

**City of Ruston**  
**Ruston Police Department**  
610 3<sup>rd</sup> Avenue, Public Safety Building, 2<sup>nd</sup> Floor  
Ruston, Major (206) 646-1820

**Crime Laboratory Report**

**Agency:** Ruston Police Department                      **Laboratory No.:** 222-3000  
**Suspect:** Hard, Edward                                      **Agency Case:** 00432150  
**Victim:** Summers, Bruno  
**Officer:** Detective Tharp

**Evidence Examined:**

W-1: One T-Shirt  
Y-5: One S and W .22 caliber long rifle revolver bearing serial number 76636  
Y-6: One spent cartridge case and four live rounds  
H-8: One spent bullet

**Results of Examination:**

The firearm (Y-5) was examined, test fired, and found to be in operable condition. Trigger pull pressure required to discharge the weapon was measured at 3.5 – 4.5 pounds in single action and 10 to 12 pounds for double action. Both trigger pulls are within normal range for this firearm.

The revolver (Y-5) was test fired using ammunition of the same make as those in Y-6. The submitted bullet (H-8) was examined and microscopically compared to the submitted pistol. It was determined that the spent bullet (H-8) had been fired by the revolver (Y-5).

Results of proximity testing indicate the muzzle of the revolver was approximately 18 to 36 inches away from the shirt (W-1) at the time of discharge, assuming no intermediate target.
