2021-2022

Welcome to **Blick's 2021–2022 Materials for Artists Catalog**. As we reflect on the year, I am inspired by artists, hobbyists, teachers, and especially our younger generations who have found new and creative ways to spread messages of hope by connecting with friends and family in their neighborhoods and across the country. Without a doubt, we continue to see how art has the power to communicate and to transform, and Blick remains committed to promoting the value of the visual arts in education and throughout our communities.

We are grateful for your business and hope our newest catalog will inspire you. It's packed with everything from paints to drawing materials, paper, canvas, and frames — we have something for artists of all disciplines and skill levels. We also have what you need to outfit your home office or studio with supplies and stylish, functional furniture. Support eco-friendly art with synthetic brushes and cadmium-free paint. Whether you're a pro with oils, acrylics, or watercolors, we have the brush and paint for you. Or try your hand at something completely new — we've got you covered.

Take a peek inside, then be sure to visit us online where you'll find project ideas and additional art supplies. Find us on our social channels or join our email lists for news about sales, contests, new product introductions, and so much more. Also, be sure to hold on to this two-year catalog — prices will be reviewed and updated as needed at the end of the first year, and you can always visit DickBlick.com for the lowest prices and most up-to-date deals.

Thank you for choosing Blick. We look forward to you shopping with us!

2021 PRICING NOTE
Our catalog prices may be subject to change. While we do our best to absorb and anticipate cost increases, the COVID-19 pandemic has caused significant volatility in global markets resulting in changes to our supply chain. Additionally, tariffs continue to be imposed on foreign imports. Blick is a leading art supplier in part because of our competitive prices, and we ask for understanding if these extraordinary circumstances require price increases.

"I don't know everything there is to know about paints, their qualities, and their value, but I know what I like and what works best for me. Even with the first use of these oil paints, I fell in love. They are beautiful and marvelous to work with. I anticipate I will be buying more Blick oil paints in the future..." **— Blick Customer from Texas**

Williamsburg®

Williamsburg® Handmade Artist Oil Colors

Pigments are carefully ground to enhance the beauty and luminosity specific to each, and then combined with pure, premium, alkali-refined and pH-balanced linseed oil. Every color in the line possesses a unique consistency and texture — some are slightly gritty, and some are extremely smooth. This is what makes Williamsburg Handmade Oils so unique and prized by the painters who choose them.

Williamsburg® Handmade Safflower Oil Colors

Williamsburg grinds its main line in linseed oil, which produces the strongest, most flexible, and fastest drying paint film. But knowing that linseed oil tends to yellow over time, the company also offers this series of white and transparent colors milled in fine safflower oil for a more enduring vibrance and clarity — ideal for passages of white and for glazing.

M. GRAHAM & Co.

M. Graham® Artists' Oil Colors

For centuries walnut oil has been considered superior to linseed oil for producing rich, vibrant colors that resist cracking and are easier to manipulate. The walnut oil formulation of these free-flowing, slow-drying colors allows artists to create passages of finely blended color, jewel-like glazes, or full brush applications without adding solvents. Non-yellowing.

Old Holland® Classic Oils

Old Holland has been making exceptional artist colors since 1664, using the same traditional formulas since the 17th century. Very concentrated, brilliant, and lightfast, these paints are made by hand using the very finest raw materials. Pigments are still ground on stone rather than with steel rollers, then blended with pure, first press linseed oil for optimal performance and archival permanence.

Schmincke® Norma® Oil Colors

Crafted in Germany using naturally renewable raw materials, these colors have an environmentally friendly formulation and production. Pigments are combined with pure, high-quality plant oils to create a balanced range of brilliant, luminous, professional-quality colors. A patient manufacturing process includes grinding with a traditional three-cylinder mill, followed by a three-month maturation period. Blockx® Artists' Oil Colors

Made in the tradition of the Flemish masters since 1865, Blockx Oil Colors are still ground by hand using a slowly rotating three-roll stone mill, and only pure pigments are used. All colors have a minimum lightfastness rating of 7 out of 8, so the entire line is considered perfectly lightfast. Iron oxides, earth pigments, and blacks are ground with linseed oil; all others are ground with poppyseed oil, which prevents yellowing and dries without wrinkling or mottling. No additives or fillers are used.

Michael Harding

Michael Harding Artists Oil Colors

Michael Harding Oil Colors possess an intensity equal to the handcrafted, limited edition oils produced prior to the invention of the collapsible paint tube in the 1840s. Formulated to the highest standards, they feature a high pigment load, offer excellent mixing power, and contain no fillers, extenders, or driers. Their consistency is silky, not oily, enabling artists to paint the thinnest layers or thick impasto brushstrokes with ease. The absence of driers ensures against brittleness, cracking, wrinkling, and yellowing.

SENNELIER

Sennelier® Extra Fine Artists' Oil Colors

These paints still entrance artists, just as they did when pioneers such as Paul Cézanne and Camille Pissarro first used them. They are crafted using the finest ground pigments combined with pure, first-press, non-yellowing safflower oil.

Van Gogh® Oil Colors

These pure-pigment paints are particularly easy to mix and work with because every color possesses virtually the same degree of gloss and viscosity, and dries at approximately the same rate. With good to excellent lightfastness, colors remain powerful and brilliant over time.

Da Vinci™ Professional Fast-Dry Alkyds

Superior pigment concentration results in excellent handling characteristics. All 60 colors are permanent and have an ASTM lightfastness rating of I (excellent) or II (very good). A thin film dries to the touch in approximately 24–48 hours. No strong smell. Colors can be thinned with paint thinner or turpentine to lower viscosity and increase transparency, and can be mixed with linseed-based oil paints.

Winsor & Newton™ Distilled Turpentine

All solvents vary in strength and in their capacity to "loosen up" the body of the color, but the solvent with the greatest power is distilled turpentine — the only solvent capable of easily dissolving damar resin.

"This is my first time using Utrecht paint but I had a project that needed a lot of paint for not a lot of money. I am thrilled with the quality, coverage, and colors of this line. I have been a user of Winsor and Newton for years, but I am now forever switching to Utrecht."

Old Holland® New Masters Classic Acrylics

These paints are the innovation of Old Holland's late owner, Theo de Beer, who dreamed of developing a line of acrylics to be used by the "New Masters," just as Old Holland Oils had been used by the Old Masters. New Masters Acrylics are formulated using the finest new pigments available today combined with a pure acrylic "boutique" binder to ensure excellent adhesion, color retention, and working properties. They dry to a satin gloss finish, offer minimum brush drag, and contain no extenders or fillers.

Golden® Heavy Body Matte Acrylics

Adding matte medium to acrylic paint will produce a matte surface, but this combination always decreases the color strength. To avoid this loss, Golden Heavy Body Matte Acrylics are formulated with a matting agent and a level of pigment that is comparable to Golden Heavy Body Acrylics. They dry to a uniform flat finish and produce a film with excellent flexibility and resistance to chemicals, water, and UV rays.

CHROMA

Chroma® Atelier® Interactive™ Artists' Acrylics

Atelier Interactive gives artists complete control over the acrylic's drying speed. It works as a traditional, fast-drying professional acrylic, but artists can also add a medium to extend the drying time for more blending or rehydrate the paint after it's dried.

Matisse Fluid Acrylics

Liquid-like yet highly pigmented, these acrylics have a very smooth, runny, slightly dense viscosity. The colors will appear dark, intense, and opaque on initial application but can be spread easily with a brush or mixed with water to reveal color graduations. Compatible with any acrylic paints in the Matisse range.

Holbein® Fluid Acrylics

Holbein's low-viscosity fluid acrylic delivers exceptional brilliance and clarity in a smooth, free-flowing formula. It resists crazing, wrinkling, and foaming whether dripped, poured, sprayed, or applied with a brush. Produced using lightfast pigments and no fillers or extenders, it can easily be thinned to achieve watercolor-like effects and mixes seamlessly with all acrylic mediums including gels, pastes, and gesso.

DANIEL SMITH® Luminescent™ Watercolors

Use alone or mix into standard colors for striking effects of light and color. Miniscule particles of titanium-coated mica are the secret. Iridescent and Pearlescent colors appear almost colorless, but when applied over a dark color they bounce back gleaming color.

Holbein Artist Materials

Holbein® Artists' Watercolors

Imported from Japan, a country with the oldest professional watercolor tradition in the world, Holbein Artists' Watercolors are free of ox gall and other dispersants that inhibit optimum brush handling. This makes them ideal for painting in the Japanese watercolor tradition, where brushstrokes are often preserved. The moist, transparent colors have a consistent texture for mixing, with a color tone that remains brilliant even when watered down to light hues.

Old Holland® Classic Watercolors

Containing up to twice as much pigment as some other artist-grade colors, Old Holland Classic Watercolors are among the richest and thickest of watercolor paints. Pigments are ground using stone rollers rather than metal. All color making is done by hand, and all processes are controlled by artists.

Sennelier® French Artists' Watercolor Half Pans

French Artists' Watercolors offer an amazingly smooth consistency and extraordinary luminosity. They have increased honey content, which helps the paint stay wet longer on the palette and makes it easier to reconstitute if it's already cured. Made in France.

Schmincke® Horadam® Gouache

Some brands offer gouache created with pre-mixed colors — Horadam Gouache is a "fine artist" gouache, created to provide artists with a range of pure, single pigment, classic colors. No white is added to artificially boost its covering power, allowing artists to create crisp color blends. All but eight of the 48 colors are based on a single pigment and are so finely ground they can even be used for 0.15 mm airbrush work.

Holbein® Artists' Gouache

Holbein's opaque matte gouache is Japan's foremost designers' color medium. These paints deliver a brilliant, rich matte finish using naturally opaque pigments — no opaquing agents are added. This creates vibrant, exciting color that won't muddy when mixed. Truly professional grade, this gouache does not darken, bleed, or crack. Use it in dense opaque layers to build surface body, or thin it with water to semi-transparency.

Blick® Master Synthetic Kolinsky Rounds

SHORT handle

The carefully selected blend of uniquely patterned synthetic fibers in these brushes deliver everything you've come to expect from the finest natural watercolor brush — and more. When bundled with similar fibers, the wavy pattern creates a series of pockets between them, trapping amounts of color not previously possible with other synthetic fibers. When combined with varying diameters, the fibers mimic the water retention, spring, and pointing capabilities of natural hair. They also retain a more consistent shape over the life of the brush.

Raphaël® Soft Aqua

SHORT handle

The unique synthetic fibers in this brush offer a fluid retention capacity equal to no other, holding twice as much color as conventional brushes. The wavy, undulating shape of the fibers creates spaces that hold water molecules — in contrast to conventional synthetic fibers, which are straight and slippery. Ideal for watercolors, ink, gouache, tempera, and diluted acrylics.

WINSOR & NEWTON™

Isabey® Series 6227 Pure Kolinsky Sable Round

SHORT handle

Isabey's Series 6227 Kolinsky Sable Rounds are the highest precision fine art brushes available. Hand-selected winter kolinsky sable is sourced from Siberia for the longest, most dense, and most luxurious hair possible. The hair is seated deeper in the nickel ferrule with less of its curve exposed, maximizing spring, snap, and control. The black lacquered wood handle is made to be balanced perfectly with the specific tuft size, making it easier to hold from almost any point on the handle.

Isabey® Series 6228 Pure Kolinsky Sable Round

SHORT handle

Isabey's Series 6228 Kolinsky Sable Round is a slightly thinner-bellied version of the Isabey Series 6227 Kolinsky Sable Round. It combines precision with the ability to hold a large quantity of paint, for long or full brushstrokes. The tuft of the brush is the smallest of any — 29 mm long and 25 mm around at the ferrule; the belly is 8 mm wide when wet. It has excellent resiliency that springs back to an incredibly sharp point.

Utrecht® Tuscan Series 206

LONG handle

Made by skilled craftsmen who carefully blend the various silky filaments, then hand-set, interlock, tie, glue, and trim them for lasting performance. The handles are made from kiln-dried beechwood and stained a deep red color. These synthetic semi-firm brushes can be used with either oil or acrylic paints, and they're also a great choice for fluid or medium-body mediums. Ideal for smooth strokes, soft blending, transitions, and details, they can also be used for glazing and varnishing.

Escoda® Tadami Synthetic Mongoose LONG handle

Escoda's Tadami brush is one of the finest-crafted brushes we've seen. The synthetic filament is designed to simulate the feel of mongoose, a favorite of painters for centuries. The brush head is stiffer than most synthetics, but it holds a remarkable point and isn't as stiff as a bristle brush. It's perfect for oils and acrylics of almost any consistency. The long gray-black lacquered wood handle is triple-crimped to the nickel-plated brass ferrule.

Winsor & Newton™ Monarch™ Synthetic Mongoose LONG handle

Stiffer than sable, softer than hog bristle, and more durable than natural mongoose, Monarch brushes are perfect for acrylic and oil painting. The unique synthetic fiber is so much like mongoose, it even has the tapered point and surface texture of the natural hair. Each brush is elegantly crafted with a gold ferrule and a stained, lacquered handle. The bristles are handsomely variegated in shades of ivory, gold, and brown.

Blick® Studio Synthetic LONG handle

A synthetic brush that feels like genuine bristle! The result of years of development, these individual filaments have the extreme taper of natural bristle and are gently formed with heat to mimic a natural curve. Ideal for water-mixable oil paints, these brushes retain their stiffness in water. They are also less susceptible to damage from acrylic paint.

Princeton™ Aspen™ Series 6500 Synthetic

LONG handle

ECO friendly

The synthetic bristles in Aspen brushes have the same stiffness as natural bristle but (unlike natural bristle) they stay together regardless of the surface or degree of pressure applied. Acrylics, oils, and watersoluble oils release and glide evenly off these bristles. Polished black handles are made from reforested wood, and matte black ferrules eliminate light reflection when painting on site.

Princeton™ Catalyst™ Polytip™ Series 6400

LONG handle

The tip of each filament has been split to replicate the natural flags on the finest natural bristle, giving Polytip bristles the ability to hold more paint while providing smoother application. These brushes are super stiff yet still extremely responsive. Designed for use with medium- to heavy-bodied acrylics as well as oil paints, they push even heavy gel mediums with assurance. And unlike natural hog bristle, which can become useless when water-soaked, they have real integrity in water.

Princeton™ Catalyst™ Blades

LONG handle

Not quite a brush. Not quite a palette knife. Catalyst Blades are crafted from flexible silicone to give artists new tools for expression. Great with heavy-bodied paints such as oils, acrylics, and water mixable oils. Because they are heat-resistant, they excel with encaustics. Artists are using them with plaster, clay, and even frosting.

Blick® Masterstroke® Pure Hog Bristle LONG handle

This series is one of our finest brush lines, and quite possibly the finest pure hog bristle you'll find anywhere. The very best craftsmanship goes into each brush — from the top-quality, hand-selected white bristle to the accent of gold on the tip of the long, matte black handles. The term "interlocking" refers to the abundance of natural flags, or splits, on the tips of the bristles — deep flags that lock together and produce a smooth stroke, even with heavy paints. Bristles are sorted by the natural curve of the hair and assembled so that the brush naturally retains its shape.

Escoda® Chungking White Bristle

LONG handle

Escoda handcrafts premium-quality bristle to create a superior-quality brush that stands up beautifully to heavy oil or acrylic paints. A patented curing process accentuates the memory of the bristles. The brush retains its original shape and handles wonderfully, and the long, natural varnished handle offers plenty of control. It's attached to the nickel ferrule using a exclusive triple-crimping process. The Filbert is available in three hair lengths — Short, Regular, and Long — a huge range of choices.

Colour Shapers™

Invented by artists for artists, Colour Shapers combine tradition with exciting new technology. The durable tips are made of an advanced rubber composite, ideal for carving back into oil or acrylic paint and creating surface effects. Don't worry — dried color just peels away! The soft ivory-colored tip is designed for responsiveness with fluid and soft colors, and the firm gray tip offers better control over heavy-bodied paints. All are encased in seamless nickel ferrules, attached to lacquered hardwood handles. Choose your size, shape, and firmness from the chart below, or try a sampler set of five.

BLICK premier belgian linen

Blick® Premier Belgian Linen Canvas — 1-3/8" Profile

Luxurious, flax-based fibers and expertly applied oil primer are meticulously combined to create this ultimate oil painting surface. Extremely smooth, medium texture (4.5 oz) linen is prepared, picked, and pumiced by hand in Belgium. Each canvas is then hand-coated in the USA with three applications of an oil-based, lead-free primer to reach a 10 oz primed weight. Finally, the canvas is hand-stretched and back-stapled around high-density pine stretcher bars with reinforced tenon corners for added strength. It's premier quality at an affordable Blick price.

American Easel Soft Maple Blocks

Softer only as compared to hard maple, these soft maple blocks are a good substitute when a hardwood of moderate density is called for. Soft maple is slightly easier to work with, and won't dull cutting edges as quickly. The 5/16" thick blocks can be carved on both sides.

Masterpiece® Alcohol Ink Art Panels

Perfect for alcohol ink, acrylic paint, pouring techniques, and other mixed media applications! These 1/8" thick, double-sided, bright white panels are made of warp-resistant, non-porous vinyl mounted to a hard-core MDF board with pH-neutral glue. Their light texture gives alcohol ink a reflective quality and allows ink to float on the surface so it can easily be lifted. It also extends the ink's open time.

Ideal for watercolors

aquabord™

With an archival, acid-free, textured clay surface that absorbs watercolors like a fine paper, Aquabord allows colors to retain their purity and vibrancy in a way that even the finest watercolor papers can't match. Its unique surface is perfect for watercolors and gouache, needs no stretching, and will not tear, shrink, or buckle. Endlessly glaze and lift to underlying layers of color — or completely lift back to white without damaging the surface. Aquabord is also ideal for casein, acrylics, and more. Unlike paper, it can be sealed and displayed glass-free, keeping colors and textures true to life.

grounds, primers, & gesso

Gamblin® Painting Ground

This lead-free painting ground is the top choice for a new generation of oil painters. The binder in Gamblin Ground makes it more flexible and faster-drying than lead/linseed oil grounds, which must dry for six months. Gamblin is ready for painting within a week. It makes canvas and linen stiffer than acrylic gesso and more flexible than traditional oil primers. Because the percentage of pigments is so much higher than in gesso, painters only need to apply two coats of Gamblin Ground instead of the recommended four coats of acrylic.

H01536-1005	8 oz (236 ml)	$23.00	$18.97

H01536-1007	32 oz (946 ml)	52.00	42.89

Gamblin® PVA Size

PVA (polyvinyl acetate) is a contemporary size for fabric supports. On linen and canvas, it will not re-absorb atmospheric moisture that causes swelling, shrinking, and, ultimately, paint cracking. PVA retains its flexibility. Neutral pH means it will not yellow.

Black Ink™ Egyptian Papyrus Papers

ECO friendly

Papyrus is the oldest writing material in existence today, dating back at least 5,000 years. In fact, the very word "paper" is derived from its name. These light-colored sheets are formed by laying thin strips of plant stalk in horizontal and vertical (crosswise) layers. They have better mechanical strength than many modern papers of the same weight. Use them for writing, drawing, or painting. Paper sizes are approximate, and edges may or may not be frayed.

Stillman & Birn™

The Stillman & Birn sketchbook system gives artists a choice of paper weight, shade, and surface, allowing them to choose the sketchbook best suited for their media and techniques. Choose Alpha, Beta, Delta, Gamma, and Zeta sketchbooks for studies rendered with dry media and ink, as well as mixed media artwork. The robust paper is both internally and surfaced-sized to provide exceptional wet strength for layering of wet media, lifting of pigment, and repeated erasing without damage. A Cranfield Caligo Safe Wash Relief Inks

These oil-based relief inks feel and work like traditional oil-based inks, but clean up with soap and water — no solvents required! Made from the finest single pigments and polymerized vegetable oil, they're suitable for all kinds of block printing, including wood engraving, linocut, woodcut, and letterpress printing with photopolymer plates. Colors stay bright and clean when mixed. Blick® Golden-Cut Unmounted Linoleum in Pre-Cut Pieces

All the benefits of traditional "Battleship" linoleum, but SOFTER!

It's softer and easier to carve — but maintains all of the qualities of traditional Battleship Gray Linoleum. The fine-textured surface produces sharp, clear prints and won't distort when subjected to high pressure in the printmaking press. And the lighter golden color makes pencil marks easily visible — no need to paint the surface white. Finally, the inevitable hardening-with-age process has been significantly reduced with Golden-Cut Linoleum.

Soft-Kut® Printing Blocks

This rubber material won't skid away and doesn't need a bench hook to hold it down. It cuts without requiring much pressure or force. Block thickness is approximately 1/4" — thick enough to allow both sides to be cut, so you get two printing surfaces per block. Cut blocks into small pieces for rubber stamping. Use with waterbased inks.

Blick® Unmounted Battleship Gray Linoleum in Pre-Cut Pieces

Specially formulated for Blick, we import it from Europe several times a year to provide the softest quality possible. It gives a finely detailed, sharp, clear print. For best results, be sure your blades are sharp! Dull blades are dangerous and frustrating, especially to students. Because of the natural aging process, linoleum should be used within a year of its purchase to take advantage of its peak softness. For your convenience, we offer our 1/8" thick linoleum in pre-cut pieces, by the roll, and mounted on blocks.

This light-sensitized, steel-backed polymer material is a simple, safe, and fast approach to etching and relief printing that does not use grounds, acids, or solvents. It is exposed with UV light and developed with ordinary tap water. Work on the plate directly with opaque materials in the form of non-waterbased pigments, or expose the plate through a transparent film with artwork on it.

Jacquard® Versatex Screen Printing Ink

These semi-transparent waterbased inks have a smooth, creamy consistency and the long open time screen printers rave about. The softest ink available for fabric, they hold up exceptionally well to washing. Non-toxic and odorless, they are super vibrant on light-colored fabrics and papers, mix and overlay beautifully, and they can be thinned and cleaned with water. Increase transparency without affecting viscosity with #300 Clear Exender. The metallic colors and #345 Opaque White have excellent coverage on dark grounds.

BLICK® squeegees

Blick Squeegees are manufactured to our high standards. Kiln-dried and precision-cut lumber is used for the non-warp handles, which are smooth, comfortably shaped, and easy to work with. The blades are molded under high heat and pressure and have a tensile strength of more than 2,000 lb, which eliminates ink streaking and provides a superior long-lasting printing edge. They're inserted into the wood handle and stapled in position, then professionally sharpened after assembly. Use for both graphic and textile applications, for all hand printing, and for many machine applications. Excellent abrasion and solvent-resistance. (Squeegee blade color may vary from image shown.)

A 70-75 Durometer Squeegee — Medium. 3/8"W x 1-7/8" thick color-coded blade. Used for general printing. Medium ink deposit.

Derwent® Inktense Pencils

Versatile as watercolor pencils, but with a firmer texture that makes them perform with the brilliant intensity of pen-and-ink, these strong colors work beautifully on their own — or mix them together to create rich, subtle tones. Use them dry for intense color; wash them out with water for a translucent effect. When dry, the color is permanent and may be worked over with other media.

These traditional Chinese pigment inks are lightfast and permanent and have a dense black formulation that makes them suitable for all ink work, painting, drawing, and calligraphy. A convenient dual cap allows the ink to be poured from the top or the side of the bottle for added control. Ultra Black is a very dense, black, water-resistant ink that withstands wet mount processing. It contains extra carbon and works on porous and less porous papers, including metallic papers. It creates unique warm tones when thinned with water. Intense Black is a dense black ink with a less water-resistant formula than Ultra Black. It is formulated to create beautiful, warm Chinese tones in varying shades of gray with the addition of water. Conforms to ASTM D-4236. Note: Shake bottle thoroughly before using.

DANIEL SMITH® Walnut Ink

The warm character of walnut ink is reminiscent of drawings by Rembrandt. This rich, finely pigmented ink has a sepia color that resembles traditional walnut-based inks, but it will not fade. Use Walnut Ink for drawings with both dip pens and brushes. Because it's waterbased, it handles like a watercolor on washes, with good layering and lifting capabilities. 2 oz (59 ml) bottle.

Copic® Gasenfude Brush Tip Pen

A new addition to the Copic inking line, this high-quality brush tip pen has individual nylon bristles that mimic a sumi-e brush. The waterbased pigment ink is archival and compatible with Copic markers (the colors won't bleed). The sturdy, flexible, 9 mm long nylon bristles end in a super-fine point for detail work.

Prismacolor® Premier Double-Ended Art Markers

Create four line widths from one double-ended marker. Each marker has "click-fit" cap to prevent marker dry-out and nib damage, and each cap has an accurate color I.D. dot for easy identification. One end has an extra-broad nib that lays down color fast with paintbrush-like strokes, and the other end has a fine nib for sketching, detail work, or cleanup. Solvent-based ink is fade-resistant and water-resistant.

Chameleon™ Color Tones Marker Sets

One marker — many tones! These unique double-ended markers let you create a range of tones in the same color family, right on the nib. With a flexible brush on one end and a bullet nib on the other, they're great for highlighting, shading, and blending or for adding depth, dimension, and texture. The innovative mixing chamber contains a toner medium that produces lighter tints of each color. Compatible with other alcohol-based markers, they are non-toxic and low-odor, perfect for working on paper crafts, manga, graphic design, and fine art. For set contents, visit DickBlick.com

Pebeo® 4Artist Markers

5 Basic Colors

Discover oil paint in the shape of a marker! Available in four tip sizes, the Pebeo 4Artist Marker range includes a variety of highly pigmented, vivid colors, and exceptional metallics. They offer scratch-free application and a homogenous, paint-like finish with high fidelity from wet to dry. Just like oil paints, these fast-drying colors can be reworked when dry to create shading, fading, and color gradients. They're great for use on canvas, wood panels, or paper, for drawing, outlining, filling in large areas, glazing, mixed media, and more. Or saturate the tip with color to create splashing and dripping effects. Available individually in 2 mm, 4 mm, 8 mm, and 15 mm tip sizes. The 2 mm round tip is ideal for fine writing, drawing, finishing touches, and embellishments.

C Blick® Concerto Wood Frames

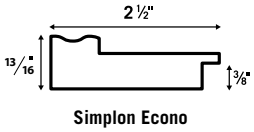

Elegantly handcrafted and finished with closed corners, the Concerto has a timeless look and appeal reminiscent of old-world European frames. The distinctive finish on these "crackle" frames is achieved by applying a quick-drying paint over a slow-drying paint — no two frames are ever the same!

AMACO velvet underglazes

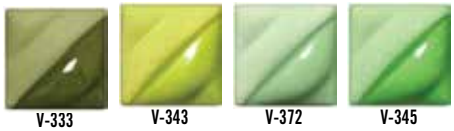

Artwork by Nikki Mizak

Amaco® LEAD-FREE Velvet Underglazes

Cone 06–10 (1855°–2381°F)

Amaco Velvets are opaque underglazes that have a velvet appearance when left unglazed. Velvets will become opaque after three coats. When glazed with Transparent Matte glaze they will assume a soft, satin finish. The colors will intensify when covered with a Clear Transparent Gloss glaze, but will lose their matte surface quality. Velvets fire true to color from the jar and may be intermixed with other colors. Some colors vary at higher temperatures; visit DickBlick.com to view color variation chart at Cone 05 and Cone 10. All are sprayable and food safe when applied and fired under Amaco LG-10 Clear Transparent glaze.

Blick® Essentials Gloss Glazes

Cone 06–05 (1828°–1888°F)

Blick Essentials Gloss Glazes come in a variety of bright, true colors that can be intermixed to create an infinite palette of colors. Non-toxic, non-hazardous, and food safe, these glazes glide smoothly onto bisque, with a self-leveling formula that eliminates brushstrokes from the fired finish. They dry quickly, speeding up handling time and allowing for the application of additional decoration. They also won't dissolve or pick up previous coats of glaze. Because they fire to a high gloss finish, no clear glaze is required. ACMI-certified. Pints.

"Great glaze for the classroom! I use the Blick Essentials with my high school art students and they work really well. We paint them onto bisqueware and the fired results are great. We get a nice glossy finish and the glazes are not too expensive. Unlike other glazes, they fire pretty true to color, so the students have a good sense of what their finished pieces will look like!"

Dry powdered glaze contains gum; mix three parts glaze to two parts water. Yields approximately one pint per 1 lb package. Apply to mature fired bisque by brushing, dipping, pouring, or spraying. Visit DickBlick.com for dry glazes. All colors except for LG-27 (Turquoise Crackle) are food safe. Those marked (*) are safe for spray application. Duncan® Metallic Glazes

Producing a range of polished finishes, from shiny to matte, Duncan Metallic Glazes transform ordinary surfaces into dramatic works of art. Use them for raku, or combine them with other Duncan glazes to create unique effects. They flow more freely when fired on vertical surfaces than other gloss glazes. Apply three to four flowing coats on Cone 04 bisqueware, then fire to Cone 04. Or use any glaze color as a base coat, apply wax resist, then apply Duncan Metallic Glazes to create metallic specks. Not overglaze-compatible. Do not use on greenware. Easy water cleanup. Not food safe.

Specially formulated to create cracks that look like crazing on handmade ceramic pieces, Crackles Glazes produce a beautiful, aged look. Apply two coats to Cone 04 bisque, then fire to Cone 06. The crackle pattern will appear as the kiln cools, and continue to appear after the piece has been removed from the kiln. The crazed effect can be enhanced by applying India ink or thinned acrylic color with a soft cloth after firing. Non-toxic but not food safe. Most are overglaze-compatible. AMACO glazes

Artwork by Tracy Gamble

Amaco® LEAD-FREE High-Fire Glazes

Food safe! Cone 5–6 (2205°–2269°F)

Developed for use on stoneware, these glazes are a beautiful collection of bright and pastel colors that are as colorful as earthenware glazes. The final appearance will change depending on the clay body to which they're applied. These glazes are great when used with contrasting colors, next to, or on top of one another. Excellent results can also be achieved when used over Potter's Choice glazes. All are sprayable.

Amaco® Celadon LEAD-FREE Mid/High-Fire Glazes

Cone 5–6 (2205°–2269°F)

Amaco's high-fire Celadon glazes are transparent gloss glazes formulated to be 100% mixable. Create your own "Celadons" from a palette of 17 hues. Celadon highlights surface textures and brings out the color of the clay. Use C-11 Mixing Clear to adjust transparency and soften colors. Thin with water and Amaco Gum Solution if needed. Shake well before use. Apply three coats of glaze to Cone 04 bisque (let glaze dry between coats). Food safe. AP colors are safe for spray application.

Worbla's Finest Art

A favorite for cosplay and classroom use because it has the quickest and easiest learning curve, Worbla's Finest Art can be used instead of clay to create pieces that are rigid, strong, and virtually indestructible. This non-toxic, skin-safe thermoplastic can be shaped by hand with a heat gun, hot air, water, an iron, or steam. There's no waste because scraps can be conditioned and 100% reblended, and leftovers can be molded to perform like putty. Can be painted or primed. Has no shelf life.

Worbla's Black Art

A companion product to Worbla's Finest Art, this black thermoplastic material has a smoother texture, with less adhesive and slightly less stretch. With a texture much like clay, fruit leather, or beeswax when heated, it takes fine details and fine filigree work well, becoming rigid and stable when cool. It can be built up in layers, shaped over forms of foam, foil, wire or similar armatures, or used as a single layer. It can be painted with virtually any paint, wax, or finish, and is often used for projects that require a more metallic finish, as its smoother surface requires less priming before metallic paint can be applied. Non-toxic, skin-safe, and requires no special equipment.

It is UV-resistant, resists yellowing, and tends not to trap air bubbles. Unlike polyester resins (which are extremely toxic and require the use of a NIOSH mask), AquaClear has little or no odor. Jacquard® SolarFast

Create remarkably detailed photographs, photograms, and shadow prints on paper or fabric by harnessing the power of sunlight. Simply brush SolarFast onto fabric or paper, place the objects, drawings, or photos on top, expose to sunlight, and watch the color appear. The dye is permanent and leaves fabric soft to the touch. Great for painting, tie-dyeing, screen printing, stamping, batik, and more. On paper, it has zero relief and won't affect the texture of the surface, making it a powerful tool for mixed media art.

PRICING/AVAILABILITY - All prices are subject to change without notice. We reserve the right to correct typographical errors in our catalogs. Due to increased demand related to COVID-19, select items may be temporarily out of stock and prices may be impacted due to fluctuating market conditions. Blick is a leading art supplier because of our competitive prices and excellent customer service. We ask for your understanding if these unprecedented circumstances require a price increase and/or your item is backordered. Please note: This is a two-year catalog and prices will be reviewed and updated as needed at the end of the first year.

— What is MSRP? (aka "List Price") MSRP stands for Manufacturer's Suggested Retail Price (also known as "List Price"). MSRPs are published by the manufacturer of each product. Unless a product is our own brand, we do not set or inflate the MSRP. We report it. For our Blick and Utrecht brand products, we establish MSRP based on those of third-party vendors whose products most closely resemble ours in quality and size.

— Does a discount off the MSRP represent a sale price? Not necessarily. A typical example would be that a product has an everyday discount of 30% off the MSRP, but during promotional periods it may rise to 40% off the MSRP. Other products might be 40% and 50% off, respectively, and so on. Paint lines often use this type of model. Some products may never be promotionally priced. For more information about pricing, visit dickblick.com/customerservice/pricingpolicy.

WRITTEN ORDER CONFIRMATION - When following up a phone, fax, or online order with a written order, please clearly indicate "Confirmation Only - Do Not Duplicate." The customer will be responsible for return freight and restocking charges for duplicate orders caused by failure to appropriately mark a written follow-up order.

SHIPPING INFORMATION

SHIPPING AND HANDLING CHARGES
Merchandise orders totaling $59 or more ship freight-free via FedEx Best Value whenever possible. Oversized or overweight orders will ship via a freight line. In those cases, the free freight offer includes curbside delivery only. Other services performed at the time of the delivery such as lift gate and inside delivery will incur additional charges. The average transit times will be extended for freight line deliveries and a delivery signature will be required. For all other orders, see shipping charges at left.

EXCEPTIONS: Additional shipping charges will be added to factory-direct (FOB) shipments, oversized or overweight orders that require lift gate and/or inside delivery; international and U.S. Territory orders; and shipments to Alaska, Hawaii, and Puerto Rico. Shipment of the following stocked art materials will be billed at an additional cost: linoleum rolls; stretched canvas 36" x 36" and larger; oversized panels; select oversized frames; any combination of clay, plaster, and molding material totaling 50 lbs or more; packages of foamboard; all GBC Classiccut Ingento Cutters and Trimmers; the Blick 906 Model II Etching Press, the Blick 999 Model II Etching Press, the Blick Master Etch Model II Press, and all Blick Model II Benches; all kilns and pottery wheels; and some shelters. Paper or boards may be assorted to reach the quantity of 10. Some stocked furniture items will be shipped by truck and billed at an additional cost.

SHIPPING METHODS - Depending upon the items ordered and destination, shipments to a residential address may be delivered by the local post office. Oversized or overweight orders may ship via freight line. In those cases average transit times will be extended and a delivery signature is required. Items shipped using FedEx Fast 2Day service will be received by the customer within two business days, and will be shipped via air or ground. Please note that hazardous items cannot be shipped to destinations outside the continental U.S.

Truck shipment delivers your item to your curb or dock. The charge varies and is based on distance, weight, bulk, and other factors. A physical address and destination phone number are required for delivery. The minimum charge is approximately $135. For an additional $45 a smaller truck with a lift gate will lower your merchandise from the truck to the ground. For an additional $30, your order can be moved from the curb to a ground-level location just inside your door. Delivery drivers cannot move items up or down stairs or to a specific location. Uncrating, disposing of packing materials, and installation are not included. Questions? Call **800.828.4548.**

FOB FACTORY AND OVERSIZED ITEMS - Items that include "HF" in front of the item number will, in most cases, be shipped directly from the factory and will not qualify for our free freight offer unless otherwise stated. Additional shipping charges do apply for these items. If you have any questions, call **800.828.4548**. Please allow additional time for delivery. Some items shipped directly from the factory may not be available for express shipping.

DAMAGE AND SHORTAGE - Count parcels and inspect the shipment before signing the delivery receipt. If damage or shortage is apparent, please note it on the delivery receipt along with the signature of the delivery driver verifying the same. Save the damaged carton for inspection purposes. **OPEN ALL PACKAGES IMMEDIATELY AND INSPECT YOUR MERCHANDISE TO SEE IF IT IS IN GOOD CONDITION.** If concealed damage (damage to materials inside a package with no external damage evident) is exposed, notify us at once. We must notify carriers within 15 days, or they may deny liability. Check merchandise against the packing slip. If an overage or shortage exists, or if there are any other problems with the order, notify Blick Customer Service at **800.723.2787** within 10 days after receipt of merchandise.

PAPER & BOARD ORDERS - When ordering sheets of paper or board larger than 18" x 24" in quantities of less than 10, a per order handling fee applies. Paper or boards may be assorted to reach the quantity of 10.

AUDIO & VIDEO RETURN POLICY - We regret that we cannot give refunds on videotapes, CDs, and DVDs; all sales are considered final. In the event of a defective tape or disc, we will replace it with an identical program.

SAFETY LABELING
The Art & Creative Materials Institute, Inc. ("ACMI") has been evaluating and certifying art, craft, and other creative materials to ensure that they are properly labeled. This certification program is reviewed by ACMI's Toxicological Advisory Board. Products bearing the AP (Approved Product) Seal of the Art & Creative Materials Institute, Inc. (ACMI) are certified in a program of toxicological evaluation by a medical expert to contain no materials in sufficient quantities to be toxic or injurious to humans or to cause acute or chronic health problems. These products are certified by ACMI to be labeled in accordance with the chronic hazard labeling standard, ASTM D 4236 and Federal law, P.L. 100-695 and there is no physical hazard as defined with 29 CFR Part 1910.1200 (c). Additionally, products bearing the AP Non-Toxic Seal meet specific requirements of material, workmanship, working qualities, and color described in appropriate product standards issued by ACMI or other recognized standards organizations. Products bearing the CL (Cautionary Labeling) Seal identify products that are certified to be properly labeled in a program of toxicological evaluation by a medical expert for any known health risks and with information on the safe and proper use of these materials. This Seal appears on only 15% of the adult art materials in ACMI's certification program and on none of the children's materials. These products are also certified by ACMI to be labeled in accordance with the chronic hazard labeling standard, ASTM D 4236 and the U.S. Labeling of Hazardous Art Materials Act.
ADDITIONAL HEALTH LABELING: CALIFORNIA PROPOSITION 65 - The state of California requires clear and reasonable warnings on products containing chemicals that have been shown to cause cancer, birth defects, or other reproductive harm. Even if these products contain only trace levels of harmful chemicals, a warning is required. Caution is recommended when using the products in this catalog that are marked with a Prop 65 label.

RETURNS - Blick will refund the full merchandise value up to one year from the time of purchase. Items must be returned within 30 days of receipt and in their original packaging and resalable condition. Return freight that is sent back to Blick is the responsibility of the customer unless: a) Blick Customer Service is notified within 30 days of receipt, AND b) the item received arrived damaged, OR c) the item received was not what was ordered. Blick is not responsible for any lost or stolen packages.

ASSEMBLY/INSTALLATION - Blick has no responsibility to unpack, crate, load, remove or dispose of debris, assemble, or install products.
