The Gaming
Industry is
**Levelling Up.
Again.**

An  **RPG** Company

The gaming industry has truly arrived—not just as a leading form of entertainment, but as a significant cultural and economic force on a global scale.

With about 3 billion gamers worldwide and a market value projected to exceed \$300 billion by 2025, the industry packs quite a punch. It offers an expansive canvas for creativity, technological advancement, and community building.

Today, the gaming landscape is as diverse as its player base, spanning continents, cultures, and age groups. Nearly 40% of gamers are now women, challenging outdated stereotypes; this influences the direction of game development and marketing.

Zensar's Gaming Studio Overview

Unlocking **10 years** of gaming expertise to elevate your experience

Empowering innovations with team of **400+ passionate gaming professionals**

Crafted **1500+ games** to ignite excitement across continents

Delivering Value, Elevating Client's Success

Create and enhance games

- Created around 100+ games with top quality
- Enhanced 300+ games to comply with German and UK market regulations

30% reduction in cost per game

Enable data driven decisions

- Designed and built centralized 'Federated Data Lake' and related cloud-based data pipelines for enabling real-time data analytics and data quality and integrity
- Enabled real-time insights into player behavior and game performance

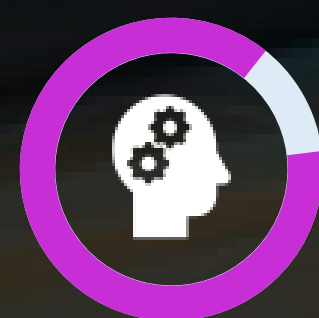

Deliver as a trusted partner in testing

- Deployed 60 testers out of a 100+ team to work as the final gate before production go-live
- Enabled 40% automated testing coverage, on average
- Set up Zensar proprietary device farms, across four global locations, with 150+ devices

20% reduction in game testing time

30 person days saving per test cycle, across products on the platform

Deploy an insight driven approach

- Conducted detailed competitor and market analysis of games of other operators
- Recommended enhancements to existing and new games to create next-gen games

15-20% increase in spins per player

Enhance player engagement

- Improved player participation through AI-based promotions and campaign management
- Enabled a GenAI-based bot solution for focused promotions
- Built a recommendation model, based on game analytics, for boosting player stickiness

Modernize legacy games

- Rebuilt the legacy game integration framework with the latest technology and modular designs
- Redesigned game engines to support enhanced features in games

~40% reduction in game loading time

Faster game turnaround time

Success Stories

Overview:

Infrastructure and DevOps solution deployed by a globally recognized gaming and software development company

Problem:

The existing infrastructure and DevOps environment was inadequate to meet data engineering needs, and enable efficient and secure operations.

Solution outcomes:

- Improved efficiency of data engineering operations
- Enhanced data processing capabilities
- Heightened security
- Improved infrastructure scalability and flexibility

Overview:

Game development and release solution deployed by a globally recognized gaming and software development company

Problem:

Rigid systems incapable of

- responding swiftly to evolving business needs and market trends, and
- minimizing the cost per game to boost player retention.

Solution outcomes:

- Achieved a 50% faster market penetration
- Deployed games in all intended markets
- Reduced gaming costs by 20%
- Accelerated time to market by 40%
- Increased player stickiness by 25%

At Zensar, we're 'experience-led everything.' We are committed to conceptualizing, designing, engineering, marketing, and managing digital solutions and experiences for over 145 leading enterprises. Using our 3Es of experience, engineering, and engagement, we harness the power of technology, creativity, and insight to deliver impact.

Part of the \$4.4 billion RPG Group, we are headquartered in Pune, India. Our 10,000+ employees work across 30+ locations worldwide, including Milpitas, Seattle, Princeton, Cape Town, London, Singapore, and Mexico City.
