-stop service, which is also available at any time after project realisation.

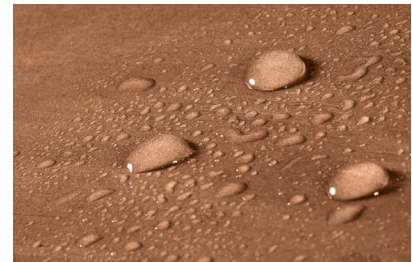

build.bega.com

For daily use not just for daylight

Our modular urban furniture features a robust construction made of powder-coated aluminium and high-quality Accoya® wood. The high-quality wood we use comes exclusively from forests managed in an exemplary manner with sustainable forestry. The trees grow back quickly, ensuring constant and sustainable availability. The synthesis of wood and aluminium creates unique accents for the BEGA product portfolio.

To create a pleasant atmosphere at night, individual elements can be supplemented with indirect light. The electrical connection is made via a flexible plug system.

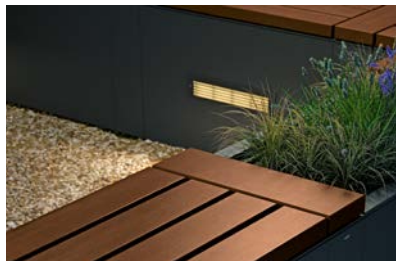

Accoya® wood

See where you are sitting

Recessed luminaires underneath the seat provide an increased feeling of safety at night.

Structure through orientation

Discreet, indirect illumination can identify or emphasise certain areas in the dark.

Ready to go

The modules are connected together on site – the individual elements are very easy to install. The robust construction ensures extremely high dimensional stability.

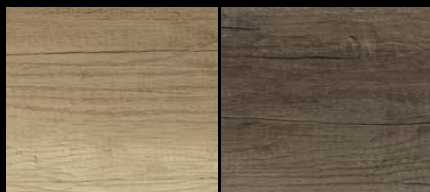

Outdoor Furniture

Experience the unique feeling of relaxed togetherness

Polar Oak

Marshland Oak

The high-pressure laminate (HPL) surfaces are available in two colours. They offer high resistance to abrasion, impact, scratches and strong temperature fluctuations. In combination with the aluminium elements, they are therefore particularly suitable for year-round outdoor use.

Tables, benches and stools from BEGA Outdoor Furniture can be adjusted to uneven surfaces using the integrated levelling system.

In semi-public spaces, such as restaurants and leisure centers, furniture is much more than just practical. It also provides structure and atmosphere to the space. Our outdoor furniture creates the ambience your guests expect from social gathering spaces: it brings people closer together. It creates a feeling of connection and a sense of community, or provides private spaces when necessary.

Our outdoor furniture is highly functional, stylish and exceptionally robust. Practical for easy use: the outdoor furniture can be bolted to the foundation on site using an adjustable fastening system.

The high-pressure laminate (HPL) surface is easy to clean and is also extremely environmentally friendly. In addition to a long service life and the many years of use you get from the products, the material can be almost completely thermally recycled.

At home outdoors

Weatherproof & reliable

The chairs in the BEGA Outdoor Furniture range combine durable materials with a clear design language. Ergonomic seat shells made of multi-layer plywood and a durable HPL surface offer high durability. The Marshland Oak and Polar Oak decors create a natural look. A powder-coated steel frame, available with or without armrests, and a stackable design enable flexible use in outdoor areas.

AUBRILAM

SoMa Collection by AUBRILAM

SoMa was created to bring a new dimension of comfort, elegance and identity to public spaces. The collection combines contemporary design with high-quality materials and a construction that is consistently focused on durability.

Designed exclusively for AUBRILAM by Caterina and Marc Aurel, SoMa is characterised by a clear, minimalist design language and the harmonious integration of furniture and lighting within the urban environment. The range includes benches, stools, outdoor armchairs, lighting elements, bollard luminaires, planters and waste collectors, which complement one another to form a cohesive design concept.

SoMa is primarily manufactured from high-quality Accoya® timber in a choice of standard colours, as well as powder-coated stainless steel profiles, combining natural warmth with high durability. Carefully processed, durable materials and precisely executed details ensure a timeless aesthetic and sustainable use for many years to come.

aurel *_design urbain*

In addition to the "Brume" colour, other standard wood and metal finishes from the AUBRILAM colour chart are available: pages 108-109

Light in appearance.
Strong in everyday use

The SoMa benches combine a delicate design with high durability. The softly rounded seats ensure a comfortable experience. Available either without backrests or with backrests and armrests for added support and comfort.

For customisation, a range of additional wood finishes is available, including those treated with the Color+Protect® and NaturaLife® finishes, as well as a range of metal finishes.

AUBRILAM

SKALA Collection by AUBRILAM

The SKALA collection presents a variety of seating furniture and additions characterised by the combination of warm Accoya® wood with metal structures. Parts of the collection look as if they are growing out of the ground, while other elements stand solidly on the ground. This creates an organic aesthetic, while emphasising the robustness and stability of the designs. The SKALA collection showcases a perfect fusion of natural materials and contemporary shapes.

In addition to the “Brume” colour, other standard wood and metal finishes from the AUBRILAM colour chart are available: pages 108–109

Geometry **with character**

The stool and chair in the SKALA collection are characterised by a striking central cuboid. Vertical lines create a subtle interplay of bevels and curves, giving the seating furniture an elegant, architectural appearance. As a compact seating solution, they are particularly well suited for high-traffic areas such as railway stations, bus stops and public spaces.

A space for encounters

The benches in the SKALA collection combine a clear design language that creates a pleasant atmosphere. A defining feature is the precise combination of wood and metal, which gives the structure its striking, architectural appearance. Available as a classic bench without a backrest or as a double bench with a central backrest, they offer flexible solutions for public spaces. Generous seating areas and the balanced design create inviting places to linger, meet and wait.

High-quality seating

The chair and 2-seater bench from the SKALA collection bring the design quality of high-end interior design into the outdoor spaces. Precise joints between wood and metal, as well as the characteristic, delicate-looking separation of the seat, define their elegant appearance. Whether used as individual furniture, in combination with one another or complemented by side tables – they allow for versatile arrangements in parks, squares, promenades and other thoughtfully designed public areas.

Connecting perspectives

The seating areas, arranged opposite one another, create different viewing directions and open up new possibilities for use and social encounter. Precise joints between wood and metal, together with the characteristic, delicate-looking separation of the seating areas, give the bench from the SKALA collection its elegant and distinctive appearance. A comfortable and robust solution for parks, squares, promenades and other public areas.

AUBRILAM

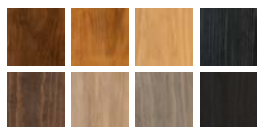

NOTCHE Collection by AUBRILAM

The NOTCHE collection embodies seating furniture with a minimalist design, made from Accoya® wood in warm wood tones. The benches that are mounted on existing low concrete walls are a unique feature. Different forms perfectly complement each other. This transforms a simple concrete wall into a bench. A standalone waste collector completes the range.

The combination of Accoya® wood and concrete creates a harmonious interplay of elegance and robustness. Inviting design meets innovative combinations of materials.

In addition to the “Brume” colour, other standard wood and metal finishes from the AUBRILAM colour chart are available: pages 108–109

Concrete becomes quality of stay

The bench seats in the NOTCHE collection complement existing concrete structures with comfortable seating areas and create new ways to enjoy public spaces. Triangular and trapezoidal elements can be flexibly combined to create varied geometries as well as individual seating arrangements. This creates inviting places for promenades, waterfront areas and thoughtfully designed open spaces.

Material

In addition to the "Brume" colour, other standard wood and metal finishes from the AUBRILAM colour chart are available: pages 108–109

Balance brought into form

The bench from the NOTCHE collection impresses with its striking design and expressive lines. The interplay of straight surfaces, precise bevels and gently rounded edges lends it a balanced, almost sculptural effect. This creates a characterful seating furniture that is equally suitable for squares, parks, courtyards, atriums and representative living areas.

In addition to the "Brume" colour, other standard wood and metal finishes from the AUBRILAM colour chart are available: pages 108-109

Concisely designed – flexibly combined

Distinctive horizontal joints and the characteristic geometry give the seating elements in the NOTCHE collection their unmistakable appearance. The triangular-shaped stool and the two- and three-seat benches with a trapezoidal-shaped base can be combined in a variety of ways. This creates individual seating arrangements and social spaces – for example, as grouped arrangement around trees or other design features in public areas.

AUBRILAM

RENDEZ-VOUS Collection by AUBRILAM

This AUBRILAM product range features a lounge style and offers a wide range of combination options. The design of this urban furniture consists of horizontally positioned wooden elements, framed by metal bands. In some products, concrete components complement the eye-catching look.

This urban furniture features generous dimensions, so even large outdoor areas can be elegantly designed for relaxation, rest and leisure.

With refined solid wood Accoya® in the colour “Brume”, electrolytically galvanised metal elements that are specially protected against environmental influences, and high-performance concrete filled with organic fibres, the durability and exclusive style of all products are guaranteed.

A charger can be integrated into a robust metal housing as an optional extra. Up to four USB ports allow mobile devices to be charged conveniently.

In addition to the "Brume" colour, other standard wood and metal finishes from the AUBRILAM colour chart are available: pages 108-109

Rectangular shape – elegant interpretation

For a feel-good atmosphere in parks, in public spaces or on terraces: the AUBRILAM bench from the RENDEZ-VOUS collection comes in the wood colour "Brume". The entire range features minimalist, functional elements that are ideal for combining. Mounted in rows or groups, they invite you to stay and enjoy the space.

The lounge picks up on the striking rectangular shape of the bench. Arranged together, this urban furniture creates statement seating for cosy places to relax and enjoy the pleasant surroundings.

AUBRILAM

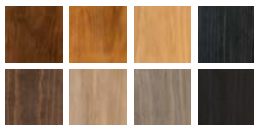

UTYL Collection by AUBRILAM

The urban furniture in the AUBRILAM UTYL product range is functional, aesthetic and durable. The basic concept of this design is all about showcasing the material. The steel is bent and cut – so the cross section of the material remains visible and forms an intentional contrast to the wood colour. This product range owes its unique design to the refined and extremely durable Accoya® solid wood combined with the black-coated steel.

Numerous structural and practical elements complement and complete this furniture collection. Complete designs for squares, paths, parks or building surroundings from a single supplier.

In addition to the “Brume” colour, other standard wood and metal finishes from the AUBRILAM colour chart are available: pages 108–109

Comfort

at its very best

The outdoor chair from the UTYL collection combines a clear, elegant design with a high level of seating comfort. Generous proportions and an ergonomic design create a relaxing seating experience for lounge, relaxation and leisure areas. Available with or without armrests.

When combined with the matching footstool, the chair can be converted into a comfortable chaise longue – for even more relaxation in outdoor spaces.

Material

Pause for thought – optimal sitting

These benches will look great in any outdoor area with their eye-catching design. Optimum ergonomics and maximum comfort make these products pleasant places to spend time. The two three-seater benches with narrow or wide slats provide visual interest – with the same stability. One or more armrests can be fitted on request.

In the shadow of the tree

The tree bench from the UTYL collection creates a natural meeting place and invites you to linger beneath the canopy of leaves. With its generous dimensions, it makes use of the tree's pleasant shade to provide a sheltered seating area, combining comfort with the experience of nature. The clean, elegant design blends harmoniously into parks, squares and outdoor spaces, making the tree the focal point of the public area.
