DIGITAL PUNK PRESENTS

CYBER PUNK

► CYBER PUNK

In a new age of digital crime against our established scene, there is need for a new breed of protection. To protect our hive against attacks on our fire walls we have created a next level counter attack program named 'Cyber Punk'.

When attacked by outside forces, Cyber Punk will engage and battle these evil entities with brute force. With weapons as hard kicks, jaw dropping screeches and relentless power, we are sure to secure a safe zone for all harder style enthusiasts.

► THE LIVE ACT

The live act 'Cyber Punk' is all about music. There will be special edits and tracks only produced for the live act alongside hit tracks from Digital Punk himself. Besides that it will involve audio based show elements that are unique and produced only for the live act.

The event at which Cyber Punk is playing is the so called 'safe zone' or 'hive'. In this 'safe zone' party lovers can be themselves and escape their problems in the outside world. The 'safe zone' is protected by fire walls. When these fire walls are attacked by evil entities from the outside world, who want to see our 'safe zone' or 'hive' fall, Cyber Punk will engage and fight these attacks off.

These audio based show elements will be combined with the music, which of course, has the upper hand in the live act. People want to party hard and that is what Cyber Punk will give them.

The live act will be delivered with visual elements that the front of house is able to use on their led screens combined with there own visual elements and fx.
