

# ENERGY. REWARDED.

## Three Time of Use Solution

The 3TOU Solution is the flexible and competitive solution to maximise your renewables and boost your energy savings, even further.

### Maximise the returns from your business' renewable energy investments

More than ever before, Australian businesses are turning to renewable energy to reduce their energy costs and meet their decarbonisation goals. If you've already invested in energy efficiencies and onsite renewables, let us take them further with Stanwell's 3TOU Solution.

The 3TOU Solution enables you to shift your high energy operations to low priced periods and store or use your solar generation during higher priced periods – saving you money and helping to reduce peak demand and strain on the energy grid.

With the 3TOU Solution, every solar and battery installation means greater savings on your bill and greater benefits for the environment.

### 3TOU Solution

Shift high energy consumption operations to daytime tariff, utilise solar and stored energy during evening tariffs.

#### Time periods applicable (AEST All days)

-  Daytime tariff 8AM - 3PM  
Low price
-  Evening tariff 5PM - 7:30PM  
Peak price
-  Shoulder tariff 3PM - 5PM | 7:30PM - 8AM

### Three ways to save with the Stanwell Three Time Of Use solution

**Optimise your solar and batteries.** Use solar generated energy or stored renewable energy during higher priced periods.

**Save on energy costs.** If your business has the flexibility to shift high energy consumption operations to low priced periods during the day, you can reduce your energy costs even further.

**Support your decarbonisation goals.** By choosing the 3TOU Solution, you will reduce your carbon footprint, contributing to your business' sustainability goals.
