What's Special About Sleep?

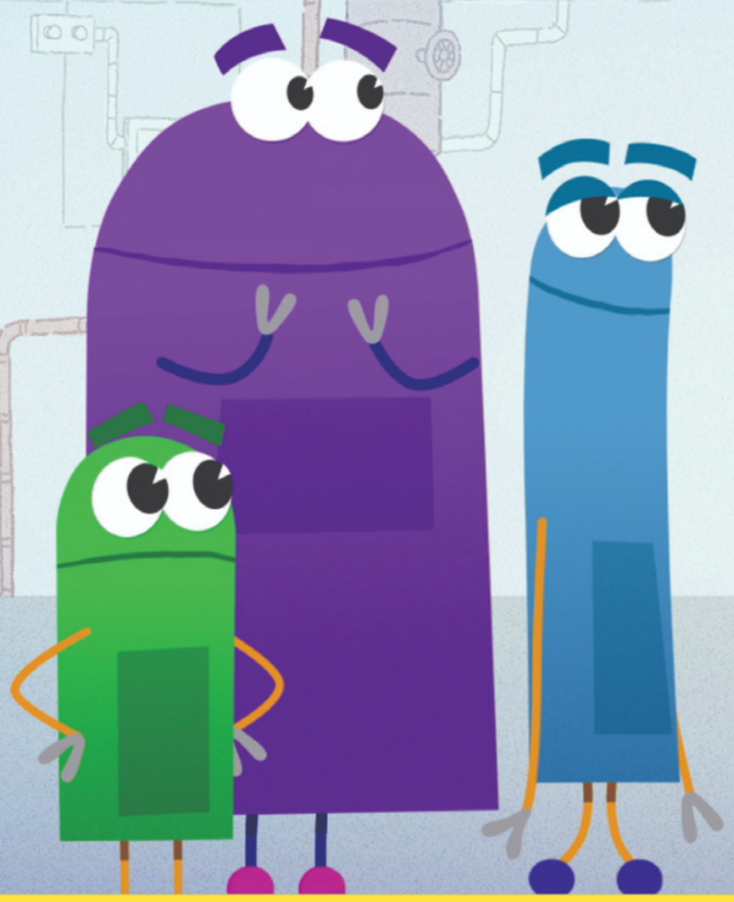

When you feel **Tired**
and it's been a long day . . .
A good night's **SLEEP**
gets you ready to play!

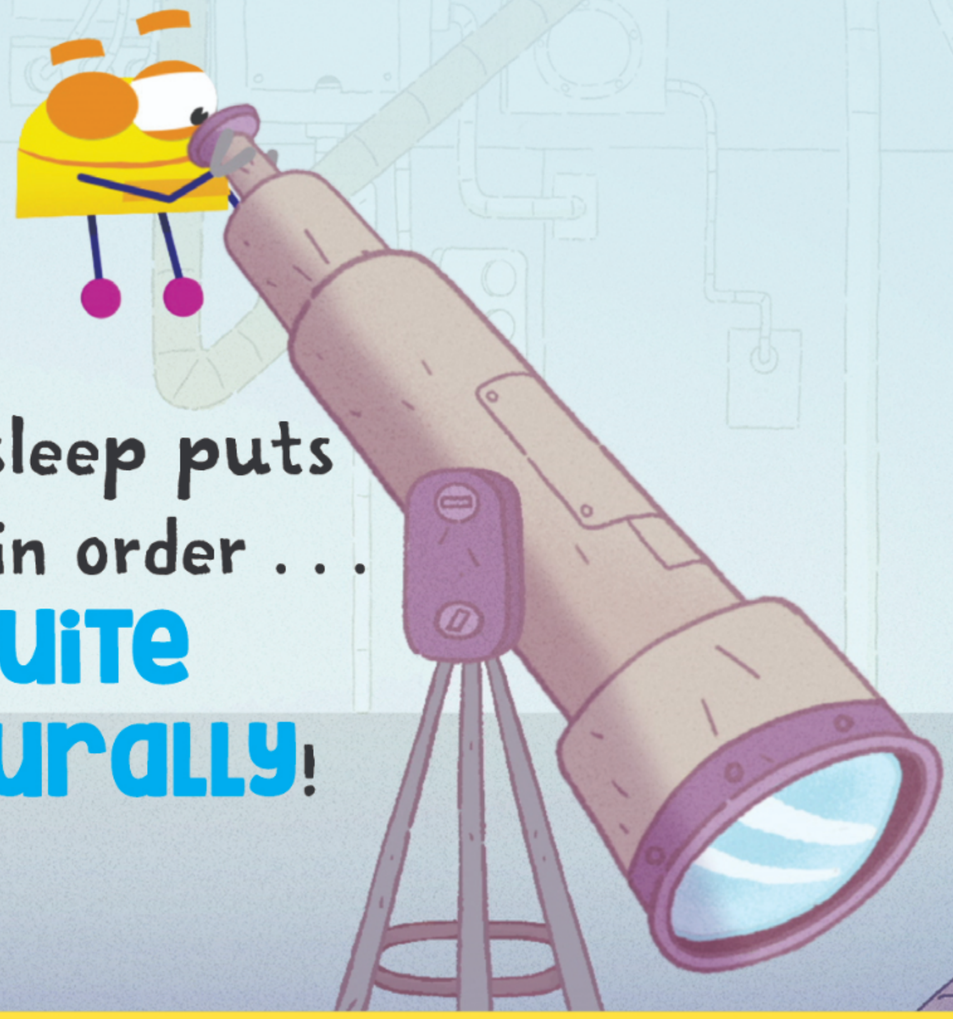

Sleep releases proteins
that **PROTECT** and **repair**,
Keeping muscles and organs
safe from wear and tear!

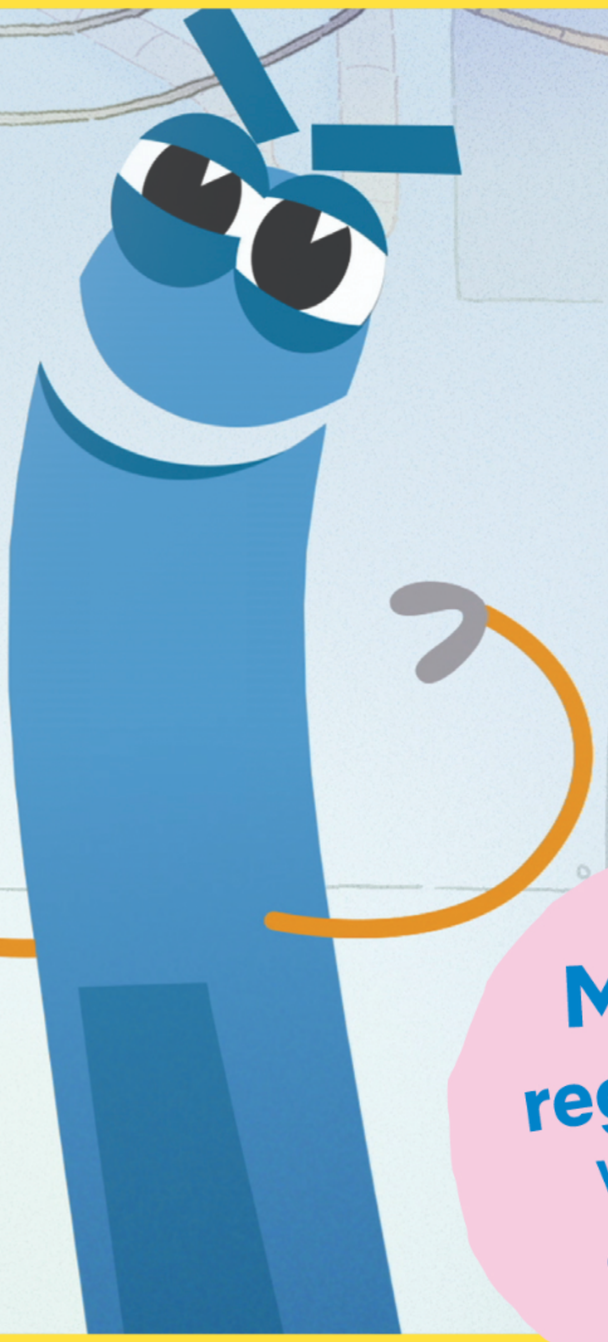

Your brain is busy **Learning**
all day long, you see,

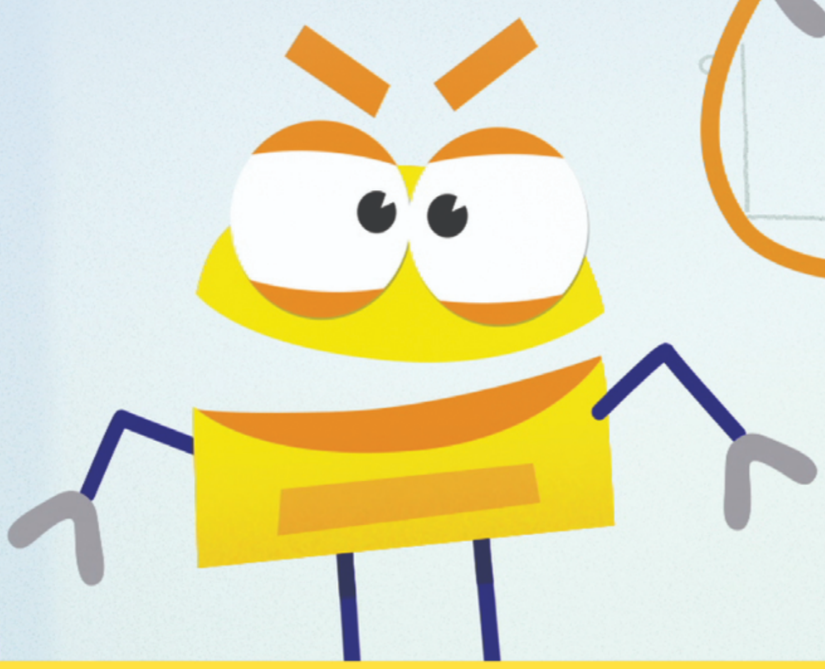

Then sleep puts
things in order . . .
quite
naturally!

Your body's busy working
for you all night long,
Freeing chemicals you need
to grow **big and strong**!

Muscles regenerate while you sleep

Sleep provides the
energy
to get up and go,

You're not tired or cranky;
you just go with
The FLOW!

If you wake up feeling **grouchy**,
friends will know in a while,

You didn't get enough sleep to turn
that frown into a **smile**!

The best way to prepare for that big day ahead,

is to get
LOTS OF REST
in your comfortable bed.

Sleep helps your body **fight off germs**

So when the **sun** sets
and the **moon's** shining bright,
Head for your bed
and stay put for the night.
