# we discovered petrified wood, an extraordinary material, from the deep forests in Indonesia.

We would like you to discover this unique material from the deep forests of Indonesia. A world where millions of years ago ancient trees were swept away by overflowing rivers, leaving behind sunken trees under layers of mud and volcanic ashes. Meanwhile, millions of years passed, and the minerals in the ancient trees started to crystallize, forming an enchanting stony material. We discovered this unique material from the deep forests of Indonesia, where our local craftsmen create beautiful and unique pieces from it, our petrified wood collection.

Every piece has been carefully selected and worked on, carrying ancient stories from millions of years of Indonesia with them.  
Take a piece of Indonesia home.

See how  
it's made.
