Antenn A-165 Smatrix Wave

Antenn för reglercentral X-165.

Artikelnr	Färg	Pris
5398322	Grå RAL7015	1.170

Täckram A-1XX Smatrix

För täckning vid montage av Uponor Smatrix termostater T-143/T-145/T-146 över apparatdosa. Färg: Vit RAL9016.

Artikelnr	Br mm	Höjd mm	Funkt	Pris
2987791	90	90	För termostat	67,2

Husautomationsmodul U@home modul R-167 Smatrix Wave

Gränssnitt mellan Uponor Smatrix Wave Manöverpanel I-167 och dator, smart-TV, smartphone eller surfplatta. Fjärråtkomst via Uponor Smatrix app (internetuppkoppling krävs).

Artikelnr	Br mm	Höjd mm	Funkt	Pris
5398345	111	79	Trådlös	8.450

Transfomator A-1XX Smatrix

Transformator för Uponor Smatrix reglercentraler X-165 och X-145.

Artikelnr	Färg	Pris
5398330	Grå RAL7015	1.145

Antenn A-155 Radio Smatrix Move PLUS

Antenn för kommunikation mellan Smatrix Wave termostater och Uponor Move PLUS regulator X-158.

Artikelnr	Färg	Pris
5398329	Vit RAL9016	954

Relä M-161 Smatrix Wave

En trådlös mottagare som kan användas för att koppla på eller av olika enheter. Dessutom kan den användas som trådlös enkanals Smatrix rumsreglering tillsammans med Smatrix Wave rumstermostater.

Artikelnr	Br mm	Höjd mm	Utför	Pris
5398326	50	170	2-kanaler	1.290

Utomhusgivare S-1XX Smatrix

Smatrix Utomhusgivare kan antingen användas i kombination som utomhus eller inomhus givare för Smatrix Move Regulator eller i kombination med Smatrix Wave PLUS Reglercentral. En trådlös anslutning mellan utegivare och reglercentral är möjlig i kombination med Smatrix Wave Termostat för offentlig miljö (T-163).

Artikelnr	Br mm	Höjd mm	Utför	Pris
5398325	58	64	Kapslad	602

Kabel Smatrix Base A-145

En speciell Busskabel med par av 4 trådar individuellt skärmade. För sändning av data och signaler i närheten av kraftfulla störfält i ett Smatrix Base reglersystem.

Artikelnr	L m	Utför	Funkt	Pris
5398324	50	4-ledare	Kopplingsledning	2.750

Stjärnmodul M-141 Bus Smatrix Base

Anslutningsmodul för upp till 8 st rumstermostater som gör stjärnnäts-installation i Smatrix Base bussystemet möjligt. Den lägger även till flexibilitet i fråga om hur ledningar i en byggnad kan dras. Sök efter en central punkt, placera modulen där och anslut termostaterna till Stjärn Modul M-141. I detta fall krävs endast en 4-delad kabel som är förbunden med reglercentralen.

Artikelnr	Utför	Funkt	Mtrl	Pris
5398308	8 in/ut-gångar	Tråd-bunden	Plast/ Flerma-terial	1.145

Termostat Uponor SPI 24V

Ersättare för tidigare trådbundna termostater, till exempel Wirsbo Electronic och Wirsbo Cosy rums-termostat. Ej för Uponor Control System Tråd.

Artikelnr	Spänning V	Stl	Pris
5398297	24	74 x 74 x 27 mm (BxHxD)	1.315

Reglercentral C-56 Radio

Reglercentral C-56 med antenn, inkl anslutning-skabel och skruvar. Denna Reglercentral har ingen möjlighet att använda DEM funktioner om den används utan Manöverpanel I-76 DEM. Maximum 12 Termostater och 14 Styrdon.

Artikelnr	Funkt	Färg	Pris
5398285	För max 12 termostater	Grå	7.225

Manöverpanel Smatrix Base Pro I-147 Bus

Upp till 16 stycken reglercentraler kan anslutas till manöverpanel I-147.

Artikelnr	Spän-ning V	Br mm	Höjd mm	Pris
2987796	230	150	108	4.760

Reglercentral Smatrix Base Pro X-147 Bus

Det går att ansluta 6 stycken rumstermostater och 8 stycken styrdon. Vid anslutning av fler styrdon och rumstermostater krävs kopplingsmodul M-140. Då kan maximalt 14 st styrdon och 12 stycken rumstermostater anslutas. Möjlighet finns att ansluta manöverpanel I-147. Levereras med DIN skena och skruvar för montering.

Artikelnr	Spän-ning V	Br mm	Höjd mm	Pris
2987797	230	340	110	4.550

Reglerset Smatrix Base Pro X-147+I-147

Relercentral X-147 och Manöverpanel I-147 i ett set. Maximalt 8 stycken styrdon och 6 stycken rumstermostater. För att utöka systemet till 14 stycken styrdon och 12 stycken rumstermostater krävs 1 styck kopplings modul M-140. Innehåller DIN skena och skruvar för montering av reglercentralen. Laddningsstation för montering i apparatdosa till Manöverpanelen.

Artikelnr	Spän-ning V	Utför	Funkt	Pris
2987798	230	6-kana-ler, pek-skärm	Tråd-bunden	7.875

Gateway Smatrix Base Pro R-147 KNX

KNX modulen möjliggör kommunikation mellan ett Uponor Smatrix Base PRO system och en standard KNX-buss.

Artikelnr	Funkt	Pris
2987826	Trådbunden	5.375

Radiatortermostat Smatrix Wave T-162

För trådlös styrning av radiatorreglering. Används tillsammans med Smatrix Wave PLUS reglersystem.

Artikelnr	Br mm	Höjd mm	Djup mm	Pris
5398315	99	51	69	1.440

Givare Smatrix Base Pro T-141 Bus

Trådbunden rumsgivare. Kräver ett Base PRO reglersystem för att kunna styra rumstemperaturen. Kopplas med fyrledad kabel. Levereras med fäste och skruvar för montering.

X-PERT S5® golvvärmerör

Roth X-PERT S5® är ett 5 skikts rör med inbyggd diffusionsspärr. Kärnan i röret är PE(polyeten). Genom att tillföra additiver erhålles ett rör som klarar högre temperatur, RT (Raised Temperatur), X står för den materialförädling som Roth utvecklat. S5 står för 5 skikt; innerör, lim, diffusionspärr, lim, skyddan-de PE. Alla 5 skikten extruderas samtidigt vilket innebär att Roth X-PERT S5® blir ett homogent, flexibelt och stryktåligt golvvärmerör. Max driftstem-peratur: 70 °C. Max driftstryck: 6 bar. 2424289 säljes i meter.
Material: PE-RT

Pump-/shuntgrupp golvvärme Roth

Shuntunit

ShuntUnit används till mindre golvvärmeanläggningar, både vid nybyggnad och vid renovering. Har en kapacitet på upp till 100 m², beroende på effektbehov. Används i system där systemtemperaturerna är högre än vad som är lämpligt för en golvvärmeanläggning. Pumpen som bland annat innehåller ett automatiskt avluftningsprogram är fabriksmonterad på vänster sida av fördelarrören, men kan enkelt flyttas till höger sida. Levereras med förmonterade fördelarrör för upp till 8 slingor och A-märkt pump, som säkerställer minimal strömförbrukning.
Tryck: 6 bar. Max temperatur: 70 °C

Folieskiva Silent

LK Golvvärme i utförande med LK Folieskiva Silent för flytande förläggning på bärande golvkonstruktion i torra utrymmen. Systemet är uppbyggt med en 30 mm eller 50 mm tjock isolerskiva i EPS med stegljudsdämpande egenskaper för mellanbjälklag. Skivorna är försedda med en folie med rutmönster för enkel förläggning av golv värmerör tillsammans med LK Bygelpistol 3D Premium. LK Folieskiva 30 Silent är testad i laboratorium i enlighet med EN ISO 140-8. LK Systems kan på begäran överlämna nödvändiga data så att noggranna beräkningar för färdig byggnad kan utföras av ljudkonsult i enighet med SS-EN 12354. Då skivan installeras på mellanbjälklag av betong i enlighet med LKs instruktion samt förses med övergolv av cellfoam och 14 mm parkett ger golvvärmekonstruktionen en uppmätt stegljudsförbättring på 21 dB. Motsvarande stegljudsförbättring med 10 mm laminatgolv är 19 dB.
Funktion: Stegljuds- och värmeisolering. Material: EPS, LDPE

2435169

2435170

Tillverkad av rostfritt stål och är avsedd att använda som fördelare där stora flöden kan förekomma. Fördelaren finns med två, tre, fyra dim G25. Kan kombineras för att erhålla erforderligt antal uttag. Fördelaren ska kompletteras med LK Konsol Qmax, LK Kulventil G50 samt LK Propp G50.
Tryck: 10 bar. Max temperatur: 70 (+95) °C.
Utförande: Invändig x invändig gänga. Material: Rostfritt stål/mässing

Minifördelare

Fördelare av mässing med integrerade injusteringsventiler för inkoppling av 2-4 stycken golvvärmekretsar till LK Minishunt. Levereras inklusive vinkelkopplingar R15 utvändig gänga, injusteringsnyckel samt anslutningskopplingar dimension 12 mm, dimension 16 mm alternativt dimension 20 mm för respektive antal kretsar. Monterad på LK Minishunt ökar bygghöjden för minishunten med cirka 90 mm.
Tryck: 6 bar. Max temperatur: 60 (+70) °C. Utförande: Utvändig gänga x koppling. Färg: Krom. Material: Mässing

Fördelarskåp GV

LK Fördelarskåp GV är avsedd att användas där man önskar dölja LK Värmekretsfördelare RF. Skåpet har en tät botten med rörgenomföringar av gummi vilket gör att eventuellt läckagevatten dräneras till valfri inspektionsbar plats. Skåpet är tillverkat av 1 mm pulverlackerad stålplåt. Skåpet kompletteras med monterad lucka och ram. Levereras med rörgenomföringar, bälgmuff för dränage, 1,5 meter tomrör för dränage, dränageböj med utloppsbricka, kabelgenomföringar för rumsreglering, sprutskydd samt monteringsanvisning.
Djup: 95 mm. Höjd: 710 mm. Material: Stålplåt. Färg: Vit

Fördelarskåp VVX

LK Fördelarskåp VVX är avsett att användas där man önskar dölja LK Värmeväxlarpaket -10 samt LK Värmekretsfördelare upp till storleken VKF-RF 5. LK Fördelarskåp VVX med tillhörande monteringsanvisning är anpassad till Branschregler Säker Vatteninstallation. Skåpet har en tät botten med rörgenomföringar av gummi. Skåpsbotten är försedd med dränagestos vilket gör att eventuellt läckagevatten dräneras till en inspektionsbar plats. Skåpet är tillverkat av 1 mm pulverlackerad stålplåt, RAL 9016. Skåpet är avsett att monteras inbyggt i vägg alternativt utvändigt på vägg. Minsta regeltjocklek vid inbyggnad är 145 mm. Skåpet skall monteras enligt Branschregler Säker Vatteninstallation. Skåpet ska kompletteras med ram/lucka. Det finns två typer av ram/lucka beroende på om skåpet är monterat invändigt i eller utvändigt på innervägg. Vid utvändigt montage ska skåpet även kompletteras med sockel för döljande av rör mellan skåp och golv. LK Fördelarskåp VVX levereras med rörgenomföringar, bälgmuff för dränage, 1,5 meter tomrör för dränage, dränageböj med utloppsbricka, kabelgenomföringar för rumsreglering, sprutskydd samt monteringsanvisning. LK Värmeväxlarpaket monteras till höger i skåpet.

Värmeväxlarpaket -10

LK Värmeväxlarpaket är tänkt till glykolblandade golvvärmesystem som behöver skiljas från det övriga värmesystemet. Exempelvis uterum, vinterträdgårdar, garage, dvs. utrymmen som man vintertid vill hålla en låg temperatur i alternativt kunna stänga av utan risk för sönderfrysning av golvvärmesystemet. LK Värmeväxlarpaket är en färdigbyggd enhet bestående av värmeväxlare, cirkulationspump, manometer, expansionskärl, smutsfilter samt styrventil med självverkande termostat och kapillärrörsförbunden anliggningsgivare. Styrventilen har inställbart Kv-värde och är på så vis anpassningsbar till anläggningens storlek. Växlarpaketet är byggt så att det passar att monteras direkt mot LK Värmekretsfördelare RF. Paketet kan kopplas mot höger sida av värmekretsfördelaren. För utetemperaturkompenserad värmereglering till golvvärme kan LK Värmeväxlarpaketet utrustas med LK Styr v.3- RA bestående av reglercentral, ventilställdon, utomhusgivare samt framledningsgivare.

Fördelarskåp Qmax

LK Fördelarskåp Qmax är avsett att användas där man önskar dölja LK Fördelare Qmax G50. LK Fördelarskåp Qmax med tillhörande monteringsanvisning är anpassat till Branschregler Säker Vatteninstallation. Skåpet har en tät botten med rörgenomföringar av gummi. Skåpsbotten är försedd med dränagestos vilket gör att eventuellt läckagevatten dräneras till en inspektionsbar plats. Skåpet är tillverkat av 1 mm pulverlackerad stålplåt, RAL 9016. Skåpet är avsett att monteras inbyggt i vägg alternativt utvändigt på vägg. Minsta regeltjocklek vid inbyggnad är 190 mm. Skåpet skall monteras enligt Branschregler Säker Vatteninstallation. Skåpet ska kompletteras med ram/lucka. Det finns två typer av ram/lucka beroende på om skåpet är monterat invändigt i eller utvändigt på innervägg. Vid utvändigt montage ska skåpet även kompletteras med sockel för döljande av rör mellan skåp och golv. LK Fördelarskåp Qmax levereras med LK Konsol Qmax, rörgenomföringar, bälgmuff för dränage, 1,5 meter tomrör för dränage, dränageböj med utloppsbricka, kabelgenomföringar för rumsreglering, sprutskydd samt monteringsanvisning. Baksidan av skåpet är försett med fyra stycken förmonterade M8 muttrar som kan användas för infästning mot LK Skåpsstativ då man önskar montera skåpet innan en betongplatta gjuts. Skåpets gavlar är försedda med knockouthål för ev. sidoanslutning av tillopp och returledning. Ovansidan av skåpet har knockouthål för ev. stamdragning genom skåpet samt knockouthål för rördragning uppåt. Max rördimension för stam är 50 mm. För kabelgenomföring till rumsreglering m.m. finns knockouthål i skåpets ovansida. OBS! I de fall en stamledning dras inuti skåpet, kan max antal uttag komma att minskas med ett eller flera uttag.

Rumstermostat S2

LK Rumsreglering BAS är ett trådförbundet reglersystem avsett för LK Golvvärme. För bästa energieffektivitet arbetar systemet med så kallad självmoduleringsteknik via signalpulsning till ventilställdonen. Självmoduleringstekniken anpassar avgiven golvvärmeeffekt i förhållande till inställd temperatur. När rumstemperaturen närmar sig inställd temperatur minskas den avgivna effekten gradvis för att undvika övertemperaturer. Systemets elektroniska termostater är ljudlösa och försedda med Triac-utgång.
Storlek: 80 x 17 x 112 mm. Material: Plast/elektronik. Utförande: Elektronisk. Färg: Vit/isgrå

Termostat ICS-RF

2434619

2434620

2434618

Trådlös rumstermostat med bakgrundsbelyst display för enkel och tydlig funktionsvisning. Displayen visar bland annat inställd och verklig temperatur, värme till/från, signalstyrka, batterinivå, driftläge samt eventuell felmeddelande. Rumstermostaten arbetar med så kallad självmoduleringsteknik via signalpulsning till ventilställdonen. Självmoduleringsteknik innebär att termostaten anpassar avgiven effekt i förhållande till inställd temperatur. När temperaturen i rummet närmar sig inställd rumstemperatur minskas den avgivna effekten för att undvika övertemperaturer. Därigenom minimeras energiförbrukningen.
Vid användning av termostatens nattsänkning-/spartemperaturfunktion arbetar den med adaptiv (självlärande) funktion. Knapparna är låsbara och på så vis kan termostaten även användas i offentlig miljö. Möjlighet finns för inkoppling av golvgivare. Rumstermostaten används tillsammans med LK Mottagarenhet ICS-RF8.
Storlek: 100 x 100 x 20 mm

Termostat ICS-W

Trådföbunden rumstermostat med bakgrundsbelyst display för enkel och tydlig funktionsvisning. Displayen visar bland annat inställd och verklig temperatur, värme till/från, driftläge samt eventuell felmeddelanden. Rumstermostaten arbetar med så kallad självmoduleringsteknik via signalpulsning till ventilställdonen. Självmoduleringsteknik innebär att termostaten anpassar avgiven effekt i förhållande till inställd temperatur. När temperaturen i rummet närmar sig inställd rumstemperatur minskas den avgivna effekten för att undvika övertemperaturer. Därigenom minimeras energiförbrukningen.
Vid användning av termostatens nattsänkning-/spartemperaturfunktion arbetar den med adaptiv (självlärande) funktion. Knapparna är låsbara och på så vis kan termostaten även användas i offentlig miljö. Möjlighet finns för inkoppling av golvgivare. Rumstermostaten används tillsammans med LK Mottagarenhet ICS-W och LK Mottagarenhet ICS-RF8, anslutning sker med tvåledare. Storlek: 100 x 100 x 20 mm.

Artikelnr	Mod	L mm	Färg	Pris
2434621	ICS.2, Vit	100	Vit, högblank	1.220

Mottagarenhet ICS-RF1, NO

LK Mottagarenhet 1 ICS.2 används tillsammans med LK Rumstermostat RF ICS.2 (trådlös) eller LK Rumstermostat W ICS.2 (trådförbunden). Till mottagarenheten kan 1 stycken LK Rumstermostat ICS.2 adresseras/anslutas. Enheten kan styra upp till 5 stycken LK Ställdon 24 V (NO). Enheten har ett inbyggt 24 timmars program för ventilmotionering. Vidare kan enheten trådlöst kommunicera med flera LK Mottagarenheter ICS.2 i större system. Storlek: 130 x 120 x 60 mm.

Mottagarenhet ICS-RF8, NO

LK Mottagarenhet 8 ICS.2 används tillsammans med LK Rumstermostat RF ICS.2 (trådlösa) eller LK Rumstermostat W ICS.2 (trådförbundna). Till mottagarenheten kan 8 stycken LK Rumstermostat ICS.2 adresseras, trådförbundna eller trådlösa. Enheten kan styra upp till 12 stycken golvkretsar via LK Ställdon 24 V (NO). Enheten har ett inbyggt 24 timmars program för ventil- och pumpmotionering. Enheten är försedd med två stycken potentialfria utgångar som vid behov används för start / stopp av pump och värmekälla. För att start / stopp av pump och värmekälla ska fungera i ett större system kan flera mottagarenheter kommunicera med varandra trådlöst. Vidare är enheten försedd med en ingång för temperatursänkning via en extern signal, till exempel via LK GSM Switch. Enheten kan kompletteras med LK Webserver ICS.2 för styrning via mobil, platta eller dator. Systemet kan också kommunicera via Modbusprotokoll RS485 för anslutning till övergripande fastighetsautomation. Från mottagarenhetens inbyggda USB-ingång kan golvvärmesystemet enkelt loggas för kontroll och felsökning. Storlek: 400 x 120 x 60 mm.

Elektronisk rumstermostat S1

2417291

2417289

Elektronisk ljudlös rumstermostat med Triac-utgång och elektronisk återföring. För bästa energieffektivitet arbetar rumstermostaten med s.k. självmoduleringsteknik via signalpulsning till ventilställdonen. Självmoduleringsteknik anpassar avgiven golvvärmeeffekt i förhållande till inställd temperatur. När rumstemperaturen närmar sig inställd temperatur minskas den avgivna effekten för att undvika övertemperaturer.
Material: Flermaterial. Färg: Vit RAL 9010

Heater 350 för M60n minishunt

LK Heater 350 är en elektrisk komfortvärmare för golvvärmeinstallationer utförda med LK Minishunt M60n.Värmaren består av en elpatron monterad i en mässingstub. Elpatronen styrs av en elektronisk styrenhet för konstanthållning av vattentemperaturen. Avsedd att användas under sommartid då fastighetens ordinarie värmesystem är avstängt. Elpatroneffekten är 350W och räcker, under avsedda driftförhållanden, för golvvärmeytor upp till 12 m². Produkten säljs komplett för 1 eller 2 golvvärmekretsar i rördimension 12 eller 16 mm.
Tryck: 6 bar. Max temperatur: 60 (+70) °C. Längd: 245 mm. Färg: Flerfärgad. Material: Flermaterial

Koppling PushFit 8

2419412

2419413

2419419

2419379

LK PushFit för 8 mm golvvärmerör. För passning mot LK Värmekretsfördelare RF eller LK Minikretsventil M5 ska kopplingar med invändig gänga användas och kompletteras med adapter G15 utvändig x G20 EuroCone, rsk 2419378. För passning mot LK Minishunt M60 och en styck golvvärmekrets används LK PushFit Single G15 utvändig. Vid anslutning av fler än en krets används PushFit Duo eller Quattro G15 invändig, kompletterad med nippel G15. Plugg rsk 2419411 används vid behov och för inkoppling av tre golvvärmekretsar med PushFit Quattro rsk 2419412.
Dimension: 8 mm x G15. Tryck: 10 bar. Max temperatur: 70 (+95) °C. Material: Rostfritt stål

Byggpanna

LK Byggpanna är en komplett transportabel elpanna. Elpannan är främst tänkt som en temporär värmare för till exempel uttorkning av betongplattor med golvvärme och för att via golvvärmesystemet värma byggnader under dess uppförande. Byggpannan är på 9 kW och arbetar i två steg om 4,5 kW. Pannan levereras komplett med cirkulationspump, expansionskärl och armatursats med säkerhetsventil och avluftare. Anslutning till värmesystemet görs enkelt via de 1,5 meter stålförnätade anslutningsslangarna. Pannan är elektriskt internt kopplad med påmonterad 1,0 meter kabel och 3-fas kopplingshandske. Temperaturregleringen sker via pannans drifttermostat.

Frostskyddskabel Altech

Altech Frostskyddskabel Flex en serie resistent värmekabel för invändig installation i vattenrör. Speciellt framtagen för långa installationer, klarar att frostskydda vattenrör från 60-295 meter. Halogenfri och tappvattengodkänd. Kan överhettas eller brännas av om den överlappar sig själv. Den har 4 st motståndstrådar som är värmeledare varav en är en ren koppartråd plus en jordledare. Nominell effekt är 7-12 W/m, och max spänning på 400V. De 4 olika ledarna skall vara ihop monterade i änden av kabeln, enligt instruktionen för gällande längd och effekt. Max temperatur: 60°C. Min temperatur: -10°C. Driftsspänning: 230/400 V, 50 Hz.Max anslutningslängd vid 10A trög säkring, en starttemperatur på lägst 5°C: för 230V - från 60 meter till 170 meter och för 400V - från 95 meter till 295 meter. Köps på löpmeter i butik och kapas efter önskad längd dock minimum 60 meter. Uttagsmultipel centrallager 400 meter. Enhet: meter.

Kabelskyddsrör Evocab Hard SRN

Detta halogenfria kabelskyddsrör är tillverkat av HDPE och levereras i längder om 6 meter. Varje längd är utrustad med en sandtät muff som standard. Röret har korrugerad utsida och slät insida. Detta ger utmärkta egenskaper när det gäller hållfasthet och slagtålighet. Dessa egenskaper behålls helt i arbetstemperaturer mellan –25 °C och +90 °C.

WC-anslutningar

Adaptern är ämnad för 4" normalrör gjutjärn muffända till wc-anslutning. Adaptern är tillverkad i TermoPlastisk Elastomer, ett gummiliknande material som gör produkten flexibel och okänslig för spänningar. Adaptern är konstruerad att funktionera även där röranslutningen i golvet ligger i eller max 20 mm under golvplanet. Givetvis fungerar adaptern då röret sticker upp ovanför golvplanet. Adaptern är kapbar för optimal funktion och har ett luktstopp som lätt rivs bort vid anslutning av wc-stolen.

DAHL

Du har väl inte missat vår app?

Hela grossistlagret i din egen telefon, smart va?

Appen funkar via i ditt lager, i servicebilen och i butik
– ett tryggt sätt att handla i dessa tider.

Ladda ner appen här:

Available on the iPhone App Store

ANDROID APP ON Google play

Med appen kommer du även åt nödvändig produktinformation på ett enkelt sätt, scanna produktkoden och kolla bland dokumenten. Där finns allt ifrån produktblad, installationsmanualer till kvalitetsdokument.

Inte nog med det, appen funkar med administrationstjänsten Flexibla Kontoret.

Nu kan du fakturera lika enkelt som du handlar.

Läs mer om Flexibla Kontoret här:

Takjärn

Betongskruv JC2-ST UTV EJOT

Självgängande och godkänd betongskruv för genomsticksmontage. Snabb och enkel montering i sprucken och osprucken betong, håldäck, tegel och kalksandsten. Inga expansionskrafter vilket gör att minimalt kantavstånd krävs.Betongskruven JC2-ST UTV C3 (försänkt) går snabbt och enkelt att montera i sprucken och osprucken betong, ETA bedömd Option 1. JC2-ST tar stora laster även då kantavstånd och inbördes avstånd är små. Den är demonterbar och kan återanvändas varför den lämpar sig väl för temporära infästningar. Betongskruven skruvas ner i borrhålet genom detaljen och skär en gänga i betongen. Lämplig för infästning av konsoler och takprofiler m.m. direkt mot betong.

Rörklammer Bismat 1000, för ljuddämpning av avlopp, FZB, Walraven

Bismat 1000 ljuddämpade rörklammer för stående avloppsrör av plast eller gjutjärn. Består av 2 stycken klammer. Den övre klammern (SX) skruvas åt runt röret, den undre klammern (SL) fungerar som stöd, styrning och lastbärare åt den övre klammern. Denna konstruktion gör att minimalt med ljud fortplantas från röret till väggen. Monteras med 1 klammer/våning däremellan monteras Bismat SL styrklammer.
Ytbehandling: Förzinkad. Material: Stål

Inskjutsöglehängare Caddy

När röret placerats på ledarmen öppnas den självstängande regeln av rörets vikt och röret leds utan besvär på plats. Integrerad gummibussning ger extra grepp när du justerar höjden på svepet och reducerar rotation runt muttern. Tar bort behovet att montera ner svepet under installationen. Medger förtillverkning av komplexa montage med fästen, sprinklermunstycken och fördelningsrör som tidigare inte kunde monteras samtidigt. Konstruerad för att reducera arbete på höjd för säkrare och mindre ansträngande installation.
Korrosivitetsklass: C1. Ytbehandling: Elektrogalvaniserad. Gängstorlek: M10. Statisk belastning: 1,334 N

Expander för gängstång

Borr för Sammy X-press

Sammy X-Press® är utformad för att ge direkt vertikal fastsättning av gängstång i metallbjälklag, tunna balkar (z-balkar) och tubstål samtidigt som det ger sänkta installationskostnader både gällande tid och material.

Snaptoggle Imex

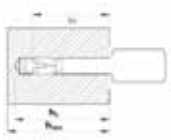
Robust för-installations mekanism centrerar metall ankaret i ett litet hål, innan bulten installeras - bulten hänger inte. Kan användas med skruvdragare, ankaret snurrar inte på baksidan. Spar minst 6 minuter per installation. Tillåter montage och demontage av detaljerna utan risk för att ramla ner på baksidan. Kommer inte att gå sönder eller förstöra väggen ens vid vibrationer.

Artikelnr	Dim	Ant/fp STK	Pris
720933	M6	50	1.910

Skruvplugg TP

E1507047

E1507042



Sortiment av färgkodade pluggar för de flesta installationer. Använd ej skruv med borr- eller spånbrytande spets. Användningsområden För de flesta installationer där tvärkrafter dominerar. Där dragkrafter dominerar eller där hög värme bildas rekommenderas någon av Thorsmans metallinfästningar t.ex TPP eller TEX. Lämplig för betong, sten, lättbetong, lättklinker, ihåliga block, ihåliga tegelstenar, fast tegel och gipsskivor.

Metallexpander EJOT

3874250

Metallexpander är det säkra valet för att fästa i skivmaterial, exempelvis gips-, spånskivor eller fiberplattor. Gripvingarna av metall låser fast och fördelar belastningen på en stor yta. Metallexpandern är lätt att montera även med enbart skruvmejsel. Låstaggar håller ankaret i skivan och fiberbrickan under skruvskallen minskar friktionen. Metallexpandern är okänslig för värme och åldring.
Typ: PH2. Förpackningsstorlek: 50 STK

Våtrumsplugg Drymo

Svensktillverkad rostfri våtrumsplugg för montering i våtrum som bryter tätskiktet där en massiv konstruktion av t ex betong eller träregel saknas. DRYMO fungerar som sin egen regel, likt metallexpander, och kan användas på gipsskivor, fibercementskivor och magnesiumoxidskivor. Drymo är även tät utan skruv i hålet. Finns för enkel- och dubbelgips. Typgodkänd för våtzon 1. Testad av SP och som är ålders- och vattenbeständig i 25 år. Korrosivitetsklass: C5

Vikbyglar

Vikbygel

Förmonterad vikbygel för montering vid rör/kanaler i korrugerad plåt eller hårda skivmaterial. Begränsningen i nominell diameter avser kraven i VdS och FM när det gäller sprinklersystem, såväl som krav vid en-punktsinfästing. I de tillfällen där installationen med vippbult inte tillfredställer kraven i VdS eller FM, vid ventilationsanläggningar, vid tyngre laster, kan det användas fler vikbyglar, montageskena på tvären av profilen som en förstärkning. Genom att skruva gängstången i vikbygeln kan man höjdreglera. Hypalon skivan som är på gängstången är väderbeständig. Tillverkade i stål och är elektroförzinkat. Typ TD är FM godkänd för sprinklersystem. Max last: 0,8 kN/punkt.

Buntband

Transparent

Svart

Novipro Buntband för buntning och fastsättning av kablar, rör och slangar. Tack vare en mängd olika storlekar och bredder kan dessa band användas till i stort sett alla typer av applikationer. De tillverkas av 100 % högkvalitativ polyamid PA 66, som också är enkelt att återvinna. Invändigt räfflad för starkt grepp om buntar. Lätt att applicera antingen manuellt eller med ett buntbandsverktyg. Den böjda änden under-lättar till ett snabbt montage.
Antal/förpackning: 100 STK

Plastplåt isogenopak

Den mycket åldringsbeständiga plastplåten Isogenopak skyddar och gör rörisoleringen lättare att rengöra. Isogenopak har betydande motståndskraft mot syror, alkalier, salter, olja, bensin, alifatiska kolväten och frätande atmosfär. Materialet kan heller inte korrodera och är praktiskt taget ogenomträngligt för vattenånga.Framställd utan de ozonskadliga substanserna FCKW och HFCKW, framställd utan tungmetallerna kadmium, bly, kvicksilver, krom eller föreningar med dessa, framställd utan användning av silikon, utan mjukgörare. ISOGENOPAK är inte lämpat för utomhusanvändning (UV-ljus).

Gullfiber

Al-folieskål GF 7300 tjocklek 20 mm

Användningsområde: Isolering av varma eller kalla rör. Densitet: cirka 75 kg/m³. Längd: 1200 mm. Förpackning: kartong eller plastsäck. Material: glasull. Ytbeklädnad av rutmönstrad glastrådsförstärkt aluminiumfolie. Ytbeklädnaden bildar en längsgående överlapp med dubbelhäftande tejp och skyddspapper. Högsta användningstemperatur: 200 °C, ytbeklädnaden max 60 °C. Brandteknisk klass: ytskikt klass I. För förslutning av tvärskarvar finns som tillbehör tejp.

Hylsor

Brandtätningshylsa AWM III för plaströr

Brandtätningshylsa vid genomföring av plaströr för utanpåliggande montage vid renovering både för tak och väggar. Observera att det krävs 2 brandtätningshylsor vid varje rörgenomföring i vägg och 1 i valv. Lämpar sig även för fuktiga miljöer. Det är möjligt att fästa flera brandtätningshylsor sida vid sida utan avstånd. Brandtätningshylsan fästes i de fyra flikar vid hylsans ytterkanter. Dessa flikar kan vikas vilket innebär att montering kan utföras utan skruvar om gapet mellan röret och väggen tätas. Det är tillåtet att montera överdimensionerade brandtätningshylsor (upp till 3 storlekar större). I kombination med Tangit FP430. EI 180, Swedcert.

Kemtekniska artiklar VVS

Silikonspray S.A.N

S.A.N spray är en multianvändbar och effektiv silikonspray helt utan organiska lösningsmedel och ozonskadliga drivgaser. NSF-godkänd för användning inom livsmedelsindustrin. Glidmedlen ger lätt och problemfri hopsättning av plastmuffrör, gummilister och -packningar. Innehållet av silikon medför att rördelarna även efter längre tid lätt kan demonteras, förutom att det skyddar gummipackningen mot att torka ut/murkna. Bra vidhäftningsförmåga i våt/fuktig miljö.

Artikelnr	Vol ml	Pris
3115124	500	214,5

Silikon spray CRC

Smörjer - skyddar. Återställer ytor av plast, gummi och trä och ger dem en ny lyster. Ger utmärkt smörjning särskilt mellan olika material till exempel plast/metall. Förhindrar att gummi hårdnar och fryser. Fläckar inte. Vattenavvisande, utmärkt impregneringsmedel.

Artikelnr	Vol ml	Pris

Flänstätning Loctite 574

LOCTITE 574 används för tätning av tätt inpassade fogar mellan styva ytor och flänsar av metall. Produkten härdar utan kontakt med luft mellan tätt inpassade metallytor. Den ger beständighet mot låga temperaturer omedelbart efter montering av flänsarna. Används vanligtvis som platsformad packning på styva flänskopplingar. Egenskaperna hos LOCTITE 574 ger mindre utflytning av produkten efter applicering på ytan. Den har hög oljebeständighet och utmärkt beständighet mot glykolblandat vatten.

Läcksökningsspray Multitec -30 gr Unipak

Multitec är ett skummande läcksökningsmedel baserat på specialutvecklade tensider (syntetiskt tvättmedel) för detektering av läckage i luft- och gasledningar. Multitec avslöjar till och med små läckor direkt genom att det applicerade detekteringsskummet börjar bubbla. Multitec kan användas direkt utan någon som helst form av förbehandling eller rengöring. Produkten har ett hudvänligt pH-värde och drivmedlet är kolsyra (CO2) som varken är hälsofarligt eller brandfarligt. Tål frost (-30 °C). <u>Vid användning på plast</u>: är godkänd för användning på polyetylenrör (FE). Vid andra typer av plast ska man försäkra sig om att produkten lämpar sig för användning i den aktuella installationen..

Easy Seal CRC

Ett vitfärgat anaerobt lim med svag styrka som innehåller PTFE. Snvänds för att täta gängade anslutningar som används i hydrauliska eller pneumatiska installationer, liksom gängade anslutningar vid rörarbeten. Komponenternas position kan justeras under en längre tidsperiod, även vid lågt tryck. Rekommenderas för användning upp till 3” BSP-anslutningar.

Klotterborttagare CRC

CRC Klotterborttagare har utvecklats för att snabbt och lätt ta bort vanprydande och anstötligt klotter av sprayfärg, spritpennor, kritor, läppstift etcetera.

Artikelnr	Vol ml	Pris
308545	400	386

Zinc kallgalv CRC

Katodskydd, även för skadade galvaniserade delar. Zinkbaserat medel med utmärkt fästförmåga på metallytor. Det höga zinkinnehållet offras under korrosionsprocessen och ger därigenom galvaniskt skydd av den behandlade metallen. Den torra beläggningen innehåller en maximal mängd zink (renhet 98 %), vilket garanterar en självläkande effekt när ytfärgen skadas. Den torra beläggningen är matt och har en utmärkt ytstruktur för målning.

Activator Loxeal AT11

Loxeal aktivator A11 används tillsammans med Unitec-limmen vid anläggningar utförda i rostfritt stål och vid förkromade rör och kopplingar. Aktivatorn påskyndar härdningsprocessen så att ämnena som fogas samman kan hanteras inom några få minuter. Aktivatorn kan också användas vid rörfogar som involverar andra typer av metaller, om man vill ha en mycket snabb härdning.

Artikelnr	Vol ml	Pris
4051335	250	350

Montagelim Novipro

Novipro MS Montage är ett högkvalitets-/enkomponentslim med extremt hög limstyrka baserat på MS Polymer. Kemiskt neutral. Produkten har utmärkande limegenskaper på de flesta byggmaterial. Fyller ojämnheter och utjämnar materialspänningar. Produkten har en mycket hög omedelbar limstyrka, upp till 200 kg/m. Ägnad för strukturell limning i de flesta sammanhang inom byggindustrin, t ex sanitet och limning mot metall i ventilationssystem. Luktfritt.

Lim & Tät Bostik

Limmet appliceras i strängar och har lättsprutad smidig och trådfri konsistens. Limning kan ske under skiftande förhållanden både inom- och utomhus. Hög vidhäftning mot de flesta material, även mot kalla, fuktiga och oljiga ytor. Limfogen får en hög hållfasthet och förblir något elastisk med bra vatten-, köld- och värmebeständighet. Användningsområde för Lim och tät är brett. Används inom många branscher som till exempel monteringslimningar vid bygg- och inredningsarbeten. Limning och tätning av plåtskarvar inom plåt och ventilation, förekommande arbeten i båtbranschen som däck, bord etcetera samt som allroundlimmet i villan och hushållet. Kan användas på trä, träfiberskivor, gips, laminat, kakel, sten, betong, puts, tegel och metaller (bland annat rostfritt stål, galvaniserat stål, aluminium).

Sanitetskitt Unigum

Unigum är ett icke-härdande, syntetiskt gummikitt helt fritt från organiska lösningsmedel. Unigum används i första hand för tätning vid anslutning av toalettstolar och köksavlopp samt vid installation av stålvaskar men kan dessutom användas för talrika andra ändamål där ett smidigt, vidhäftande och icke-härdande kitt är önskvärt. Unigum kan således även användas utomhus för tätning av takrännor, stuprör, takbeläggningar av tex eternit och plåt. Unigums goda vidhäftningsförmåga gör det möjligt att använda det på så olika material som till exempel metall, trä, glas, betong och plast.

Gängtätning Loctite 577

LOCTITE 577 är utformad för fixering och tätning av metallrör och rörkopplingar samt andra cylindriska metallmonteringar. Produkten ger en omedelbar lågtryckstätning för rör och rörkopplingar i metall. Den varken kryper, krymper eller orsakar igensättning av system genom sönderfall. Lämplig för snabb applicering vid låga temperaturer. Produkten har utmärkt termisk och kemisk motståndskraft och ger lägre grad av utflytning efter applicering på delen.

Geotextil

Votec fiberduk / geotextil

726060 9107028

Leveranstid 2-3 dagar från lagerställe 627. Votec fiberduk/geotextil är godkänd och klassad enligt Norgeospec, samt bedömd enligt kriterier för Sunda Hus, Basta och Byggvarubedömningen. För att välja rätt sorts fiberduk/geotextil använd fiberduksväljaren som ni hittar när ni är inloggade och klickar på ett artikelnummer. Votec fiberduk/geotextil är nålfiltad och termiskt behandlad. Fiberduk/geotextil används till separation och infiltration. Vid separation förhindras olika massor av olika fraktioner att blandas. Vid infiltrering släpper fiberduken/geotextilien igenom vatten medan den hindrar partiklar att passera. Behövs en skyddsgeotextil se avsnitt “Skyddsgeotextil”.
Material: PP

Gummimembran, EPDM

Membran för exempelvis dammar och tätskikt. EPDM (gummi) har unika egenskaper med lång livslängd. Gummiduk ger ett bra tätskikt som är hållbart och har en hög motståndskraft mot yttre påverkan. Gummiduken har en bra förmåga att motstå mekanisk påverkan från tryck eller rörelser. EPDM är inte oljebeständigt. För val av rätt membran kontakta geoteknik@dahl.se

Bentonitmattor

Bentonitmatta VOTEC

726070, 726072

726071, 726073, 726074

Leveranstid 2-3 dagar från lagerställe 627. VOTEC Bentonitmattor är tillverkade i sandwichkonstruktion bestående av två lager geotextil som omsluter ett lermineral bestående av bentonit. Finns också med ett plastmembran (Bentonitmatta Plus) som möjliggör användning av bentonitmattan i miljöer med kemikalier. VOTEC Bentonitmatta Plus ger även ett dubbelt skydd, så kallat kombinationstätskikt, då både bentoniten och plastmembranet tätar. Detta ger en mycket säker konstruktion och en täthet på näst intill 100 %. VOTEC Bentonitmatta har bland annat fördelar såsom höga tätningsegenskaper som garanteras med en förutbestämd permeabilitet och tjocklek, snabb och enkel installation, inga certifierade installatörer eller kostsam svetsutrustning krävs, låg vikt som minskar transportkostnaderna, miljövänlig samt finns i flera olika bredder, tjocklekar och kvalitéer. VOTEC Bentonitmatta kan bland annat användas vid botten- och topptätningar av deponier, grundvattenskydd, invallningar, tätningar av grundkonstruktioner, vertikala barriärer som avskärande skikt, inneslutning av gas.
Längd: 40 m. Bredd: 5 m

Lösbentonit VOTEC Actifill

Leveranstid 2-3 dagar från lagerställe 627. Actifill är ett natriumbentonitgranulat vilken används på detaljer vid vattentätning. ActiFill kan användas torr eller blandad med vatten och blir en vattentät pasta som kan appliceras på detaljer. När den appliceras tillsammans ActiTex bildar den ett sömnlöst vattentätt system. Användningsområden: Fyllnadsmaterial för att fylla hålrum i underlaget innan ActiTex påförs. Fyllmaterial vid vertikala eller horisontella genomföringar.

Gabioner

Gabioner

Leveranstid 2-3 dagar från lagerställe 627. Stålkorgar för stenfyllnad som byggs ihop av paneler, spjut och stag. Används ofta till murar eller stödkonstruktioner. Panelerna bildar gabionens sidor, spjuten kopplar samman panelerna till korgar och stagen ger den monterade korgen stabilitet. OBS Gabionkorgarna måste fyllas med sten på den plats där de är avsedda att anläggas. Dessa gabioner är inte lyftbara när de är fyllda med sten.
Utförande: Rutnät 10 x 10 cm

DAHL

Du har väl inte missat vår app?

Hela grossistlagret i din egen telefon, smart va?

Appen funkar via i ditt lager, i servicebilen och i butik
– ett tryggt sätt att handla i dessa tider.

Ladda ner appen här:

Available on the iPhone App Store

ANDROID APP ON Google play

Med appen kommer du även åt nödvändig produktinformation på ett enkelt sätt, scanna produktkoden och kolla bland dokumenten. Där finns allt ifrån produktblad, installationsmanualer till kvalitetsdokument.

Inte nog med det, appen funkar med administrationstjänsten Flexibla Kontoret.

Nu kan du fakturera lika enkelt som du handlar.

Läs mer om Flexibla Kontoret här:

BROEN
VALVE TECHNOLOGIES

BROEN
FULL FLOW

NEXT GENERATION VALVE TECHNOLOGY

BROEN FULL FLOW bjuder med denna nya ventil på många fler möjligheter till kompletta lösningar med enhetliga materialegenskaper och installationsteknik. Ventilen tillgodoser de allt högre kraven på produkter när det gäller pålitlighet, effektivitet och kvalitet i moderna byggnader.

- Alla system – en teknologi
- Kompakt Full Flow design
- Anslutningsflexibilitet
- Unik ventilidentifikation
- Dansk innovation – producerad i Danmark

Den nya BROEN FULL FLOW ventilen är helt flexibel och kan användas i både gamla och nya rörsystem, tack vare att materialstandarden och presstekniken är den samma.

Kulventiler Altech

Kulventil med invändig gänga AL3600

Kulventiler med fullt genomlopp och invändig gänga. Tillverkade i förkromad mässing med stålhandtag, packning i grafoil, förkromad mässingskula och blåsutsäker spindel. Dimensionsområde: DN8 – DN80. Tryckklass: PN40 upp till max +95 °C. DN65 – DN80: PN25 upp till max +95 °C. Temperaturområde vatten: PN25: 0 °C – +150 °C, PN 40: 0 – +95 °C. Temperaturområde luft: PN25: -10 °C – +150 °C, PN40: -10 – +95 °C. Får användas för grupp 2 enligt AFS 2016:1, föreskriften för tryckbärande anordningar. Kulventiler inom dimension DN40 – DN80 är CE-märkta enligt PED 2014/68/EU.
Anslutning: Invändig. Utförande: Rak. Material: Mässing. Spak: Ja. Pressprofil: M/V

Vridspjällventiler Altech

Vridspjällventil Altech med handspak

Hus i gjutjärn och spjällskiva i rostfritt med EPDM-tätning. Levereras med handspak. DN50-150 PN16 och DN200 PN10. För montage mellan flänsar (Wafer). Temperaturområde: EPDM -10 °C +120 °C. Användningsområde: ventilerna används till avstängning av medier som ventilens spjällskiva och sätespackning är resistenta mot. Till exempel värme, kyla och andra applikationer inom industri. Funktion och konstruktion: Gjutet ventilhus med centriskt spjäll. Genomgående spindel. Mjuktätande säte där endast tätningen har kontakt med media. Handspak med flera ”hack” och låsning. Toppfläns enligt ISO5211. Hög hals för isolering.
Max. Diff. tryck: 16 bar

Vridspjällventiler Ari

Växel med ratt ARI ZESA

Komplett med skruv för montering. Handväxeln är självhämmande och har indikering av ventilens läge. Underhållsfri hel kapslad snäckväxel med ratt. Hus i gjutjärn med lock av stålplåt. Handväxeln monteras på montageflänsen och är anpassad till ARI-spjällventilers hålbild, detta gör det möjligt att även efter idrifttagning av spjällventilen montera handväxeln utan bearbetning eller extra montagekonsoler. Växeln levereras komplett med skruvar och "plastkåpa". Lämplig också som manuell vriddon till andra ventiltyper som har vridande arbetsrörelse. Tillverkad i Tyskland.

Ventilhus av segjärn och spjällskiva/spindel av syrafast stål. Korrosionsklassade C3 målning. Säte av EPDM, DN 50-200 inklusive spak, DN 250-300 fri axel och hög hals för isolering. Temperaturområde -10 - +120 °C. Fabriksbeteckning: 22012 E. Underhållsfri helt tätande spjällventil för montage mellan flänsar. Hus i segjärn med foder av EPDM-gummi, spjällskiva av syrafast stål. Hög hals med montagefläns för inisolering. Montageflänsen gör det möjligt att även efter idrifttagning montera alternativa manöverdon. Den är försedd med en köldspärr med cirka 10 mm luftgap, vilket effektivt förhindrar kondensbildning på handspaken. På handspaken finns möjlighet att låsa med hänglås. Alla ventiler med handspak är förberedda för termometermontage. Spindeln tjänstgör då som termometerficka. Dricksvattengodkännande DVGW. Tillverkad i Tyskland.

Vridspjällventiler Ghibson

Vridspjällventil CF8M Syrafast Rostfritt PN25, RTFE-tätad Ghibson

Spak

Växel

RTFE-tätad dubbelexcentriskt vridspjällsventil i CF8M syrafast rostfritt för inspänning mellan flänsar, typ wafer. Användningsområde: Lämplig för olika typer av applikationer där medier och/eller omgivningen ställer höga krav på ventilen. Ventilen är utrustat med utbytbart säte, montagefläns enligt ISO5211 för montage av don samt höghals för isolering. Uppfyller kraven för ATEX och SIL 3.

Ventilrör, ventilkombinationer och påfyllningsventiler

Ventilrör med back- och avstängningsventil LK

Ventilröret innehåller kombinerad avstängnings- och backventil. Två invändiga G15-anslutningar för anslutning av säkerhets-, vakuum-, alternativt påfyllnadsventil. Anslutningarnas utformning ger en mycket enkel och snabb montering av övriga LK Ventiler. Ventilhus av varmpressad, avzinkningsbeständig mässing. Conex klämringskoppling på kallvattensinloppet samt på anslutning till beredare och blandningsventil. Max tryck / temperatur: 1.0 MPa / 90 ºC.
Tryck: 10 bar. Material: AZH-mässing

Vattenfelsbrytare LK

Vattenfelsbrytare CubicSecure

LK CubicSecure mäter ditt vattenflöde i realtid och upptäcker vattenläckor omedelbart. Vattenfelsbrytaren skyddar ditt hem från skador orsakade av droppläckage och brustna vattenledningar. Den kompakta designen gör LK CubicSecure enkel att installera och passar i monteringsskåp. LK CubicSecure fungerar helt på egen hand och behöver inte någon uppkoppling mot internet. Vill man däremot få notiser om larm och möjligheten att se sin individuella vattenförbrukning behöver produkten kopplas upp mot Wi-Fi. När enheten är uppkopplad kan man styra LK CubicSecure på distans genom LK:s App. Tryck: 10 bar. Storlek: 110x65x85 mm (LxBxH)

Standardpaket Plus WSS

LK Standardpaket plus WSS innehåller en huvudenhet, en motorventil G20, en tryckgivare med T-rör, en manöverpanel och en läckagedetektor med två sensorer. Motorventil och tryckgivare monteras på inkommande vatten efter vattenmätaren. Huvudenheten styr motorventilen och övervakar trycksignalen från tryckgivaren. Huvudenheten spänningsmatas med en 12V nätadapter. Med manöverpanelen kan man stänga av vattnet direkt eller med fördröjning och slå på det igen. Läckagedetektorn har två sensorer men kan byggas på med flera. Detekterar sensorn vatten skickar den en signal till huvudenheten som stänger av vattnet. Det går även att komplettera systemet med fler läckagedetektorer om man vill övervaka flera platser. Övervakning av trycket i systemet sker med tryckgivaren då motorventilen är stängd. Manöverpanelen och läckagedetektorn kommunicerar trådlöst eller med kabel, är batteridrivna eller kan ha extern spänningsmatning. Totalt kan max 16 manöverpaneler eller läckagedetektorer anslutas till huvudenheten. • Trådbunden eller trådlös kommunikation. • Kan styras och övervakas mobilt då LK Webserver ansluts. • Kan enkelt byggas på med detektorer och manöverpaneler.

Läckagedetektor WSS

LK Läckagedetektor WSS är ett tillbehör till LK Vattenfelsbrytare WSS (Start, Standard och Standard plus). I paketet ingår två sensorer för detektering av vattenläckage. Enheten är batteridriven men kan kompletteras med en nätadapter för extern spänningsmatning. LK Läckagedetektor WSS kan också användas enskilt, som ett vattenlarm. Vid ett eventuellt läckage ger detektorn ifrån sig ett ljud. Det går att ansluta fler sensorer för detektering på en större yta. Läckagedetektorn kommunicerar trådlöst eller med kabel om den ansluts till en huvudenhet. Totalt kan max 16 manöverpaneler eller läckagedetektorer anslutas till huvudenheten. 2st AA batterier är bipackade. • Fler sensorer kan anslutas. • Trådbunden eller trådlös kommunikation. • Har temperaturövervakning.

Vattenfelsbrytare Vatette

Vattenfelsbrytare Vatette

Vatette Vattenfelsbrytare övervakar kontinuerligt fastighetens hela tappvattensystem och upptäcker allt från små droppläckage till stora flödesläckage som t.ex. brustna ledningar. Vattenfelsbrytaren upptäcker även dolda läckage som annars riskerar att orsaka stora skador. Vid ett detekterat läckage larmar vattenfelsbrytaren och stänger av vattentillförseln. Storlek: 200x150x120 mm (LxBxH). Tryck: PN10. Effekt/eldata: 24V/230V. OBS endast för kallvatten.

Vattenfelsbrytare Waterfuse

Villa WaterFuse®

WaterFuse Vattenfelsbrytare (VFB) fungerar som en säkring för vattensystemet. Stänger automatiskt av vattnet vid indikering av vatten eller när man lämnar hemmet samt trycktestar VVS installationen. Använder tryckgivare för att hitta de minsta droppläckagen. Identifierar läckage ned till 5 ml/timme. Kan komplimenteras med Fjärrenhet och Vattendetektor.

Artikelnr	Dim	Typ	Mtrl	Pris
5619830	G20	Invändig	Rostfritt stål/flermaterial	7.975

Villa komplett WaterFuse®

5619834A

När man lämnar huset stängs vattnet av i hela huset med ett tryck på fjärrenheten eller centralenhet, och slås på lika enkelt. Vattendetektorer känner kontinuerligt av om det uppstår läckor vid utsatta platser, som t ex diskmaskin och larmar samt stänger av vattnet vid läckage. När vattnet är avstängt utförs en automatiskt läckagekontroll av den elektroniska tryckgivaren. Detta sker automatiskt en gång per dygn om inte manuell avstängning skett. Det innebär att även dolda fel som kan finnas inne i väggarna upptäcks och att en daglig kvalitetskontroll på rörsystemet i fastigheten utförs.

Vattenfelsbrytare WaterFuse®

WaterFuse Lägenhet är en produkt som enkelt minskar risken för att drabbas av vattenskada i lägenheten. Genom att placera in motoriserade kulventiler i vattenfördelarskåpen skapas möjlighet att stänga av vattnet per lägenhet. Givare i vattenfördelarskåpet känner av vattenläcka och stänger av omedelbart.

Artikelnr	Dim	Typ	Mtrl	Pris
5619868	G15	Invändig	Rostfritt stål/flermaterial	5.350

Läckagebrytare WaterFuse® - PlugIn

5216567, 5216569

5216566

WaterFuse - Plug In skyddar enkelt mot vattenskador. Systemet stänger av vattnet och larmar med tydlig pipsignal vid läcka. Använder motorventiler som monteras på vattenledningen till objektet som ska övervakas. Den medföljande vattensensorn placeras under objektet. Monteras direkt i väggguttaget och möjlighet finns att bryta strömtillförseln till apparaten som är inkopplad till vattenfelsbrytaren. Material: Rostfritt stål/flermaterial. Tryck: 0-16 bar. Effekt: 230 V

Artikelnr	Dim	Utför	Stl	B	Pris
5216566	G15	En ventil	65	B	2.340
5216567	G15	Två ventiler	65		3.400

Vattendetektor WaterFuse®

Vattendetektor med tre vattensensorer kopplas ihop med WaterFuse systemen Villa, Stuga, och Lägenhet för att automatiskt stänga av vattnet vid vattenläcka.

Artikelnr	Mtrl	Eff	Färg	Pris
5619897	PP/flermaterial	Batteri 2 x AA	Vit	1.220

Stuga WaterFuse®

WaterFuse Vattenfelsbrytare (VFB) fungerar som en säkring för vattensystemet. Gör det enkelt att stänga av vattnet när man lämnar hemmet och stänger av automatiskt om vattendetektorn identifierar vatten. En enklare lösning för mindre stugor och fritidshus. Kan inte använda tryckgivare och använder en enklare trådlös överföring än Villa systemen. Kan komplimenteras med Fjärrenhet och Vattendetektor.

Artikelnr	Dim	Typ	Mtrl	Pris
5619853	G20	Invändig	Rostfritt stål/flermaterial	4.920

Läckagebrytare Utrustning WaterFuse®

En perfekt lösning när enstaka utrustningar ska övervakas inom restaurang, affärer, industrier eller flerbostadshus. På morgonen slår man enkelt på vattnet genom att trycka ON på styrenheten. Samtidigt startar en timer som automatiskt stänger av vattnet 12 senare så vattnet är avstängt kvällar och helger. Vill man att vattnet ska vara på konstant finns sådan funktion som också ställs in vid installation. Du styr då vattnet manuellt på/av och givaren övervakar hela tiden när vattnet är på. Larmet eller fastighetsstyrningen kan stänga av vattnet när ingen finns på plats.

Artikelnr	Dim	Typ	Mtrl	Pris
5619884	G15	Invändig	Rostfritt stål/flermaterial	3.860

Fjärrenhet WaterFuse®

Fjärrenhet för styrning av WaterFuse systemen Villa, Stuga, och Lägenhet.

FLEXIBLA KONTORET

SMIDIGT ADMINISTRATIONSTJÄNST FÖR HANTVERKARE

Är du proffshantverkare och trött på att administrationen äter upp din arbetstid? Ta hjälp av Flexibla Kontoret – ett molnverktyg speciellt utformat för att förenkla och effektivisera administrationen för hantverkare.

I Flexibla Kontoret kan du registrera allt från materialinköp och arbetstid till fakturering och betalning – snabbt och smidigt via din mobil, surfplatta eller dator. Du får överblick över alla kunder, arbetsorder, fakturor och pågående affärer och kan enkelt dokumentera inköp och arbetstid.

Tjänsten är molnbaserad och drift, back-up, säkerhetslösningar och arbetsverktyg för pågående arbete ingår.

Välkommen till Flexibla Kontoret!

Logga inköp, logga tid och administrera online – med flexibla kontoret sköter du enkelt din administration och kan koncentrera dig på ditt hantverk!

Luftningsventiler Spirovent

SpiroTop - Höjdpunktsavluftare Originalet

Det stora luftgapet från vattnet (minimalt 40 mm) förebygger att ventilen förorenas. Sådan förorening är en av de vanligaste orsakerna till läckage. Genom ventilens särskilda konstruktion kommer den alltid att stänga helt.
Tryck: 10 bar. Max temperatur: 110 °C. Material: Mässing

4845249	DN10 3/8	Utvändig gänga	0,2-8	196

Automatiska luftningsventiler övriga

Flottöravluftare LK 700

För automatisk avluftning av värme- och kylsystem. Tillverkad i rostfritt stål, SIS 2333, vilket medför att den lämpar sig väl vid höga krav på tryck, temperaturer och media. Luftklockan är försedd med mjuktätning av EPDM-gummi och tål glykolblandat vatten (max 50 %). Max tryck / temperatur: 1.6 MPa / 130 ºC. Avstängningsventil i mässing.
Max temperatur: 130 °C. Utförande: Utvändig: Material: Rostfritt stål

Artikelnr	Mod	Ansl	Tryck bar	Pris
4845228	Rak	G10	16	3.300

Flottöravluftare LK 740

Bottenansluten flottöravluftare för avluftning av värmesystem. Avluftaren levereras med en automatisk avstängningsventil i mässing. Avluftaren är försedd med en snabbavluftningsventil som används i samband med systempåfyllning (placerad på toppen av avluftaren). Samt ytterligare en avluftningsventil som kan lämnas öppen under en kortare period (max en månad) för att avskilja resterande luft i systemet.
Max temperatur: 120 °C. Utförande: Utvändig. Material: Mässing

Självverkande regulatorer Danfoss

Styrventil AB-QM

5401092-5401096, 5401102-5401106

5401097-5401101, 5401107-5401110

Automatisk flödesbegränsare med utvändig eller invändig gänga, med eller utan mätnipplar. AB-QM är en tryckavlastad reglerventil som kan bestyckas med ett ställdon och fungera som en reglerventil med inbyggd flödesbegränsning.Ventilen är extremt kompakt och är perfekt för moderna värme- och kylsystem. Inställning av önskat flöde är mycket lätt och utföres utan verktyg. Genom en inbyggd regulator bibehåller ventilen ett konstant differenstryck över käglan, och är därmed oberoende av tryckförändringar ute i systemet.
Material: Avzinkningsfri mässing

5402405	DN15/20	Mässing	716

Termostatisk reglerventil MTCV Basic

En termostatisk reglerventil, med flera funktioner, avsedd för system med cirkulerande tappvarmvatten, VVC. Skapar en termisk balans i cirkulationssystemet genom att konstanthålla en förinställd temperatur. Ett VVC-system med MTCV monterad ska inte inregleras manuellt eller justeras - ventilen reglerar automatiskt hela cirkulationskretsen. MTCV (A grundversion) kan byggas ut till MTCV(B version) och MTCV (C version) under drift.
Temperaturområde: 35-60 °C. Tryck: 16 bar. Kvs: 1,5. Utförande: Invändig gänga. Material: Rg5, CW724R

Växelventil

ESBE serie VZC är en serie kompakta växelventiler i mässing avsedda för värmepumpar, golvvärme eller HVAC applikationer. Den främsta egenskapen är förmågan att snabbt växla flödesriktning mellan två kretsar vilket resulterar i energi-effektiv funktion. Serie VZC utan kabel levereras med ett kontaktdon typ Molex för anslutning till en kabel av eget val.
Utförande: Klämringskoppling, lös kabel. Tryck: 6 bar. Material: Mässing/PPS

4795919, 4795920

4795917, 4795918

4795916, 4795915

Termostatventilen för automatisk injustering av varmvattencirkulation i bostäder har en steglös temperaturinställning, som sparar energi genom kortare fördröjningstid for varmvatten. Avstängningsfunktionen säkerställer ett okomplicerat underhållsarbete och funktionen för temperaturreglering ger säkrare driftprocesser. TA-Therm ZERO är en produkt som klassas som blyfri då den innehåller mindre än 0,1% bly. ZERO – blyfri en produktserie som innehåller mindre än 0,1% bly. Termometer för enkelt underhåll. Mätuttag för enkelt underhåll och temperaturmätning.
Tryck: PN16 bar. Temperaturområde: 35-80 °C. Material: Blyfri mässing (<0,1%bly). Funktion: För tappvarmvatten

DAHL // /OPTIMERA/

DAHL PICK-UP POINT!

PICK-UP POINT

BESTÄLL ONLINE OCH ANGE VAR DU VILL HÄMTA GODSET
så kommer det levererat till den ort/butik du anger.

Nu kan du hämta ditt beställda material även hos vårt systerbolag Optimera.
Godset beställer du på dahl.se för leverans till en butik, där finns nu ännu fler butiker att välja bland, vi samarbetar med Optimera på utvalda orter.

Så här beställer du från Dahl:

> På dahl.se väljer du lämpligt Dahlcenter eller Pick-up point via ”Hitta butik”
> Genomför din order och välj hämta i butik som leveransalternativ
> Ditt gods aviseras via sms och du är sedan välkommen till Dahl i våra butiker eller Pick-up Point (Optimera) för att hämta ditt gods.

Dahl Pick-up point finns nu på Optimera i följande orter:

- Eksjö
- Eslöv
- Falköping
- Hagby
- Hallsberg
- Höganäs
- Klippan
- Ljungby
- Ljusterö
- Nässjö
- Mjölby
- Skanör
- Svedala
- Säffle
- Sävsjö
- Tranås
- Ulricehamn
- Vaggeryd
- Vagnhärad
- Vara
- Vetlanda
- Värnamo
- Åhus
- Älmhult

Nivåmätare Sitrans LUT 420

1-kanals ultraljudsnivåmätare för nivåmätning på vätska, slurry och fast material upp till 60 m avstånd beroende på givare (Echomax givare köpes separat). LUT 420 har programvara för volymsberäkning och pumpstyrning som standard. Flerfunktionsdisplayen kan visa flöde, nivå, mA mm. Matningsspänning och förskruvningar: 100 till 230 V AC +/-15%, 3 st M20 i plast. Ingångar: 1 st för valfri Echomax ultraljudsgivare, 1 st för extern tempgivare TS-3, 2 st binära. Utgångar: 1st 4-20mA HART, 3st relä.

Artikelnr	Funkt	Pris
5619759	Nivå ihop med Echomax	23.200

Nivåmätare Sitrans LUT 430

1-kanals ultraljudsnivåmätare för nivåmätning på vätska, slurry och fast material upp till 60 m avstånd beroende på givare (Echomax givare köpes separat). Kan användas som flödesmätare i öppna rännor, men bör då kompletteras med tempgivare TS-3. LUT 430 har programvara för flödesmätning, volymsberäkning och pumpstyrning som standard. Flerfunktionsdisplayen kan visa flöde, nivå, mA mm. Matningsspänning och förskruvningar: 100 till 230 V AC +/-15%, 3 st M20 i plast. Ingångar: 1 st för valfri Echomax ultraljudsgivare, 1 st för extern tempgivare TS-3, 2 st binära Utgångar: 1 st 4-20mA HART, 3s.

Artikelnr	Funkt	Pris
5619760	Nivå/flöde ihop med Echomax	32.200

Kallvattenmätare och tillbehör Siemens

Vattenmätare mekanisk WFK30

Mekanisk mätare för mätning av kallvattenförbrukning. Visning av ackumulerad förbrukning, möjlighet till fjärravläsning via m-bus med WFZ31, RSK 4647730. För mätning av vattenförbrukningen i: Tappkallvattenanläggningar i bostadshus och övriga byggnader, olika typer av vattenförsörjningsanläggningar, flerfamiljshus, kontors- och förvaltningsbyggnader. Nominellt tryck: PN16. Kontinuerligt flöde Q3: 2,5 m³/h. Anslutningsgänga: G ¾ “. Max vattentemperatur: 30 °C.
Material: Plast/brons

Varmvattenmätare och tillbehör Siemens

Vattenmätare mekanisk WFW30

Mekanisk mätare för mätning av varmvattenförbrukning. Visning av ackumulerad förbrukning, möjlighet till fjärravläsning via m-bus med WFZ31, RSK 4647730. För mätning av vattenförbrukningen i: Tappvarmvattenanläggningar i bostadshus och övriga byggnader. Olika typer av vattenförsörjningsanläggningar flerfamiljshus, kontors- och förvaltningsbyggnader. Nominellt tryck: PN16. Kontinuerligt flöde Q3: 2,5 m³/h. Anslutningsgänga: G ¾ “. Max vattentemperatur: 90 °C.
Material: Plast/brons

Varmvattenmätare och tillbehör Ambiductor

Varmvattenmätare Flow 4

Digital varmvattenmätare av ultraljudstyp med löstagbar elektronik (upp till 5 m kabel som option) och modulplatser för kommunikation och matning. Godkänd för dricksvatten och debitering. Extremt lågt startflöde för läckagedetektering. Intern avancerad logger och larmhantering. Tillval: M-bus (RSK 4647726), Modbus (RSK 4647715), wireless M-bus (RSK 4647716), LoRa (RSK 4647925), 24/230V-matning (RSK 4647791), kopplingar och backventiler. Mätinsamlingsutrustning för drive-by samt trådbundna och trådlösa nätverk.
Tryck: 16 bar. Material: Ecobrass, mässing. Max temperatur: 90 °C

120368	DN15/ G20	110	16	542

Varmvattenmätare och tillbehör LK

Vattenmätare CubicMeter

LK CubicMeter är en icke-invasiv vatten- och läckagemätare. LK CubicMeters unika design gör att den kan installeras på befintliga rör i intervallet mellan 15 - 26 mm med ytterdiameter och en rad olika material. Eliminerar behovet av ultraljud gel, som torkar snabbt. Upp till 98% noggrannhet och MID / OIML R-49-kompatibel. Upp till tio års batteritid. Plug och Play-installation med lågt underhåll. Kompatibel med LK Pex och PAL rör dim. 16 – 25. Detektering av droppläckage, brustna rör och större läckor. Trådlös kommunikation, Wireless M-Bus – Mode C1 868 MHz (EN-13757 Standard). Enligt studier minskar implementeringen av individuell mätning vattenförbrukningen med cirka 30%. För en normal genomsnittlig familj minskar inte bara vattenförbrukningen utan också koldioxidutsläpp och eventuella läckagekostnader.

Stigarrör Tegra 1000

Tegra 1000 korrugerat stigarrör utan muff. Stigarrören används som stigare till nya Tegra 1000 brunnsbottendelar. Det korrugerade stigarröret kommer vid tjäle att röra sig i takt med kringfyllnads-massorna. Vid alla typer av sättningar på grund av jordlast, trafiklast eller tjäle kan röret pressas ihop och sträckas ut, utan att krafter överförs till brunnsbotten.

Plastgolvbrunnar och tillbehör Faluplast

Golvbrunn Bodil

Typgodkända BODIL är framtagen för att klara vertikalt montage. Golvbrunnen har Ø75 mm utlopp, är självrensande samt optimerad för ett högt flöde. Utloppsröret är anpassat i längd så man kommer igenom bjälklaget och skarven kommer under bjälklaget. BODIL är godkänd för både dusch och badkar. Silen döljer klämringen och har ett excentriskt urtag. BODIL är tillverkad av polypropen vilket gör att den tål höga temperaturer och har en god kemikalieresistens.

Filter till golvbrunnar

Flergångsfilter som placeras ovanpå duschbrunnens vattenlås och förhindrar att hår och andra partiklar fastnar i både brunnens vattenlås och husets stammar. Avfallet avlägsnas lätt från filtret och läggs i torrsoporna. Med filtret följer verktyget Droppen som gör det enkelt att lyfta upp brunnsgallret. Förvara Droppen så att det alltid finns till hands samtidigt som den blir en påminnelse om att regelbundet rensa golvbrunnen. Passar brunnar med galler av metall eller plast.

Plastgolvbrunnar Jafo, tillbehör

Klämring

Klämring i vit plast som passar samtliga JAFOs 150-golvbrunnar i plast med skruvad klämring. Ingår som standard klämring i JAFOs golvbrunnar med mattpaket (MP). Klämringen levereras med 5 st tillhörande specialskruvar utan spets i syrafast rostfritt stål och O-ring. För flera designmöjligheter finns klämringen att erhålla i grått utförande.

Artikelnr	Diam mm	Utför	Funkt	Pris
7133854	171	Med 5 rostfria skruvar	För Jafo golv-brunn	139

Vattenlås

Vattenlås med handtag i rostfritt stål. Anpassat för ett cirkulärt säte och har en integrerad tätning. Med ett enkelt handgrepp delar man vattenlåset för en snabb och effektiv rengöring. Vattenlåset är anpassat till alla JAFO plastgolvbrunnar från 1991 och till dagens golvbrunnar med cirkulärt vattenlås. Passar till: PS75, PS75D, PB75, PBL50, PBL75, PB110, PBB110, PBX110, PS50 M2, PS75 ROT M2.

Artikelnr	Funkt	Pris
7129535	För JAFO golvbrunn	226

Luktstopp mekaniskt

Mekaniskt luktstopp kan monteras i alla JAFO golvbrunnar med pungvattenlås, passar även i golvbrunnen 86:an. Det mekaniska luktstoppet ersätter det traditionella vattenlåset i golvbrunnen och förhindrar att avloppslukt tränger upp ur golvbrunnen även om vattenlåset torkat ut. Lämpligt i golvbrunnar som inte används regelbundet. Hög kapacitet, upp till 1,2 l/s beroende på vilken av våra golvbrunnar den monteras i. Vid montering smörj den röda tätningen med flytande tvål eller liknande. Vid komplettering med Låsring RSK 7133868 fungerar det mekniska luktstoppet även som ett bakvattenstopp. Låsringen passar ej till golvbrunnen 86:an.

Artikelnr	Diam mm	Pris
7133875	135 och 122	708

Luktstopp mekaniskt

Luktstopp förhindrar dålig lukt från avloppssystemet. Det är lätt att ta upp även när det har suttit länge i golvbrunnen. Vattenlåset är alltid stängt och öppnas först när golvbrunnen fylls med vatten. Ett fjäderbelastat membran stänger av inloppsröret. När vattenpelaren i inloppsröret stiger, rör sig membranen nedåt av tyngdkraften, öppnar vattenlåset och släpper ut vattnet. När vattenpelaren minskar rör sig membranet uppåt igen och stänger vattenlåset. Om luktstoppet kompletteras med en Låsring, RSK 7133868 fungerar det även som bakvattenstopp.

Artikelnr	Typ	Funkt	Pris
7133864	Luktstopp	Till Jafo´s golvbrunnar PS 50, PS 75 ROT, PSX 75 samt PBX 75	962

Låsring luktstopp

Låsringen tillsammans med luktstopp fungerar som bakvattenstopp. Låsringen placeras under golvbrunnens klämring och förhindrar luktstoppet från att tryckas upp ur brunnen. Passar inte till PSX 75, PBX 75, PBX 110, PRB 110, 86:an eller PRK 110.

Artikelnr	Typ	Funkt	Pris
7133868	Låsring	Till bakvattenstopp	658

Monteringsplatta 2014

Purus monteringsplatta för Purus golvbrunn 150 serie i ABS plast för träbjälklag med vändbar funktion. Medföljande 12,5 mm distans monteras och avjämningsmassa flyts in mot brunn enligt dagens gällande branschregler när det gäller klinker på träbjälklag. Släta sidan är för vinylgolv och innehåller en lutning in mot golvbrunn. Skruvar medföljer för montering av platta och golvbrunn. När distansringen inte används, så passar alla plastgolvbrunnar i 150-dimension. Passar inte Våke, Våge och Loke. Med distansringen monterad passar följande plastgolvbrunnar: Oden, Brage, Ymer 50, Duschbrunn, Flex och Freja.

Regulator Siemens

Rumstemperaturregulator Siemens RCU15

Rumstemperaturregulator för individuell reglering i rum som värms eller kyls med luftbehandlingsanläggning, radiator, kyltak etc. För styrning av termiskt ventilställdon. Styrsignal: 2-läges , 2-läges PWM Kapslingsklass: IP30

Artikelnr	Märkspän V	Pris
5353769	AC 24	1.760

Rumsenhet QAA55.110/101

Rumsenhet för avkänning och ändring av rumstemperatur tillsammans med reglercentral RVS46.530/11 Datablad 1635.1.

Artikelnr	Funkt	Pris
5354104	Tillbehör till RVS46.530/11	1.660

Regulator RDG100

Rumsregulator med display för väggmontering. För Fan Coil-applikationer, universella applikationer och för kompressorer i DX-utrustning. Matningsspänning AC230V, styrsignalutgångar ON/OFF, 3-läges eller PWM. Kapslingsklass: IP30

Artikelnr	Märkspän V	Pris
5383572	230	2.330

Regulator RDG100KN

Rumsregulator med display för väggmontering. För Fan Coil-applikationer, universella applikationer och för kompressorer i DX-utrustning. Matningsspänning AC230V, styrsignalutgångar ON/OFF, 3-läges eller PWM, KNX kommunikation. Kapslingsklass: IP30

Artikelnr	Märkspän V	Pris
5383574	230	3.550

Regulator RDG100T

Rumsregulator med display för väggmontering. För Fan Coil-applikationer, universella applikationer och för kompressorer i DX-utrustning. Matningsspänning AC230V, styrsignalutgångar ON/OFF, 3-läges eller PWM, 8 programmerbara tidur. Kapslingsklass: IP30

Artikelnr	Märkspän V	Pris
5383573	230	2.670

Regulator RDG160T

Rumsregulator med display för väggmontering. För Fan Coil-applikationer 3-hastighets eller ECM-fläkt. Universella applikationer och värmepumpsapplikationer. Matningsspänning 24 V, styrsignal utgångar ON/OFF eller DC 0...10V. Kapslingsklass: IP30

Artikelnr	Märkspän V	Pris
5383575	24	2.620

Regulator RVD260-A

Fjärrvärmeregulator för installation i fjärrvärmeundercentraler. Regulatorn kan kommunicera via LPB och Modbus. Reglering av två kretsar med cirkulationspump. Beredning av tappvatten i värmeväxlarsystem eller varmvattenberedare. 14 programerade anläggningstyper med automatiskt val av erforderliga funktioner beroende på anläggningstyp. Kapslingsklass: IP40

Artikelnr	Märkspän V	Pris
5382126	230	13.950

Regulator RVD140-A

För installation i fjärrvärmeundercentraler. Regulatorn kan kommunicera via Modbus. Reglering av en krets med cirkulationspump. Beredning av tappvatten i värmeväxlarsystem eller varmvattenberedare.

Artikelnr	Märkspän V	Pris
5351662	230	11.525

Regulator RVL480

Multifunktionell värmeregulator för reglering av värmegrupp och panntemperatur samt förregling. För bostadshus och andra byggnader. Kapslingsklass: IP42.

Artikelnr	Märkspän V	Styrsig	Pris
5351642	AC 230	3-läges	17.850

Regulator RVL481

Värmeregulator med beredning av tappvarmvatten. Multifunktionell och kommunicerande värmeregulator för bostadshus och andra byggnader. Avsedd för värmegruppreglering med behovsstyrd panntemperaturreglering eller för reglering. Värmekällor så som till exempel fjärrvärme och pannor. Styrning av tappvattenberedning. 29 förprogrammerade anläggningstyper.

Artikelnr	Märkspän V	Styrsig	Pris
5351641	230	3-läges	21.150

Regulator Siemens RLA162

Elektronisk regulator för direkt montering i rum. Konfigurerbar för värme- och/eller kylapplikationer. Kan användas som individuell regulator eller tillsammans med kanaltemperaturregulator (RLM) för begränsning.

Artikelnr	Märk-spän V	Styrsig	Max temp °C	Pris
5353738	AC 24	DC 0...10 V	50	3.090

Regulator Siemens RLM162

Kompakt, elektronisk regulator med integrerad kanaltemperaturgivare och börvärdesomställare i en enda enhet, för direkt inbyggnad i anläggningen. Endast ledningarna för matning och reglerutgång skall förläggas. Kapslingsklass: IP65.

Styrventil MXG461B

3-vägs blandnings- resp. 2-vägsventil med elektromagnetiskt ställdon för kontinuerlig styrning i system med tappvarmvatten (vatten i öppna kretsar), kall- och varmvatten. Gängat utförande, med lägesreglering, lägesåterföring, snabbstängningsfunktion, manuell omkoppling. • Kapslingsklass: IP31 • Nominellt tryck: PN 16 • Märkspänning: AC 24V / DC 20-30 V • Tillåtet drifttryck: 1600 kPa • Gångtid: < 2 s • Styrsignal: DC 0-10 V, DC 2-10 V, DC 4-20 mA, DC 0-20 mA, DC 0-20 V Phs
Tryck: 16 bar. Gänga: Utvändig. Märkspänning: AC/DC 24 V. Gångtid: <2 sek. Max temperatur: 130 °C. Material: Rödgods CC491K

Ventiler och ställdon Sauter

2-vägs reglerande kulventil

För kontinuerlig reglering av kallvatten, varmvatten eller luft . Passar till ställdon, serie AKM 105, 115(S), AKF 112, 113(S). Ventilhus av avzinkningresistent gjuten mässing, kula av DZR mässing, förkromad och polerad yta. Axelpackning: 2st o-ringar EPDM. Reglerkarakteristik: likprocentig (kan ändras på SUT ställdon). Reglerförhållande: 500:1, i drift >100:1. Läckage: 0,001% av kvs värdet. Tillåten drifttemp: –10 …130°C.

Ställdon för kulventiler

För reglering av 2 och 3-vägs kulventiler i serie VKR och BKR. För regulatorer med kontaktutgång (2- eller 3-punkts styrning) eller med analog utgång (0…10V). Teknisk beskrivning: Tvådelad kapsling av självsläckande plast, underdel svart, överdel gul. Konsol och bayonettring tillverkade av plast för montering på kulventil. Anslutningskabel 1,2m, 3x0,75mm². Vridkraft AKM 105 4 Nm, AKM115 8 Nm.

Artikelnr	Mod	Pris
121011	SUT 8NM 24VAC/DC	2.670

Termiskt ställdon

För små ventiler, med lägesindikering och automatisk anpassning. Reglering av 2-vägs- och 3-vägsventiler typ VUL, BUL, VUT, BUT och Valveco eller vanliga småventiler från andra tillverkare. För regulatorer med växlande utgång, 2-punktsstyrning eller kvasi-kontinuerlig reglering med ”puls-paus”-signal, i kombination med individuella rumsreglersystem. Tryckkraft upp till 125 N. Med 230 V eller 24 V anslutningsspänning. Utföranden typ NC (normalt stängd) och NO (normalt öppen). Kan även monteras upp-och-ned. Tillåten omgivningstemp: 0...50 °C. Kapslingsklass: IP54. Anslutning till ventil: ISO diam. 30 mm x 1,5. Finns med olika kabellängder. Standardlängd 1.0 m. Passar de vanligaste ventilfabrikaten, adaptrar finnes till övriga ventilfabrikat. Finns även i svart utförande på förfrågan.

Shuntgrupper ESBE

Shuntgrupp Esbe GRC111

En komplett shuntreglering med inbyggt ställdon. Regleringen baseras på feedback från utomhusgivare och en justerbar karakteristisk värmekurva. En förskjutning/parallell justering av den karakteristiska värmekurvan kan aktiveras av en extern signal, till exempel for nattsänkning. Ett temperaturfilter kan aktiveras för att fördröja reaktionstiden på förändring i utomhustemperatur och därmed undvika obalans mellan beräknat och faktiskt uppvärmningsbehov. Speciellt användbart i välisolerade byggnader och för applikationer med snabba uppvärmningssystem.

Artikelnr	Mod	Pris
5492694	GRC111 CRC +VRG	13.600

Shuntgrupp Esbe GRA111

Regleras av Esbe ARA661 (230V, 90° arbetsområde, 120 sekunder gångtid), ett ställdon med 3-punktssignal (öppna/stäng). Det kompakta ställdonet har 90° arbetsområde och ventilen kan enkelt handmanövreras med hjälp av drag-och-vrid-ratten på framsidan.

Artikelnr	Mod	Pris
5492695	ARA661+VRG	10.825

Shuntgrupp Esbe GBA111

GBA 111 regleras av ESBE ARA661 (230V, 90° arbetsområde, 120 s. gångtid), ett ställdon med 3-punktssignal (öppna/stäng) som är bra för blandning tillsammans med en extern reglering. Det kompakta ställdonet har 90° arbetsområde och ventilen kan enkelt handmanövreras med hjälp av drag-och-vrid-ratten på framsidan.

Artikelnr	Mod	Pris
5492699	ARA661+VRB140-W	11.675

Shuntgrupp Esbe GRA131

Shuntgrupp inklusive ESBE ARA639 (24V), ett ställdon med proportionell signal som är bra för blandning tillsammans med en extern reglering. Utrustad med ESBEs senaste progressiva ventilteknologi vilket gör ventilen användbar för både värme och kyl tillämpningar,ventilen kan enkelt handmanövreras med hjälp av drag-och-vrid-ratten på framsidan.

Artikelnr	Mod	Pris
5492705	ARA639+VRG	11.825

Shuntgrupp Esbe GRC211

GRC211 regleras av ESBE 90C-1A, en komplett shuntreglering med inbyggt ställdon. 90C-1A är utrustad med fullständig grafisk display för enkel hantering och snabbt idrifttagande. Den kan hantera upp till fem olika inkommande signaler och styra en extern funktion.

6250985

Blandningskärl är en komplett färdigmonterad enhet med pump och armatur som används för att blanda och fylla på glykol i kyl- och värmesystem. Levereras med en behållare i polyeten, med volymgradering, skruv, lock och synlig vätskenivå. Behållaren är tillverkad i ett enda stycke utan skarvar och har därför inga svaga punkter. Den är livsmedelsgodkänd, återvinningsbar, korrosions- och kemikaliebeständig. Självsugande pump med ett max driftstryck på 6 bar. Pumphus och pumphjul i rostfritt stål. Pumpen är utrustad med termisk motorskyddsbrytare. Brytare finns direkt på pumpen. Spänning: 230 V. Effekt: 750 W. Kapslingsklass: IP44. Arbetstemperatur: +5 - +35 °C. Max driftstryck: 4 bar. Användningsområde: kyl- och värmesystem, max 30 % glykol. Tänk på att brandfarliga vätskor inte får användas tillsammans med en elektrisk pump Tillbehör Altech Armatursats för blandningskärl, rsk 6250986.

Hydroforer galv

Hydrofor, varmförzinkad

Varmförzinkad (galvad) tryckktank godkänd för 6bars arbetstryck. Dricksvattengodkänd varmförzinkning, som borgar för mycket gott korrosionsskydd och livslängd, även i svårare vatten. Tanken kan användas som hydrofortank till bostäder, buffert- och/eller tryckkslagstank i vattenförsörjningsanläggningar mm. Den är utformad för stående montering och rengöringen underlättas mycket, tack vare strategisk placering av rensluckan.
Anslutning: R32. Invändigt behandlad: Ja. Material: Tryckkärlstål

Clean I

Funktion: Clean I är ett biologiskt/kemiskt reningsverk som kan ta emot allt hushållsavloppsvatten från en fastighet. Funktionen bygger på satsvis reningsteknik, aktiv slamprocess och kemisk utfällning av fosfor. Avloppsvattnet renas i satser av samma storlek och därmed rengörs alla avloppssatser lika effektivt. Den biologiska reningsprocessen utförs av mikroorganismer som lever i det aktiva slammet. Med hjälp av flockningsmedel renas fosforn som finns i avloppsvattnet. När reningsprocessen är avslutad pumpas det renade vattnet till den tänkta utloppsplatsen. Clean 1 fungerar både vid kontinuerlig drift och i fritidshus tack vare semester automatiken. Tanken tillverkad av PE.

Fosforfällningsenhet

EkoTreat WiFi, fosforrening för ett hushåll. Liten enhet för fosforrening inomhus. Tar liten plats och är enkel att installera. Har stor fördel då den sitter i skyddad miljö. Inbyggt larm talar om när fällningsmedlet är slut. Via WiFi kan man enkelt anslutna EkoTreat till nätet och fjärrstyra enheten. Kombineras med EkoTreat fällningsmedel, RSK 5619463.

Nyhet!

CIRKULATIONSPUMPAR

Pumparna är utformade för att passa de vanligaste måtten inom svensk byggstandard: 130 och 180 mm. De har en tryckhöjd på 4, 6 eller 8 meter och levereras med snabbkoppling för elanslutning samt isolerskål.

Pumparna tål upp till 50 % glykolhalt, och kan styras med konstanttrycksreglering eller 3 fasta hastigheter.

Scanna QR-koden
för mer information.

BLYFRIA KULVENTILER

Produktprogrammet omfattar de flesta ventilstorlekar och finns både med låg och hög hals samt i följande utföranden:

- Invändig gänga (G10 upp till G50)
- Lödkoppling (DN12 upp till DN54)
- Klämringskoppling (DN12 upp till DN54)

Scanna QR-koden
för mer information.

Altechs blyfria ventiler kännetecknas av sina vita handtag.

Besök altech.nu – där finns ett omfattande sortiment av installationsprodukter för olika behov och all information du behöver.

Altech

SÄTT INTE DITT RYKTE PÅ SPEL. VÄLJ RÄTT PUMP!

GÖR ETT SMART VAL VÄLJ GRUNDFOS PUMPAR

Tillsammans kan vi skapa bättre värmesystem.
Oljud, ojämn värmefördelning, ineffektiva värmesystem, magnetit – värmesystemet innebär ofta utmaningar som måste lösas. Men så behöver det inte vara. I vårt Grundfos Lab, visar vi lösningar som är utformade för att minimera eller till och med eliminera denna typ av utmaningar, vilket gör din vardag enklare. Det är dags för en förändring.

EFFEKTIVA PUMPAR FÖR HUSHÅLL MED BORRAD ELLER GRÄVD BRUNN

VATTENFÖRSÖRJNING FRÅN EGEN BRUNN? DÅ ÄR EN EFFEKTIV LOWARA-PUMP RÄTT VAL

För borrade brunnar har vi kompletta paketlösningar anpassade för olika monteringsdjup ned till 140 m. Med dricksvatten-godkänd Lowara GS 4" borrhålspump, inbyggd backventil, motorskydd/start (för 3-fas pumpar) samt motorkabel och rostfri vajer anpassade till rätt monteringsdjup.

För grävda brunnar väljer du istället Lowara Scuba – en kompakt rostfri flerstegspump för vattenförsörjning. Välj mellan dränkbara och torrt uppställda versioner.

Beställ hos Dahl, eller kontakta din säljare hos Xylem så berättar vi mer om energieffektiv vattenförsörjning för enskilda hushåll.

Handpumpar

Gårdspump Nr 12

Gårdspump Nr-12 kan användas till ett djup av cirka 7 meter. Cylindern är placerad 1,2 meter under fotplattan, vilket som regel räcker för att cylindern inte ska frysa vintertid. På beställning kan cylindern monteras upp till 2 meters djup. Cylindern har rörgänga DN40 undertill, där galvaniserade rör med samma dimension kan skarvas i, för att sugledningen ska nå erfoderligt djup. På beställning kan Nr-12 levereras med stigrör i dimension DN32.

Klaffpump - typ Allweiler

Pumparna är av robust konstruktion tillverkade i gråjärn med metallinsats för pumpning av vätskor fria från fasta föroreningar. Hög precision i tillverkningen ger pumpar med säker drift och lång livslängd. Standardpumparna är utrustade för pumpning av vatten, oljor, bensin och vissa lösningsmedel upp till +80 °C. Klaffpumparna kan användas för en sughöjd på upp till 8 meter. Bottenventil bör användas om sughöjden överstiger 2 meter.
Ytbehandling: Lackerad

Cirkulationspumpar Altech

Cirkulationspump 1-fas Altech

5759006-09

5759010

Högeffektiv våt cirkulationspump med elektronisk reglering. Underhållsfri. Försedd med permanent magnetmotor. Effekt/eldata 230V, 50Hz. Klarar 2015 års energieffektivitetskrav. Användningsområde: värme och air-condition system. Media: värmesystem med max 50% glykol. Inställningsmöjligheter: konstant differanstryck, proportionellt differenstryck samt tre fasta lägen. Led-display som visar: effektförbrukning och felkoder. Medietemperatur: 5 – 110 °C Fas: 1. Spänning: 230 V. Tryck: PN10 bar. Tvillingpump: Nej. Pumptyp: Våt

Cirkulationspump ALPHA2 - enkelutförande, våt varvtalsreglerad 1-fas

Våtlöpande högeffektiv cirkulationspump och injusteringsverktyg för värmesystem tillsammans med ALPHA3 Reader och Grundfos Go Balance (komplettera med ALPHA Reader) . Inbyggd automatisk varvtalsreglering, funktionen Auto-Adapt som anpassar kapaciteten efter behovet, tre kurvor för proportionaltryck, tre kurvor för konstanttryck samt tre fasta varvtal. Manöverpanel med intuitiv enknappsstyrning och som på en tydlig LED-display visar aktuell energiförbrukning eller aktuellt flöde. Pumphus av gjutjärn, pumphjul av korrosionsbeständigt material och pumpaxel av keramik. Temperaturområde: 2 °C - 110 °C. Energiklass: EuP-godkänd EEI 0,15. Levereras inklusive isoleringskåpa för värme och exklusive kopplingar.
Spänning: 230 V. Fas: 1. Tryck: 10 bar. Fläns: Nej. Tvillingpump: Nej

Cirkulationspump Magna3 - enkelutförande, våt varvtalsreglerad 1-fas

Med fläns

Utan fläns

Cirkulationspump i enkelutförande med automatisk steglös varvtalsreglering och konstant eller proportionell tryckreglering samt funktionerna AUTOadapt,Flow-adapt och Flowlimit. Inställning på pump eller via styrenheten/fjärrkontrollen Grundfos GO. Extern styrning och övervakning med hjälp av utbyggnadsmod-uler. MAGNA3 har en 4 tums TFT-display med intuitivt och användarvänligt gränssnitt. Manöverpanelen har självförklarande knappar av högkvalitativt silikon för exakt navigation i menystrukturen. Manöverpanelen är utformad för att ge användaren snabb och enkel åtkomst till pump- och kapacitetsdata på plats. Pumphus av elektroforesbehandlat gjutjärn, pumphjul PES och axel av rostfritt stål. Driftstemperatur: -10 °C - 110 °C. 1 x 230V, 50Hz. Samtliga MAG-NA3-pumpar uppfyller kraven enligt EuP 2015. Levereras inklusive isolering-skåpor för värmesystem och exklusive kopplingar och motflänsar.
Tvillingpump: Nej

VVC-pump Magna3 - enkelutförande, våt varvtalsreglerad 1-fas

Med fläns

Utan fläns

Cirkulationspump i enkelutförande för tappvarmvatten med automatisk steglös varvtalsreglering och konstant eller proportionell tryckreglering samt funktionerna AUTOadapt, Flowadapt och Flowlimit. Inställning på pump eller via styrenheten/fjärrkontrollen Grundfos GO. Extern styrning och övervakning med hjälp av utbyggnadsmoduler. MAGNA3 har en 4 tums TFT-display med intuitivt och användarvänligt gränssnitt. Manöverpanelen har självförklarande knappar av högkvalitativt silikon för exakt navigation i menystrukturen. Manöverpanelen är utformad för att ge användaren snabb och enkel åtkomst till pump- och kapacitetsdata på plats. Pumphus av rostfritt stål, pumphjul PES och axel av rostfritt stål. Driftstemperatur: -10 °C - +110 °C (i tappvarmvattensystem rekommenderas upp till 65 °C). Samtliga MAGNA3-pumpar uppfyller kraven enligt EuP 2015. Levereras exklusive kopplingar och motflänsar. 1 x 230V, 50Hz.
Tryck: 6/10 bar

Centrifugalpumpar Xylem

Flerstegs tryckstegringingspump Lowara e-SV - Oval fläns

Lowara e-SV vertikala tryckstegringspumpar i rostfritt utförande är högeffektiva och energibesparande. Passar för pumpning av renvatten och inom industri. Vanliga användningsområden är tryckstegring och vattenförsörjning, pumpning och cirkulation inom kommun och industri. Finns i flera olika storlekar och versioner. Kan med fördel användas tillsammans med motormonterad frekvensstyrning av typ Hydrovar för tryckstyrning/reglering. Vätsketemp -30 °C - 120 °C. Tryckklass: PN 16 eller högre. Kapslingsklass: IP 55. Effekt: 1,1 - 7,5 kW. Isolationsklass: F (155°), 3-fas.
Spänning: 400 V. Pumptyp: Torr. Pumphus: Rostfritt stål. Anslutning: Oval fläns. Frekvens: 50 Hz

Dränkbara dräneringspumpar - SXM Flygt - Vippa

5890081, 5890072

5890079

5890080

Pumparna i Flygt SX-serien passar de flesta typer av läns- och dräneringsjobb. En kompakt design gör dem både enkla att hantera och lätta att placera där det är trångt. SX-serien av rostfritt stål klarar av att hantera både rent och förorenat vatten. Exempel på bra användningsområden är länspumpning, bevattning, dränering av källare, garage, vägtunnlar, upplagsplatser och diken. Ytterligare ett är utpumpning av spillvatten från tvätt-maskiner eller biltvättar. Ytterkåpa, motorkåpa och kylmantel är av rostfritt stål, SS 2333 (AISI 304). Tätningssystem med oljehus och miljövänlig giftfri olja samt dubbla tätningar (mekanisk-samt läpptätning).
Antal anslutningar: 1 STK. Utförande: Med vippa. Material: Flermaterial. Spänning: 230 V. Skyddsklass: IP68. För WC: Nej

Breakthrough Engineering

IMI TA

Eclipse
Termostatventil med inbyggd flödesreglering

Automatisk *flödesbegränsning*

Enkel att injustera

Lägre energi-kostnader

Perfekt för renovering

Eclipse är en termostatventil med inbyggd flödesbegränsare vilket säkerställer att ventilen håller jämt flöde utan att orsaka oljud och optimerar radiatorns verkningsgrad för att hålla önskad rumstemperatur – även om andra ventiler stängs. Eclipse är enkel att injustera. Flödet ställs in direkt på ventilen. Det krävs inga komplicerade tryckförlust- och rörberäkningar. Det går även att starta upp delar av systemet. Eventuell utbyggnad av systemet påverkar inte heller injusteringen av det befintliga systemet.

Radiatorer Altech

K11 höjd 300 mm

Panelradiator i standardutförande som genom sin design med runda hörn och höga kvalitet passar i varje centralvärmeanläggning. Radiatorn är försedd med 4 stycken anslutningar R1/2" samt med påsvetsade upphängningar. Radiatorn är försedd med sidogavlar och ett mycket robust toppgaller som tillsammans ger ett exklusivt utseende och design. Kan även beställas färdigmonterade med koppel och valfri radiatorventil. Dolda konsoler ingår. RAL 9016.
Höjd: 300 mm

Fläktkonvektorer SL/SLS-DC

Fläktkonvektor för effektiv uppvärmning/kylning. Användningsområden: en serie fläktkonvektorer med den senaste tekniken och de minsta byggmåtten på marknaden. Fläktkonvektorn är utrustad med BLDC lågenergimotor och fullautomatisk temperaturreglering och kan användas för uppvärmning alternativt kylning. Konvektorn kan monteras på vägg eller i tak (undantaget SLS som för kylning inte ska takmonteras). Stilren design och extremt små byggmått gör att SL/SLS smälter in i de flesta miljöer.
Spänning: 230 V. Djup: 131 mm

Takfläkt TF20

Takfläkt med låg ljudnivå. Den är lämplig för montage i de flesta förekommande lokaler som till exempel industrihallar, samlingslokaler, lager och offentliga byggnader. Ø1400 mm. IP20. En fläkt klarar cirka 100 m² vid 4 meter takhöjd. Den klarar större area ju högre den monteras.
Längd: 1400 mm. Bredd: 1400 mm. Höjd: 495 mm.
Fas: 1. Spänning: 230 V. Standard: IP20. Material: Stål

Artikelnr	Mod	Eff kW	Pris
6739303	TF20	70	4.020

Reglerenhet TFR1

Reglerar hastigheten för en fläkt i fem steg. Takfläktarna bör regleras av en varvtalsreglering för att kunna anpassas till rådande förhållande. Mått: 128x123x58 mm.
Utförande: 5-stegs. Fas: 1. Spänning: 230 V

Artikelnr	Mod	L mm	Funkt	Pris
6739305	TFR1	123	För max 1 fläkt	1.190

Reglerenhet TFR1R, reverserbar

Reglerar hastigheten för en fläkt i fem steg och kan också reversera fläkten. (OBS kräver 3+1 ledare till fläkten om dem ska reverseras.) Takfläktarna bör regleras av en varvtalsreglering för att kunna anpassas till rådande förhållande.
Utförande: 5-stegs, Reverserbar. Fas: 1. Spänning: 230 V

Artikelnr	Mod	L mm	Funkt	Pris
6739306	TFR1R	123	För max 1 fläkt	1.255

Reglerenhet TFR6

Reglerar hastigheten för max 6 fläktar steglöst. Takfläktarna bör regleras av en varvtalsreglering för att kunna anpassas till rådande förhållande. Mått: B128xD123xH58 mm.
Utförande: Steglös. Fas: 1. Spänning: 230 V

Artikelnr	Mod	L mm	Funkt	Pris
6739307	TFR6	123	För max 6 fläktar	1.830

Reglerenhet TFR30

Reglerar varvtalet automatiskt i förhållandet till temperaturskillnaden mellan golv och tak. 2 givare ingår som placeras under taket respektive i vistelsezonen. TFR30 kan reglera upp till 30 stycken takfläktar parallellt. Takfläktarna bör regleras av en varvtalsreglering för att kunna anpassas till rådande förhållande.
Fas: 1. Spänning: 230 V

Artikelnr	Mod	L mm	Funkt	Pris
6739308	TFR30	210	För max 30 fläktar	8.800

Ventiställdon modulerande NC 24V 0-10V

Modulerande termoställdon för ventil med M30x1,5 gänga. Drivspänning 24V, styrspänning 0-10V, 3-ledare, gångtid cirka 150 sekunder, strömlöst stängd. Kapslingsklass IP54. Ställdonet snäpps enkelt fast på ventilen efter att montageringen skruvats på plats. Tillverkar kod 1012952.

Lågspänningsstyrsystem

6731943

6731944, 6732001

SIRe är förprogrammerad vid leverans och är försedd med snabbkopplingar. SIRe förutser och lär sig behoven av lokalen den är installerad i (bland annat öppningsfrekvens och utetemperaturer). Då fläkthastigheten kan anpassas, optimeras ljudnivån och är aldrig högre än vad som behövs för komforten. Med SIRe Advanced finns det möjlighet att välja mellan Eco- och Comfortläge beroende på om energibesparing eller optimal komfort prioriteras. Det finns tre olika nivåer med olika funktionalitet att välja på, Basic, Competent eller Advanced.

Luftridåer Eveco

Luftridå Essenesse Neo B - ovärmd

En kompakt och effektiv luftridå som skapar en osynlig dörr av luft och förhindrar att uppvärmd luft lämnar lokalen/öppningen. Bra prestanda och kastlängd för sin storlek tack vare ett speciellt utblåsningsgaller som gör att den även klarar krävande situationer. Lämpliga användningsområden är entréer till butiker, kontor och mindre lagerportar. Rekommenderad upp till 3,2m monteringshöjd. Vit RAL 9016.
Bredd: 377 mm. Höjd: 252 mm. Fas: 1. Spänning: 230 V. Standard: IP20. Material: Stålplåt/flermaterial

Värmeväxlare, Cetetherm

Fjärrvärmecentral komplett, Mini Plus Siemens UPM15

Cetetherm Mini Plus är en komplett, installationsfärdig fjärrvärmecentral för värme och varmvatten. Avsedd för fastigheter upp till 8 lägenheter anslutna till fjärrvärmenät. Alla plattor och rör i enheten är tillverkade av syrafast rostfritt stål. Testad och godkänd enligt ISO 9001, CE- märkt.
Bredd: 590 mm. Djup: 400 mm. Höjd: 990 mm. Max temperatur: 120 °C. Fas: 1. Spänning: 230 V. Material: Syrafast stål/flermaterial

Artikelnr	Dim	Eff W	Tryck bar	Max temp °C	Utför	Pris
6789046	G20/G25	50	16	120	1-10 lä-genheter	48.900

Fjärrvärmecentral, Mini Plus Siemens UPM25

Cetetherm Mini Plus är en komplett, installationsfärdig fjärrvärmecentral för värme och varmvatten. Avsedd för fastigheter upp till 10 lägenheter anslutna till fjärrvärmenät. Alla plattor och rör i enheten är tillverkade av syrafast rostfritt stål. Testad och godkänd enligt ISO 9001, CE-märkt. Elektrisk färdigkopplad regler-central för värme och varmvatten. Flerstråks värmeväxlare för varmvatten för bästa reglering och låg returtemperatur. Kompakt konstruktion med inkoppling både uppifrån och nerifrån. Väggmonterad. Mätaranslutning för mätning av energianvändning.
Bredd: 590 mm. Djup: 400 mm. Höjd: 990 mm. Max temperatur: 120 °C. Fas: 1. Spänning: 230 V. Material: Syrafast stål/flermaterial

Fjärrvärmecentral, Midi Wall

Cetetherm Midi Wall är en vägghängd, installationsfärdig fjärrvärmecentral för värme och varmvatten med en enkel Siemens reglering. Parallellkopplad men med tvåstråks varmvattenväxlare för bästa varmvattenreglering och lägsta returtemperatur. Den finns i tre storlekar; 70/100/130 kW (100-63/60-80°C) uppvärmning med matchande varmvattenkapacitet. Horisontell mätsträcka med gängad passbit 1"/190 mm. (Separat 3-punktsmätning och flänsad passbit DN25/260mm, se tillbehör). Alla plattor och rör i enheten är tillverkade av syrafast rostfritt stål. Testad och godkänd enligt ISO 9001, CE- märkt.
Dimension: DN25/G32/G25. Effekt: 290-315 W. Tryck: 16 bar. Bredd: 730 mm. Höjd: 1115 mm. Max temperatur: 120 °C. Fas: 1. Spänning: 230 V. Material: Syrafast stål/flermaterial

Artikelnr	Mod	Djup mm	Utför	Pris
6789071	Midi Wall 70	570	För 10-15 lägenheter	59.000
6789072	Midi Wall 100	510	För ~20 lägenheter	63.200
6789073	Midi Wall 130	510	För ~30 lägenheter	69.050

Fjärrvärmecentral, Midi Compact

Cetetherm Midi Compact är en golvstående, installationsfärdig fjärrvärmecentral för värme och varmvatten med en enkel Siemens reglering. Tvåstegskopplad för bästa varmvattenreglering och lägsta returtemperatur. Den finns i fyra storlekar; 80/100/160/200 kW (100-63/60-80°C) uppvärmning med matchande varmvattenkapacitet. Vertikal mätsträcka med gängad passbit 1"/190 mm.
Alla plattor och rör i enheten är tillverkade av syrafast rostfritt stål. Testad och godkänd enligt ISO 9001, CE- märkt.
Effekt: 290-315 W. Tryck: 16 bar. Höjd: 1300 mm. Max temperatur: 120 °C. Fas: 1. Spänning: 230 V. Material: Syrafast stål/flermaterial

6789044

Centralerna är kompakta fastighetscentraler som ger en hög kostnadseffektivitet genom att vara flexibla och enkla. Finns i flera olika utföranden. De är redan vid leverans utrustade med en färdig mätarplats. Har vridbara anslutningar vilket medför att samtliga rör kan anslutas uppåt eller neråt. Centralerna kan både monteras på vägg och golv. Kompletteras med stativ vid golvmontage (tillbehör). Regleringen styr både värmen och varmvattnet elektroniskt. Möjlighet till uppkoppling och fjärrstyrning via Modbus/RTU (RS485). Finns även att beställa med ECL 310.

Poolvärmeväxlare Pahlén

Poolvärmeväxlare MF260

Rörvärmeväxlare med utmärkta värmeegenskaper tillverkad i rostfritt syrafast stål SIS2348 för optimal livslängd. Ansluts ofta till bergvärmepumpar. Avsedd för pooler upp till 50m3. Ej avsedd til saltvattenpooler. Värmeväxlaren är enkel att montera med de rostfria, reglerbara fästena som medföljer. 75kW. Anslutningar, primär 1” invändig gänga och sekundär 2” invändig gänga.

Artikelnr	Mod	Fabr.bet	Pris
173454	MF260	11367	9.150

Poolvärmeväxlare HF75

Spiralvärmeväxlare tillverkad av rostfritt syrafast stål SIS2348. Används ofta i kombination med fjärrvärme. Värmeväxlare Hi-Flow är enkel att installera. Rostfria, reglerbara fästen medföljer. 75kW. Ej avsedd till saltvattenpooler. Anslutningar, primär 1” utvändig gänga och sekundär 2” invändig gänga.

Artikelnr	Mod	Fabr.bet	Pris
173455	HF75	11394	8.700

Poolvärmeväxlare HFT Spiral titan

Spiralvärmeväxlare tillverkad av titan för användningsområden där risken för korrosion är stor. Används där saltvatten eller t.ex. saltklorinator används. Rostfria, reglerbara fästen medföljer. 75kW. Anslutningar, primär 1” utvändig gänga och sekundär 1,5” invändig gänga.

Artikelnr	Mod	Fabr.bet	Pris
173456	HFT Sprial titan	11334	15.900

Poolvärmeväxlare Pahlén, tillbehör

Termostat 1-polig

Tillbehör till poolvärmeväxlare. Precisionstermostat med graderad ratt för inställning och automatisk reglering av vattentemperaturen. Anslutning, ½ “ utvändig gänga.

Artikelnr	Mod	Fabr.bet	Pris
173457	0-40 °C	12840	1.440

Temperaturstyrning digital

Tillbehör till poolvärmeväxlare. Digital temperaturstyrning för värmeprodukter där inställning och avläsning av temperaturen görs via en digital display. Passar både existerade och nya installationer. Som standardlevereras MIDI-Temp temperatursensor med installationskabel för 230 V.

Laddomat ackumulator- tankladdning

Laddomat MR 40

Denna Laddomat levereras med pumpar som är ErP-ready 2015. För reglering av laddning mellan kombipanna och ”tom” tank. Pannan har inbyggd varmvattenberedare och shunt. Vid eldning skickar Laddomat MR 40 överskottsvärmen till tanken. Genom att Laddomat MR 40 förvärmer det kalla vattnet från tanken förhindras kondens och korrosion. Efter avslutad eldning styr Laddomat MR 40 tillbaka det heta vattnet till toppen av pannan. Detta sker med låg hastighet så att skiktning uppstår och all värme tas till vara.
Material: Flermaterial

Artikelnr	Mod	Eff kW	Dim	Pris

Laddgrupp Esbe LTC261

Serie LTC200 är framtagen för att effektivt och automatiskt ladda ackumulatortankar och skydda fastbränslepannor från för låga returtemperaturer vilket annars kan orsaka tjärbildning, reducerad uteffekt och kortare livslängd för pannan.Denna laddgrupp inkluderar en A-klasspump utvecklad för att möta EU-direktivet 2009/125/EC. LTC200 förbrukar upp till 70% mindre elektricitet än företrädaren LTC100. Invändig gänga,integrerad pump
Tryck: 6 bar. Max temperatur: 60 °C. Spänning: 230 V. Material: Segjärn

Laddventil VTC511

En 3-vägsventil med invändigt gängade anslutningar som skyddar fastbränslepannor mot för låga returtemperaturer. Genom att bibehålla en hög och stadig nivå på returtemperaturen säkerställs hög verkningsgrad, låg tjärbildning och ökad livslängd för pannan. Serien används för värmepannor med effekt upp till 150 kW.
Modell: VTC511. Material: Segjärn. Tryck: 10 bar. Utförande: Invändig gänga

F1345 Bergvärmepump

En bergvärmepump för uppvärmning av större fastigheter såsom flerbostadshus, kyrkor och industrifastigheter. F1345 är en flexibel produkt med avancerad styrutrustning och är anpassningsbar till ett flertal systemlösningar. Som värmekällor kan bland annat berg, mark eller sjö användas. Med en mellanliggande värmeväxlare kan även grundvatten användas som värmekälla. Ett annat användningsområde kan även vara ventilationsåtervinning i flerfamiljsbostäder.
Bredd: 600 mm. Djup: 620 mm. Höjd: 1 800 mm. Erfoderlig reshöjd: 1950 mm. Varmvattenberedare: Nej. Fas: 3. Spänning: 400 V

Värmepump Compress 7800i LWMF

Bosch Compress 7800i LWMF är en vätska/vatten värmepump för energikällorna mark, berg, sjö eller grundvatten. Bosch Compress 7800i LWMF innehåller en användarvänlig reglercentral med stor och tydlig touch färgskärm och med möjlig uppkoppling mot smartphone. Bosch Compress 7800i LWMF producerar värme och varmvatten via den integrerade varmvattenberedaren med en slät rostfri laddslinga och har även integrerat tillskott på upp till 9kW. Bosch Compress 7800i LWMF har inverterstyrd kompressor. De integrerade cirkulationspumparna på varma och kalla sidan styrs helt automatiskt efter behov. Expansionskärl och påfyllnadssats ingår i leveransen.
Bredd: 600 mm. Höjd: 1780 mm. Varmvattenberedare: integrerad VV beredare. Fas: 3. Spänning: 400 V. Färg: vit metall. Material: stål/rostfritt/flermaterial. Ytbehandling: lackerad

Värmepump Compress 7000 - Fastighet

Värmepumpen är uppbyggd med helhermetisk tandemkompressorer av typ scroll med injectionteknik. (EVI). Färdigbyggd kylkrets innehållande elektroniska expansionsventiler inkl tillhörande givare samt serviceuttag för mätning. Kompressordelen är avvibrerad genom dubbla bottenplåtar med gummiupphängning mot stativ. Separat högtryckspressostat med indikering på reglercentral Rego 5200. Aggregaten är försedda med isolerande ljuddämpande plåtar samt justerbara stativfötter. Avgiven värmeeffekt är konstant över hela driftområdet. Aggregatet är välanpassat till dellastbelastning tack vare tandemkonstruktion. Kompletteras med utegivare, samt givare för respektive systemlösning.
Längd: 1450 mm. Djup: 750 mm. Höjd: 1000 mm. Varmvattenberedare: Nej. Fas: 3. Spänning: 400 V. Typ: Berg, jord, sjö. Energiklass ErP systemetikett: A+++

Frånluftsvärmepump NIBE

Frånluftsvärmepump F135

En frånluftsvärmepump som dockas mot valfri NIBE inomhusmodul för luft/vattenvärmepumpar, VVM310/320/325 eller 500. NIBE F135 ventilerar huset och återvinner energin ur ventilationsluften. Uppvärmning av värme och varmvatten sker parallellt tillsammans med dockad luft/vattenvärmepump. NIBE F135 är ett tillbehör och all styrning sker från NIBE inomhusmodul.
Bredd: 600 mm. Djup: 605 mm. Höjd: 420 mm. Fas 1. Spänning: 230 V

Artikelnr	Mod	Tryck bar	Energiklass ErP	Pris
6251241	F135	10	A+	17.900

Frånluftsvärmepump F110

Nibe F110 har en inbyggd fläkt som ventilerar och återvinner energin ur ventilationsluften och bereder tappvarmvatten. Den kan även användas med omgivande luft eller uteluft. Varmvattenkapacitet är på 365 liter. Isolering av formgjuten neopor ger låga värmeförluster. För att säkerställa varmvattenkomforten vid stor förbrukning är värmepumpen försedd med elpatron på 1,3kW.
Mått: L604xB600xH2071 mm.

Värmepumpar luft/luft Bosch

Luftvärmepump Climate 6100i

För hus med direktverkande elvärme eller fritidshus. Climate 6100i är A++ med köldmediet R32 och har ett smart system för energibesparing där inverterteknik justerar värmeeffekten efter behovet. Du får precis den mängd värme som behövs för stunden och längre livslängd eftersom färre start och stopp minskar slitaget. Observera att höjden på innedelen endast är 249 mm hög och passar då enkelt ovanför ytterdörren. Som tillval kan 6100i förses med wifi-modul. Dimension: 1/4"-3/8". Bredd, innedel: 790 mm. Höjd, innedel: 249 mm. Djup, innedel: 299 mm. Bredd, utedel: 780 mm. Höjd, utedel: 540 mm. Djup, utedel: 269 mm. Vikt, innedel: 9 kg. Vikt, utedel: 30 kg. Fas: 1. Spänning: 230 V. SCOP: 4,6. Funktion: luft/luft

Luftvärmepump Climate 8100i

För hus med direktverkande elvärme eller större fritidshus. Climate 8100i är A+++ med köldmediet R32 och har ett smart system för energibesparing där inverterteknik justerar värmeeffekten efter behovet. Du får precis den mängd värme som behövs för stunden och längre livslängd eftersom färre start och stopp minskar slitaget. Observera att höjden på innedelen endast är 249 mm hög och passar då enkelt ovanför ytterdörren. Som tillval kan 8100i förses med wifi-modul.
BxDxH, innedel: 798x299x249 mm. BxDxH, utedel: 800x328x630 mm. Fas: 1. Spänning: 220-240 V. Energiklass ErP: A+++

Luftvärmepump Panasonic NZ

Utedel

Innedel

NZs design och mått är anpassade för att förenkla vid utbyte av en äldre Panasonic modell. Till exempel är rörstorleken den samma som på den äldre modellen. Fästena bakom värmepumpen behöver inte heller bytas och innedelens mått gör att placeringen kan behållas. Nya funktioner som underhållsvärme, möjlighet till fjärrstyrning, bättre luftrening och timerinställning. Drift ner till -35 °C. Underhållsvärme +8/+10 °C, köldmedium R32. OBS! Dessa artiklar kräver Kylcertifikat!
Röranslutning Vätska/gas: 1/4-3/8. Energiklass ErP: A++

173408	SBM Eco	0,75	1	230	1156651	19.600

Poolpump SBM

En driftsäker poolpump med hög prestanda avsedd för cirkulation av poolvatten med en poolfilteranläggning. Motoraxeln fungerar samtidigt som pumpaxel på vilken pumphjulet är monterat. Axeltätningen är en mekanisk tätning av bälgtyp som är monterad på en pumphjulsnav av plast. Konstruktionen gör att pumpen även kan användas i poolvatten med salthalt upp till 0,5%. Pumpen är uppbyggd i block och tar lite plats. I pumphuset finns en integrerad silkorg.
Fas: 1. Spänning: 230 V

Smidiga Lusso – lätt att installera

Lusso erbjuder många valmöjligheter. I serien ingår duschhörna, nischdörr och fristående skärmvägg, i mängder av olika mått.

Dörrarna är raka, svängda eller funktionellt vikbara. Alla sparar plats, då de kan öppnas både inåt och utåt. Profilerna väljs kromade, svarta eller vita, med klart, gråtonat, frostat, halvfrostat eller iögonfallande svart- eller vitrutigt glas. Samtliga glas är Easy Clean-behandlade – ett skydd mot avlagringar och smuts.

Lusso-duschväggar är enkla att installera med justerbar infästning. Alla duschdörrar kan dessutom monteras borrfritt.

Alternakatalogen är ett smart införsäljningsverktyg som du kan ge till din kund. Här finns mängder med inspiration, tips och produktfakta. Blir du återförsäljare får du dessutom ditt företagsnamn på baksidan av katalogen.

Upptäck hela sortimentet på alternabadrum.se – badrum genom hela livet! Följ oss också gärna i våra sociala kanaler för ytterligare inspiration.

Vår webbplats är fylld av inspiration och sköna idéer. Där kan du även bli återförsäljare och beställa kataloger.

Badkar emaljerat Alterna

Komplett Badkar Basic Alterna

Komplett badkar med utloppssats, front, gavel och benställningssats. Tillverkad i 2,5 mm emaljerad stålplåt. Ett stålbadkar behåller vattentemperaturen längre genom att stålet absorberar värmen från vattnet och skickar tillbaka det till vattnet. Badkaret tar inte upp statisk elektricitet, vilket gör att det inte drar till sig damm.
Höjd: 565–605 mm. Djup: 410 mm. Material: Emaljerad stålplåt. Fristående: Ja. Färg: Vit

7314089	Alterna Basic 1600	3.732

Badkar Basic Alterna, för inbyggnad

Klassiskt kvalitetsbadkar i 2,5 mm emaljerad stålplåt. Ett stålbadkar behåller vattentemperaturen längre genom att stålet absorberar värmen från vattnet och skickar tillbaka det till vattnet. Badkaret tar inte upp statisk elektricitet, vilket gör att det inte drar till sig damm. Badkaret är avsedd för inbyggnad. Levereras med benställning.
Djup: 410 mm. Utförande: Rektangulärt, med ben, för inbyggnad. Material: Emaljerad stålplåt. Fristående: Nej, för inbyggnad. Färg: Vit

Nischdörr och duschhörn, Aria 8 mm, klarglas

Skjutdörrsparti

Sidopanel

Alterna Aria Nischdusch är en lyxig duschväggsmodell med flera kombinationsmöjligheter. Som standard levereras Aria som en nischlösning med en skjutdörr och ett fast parti, men kan även kombineras med sidopanel i glas för att få en duschhörna. Stag och profiler är tillverkade i förkromad aluminium. Samtliga glaspartier är tillverkade i 8 mm glas och 3M-behandlade för enklare rengöring. Duschväggen kan monteras både på vänster och höger sida. Den finns i ett spann av storlekar för att kunna användas både i det större och mindre badrummet. Höjden på samtliga delar är 2 000 mm. Obs! Aria Duschvägg kan endast monteras på ett golv som är helt rakt.

DAHL // /OPTIMERA/

DAHL PICK-UP POINT!

PICK-UP POINT

BESTÄLL ONLINE OCH ANGE VAR DU VILL HÄMTA GODSET
så kommer det levererat till den ort/butik du anger.

Nu kan du hämta ditt beställda material även hos vårt systerbolag Optimera.
Godset beställer du på dahl.se för leverans till en butik, där finns nu ännu fler butiker att välja bland, vi samarbetar med Optimera på utvalda orter.

Så här beställer du från Dahl:

> På dahl.se väljer du lämpligt Dahlcenter eller Pick-up point via ”Hitta butik”
> Genomför din order och välj hämta i butik som leveransalternativ
> Ditt gods aviseras via sms och du är sedan välkommen till Dahl i våra butiker eller Pick-up Point (Optimera) för att hämta ditt gods.

Dahl Pick-up point finns nu på Optimera i följande orter:

- Eksjö
- Eslöv
- Falköping
- Hagby
- Hallsberg
- Höganäs
- Klippan
- Ljungby
- Ljusterö
- Nässjö
- Mjölby

GEBERIT
Ifö
GEBERIT DUOFIX OCH IFÖ SPIRA
EN PERFEKT
KOMBINATION
KNOW
HOW
INSTALLED
Geberit Duofix Sigma inbyggnadsfixtur har unik kvalitet och
säker funktion. Ifö Spira Rimfree® är en svensktillverkad WC
helt utan spolkant. Det gör toaletten hygienisk och enkel
att rengöra, något även glasyren Ifö Clean hjälper till med.
Duofix Sigma och Ifö Spira är en perfekt kombination.

FLEXIBLA KONTORET

SMIDIGT ADMINISTRATIONSTJÄNST FÖR HANTVERKARE

Är du proffshantverkare och trött på att administrationen äter upp din arbetstid? Ta hjälp av Flexibla Kontoret – ett molnverktyg speciellt utformat för att förenkla och effektivisera administrationen för hantverkare.

I Flexibla Kontoret kan du registrera allt från materialinköp och arbetstid till fakturering och betalning – snabbt och smidigt via din mobil, surfplatta eller dator. Du får överblick över alla kunder, arbetsorder, fakturor och pågående affärer och kan enkelt dokumentera inköp och arbetstid.

Tjänsten är molnbaserad och drift, back-up, säkerhetslösningar och arbetsverktyg för pågående arbete ingår.

Välkommen till Flexibla Kontoret!

Logga inköp, logga tid och administrera online – med flexibla kontoret sköter du enkelt din administration och kan koncentrera dig på ditt hantverk!
