

Tutorial

Tissue box critter bank

Storing your change has never been so rewarding – especially when you make your own critter bank to store it in. Create your own piggy bank using materials from around the house or choose your own critter.

Materials needed:

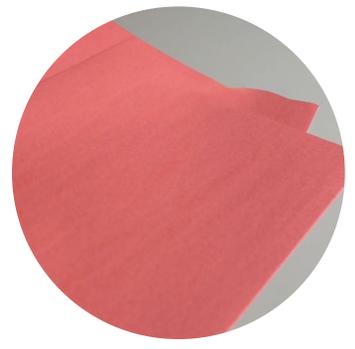

① Tissue box

② Pencil and a thick marker

③ Scissors and glue

④ Construction paper

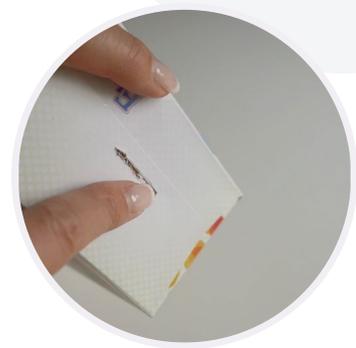

Instructions:

① Glue colourful construction paper to every side of the tissue box. Use pink construction paper for a pig.

② Decorate your critter bank! Use the construction paper and markers to create a snout, ears, eyes, and tail (for a pig).

③ Finally, create a coin drop at the top of the box. Use the pencil to cut a small slit through the construction paper right over the tissue box's hole.
