# WE ARE at the heart of building.

We offer a diverse range of building products, solutions and expert technical and design services that enable our customers to create inspirational spaces and places.

Everything we do revolves around our valued customers and we continuously strive to exceed their expectations. We pride ourselves on leading for new, innovative and sustainable products and solutions, both for today and for a new era of building.

**WE ARE at the heart of building. WE ARE Ibstock.**

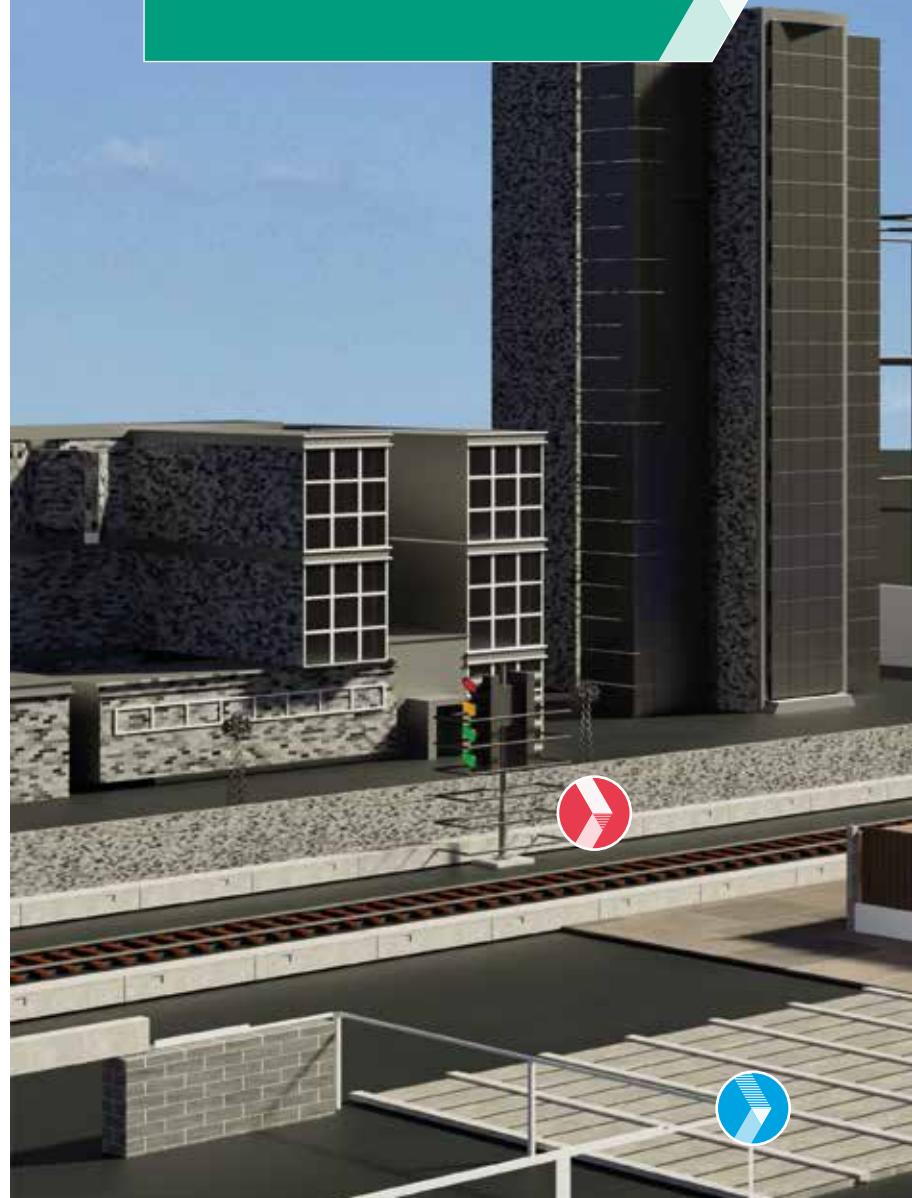

## Bricks and Masonry

Our bricks and masonry range is truly comprehensive. Take the widest brick range in the UK and add in walling stone, architectural masonry, cast stone products and specials and you are sure to find a product for your project.

## Staircases and Lift Shafts

Our bespoke high quality, Longley precast staircases and lift shafts are designed to meet your projects exact requirements.

## Facade Systems

With the establishment of Ibstock Futures, Ibstock is demonstrating a clear ambition to grow into the Facades sector. With Ibstock Telling GRC, Mechslip, Nexus and Genbrix we already have some fantastic solutions for this space.

## Fencing and Landscaping

Ibstock offers a wide range of products for the fencing and landscaping sector – including high quality concrete fence posts from our Supreme brand or beautiful cast stone balustrades and pier caps from our Forticrete brand.

## Roofing

Our wide range of concrete roof tiles for the new build housing market, including the innovative SL8 and Gemini products, added to our high quality chimney options from Ibstock Kevington mean we've really got roofing covered.

## Flooring and Lintels

A comprehensive range of flooring solutions and lintel products, including high fire rated options – with nationwide coverage delivered through our Supreme and Longley brands.

## Retaining Walls

Whether it is a retaining wall solution to prepare a new site or for a major infrastructure scheme – our Anderton brand gives us the products and technical expertise to deliver.

## Rail and Infrastructure

Ibstock Rail and Infrastructure combines rail troughs, signal bases, platform copers and other products for infrastructure from our Anderton range – all harnessing the latest in concrete technology to minimise embodied carbon without compromising performance.

## Design and Technical Services

We are committed to providing the best possible design and technical support to our customers. From expert advice to a sector-leading training and CPD provision, Ibstock's range of design and technical services are especially configured to give architects and specifiers the access to the support they need at every stage on their project journey – from concept to build.

# SUSTAINABILITY: THE KEY TO ALL OUR FUTURES

We are extremely conscious about our environmental impact and are taking steps to build a sustainable future.

Our guiding purpose is to build a better world by being at the heart of building. To help achieve this, we have developed an environmental, social and governance strategy that highlights how we are working towards our goals and ambitions.

**Central to this ESG strategy are three guiding promises:**

## **WE WILL ADDRESS CLIMATE CHANGE**

Decarbonise our products, processes and supply chain by focusing on carbon reduction, water efficiency and biodiversity gains.

## **WE WILL IMPROVE LIVES**

Build our social value by investing in our people, our culture and our communities.

## **WE WILL MANUFACTURE MATERIALS FOR LIFE**

Evolve our products, processes and services by incorporating whole life cycle design.

# SUSTAINABILITY: THE KEY TO ALL OUR FUTURES

In the last decade we've invested £150 million in sustainable performance, implementing decarbonisation measures, production efficiencies and transformational technologies that reduce the carbon intensity and environmental impact of our operations and products, whilst accelerating our journey to Net Zero.

We are committed to supporting the Government's ambition to deliver new homes and infrastructure that are **fit for the future**, and continually work to enhance our product portfolio.

As a category, Ibstock Roofing is committed to innovating our products and processes to ensure they are **as sustainable as possible**. This includes the launch of our newly improved SL8 roof tile, a game-changing solution that has significantly less embodied carbon compared to the previous generation.

# IBSTOCK – PROUD TO BE THE NUMBER 1 BRICK MAKER IN THE UK

With over 200 years of brickmaking heritage and the widest range of UK produced bricks available, we are able to offer the ideal product whatever the project.

This, coupled with our unparalleled technical and design expertise, is why we are the **UK's number 1 brick maker**.

**Building with clay brick is 30% quicker**

than concrete brick – equivalent to a **saving of 8 working days** for an average house.

**Comparable full lifecycle CO<sub>2</sub> emissions**

when a like for like analysis compares **concrete and clay brick** over a buildings lifetime.

# GET TO KNOW YOUR BRICKS: WHY CLAY?

The UK as we know it today was built on brick. The literal foundation of our contemporary built environment, and the material which overwhelmingly comprises not just our homes and places of work, but also some of our most iconic landmarks.

It is the simplicity of brick that is perhaps the key to its endurance. There is a latent power in a product made from **earth, fire and water**; a product that is at once ancient and yet, increasingly, applied in new and exciting ways. It is also that durability that has seen brick become the building material of choice for British architects, and why the UK manufactured **1.9 billion bricks in 2019 alone**.

## DURABLE

150 years life expectancy.

## FLEXIBLE

12 metre movement joint spacing for clay brick facades.

## DIVERSE

1000's of colours, textures and finishes available.

## LOCALLY MADE

68 miles average delivery distance.

## FAMILIAR

77% of new homes are built with clay bricks.

## RELIABLE

150,000 UK homes built with clay bricks in 2019.

## EYE-CATCHING AESTHETICS

Clay bricks have an outstanding appearance, that improves with age.

## THE FACE OF THE UK

1.9 billion clay bricks manufactured in the UK in 2019.

The figures on this page are taken from the Brick Development Association's 'Know Your Bricks' findings and infographic.

## BRICKMAKERS QUALITY CHARTER: TOP MARKS FOR IBSTOCK BRICK

At Ibstock, we are incredibly proud to be a founding signatory of the BDA's Brickmakers Quality Charter.

It was with significant honour that we became one of the first brickmakers nationwide to achieve accreditation from this new charter, **securing a three-star rating** – the highest possible level of accreditation. This certification bears testament to the robustness of both our supply chain and manufacturing processes, and demonstrates our continued commitment to ensuring the ethical manufacture of best quality bricks.

Securing this accreditation was a uniquely involved process, in which we had to demonstrate our adherence with eight globally recognised Critical Assessment Points (CAP). These included the Responsible Sourcing Systems (BES 6001), Health & Safety Management Systems (ISO 45001) and the Anti-Modern Slavery Policy and Procedures, in line with existing national standards.

SECURING CHARTER ACCREDITATION IS AN IMPORTANT STEP FORWARD FOR OUR BUSINESS, AND SIGNALS OUR ONGOING COMMITMENT TO LEADING THE WAY ON QUALITY.

# HOW TO CHOOSE THE RIGHT BRICK FOR YOU

| TEXTURE                       | WIRECUT |             |           |            |           |        | WATERSTRUCK | STOCK       |           |            | HANDMADE    |           |

# HOW TO CHOOSE THE RIGHT BRICK FOR YOU: BRICK TYPES

## WIRECUT

Defined edges are formed within the manufacturing process although a softer edge can be achieved by rumbling; perforations through the body of the brick easily identify if the brick is wirecut. Can also be a solid brick.

## WATERSTRUCK

Often a solid brick, although a few products are made frogged. Commonly a lip is evident at the bottom of the face.

## STOCK

Commonly has soft edges, **ALWAYS a frogged body.**

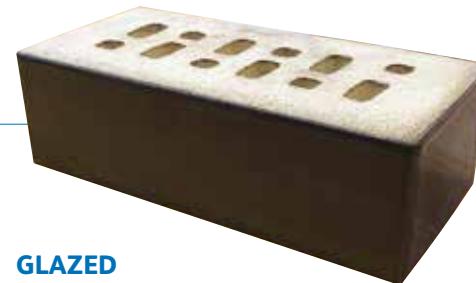

*(Indent in the top of the brick).*

## HANDMADE

Commonly has soft edges, **OFTEN a frogged body.**

*(Indent in the top of the brick).*

## GLAZED

Smooth textured with a gloss face and header, glazed bricks are typically wirecut and come in a variety of high impact colours.

## LONG FORMAT

Long format bricks come in a variety of lengths, colours and textures – the majority of our long format bricks are solid or wirecut.

# HOW TO CHOOSE THE RIGHT BRICK FOR YOU: COLOUR AND TEXTURE

## COLOURS

There are eight basic body colours to choose from. We then add variations of darker and lighter shades to create a wider choice.

**NOTE:** Bricks are made from natural materials so colours will vary slightly from batch to batch.

# THE IBSTOCK TRADESMAN® RANGE

Traditional finishes for the modern builder.

The UK's historic housing stock has been built with bricks made from distinctive Lower Oxfordshire Clay, and our Tradesman® Range has been meticulously designed to blend in with these bricks.

## DURABILITY

F2 and S2-rated ensures damage resistance from extreme weather, including frost, in any application.

## LOW BREAKAGES

Strength and durability mean less breakage and waste compared to alternatives.

## CONSISTENCY

Consistent colour, texture and quality provide long term confidence for depot stock and sites.

## LIGHTWEIGHT

Weight and ease of handling provide a quick laying experience.

## PRICE

Competitive pricing allows value without compromising on quality.

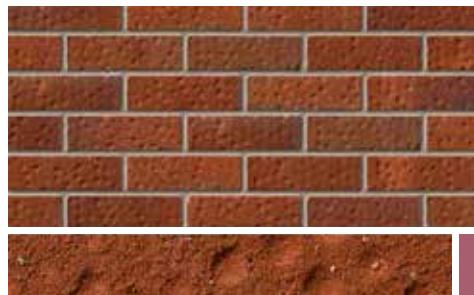

## SPECIAL SHAPES

Our cut and bond service allows us to offer solutions where a non-standard brick type or size is required.

# WALLING STONE

## CREATING AN AREA OF OUTSTANDING NATURAL LOOKING BEAUTY

Whether you are visiting some of Britain's most historic towns and cities like Bath, Edinburgh and Lincoln, or taking a stroll through some of the most scenic villages and countryside on offer in places like the Cotswolds, Yorkshire and Derbyshire, one thing they all have in common is stunning architecture.

From **storybook style cottages to neo-classical Georgian buildings**, these areas are home to some of the country's most elegant, beautiful and breath-taking developments. For specifiers, architects, house builders and self-builders looking to create **contemporary and desirable properties** in these areas, it means finding the right solutions that are in keeping with the local 'stone' vernacular of these spectacular areas is essential.

Ibstock's Walling Stone range has developed an enviable reputation as the best reconstituted walling range on the market. Providing a premium, high quality but cost-effective alternative to natural stone, the Shearstone® and Anstone® ranges offer the appearance and weathering qualities that are almost indistinguishable from natural stone, at a fraction of the price.

Ibstock's Walling Stone range has developed an enviable reputation as the best reconstituted walling range on the market. Providing a premium, high quality but cost-effective alternative to natural stone, the Shearstone® and Anstone® ranges offer the appearance and weathering qualities that are almost indistinguishable from natural stone, at a fraction of the price.

# WALLING STONE

## THE CHOICE OF THREE DIFFERENT FINISH OPTIONS

Whether you are looking for walling products to complement quintessential villages, the cobbled streets of medieval towns or you're developing luxurious properties in rural counties, Ibstock's Walling Stone range gives you the ability to satisfy local planning authorities' desires for new homes to look attractive, blend with the surrounding areas and help shape desirable communities.

No matter where you are in the country, Ibstock's Walling Stone range offers the closest match to natural stone on the market, with core stock readily available for fast nationwide delivery. Manufactured at our market leading manufacturing sites in the UK, the range is available in **Standard colour ranges**, as well as the enhanced **Premier range**, which provides yet further colour options.

Offering a choice of the three most popular types of natural stone finish – cottage, pitched and split – both the **Anstone®** and **Shearstone®** products are through-coloured, and can be dressed on-site to suit individual requirements.

### SPLIT

The most cost-effective type of finish, popular throughout the UK.

**Available in both Anstone® and Shearstone®**

### PITCHED

A rugged effect, with each block featuring a raised centre that is typical of quarry dressed stone.

**Available in Anstone®**

### COTTAGE

A rough, irregular, shape replicating traditional stone in its quarried state. Used in the South West of England and Wales.

**Available in Shearstone®**

When these options are combined with our carefully selected colour ranges, it gives you the ability to match the local and regional vernaculars right across the UK.

# ANSTONE® RANGE

## AVAILABLE IN SPLIT AND PITCHED FINISHES

The Anstone range, available in both pitched and split textures, is ideal for developments in the Northern part of the UK, from the Peak District and Yorkshire in the south, into the Lake District, Cumbria and Northumberland, right up to Scotland.

Manufactured to match and blend effortlessly with the **natural stone types** quarried in these regions, the Anstone range includes Olde Heather Black, which replicates the weathered Pennine Sandstone and Regency Buff, as well as the Olde Heather Gold, which corresponds to the Yorkshire Sandstones. For Scotland, there's also a host of colour options, including Buff, Black Old Weathered, Brown Old Weathered and the Borders Red.

# SHEARSTONE® RANGE

## AVAILABLE IN SPLIT AND COTTAGE FINISHES

Recapturing the tradition of many of the UK's most appealing types of natural stone, the Shearstone range includes a broad range of colours and finishes.

From the Buff of Cotswolds to the grey multi Pentstone of Bristol and South Wales, these solutions admirably **mirror the look of natural stone** to help create stand out developments.

## CASE STUDY **MILLER HOMES, TETBURY**

**A prestigious housing development set  
in beautiful surroundings.**

Situated in the beautiful Cotswold countryside, on the edge of the picturesque market town of Tetbury and a stone's throw from HRH the Prince of Wales' Highgrove House, Miller Homes' Highfields development presents a selection of two, three and four bedroom homes in beautiful surroundings.

Ibstock's Shearstone® range was specified for this 250 multi-phase development of traditionally built homes because the products blend in perfectly with the architectural heritage of Tetbury's existing properties, which are mainly in natural Cotswold stone with some render and brick treated elevations.

# CAST STONE

## CREATING A TRADITION FOR OVER 40 YEARS

Ibstock's Cast Stone manufacturing facilities have been replicating the traditions of natural stone in Britain for over 40 years.

Ibstock's Cast Stone Dressings are a perfect example of advanced technology and time-honoured **craftsmanship** working together in perfect harmony.

The result is a wide range of standard profiles of semi-dry cast stone products of **unrivalled quality** with no compromise to aesthetic appeal. Ibstock offers a wide range of standard profiles of semi-dry cast stone products which replicate the traditions of natural stone.

### Top quality

Cast Stone at trade prices

Manufactured in Britain

# CAST STONE

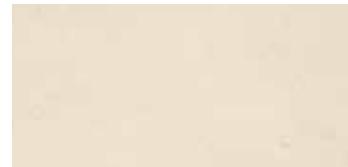

## CREATING A TRADITION FOR OVER 40 YEARS

Ibstock Cast Stone is available in a choice of six standard colours that are intended to replicate the natural stones available throughout the UK.

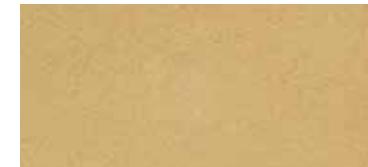

In common with natural stone, Dressings are through coloured. The reproduction of colour is as **close as is possible** within the photographic and printed processes. Where precise colour tolerances are vital, you are advised to view actual product samples.

# FASTSTACK® CHIMNEYS

## SIMPLE, TIME SAVING CHIMNEY BUILDING

Ibstock's Faststack Chimneys offer a market leading, high performance, safe and beautiful alternative to traditionally constructed chimneys.

The Faststack concept has been developed to make the installation of decorative chimneys simple and cost effective. The compact design enables the installation of chimneys in situations where traditionally constructed ones would not be possible. Ibstock was the **first to gain BBA Certification** for its brick-clad chimneys, giving you total confidence for in excess of 25 years.

### EASY INSTALLATION

- Can be used on timber frame buildings where traditionally constructed chimneys cannot
- Stainless steel lifting sockets and certified loops
- No descending stack to consume valuable room space

### DESIGN FLEXIBILITY

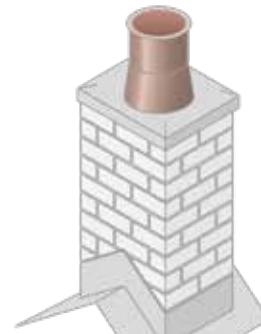

- Available as both fully working or decorative chimneys
- Range of clay pots available
- Available in a wide range of finishes including brick, stone and render
- Bespoke options available
- Flashing styles including stepped can be accommodated

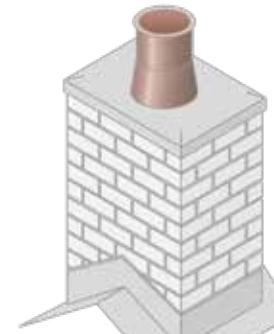

### HIGH QUALITY

- Marine grade one piece GRP
- Fully waterproof sealed units
- Integrated flashing channel
- Fixings and high quality PU lead coloured sealant supplied

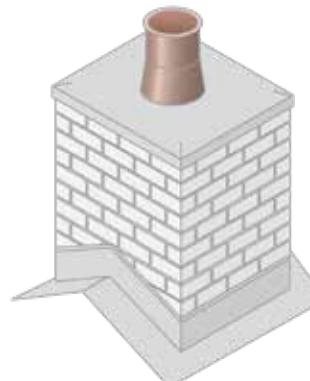

# THE FASTSTACK® CHIMNEY RANGE

Our entire Faststack Chimney range is suitable for Gable End, Mid Ridge and Parapet locations.

NOTE: Chimney height may vary between a minimum and maximum number of courses. Please speak to us to find out more.

# HYPRLITE ARCHES

## OUTSTANDINGLY LIGHT, REMARKABLY QUICK

Ibstock's Hyperlite is a revolutionary, outstandingly light, arch system which allows quick and simple arch construction with minimal skills.

Arches are a traditional feature of brickwork over openings and can vary from the simple flat arch detail to the highly decorative. Constructed using a high tech backing material this system also **incorporates 20mm brick arch slips** which are bonded to the face to finish. Pointed on the ground and used in conjunction with a standard steel cavity lintel.

They have a compressive strength in **excess of 13.0N/mm<sup>2</sup>**. The Hyperlite arch can be produced in one piece to a maximum 2000mm span and can be sectionalised to any length. Maximum 20mm fair faced soffit.

ENDORSED BY BBA

### High-tech

# IBSTOCK ECOHABITATS

## BUILDING IN BIODIVERSITY

Our EcoHabitat range is designed to provide safe spaces for bees, bats, swifts, hedgehogs, sparrows and starlings, enabling them to live in harmony with people.

With an increasing number of our customers now applying **Biodiversity Net Gain Principles (BNG)** to new developments – the guarantee that a site will have a positive ecological impact upon completion – Ibstock is investing in our built-in EcoHabitat range to support these gains through the lifetime of the homes our customers build.

Developing our product range to help tackle nature loss and promote biodiversity is a key part of Ibstock's sustainability strategy. We are taking action on our own sites across the UK as we work towards being a BNG business as well as supporting our customers to **achieve their own sustainability goals**.

Ibstock EcoHabitats are designed to work with Ibstock's wider range of construction products, no special skills are required for install beyond normal professional practise, making them **easy to include** in a standard construction.

Discover our full EcoHabitat range at  
[www.ibstock.co.uk/products/ecohabitats](http://www.ibstock.co.uk/products/ecohabitats)

### BEE SAFE, BEE SECURE, BEE HAPPY

#### THE ECOHABITAT BEE BRICK

Around 240 species of pollinators are solitary bees who do not live in colonies but in cracks, crevices and holes in trees, walls and buildings. We are encouraged to invite these fascinating creatures into our gardens and, with the Ibstock Bee Brick, safely into our living environments.

Available in both clay and concrete, the Ibstock Bee Brick allows the bee to create a safe nest in the face of a brick. With an enclosed back and sides, resident bees can only enter and leave through the face holes, ensuring safety for both bee and homeowner.

## A HOLE NEW WORLD THROUGH THERE

### THE ECOHABITAT HEDGEHOG BOARD

Making the smallest alterations to our built environment can make a difference to Hedgehog habitats.

Constructed with a pre-cut hole to enhance the presence and habitation of wildlife, the hedgehog board is designed to keep hedgehogs safe when entering and exiting a garden without affecting the performance of the gravel board. Our Hedgehog Boards have been manufactured to protect both our hedgehog population, and also fence panels against the risk of rot and damp.

## PROVIDING BATS WITH SAFE HABITATS

### THE ECOHABITAT BAT BOX

With 17 species protected under UK law, Britain's Bat population are well protected to preserve their vital role in the nation's eco-system.

Discreet and easy to install, Ibstock's clay-faced Bat Box provides a haven for this important, yet endangered, mammal. Available in red, buff and blue bricks and can be brick cladded in any brick type. Ibstock's clay-faced Bat Box solution allows for the creation of several roosting zones within the box, making it the ideal product for new builds and conservation work.

## THE WEATHER RESISTANT SWIFT SOLUTION

### THE ECOHABITAT SWIFT BOX

The swift population continues to decline, with the species currently on the Red UK conservation status. This is due, in part, to modern buildings failing to provide a suitable nesting site, due to the effective sealing of eaves.

This hollow box is mortared into the external leaf of a cavity wall creating a secure, weather resistant and attractive finish while remaining accessible to Swifts. As with Ibstock's Bat Boxes and Bee Bricks, a range of Clay and Cast Stone finishes and bespoke specifications are available.

## SAFE SPACES FOR BOTH SPARROWS AND STARLINGS

### SPARROW AND STARLING BOXES

To help bolster the UK's sparrow population and provide them with a place of safety and comfort. With a front plate cut from Ibstock's fireburn bricks and available in red, blue or cream, the hollow middle and solid back of the box creates a safe environment for sparrows.

The sparrow box measures at 280x203x178mm, giving internal dimensions of 230x153x158mm, with a 32mm diameter aperture. A starling version is also available at the same size, with a 48mm diameter aperture.
