

Lotus is the premium small kitchen appliance brand for home cooks with big culinary ambition. At the heart of each chef-inspired, meticulously crafted Lotus design is a passion for unlocking culinary confidence and delivering consistently delicious results. Experience function, flavor, and finesse – all in harmony, all in balance.

Lotus Signature Series: The Craft™ Espresso System

Specialty Espresso, Made Remarkably Easy

With its balance of intuitive guidance, refined design, and uniquely engineered details, the Lotus Signature Series: The Craft™ Espresso System makes specialty coffee feel effortlessly within reach, bringing café-level drinks into everyday life, with more confidence and less cleanup.

For those who love café culture but want espresso at home to feel approachable, the Lotus Signature Series The Craft Espresso System blends thoughtful automation with hands on creativity in a refined, slim footprint design. It's built to make espresso feel welcoming from the first use, while still delivering the control specialty coffee lovers crave.

The Craft is designed to fit your routine, whether you prefer whole beans or pre-ground espresso. A conical burr grinder with an adjustable grind setting helps dial in flavor, while an auto tamping function keeps prep consistent and approachable. A pre-heat cycle warms the system before brewing, so you're not pulling shots into a cold start—helping espresso taste as intended from the very first cup

Guided Frothing

For many home espresso drinkers, frothing is the biggest barrier to buying an espresso system. It's where confidence can drop and frustration can creep in. The Craft solves that with a full-color, interactive touchscreen that guides you through frothing based on the drink you're making. Whether it's a cappuccino, latte, or flat white, the intuitive guidance helps you get the texture right, so specialty drinks feel achievable (and repeatable), not a guessing game.

Uniquely Lotus: The Portafilter Experience

Where The Craft truly stands apart is its portafilter design. A patent-pending portafilter eject system makes puck removal clean and easy—eliminating the messy habit of knocking the portafilter against the garbage can or countertop. It's a distinctly Lotus detail: smarter, tidier, and designed to make the ritual feel as refined as the result.

Designed for Everyday Ease

The details are designed to make daily use feel effortless. A detachable, side-mounted 1.8-liter water reservoir is easier to remove and refill than back-mounted designs—especially under cabinets. Cleanup is streamlined with a removable drip tray, and a magnetic cleaning brush + needle tool (two tools in one) helps maintain both the filter and frothing components. Best of all, it magnetically stores on the espresso system, so it's always within reach.

MODEL: LTSEM110

MSRP: \$849.95
