Speedball® Ceramic Underglazes
Class Packs

Cone 06–10 (1855°–2381°F)

Bright, intense colors that are highly saturated for spectacular results, these underglazes are compatible with Speedball Earthenware Glazes, and can be used for a variety of decorating techniques. They may be applied to greenware or bisque and can be blended. The liquid, opaque colors will not move or bleed, making them perfect for detailed painting, design work, and sgraffito. Because they're lead-free and clean up easily with water, they're ideal for classroom use. These underglazes are dinnerware safe when used and fired as directed. However, tableware producers should have finished ware lab tested to determine dinnerware suitability due to firing variances and contamination.

Amaco® LEAD-FREE LG Series Low Fire Gloss Glazes

Cone 05 (1911°F)

America's best-selling school glaze. Brilliant translucent colors flow during firing to highlight surface textures and correct most application defects. Formulated for brushing on bisque. All dinnerware safe.

Amaco® Teacher's Palette® Glazes

Cone 05 (1911°F)

Economical gloss glazes that fire true to their color in the jar, these colors intermix with each other to create an infinite palette. The colors can be layered without bleeding, and they won't flow when fired, so they're great for details. One coat results in a translucent look; use three coats for an opaque look. Choose Teacher's Palette in gallons for larger projects and greater savings. Available in a wider range of colors, Teacher's Palette glazes may appear brighter and more intense, depending on the number of layers applied. All food safe.
