Toalettsitsförhöjare

203003

203004

Hi-Loo med kantstopp är en upphöjd toalettsits som både sitter säkert och är enkel att lyfta av. Hi-Loo är mycket komfortabel tack vare den ergonomiska utformningen. Urtag både fram och bak ger hög åtkomlighet för intimhygien. Två olika höjder Hi-Loo finns i två olika höjder, 6 cm och 10 cm. Utöver detta är Hi-Loo enkel att rengöra tack vare sina släta ytor. Enkel att lyfta av Hi-Loo monteras enkelt på toalettstolen och man lyfter av Hi-Loo utan att ändra inställningar av kantstoppen.
Funktion: För WC. Material: ABS/PC/polypropylen

Akustikband WC

WC-stolar kan ge störande stomljud både vid spolning och användning, särskilt golvstående WC. Med en 2 mm vibrationsdämpande SYLOMER®-packning så dämpas stomljudet effektivt. SYLOMER® AkustikBand WC ger cirka 20 dB dämpning vid limmat montage av WC-stolen. Limning av SYLOMER® AkustikBand WC är en robust monteringsmetod och ett alternativ till flytande golv eller undertak för att lösa ljudproblem. Fördelar med AkustikBand WC är: stomljudsdämpande, enkel montering och demontering, bibehåller tätskiktet intakt, utjämnar små ojämnheter i underlaget, stabilt montage med minimal nedfjädring. För en WC-stol krävs 2 stycken SYLOMER® AkustikBand WC. Stolen bör limmas med högvärdigt silikonlim.

Mulltoa

MullToa 15A

En ekonomimodell vilket betyder att man behöver vara lite mer noggrann med skötseln. Efter varje användning vrider man ett par varv på handtaget så att de två rakorna blandar komposten och skrapar ner mullen i lådan. En reglerbar termostat styr uppvärmningen och fläkten evakuerar luften från toaletten. Denna modell har ett extra element monterat i botten. Soft-closing toasits samt insynsskydd med dubbelfunktion vilket gör det möjligt att stå upp när man urinerar. Kapacitet: 3-4 personer i fritidsbruk Max effekt: 305W Mått: H65xB55xD71 cm, erforderlig golvyta 55x110 cm

Artikelnr	Färg	Br mm	Djup mm	Pris
7953221	Vit	550	710	9.100

MullToa 25A

Förmultningstoalett med automatisk omrörning. Kapacitet 1-3 personer i fritidsbruk. Soft-closing toalettsits samt insynsskydd med dubbelfunktion vilket gör att man kan stå upp och urinera ifall man så vill. Max effekt:355 W. Mått:: H65xB55xD71 cm. Erforderlig golvyta: 55x110 cm. Sitthöjd: 51 cm.

Artikelnr	Färg	Br mm	Djup mm	Pris
7953222	Vit	550	710	10.450

MullToa 55AI

Mulltoa 55ai klarar fyra personers behov vid frtitidshuset. Mulllådan töms vid normal användning en gång per säsong. Kapacitet: 4 personer i fritidsbruk. Max effekt: 355 W. Mått: B55xH65xD71 cm. Sitthöjd 51 cm.

BESTÄLL ONLINE OCH ANGE VAR DU VILL HÄMTA GODSET
så kommer det levererat till den ort/butik du anger.

Nu kan du hämta ditt beställda material även hos vårt systerbolag Optimera.
Godset beställer du på dahl.se för leverans till en butik, där finns nu ännu fler butiker att välja bland, vi samarbetar med Optimera på utvalda orter.

Så här beställer du från Dahl:

> På dahl.se väljer du lämpligt Dahlcenter eller Pick-up point via ”Hitta butik”
> Genomför din order och välj hämta i butik som leveransalternativ
> Ditt gods aviseras via sms och du är sedan välkommen till Dahl i våra butiker eller Pick-up Point (Optimera) för att hämta ditt gods.

Dahl Pick-up point finns nu på Optimera i följande orter:

- Eksjö
- Eslöv
- Falköping
- Hagby
- Hallsberg
- Höganäs
- Klippan
- Ljungby
- Ljusterö
- Nässjö
- Mjölby
- Skanör
- Svedala
- Säffle
- Sävsjö
- Tranås
- Ulricehamn
- Vaggeryd
- Vagnhärad
- Vara
- Vetlanda
- Värnamo
- Åhus
- Älmhult

Avfallskvarnar

Avfallskvarn W5

W5 har dubbla rotationsriktningar, microprocessorstyrt vridmoment som höjer effekten när belastningen ökar, bra ljuddämpning och dessutom timer-avstängning. W5 har naturligtvis 3-stegs malning och uppfyller kraven för installation enligt Boverkets Ljudklass B. Motoreffekt: 0,75 hk (560 W) Spänning: 220 V Ingångsström: 560 W Frekvens: 50 Hz. Ljudnivå: under 27 dB vid mätning enligt installationsklass B Storlek malkammare: 1 200 ml Material malkammare: härdad aluminium Material matningsystem: syrafast rostfritt stål Malstorlek: ≤2,0 mm Chassimaterial: gjuten aluminium. Garanti: 5 år Uppskattad livslängd: +12 år vid normal användning Mått: 225 x 335 mm

Artikelnr	Eff W	Pris
8019673	560	7.050

Avfallskvarn W6

W6 har en elektroniskt styrd permanentmagnetmotor med reglerbart varvtal som automatiskt anpassar varvtal utifrån hur mycket matavfall som matas ner i malkammaren. I kombination med 3-stegsmalning, automatisk tvåvägs-rotation, energi-sparfunktion, avstängnings-timer och den nya motortekniken erhålls optimal prestanda och låg ljudnivå. W6 har förutom reglerbara effektnivåer även ljudlarm som indikerar om problem uppstår. W6 uppfyller förutom de generella kraven för Boverkets Ljudklass B, även installationskraven för “kök mot angränsande sovutrymme. Motoreffekt: 0,75 hk (560 W) Spänning: 220 V Ingångsström: 560 W Frekvens: 50 Hz Rotationshastighet: 1000/1500, 1000/1850, 1000/2200 varv/minut Ljudnivå: under 27 dB vid mätning enligt installationsklass B Malverk/Rivverk: syrafast rostfritt stål Storlek malkammare: 1 200 ml Material malkammare: härdad aluminium Material matningsystem: syrafast rostfritt stål Malstorlek: ≤2,0 mm Chassimaterial: gjuten aluminium Garanti: 5 år Uppskattad livslängd: +12 år vid normal användning Nettovikt: 7 kg Mått: 225 x 335 mm

Spilltratt vit med luddfilter och luktspärr

Luddfiltret eliminerar att ludd och diverse annat som följer med spillvattnet från tvättmaskin/torktumlare spolas ut i avloppsrören och riskerar stoppa upp flödet. Nyare tvättmaskiner saknar fungerande luddfilter. Luktspärren eliminerar att odör från avloppet stiger upp i spilltratten och ut i miljön man vistas i, ett mekaniskt vattenlås alltså. Gänga 32 kan kapas bort för att få slätända 40 mm.

Utloppsslang PP Di 19/20 töjbar

Grå utloppsslang för disk- och tvättmaskin. Utdragbar. Med upphängningsbygel och anslutningsmuffar Ø 19 och 21 mm. Gjorda i smidig, följsam PP-plast och temperaturbeständiga upp till +100 °C. Om andra längder önskas, använd slangen rsk 8184231 tillsammans med anslutningsmuffarna rsk 8184233 och rsk 8184234. För att undvika läckage måste då anslutningsmuffen skruvas på så att slangen bottnar. Rekommenderas att använda någon typ av byggsilikon som appliceras mellan muff och slang. Slangen ska monteras så att ett eventuellt läckage omgående upptäcks.
Dimension anslutning: 19/21. Funktion: för disk- och tvättmaskin.. Färg: Grå. Material: PP

Vattenlarm Dropp Stop 600

Vattenlarm, ett larm att montera i dolda utrymmen exempelvis diskbänksskåp eller under diskmaskin. Montera larmet i diskbänks skåpet och lägg ner vid sensorerna vid diskmaskinen, avloppsröret och vattenröret. Kommer sensorerna i kontakt med vatten så larmar larmet med tydlig pipsignal. På det här sättet kan vi stoppa en vattenskada. Drivs med 9V batteri.

Artikelnr	Br mm	Djup mm	Färg	Pris
8039024	82	65	Vit	950

Slanggenomföring Diaflex

Vattensäker genomföring för diskmaskinens slangar i diskbänksskåpet. Används som effektivt skydd mot vattenskador i diskbänksskåp. Passar alla vattenanslutna hushållsmaskiner. Ingår i vattensäkert kök konceptet. Konsumentförpackning. Diaflex håller i slangarna så de inte skaver mot varandra. En vanlig "dosborr" används för att ta hål i skåpbotten. Komplettera med bänkskåpsinsats(8080818-8080823) och tätningssats (3829933) för en vattensäker installation.

WC-fixtur Duofix Sigma TEK

Geberit har utvecklat en inbyggnadscistern för montering mellan reglar i vägg när man önskar en hel och slät vägg istället för en installationsvägg. Resultatet har blivit en cistern som är enkel att montera för rörinstallatören och lätt för plattsättaren att ansluta tätskikt och kakel.Cisternen är utbytbar inifrån badrummet utan att tätskiktet behöver brytas eller skadas. Detta är ett krav från bl.a. SINTEF Byggforsk i Norge.

Klassiker i mattsvart

Vi använder våra badrum 2500 gånger om året. Få varje gång att räknas.

Inte bara vanligt svart. Oras matt black edition innehåller blandare för kök och badrum, samt duschprodukter, för att kunna få en genomgående modern och universell design i hela hemmet.

Nano-keramisk Coating ger en extrem slitstark och motståndskraftig yta. Beläggningen är vattenavvisande och skyddar från UV strålar, så att färgen håller sig lika fin år efter år.

Tvättställsblandare Oras Safira, för fritidshus

Tvättställsblandare med öppen varmvattenberedare. Fast utloppspip och strålsamlare. Flöde 5 l/min. På grund av expansion som uppstår vid uppvärmning av vatten, kan vatten droppa från blandarens strålsamlare, detta är naturligt och ska ej förhindras. Strålsamlaren får inte bytas ut eller kompletteras med ytterligare komponenter. Trycklös varmvattenberedare, 5 l, med stickpropp. Enkel att installera. Användningsområde 35°-85°C (enligt svenska byggregler får tappvattentemperaturen inte överstiga 60°C). Blandaren och varmvattenberedaren måste tömmas på vatten om frysrisk föreligger (t.ex. i fritidshus som står ouppvärmt under vinterhalvåret). Denna varmvattenberedare får endast användas tillsammans med Oras speciella blandare för fritidshus.
Bygghöjd piputlopp: 74 mm. Piplängd: 107 mm

Köksblandare Oras Safira, för fritidshus

Köksblandare med öppen varmvattenberedare. Svängbar utloppspip, förinställd på 120° (kan begränsas till 40°- 80°). Flöde 5 l/min. På grund av expansion som uppstår vid uppvärmning av vatten, kan vatten droppa från blandarens strålsamlare, detta är naturligt och ska ej förhindras. Strålsamlaren får inte bytas ut eller kompletteras med ytterligare komponenter. Trycklös varmvattenberedare, 5 l, med stickpropp. Enkel att installera. Användningsområde 35° - 85°C (enligt svenska byggregler får tappvattentemperaturen inte överstiga 60°C). Blandaren och varmvattenberedaren måste tömmas på vatten om frysrisk föreligger (t.ex. i fritidshus som står ouppvärmt under vinterhalvåret). Denna varmvattenberedare får endast användas tillsammans med Oras speciella varmvattenblandare för fritidshus. Piphöjd: 125 mm. Piplängd: 211 mm. Bygghöjd piputlopp: 162 mm

Tvättställsblandare Oras Optima, batteridrift 6V

Beröringsfri tvättställsblandare med temperaturvred. Batteridrift 6V. Blandarens höjd är endast 125 mm vilket möjliggör installation även vid trånga utrymmen. Blandaren är utrustad med smutsfilter, backventiler, flexibla anslutningar och Oras Autofocus sensor som säkerställer att ingen justering av blandaren är nödvändig vid installation. Blandarens pilotventil reagerar med hjälp av impulsteknik vilket ger batteriet lång livslängd. Den beröringsfria funktionen i kombination med ett lågt flöde (5 liter/minut) ger en mycket låg vatten- och energiförbrukning.

Beröringsfri blandare med temperaturvred. Batteridriven 6 V. Blandaren är utrustad med smutsfilter och backventiler. Inga inställningar och justeringar behövs i samband med installation tack vare Oras Autofocus sensor. Bluetooth anslutning möjliggör en enkel övervakning och justering av blandaren via Oras App. Blandarens pilotventil reagerar med hjälp av impulsteknik vilket ger batteriet lång livslängd. Flödestid 6 l/min. Enkel installation med systemet Oras 3S-Installation. F = flexibel anslutning.

8430547	G10	Flexibel slang, invändig gänga	6	4.210

Tvättställsblandare Oras Optima 6V

Beröringsfri tvättställsblandare med temperaturvred. Batteridrift 6 V. Blandarens höjd är endast 125 mm vilket möjliggör installation även vid trånga utrymmen. Blandaren är utrustad med smutsfilter och backventiler. Oras avancerade autofocus sensor säkerställer att ingen justering av blandaren är nödvändig vid installation. Blandarens pilotventil reagerar med hjälp av impulsteknik vilket ger batteriet lång livslängd. Den beröringsfria funktionen i kombination med ett lågt flöde (5 l/min) ger en mycket låg vatten- och energiförbrukning. Max-temperaturbegränsning möjlig med bipackade delar. Bluetooth anslutning möjliggör en enkel övervakning och justering av blandaren via Oras App. F=Flexibel anslutning.

Köksblandare RFR NGL-838

NGL-838, hög pip, vred för avstängning av dm-anslutning under bänk. Blandaren har som standard flexibla slangar i rostfritt stål och ansluts med inv. 3/8” lekande mutter med filter. Pipen går att spärra över diskhoar. NGL-838 är utrustad med NGL-strålsamlare med höghastighetsteknik och som standard 9liter/min. Blandaren kan beställas med andra flöden genom att lägga till ändelse med önskat maxflöde t.ex NGL-838-06,NGL-838-08,NGL-838-12 osv. Maxflödet påverkar dock inte sparförmågan då högre flöde ger desto större spareffekt på grund av höghastighetstekniken.
Bygghöjd piputlopp: 192 mm. Piphöjd: 350 mm. Piplängd: 228 mm

DAHL // /OPTIMERA/

DAHL PICK-UP POINT!

PICK-UP POINT

BESTÄLL ONLINE OCH ANGE VAR DU VILL HÄMTA GODSET
så kommer det levererat till den ort/butik du anger.

Nu kan du hämta ditt beställda material även hos vårt systerbolag Optimera.
Godset beställer du på dahl.se för leverans till en butik, där finns nu ännu fler butiker att välja bland, vi samarbetar med Optimera på utvalda orter.

Så här beställer du från Dahl:

> På dahl.se väljer du lämpligt Dahlcenter eller Pick-up point via ”Hitta butik”
> Genomför din order och välj hämta i butik som leveransalternativ
> Ditt gods aviseras via sms och du är sedan välkommen till Dahl i våra butiker eller Pick-up Point (Optimera) för att hämta ditt gods.

Dahl Pick-up point finns nu på Optimera i följande orter:

- Eksjö
- Eslöv
- Falköping
- Hagby
- Hallsberg
- Höganäs
- Klippan
- Ljungby
- Ljusterö
- Nässjö
- Mjölby
- Skanör
- Svedala
- Säffle
- Sävsjö
- Tranås
- Ulricehamn
- Vaggeryd
- Vagnhärad
- Vara
- Vetlanda
- Värnamo
- Åhus
- Älmhult

Vattenutkastare Alterna

Vattenutkastare Alterna

Alterna vattenutkastare. Självdränerande och kapbar, med backventil. Skyddsmodul EB. Anslutning utvändig R15. Vattenutkastaren passar inte till kopplingsskåp med 70 mm djup.
Rördimension: 18 mm. Material: Koppar/mässing.
Max temperatur: 60 °C. Max arbetstryck: 10 bar

Artikelnr	Väggtj max mm	Pris
4398969	390	644
4398970	490	708

Vattenutkastare FMM

Vattenutkastare självdränerande

Självdränerande och därmed frostsäker även om man glömt att demontera trädgårdsslangen inför höstens och vinterns minusgrader. Vi rekommenderar dock att man alltid demonterar slang och koppling när det föreligger risk för frost Med typgodkänd backventil och nyckel. Kan kapas för anpassning mot väggtjocklek. Väggbricka: Höjd 106 mm, bredd 66 mm, skruvhål diagonalt.
Anslutning: G15. Funktion: Återströmningsskydd.
Utförande: Lös nyckel, inbyggd backventil

Artikelnr	Väggtj max mm	Pris
4316696	400	780
4316698	600	1.825

Vattenutkastarblandare

Trädgårdskran för både varmt och kallt vatten. Med typgodkänd backventil. Kan kapas för anpassning mot väggtjocklek. Kranen är fryssäker utan slang. Väggbricka: Höjd 70 mm, bredd 180 mm, skruvhål 172 c/c. Med vår dubbla trädgårdskran kan du tvätta bilen, fylla poolen eller koppla till trädgårdsduschen med den temperatur du önskar. Avstängningen är frostfritt placerad på insidan väggen så den tömmer sig själv när du stänger av vattnet.

Duschpaneler Oras

Beröringsfri duschpanel Electra

Sensorstyrd duschpanel med termostatblandare och temperaturratt på panelen för individuell inställning av temperatur. Anslutning 40 c/c ovanifrån. Duschen startas genom att föra handen inom sensorns startområde. Duschen flödar så länge man står i sensorns känslighetsområde och stängs av automatiskt när du lämnar sensorns känslighetsområde. Duschen kan stängas av för städning. Oras Data Terminal kan anslutas till transformator (199099) för att justera och utföra service på denna produkt.

Inspektionsluckor

Inspektionsluckor Standard

Luckan är tillverkad i galvaniserad stålplåt och består av tre delar; ram, lucka och fästbleck. Framsidan på luckan är pulverlackerad vit, kulör NCS S 0500-N, glans 30. Luckan fästes i ramen med snäpplås.Ramen fästes i vägg och tak med bifogade klämfästen, lika många per sida, för skivtjocklekar mellan 12,5-25 mm. Måtten som anges är håltagningsmåtten i väggen. Luckan används för nyproduktion, ombyggnader och renoveringar i gipsväggar och tak där det finns ett behov av en öppning för t.ex. besiktning eller inspektion av kranar och ventilationsspjäll etc.

Med Design4Baths tillbehör av montagebrickor kan du på ett enkelt sätt konvertera icke limbara produkter till att bli just limbara. Då många produkter inte har hunnit anpassas till dagens moderna montageteknik löser Design4Baths montagebrickor denna konvertering. Produkter som är vanliga att konvertera är bl.a. duschset, duschdraperistänger, torkställningar, pappershållare, tvåldispensers etc. RFR 0,7 mm inklusive mutter och bricka.
Material: Rostfritt stål. Färg: Matt rostfri

Strålsamlare Dual flow

Nozzle Dual Flow är konstruerad för vardagligt bruk. Det innebär att spara vatten utan att slösa bort tid eller förlora funktionalitet. Atomiseringstekniken bryter varje droppe till miljoner små droppar som direkt dränker dina händer och sparar 98% av det vanliga flödet. Vrid enkelt på handtaget för att växla till Spray läge för ett starkare flöde, men fortfarande med 90% besparing.

Isella – vår största möbelserie

Rena, raka linjer och antingen ett tunt möbeltvättställ eller ett ovanpåliggande tvättställ på bänkskiva i svart eller vitt, ger den här serien en enkel, jordnära och ungdomlig stil.

Isella har möbler för varje behov, i en mängd olika mått och i fyra färger: högblank vit, matt vit, matt ljusgrå och sand. I serien ingår underskåp, tvättkorgsskåp, väggskåp och högskåp. Ariella tvättmaskinsmöbel kan matchas med bland annat Isella.

Alla delar i Isella-serien är lagerlagda för snabba leveranser.

Alternakatalogen är ett smart införsäljningsverktyg som du kan ge till din kund. Här finns mängder med inspiration, tips och produktfakta. Blir du återförsäljare får du dessutom ditt företagsnamn på baksidan av katalogen.

Smidiga Lusso – lätt att installera

Lusso erbjuder många valmöjligheter. I serien ingår duschhörna, nischdörr och fristående skärmvägg, i mängder av olika mått.

Dörrarna är raka, svängda eller funktionellt vikbara. Alla sparar plats, då de kan öppnas både inåt och utåt. Profilerna väljs kromade, svarta eller vita, med klart, gråtonat, frostat, halvfrostat eller iögonfallande svart- eller vitrutigt glas. Samtliga glas är Easy Clean-behandlade – ett skydd mot avlagringar och smuts.

Lusso-duschväggar är enkla att installera med justerbar infästning. Alla duschdörrar kan dessutom monteras borrfritt.

Handdukstorkar för alla badrum

Alterna har ett stort utbud av handdukstorkar, för att passa olika smaker och behov. Allt från breda i klassiska designer, till smala vertikala för det moderna badrummet.

Välj kombitork för det vattenburna värmesystemet och/eller elpatron, eller en helt elektrisk tork. Både elpatroner och elhanddukstorkar finns för fast installation eller anslutning via stickkontakt.

Förutom många mått och stilar, finns torkarna även i olika färger: krom, svart och vit. Elpatron och reglerventil till kombitorkarna kan väljas i matchande färger.

Belysning Kungsör LED

Färgtemperatur: Kallvit 4000° Kelvin. IP 44 (belysningen är sköljtät). Armaturen är certifierad av Intertek Semco. Samtliga belysningar med eluttag kan man få med konstant strömförsörjning. LED i plåtramper belysning ner mot spegeln samt upp mot taket. LED betyder energieffektivitet. Upptill 90 % lägre energiförbrukning än en vanligglödlampa. Långlivslängd. Beräknad livslängd upp till 50000 timmar. Lågvärmeutveckling. Riktadljusspridning. Stöt-och vibrationståliga. Dioderna har komponenter i fast form och saknar glödtrådar. LED-belysning tänds direkt, ingen fördröjning. Tål obegränsat antal tändningar. Miljö: Till skillnad från lysrör och lågenergilampor innehåller lysdioder inget kvicksilver.
Typ: LED-belysning. Färg: Vit. Höjd: 60 mm. Djup: 225 mm. Material: Plåt /flermaterial. Skyddsklass: IP44

911749	Spegel-klammer	25	30	91

Badrumslist/duschlist

Duschrumslisten håller vattnet på plats utan besvär av höga trösklar. T-listen viker sig utan motstånd åt båda håll vid tryck, vilket gör den lämplig i utrymmen där man behöver komma fram med rullstol. Efter passage reser sig listen igen, beredd att stoppa det rinnande vattnet. Listen kontaktlimmas på golvet, går att fästa på alla underlag.

Tilluftpaket RMP 80/100 rund kåpa

8758155 8758167

Manuellt tilluftspaket för direktintag av uteluft. Ventilen är avsedd för praktiskt taget alla typer av lokaler med självdragsventilation eller fläktstyrd frånluftsventilation. Utformat för att reducera risker för drag. Förhindrar utkylning och frysskador vid kall väderlek. Ventilöppningen regleras steglöst via ett lätt åtkomligt reglage. Tilluftspaketen levereras komplett med ytterväggsgaller och väggenomföringsrör. Enkelt montage. Mycket god åtkomlighet vid rengöring tack vare innerdelens snabbfäste. PAX RMP 80/100 kan, via enkla handgrepp, kompletteras med med tillbehöret PAX Termostatkassett. Ventilen får då en automatisk funktion genom att spjällöppningen regleras i takt med utetemperaturens växlingar. Kan med fördel även kompletteras med tillbehöret PAX Vindskyddshuv. Vägghåltagningsmått: PAX Tilluftspaket 100 = Ø110mm / PAX Tilluftspaket 80 = Ø95 mm. Max väggtjocklek för PAX Tilluftspaket 80/100 = 370mm.
Bredd: 154 mm. Höjd: 400 mm. Längd: 163 mm.
Material: ABS

- **Välj bland flera varumärken**
- **Stöld- och drulle-försäkring ingår**

Leasingperiod: 12, 24 eller 36 månader

Välj den leasingperiod som passar ditt företag bäst. Månadskostnaden anpassas efter den leasingperiod du väljer och baseras på ditt kundunika pris på respektive verktyg. Självklart är alla avgifter inkluderade i ditt månadspris – det tillkommer inga dolda avgifter som upp-läggnings- eller fakturaavgift. Dessutom har du möjlighet att inkludera verktygstillbehör i ditt leasingavtal.

Alla varumärken ingår! I vårt sortiment har vi många olika varumärken på både verktyg och tillbehör – välj och vraka! Alla dina val, oavsett varumärke, samlas i samma leasingavtal.

Garanti och verktygsförsäkring

Hos oss ingår givetvis en heltäckande försäkring i leasingkostnaden. Drulle- och stöldförsäkring är standard och dessutom erbjuder vi en extra ”stöld ur bil”-försäkring – det är en unik förmån i just vår leasingtjänst och en stor fördel för dig.

Verktygsleasing hos Dahl – så fungerar det

1. Kontakta en säljare och välj de produkter du vill leasa.
2. Utifrån dina val räknar säljaren ut månadskostnaden.
3. Avtalet undertecknas. Välj om du vill ta med verktygen hem direkt från butik eller få dem skickade till önskad leveransadress.
4. När leasingperioden är över löser du ut verktygen till ett restvärde på 10–20 % beroende på vald leasingperiod.

Livsmedel

Kaffe Zoegas Skånerost

En smakrik komposition gjord av omsorgsfullt handplockade Arabicabönor från Östafrika och Brasilien, väl avvägt med högvuxna bönor från Latinamerika. Bönorna är varsamt mörkrostade och koppade i kafferosteriet i Helsingborg där man lyft fram en smakfull kaffekaraktär av kärv mörkrost med behaglig fruktighet och toner av mörka bär. Rostning: 7/8 Syrlighet: 2/5 Fyllighet: 5/5
Typ: Kaffe

Artikelnr	Miljömärkning	Vikt g	Ant/fp STK	Pris
323041	Rainforest alliance certified	450	12	81,2

Kaffe Arvid Nordqvist mellan

Doft med ton av nougat. Elegant smak med livlig syrlighet. Generöst lång och balanserad eftersmak. Mellanär ett100 % hållbart certifierat (UTZ Certified) och100% klimatkompenserat kaffe.

Artikelnr	Miljömärkning	Vikt g	Pris
323040	UTZ Certified	500	108,5

Kaffe Zoegas Hazienda Eko

Hazienda ingår i Organic-kollektionen, där hittar du dubbelcertifierade ekologiska kaffeblandningar som rostas på 100% högvuxna Arabicabönor för att få fram just de smaknyanser som skapar den unika karaktären. Rostning: 6/8 Syrlighet: 2/5 Fyllighet: 4/5

Förnödenheter

Absorberingsmatta Novipro

Novipro Absorberingsmatta är ett läckagefritt arbetsunderlägg i biomaterial. Med hjälp av påsens nya konstruktion har absorberingsmattan fått fler funktioner, så kallad 3-i-1-funktion. Den kan användas både i och utanför påsen och passar utmärkt på svåråtkomliga platser där t.ex. hink inte ryms. Den placeras ut vid arbetsområdet med vita sidan mot vätskekällan. För engångsbruk.

Artikelnr	Kap	Storlek utvikt matta mm	Storlek påse mm	Pris
324205	5 liter/ matta	1400 x 600	370 x 370	366

Suck-It Sugmatta

Absorberande matta för säker uppsamling av utströmmande vätska från rör och behållare under utbyte eller reparation. Mattan har en absorptionskapacitet på 4-5 liter vatten, och den är mycket flexibel så att den kan användas på svåråtkomliga ställen där det inte finns rum för exempelvis en hink. Mattorna är till exempel idealiska vid utbyte av radiatorer, när det ofta inte är möjligt att använda en hink på grund av placeringen nära golvet och när den restvätska som ofta kommer ut under demonteringen är fylld med rost så att man riskerar att förorsaka skador och missfärgningar på golv och mattor.

Vinkelslip GWS 13-125 Milwaukee

Kompakt design med smal kropp för mer komfortabel användning. Kraftfull 1550 W “PROTECTOR motor” - epoxybehandlat fält och ankare skyddar motorn från skadliga partiklar för ökad livslängd. 4 meter kabel och mjukstart. Nollspänningsutlösare förhindrar verktyget från att starta oavsiktligt efter att strömtillförseln brutits. Överbelastningsskydd förhindrar motorn från att överhettas. Slirkoppling skyddar både användare och verktyg från “kick back effekt”. FIXTEC för verktygslösa och snabba byten av skiva. Verktygslös och robust skyddskåpa för enkel och snabb justering. Stödhandtag med anti-vibrationssystem för lägre vibrationsnivå.

Hammarborr SDS-PLUS MX4 Milwaukee

4-sidig spårgeometri säkerställer maximal dammbortförsel under användning. Fyra symmetriska 90° skär säkerställer perfekt runda hål för optimal montering av kemiska ankare. Centreringsspets för perfekt borrning gång på gång. Den solida karbidspetsen på diametrarna Ø 5-8 mm ger bredare kanaler som ger snabbare borrning. Mer karbid betyder även bättre hållbarhet och längre livslängd. 4 mejseltänder som skapar en "rivningseffekt" genom små microsprickor i det borrade materialet - ger upp till 20% fler hål än konkurrenter. Förbättrade andraskär på sidorna ger bättre motståndskraft vid träff i armeringsjärn.

Metallborr HSS-G Milwaukee

Thunderweb designen har en konisk formad kropp där borrets interna kärna, är tjockare desto längre bak man kommer. Kroppen hos ett standard metallborr har en konstant tjocklek genom hela borrets längd. Tvärsnitt på en parabolisk borrkropp tillåter högre tryck och vridmoment. Mindre brott, bra på böjda ytor och för borrning av djupa hål. Lång livslängd. THUNDERWEB spiralen avlägsnar varma spån snabbt vilket avleder värmen och därmed förlänger livstiden. 135° delat skär - Precisions start – Tränger genom snabbt utan att vandra. Polerad finish ger mindre friktion och längre livslängd. Slagtålig förpackning med vadderade hörn. Klarar högre matningstryck och vridmoment vilket innebär mindre sprickor.

Tigersågblad Torch Milwaukee

Förbättrad tandgeometri för ökad hastighet och förlängd livslängd. 1,06 mm robust blad för precis sågning. 25 mm bladhöjd för förbättrad stabilitet och minimal vibration. Bi-metall tänder med 8% kobolt ger ultimat prestanda och livslängd. Stansade fördjupningar runt fästet stärker bladet vid dess svagaste punkt. Inbyggt nätmönster i bladet gör det styvare, med mindre tendens att böjas eller bucklas för bästa hållfasthet. För sågning i metall och trä.

Stämjärn Bahco

Stämjärn polerade och färdigskärpta för direkt användning. Tillverkade av helsmitt verktygsstål i bladet och med konisk hals. Helhärdat blad med transparent lack som motverkar rost. Bladet kan slipas om många gånger. Bladen är snedslipade på båda sidor ned till halva bladtjockleken. Handtagen kan normalt tåla ganska stora påfrestningar från slag av träklubba eller plasthammare, men inte ens ett hårt plastkomponentsmaterial håller för alltför tuff behandling. Använd klubba eller hammare med omsorg. Härdat till Hrc 58-60 över 2/3 av längden. Skärvinkel 25°, slipvinkel 10°, 110 mm långt handtag av mycket hårt plastmaterial.

Sidavbitare Novipro

Speciell sandblästrad yta ger produkten en fin finish och skyddar tången mot rost. Smal krage på tångens handtag säkrar att tången inte glider i handen och gör det samtidigt lätt och smidigt att få ner och upp tången ur fickor på exempelvis arbetsbyxa. Ergonomiskt 2-komponentshandtag säkrar ett högt arbetstryck på tången. Testat och producerat efter DIN/ISO-standard

Sidavbitare Bahco

Sidavbitare med progressiva käftar. Enligt ISO 5749, DIN 5749. Två tänger i en - progressiv egg gör det möjligt att klippa hårt material närmast leden, exempelvis pianotråd, och mjukare material som koppartråd och plastisolerad tråd närmare spetsen. Smala, rundade käftar gör det enklare att komma åt även i trånga lägen. Nitplaceringen möjliggör hög utväxling med minimal kraftåtgång. Returfjäder som kan kopplas ur. Material: Svartoxiderat och rostskyddat kromvanadinstål. Ergonomiskt utformade handtag i tvåkomponents plastmaterial av polypropen och termoplastisk elastomer. Klippkapacitet: Pianotråd.

Bockverktyg Nr 55 Fromax

Verktyget kan användas för bockning av både hårda och mjuka koppar, stål, aluminium, rostfria och liknande rör. Verktyget är graderat 0°-180° vilket gör att man erhåller exakta bockar. . För att minska risken för repor på röret som bockas rekommenderas att man fettar in kontaktytorna mellan verktyget och röret med ett lämpligt fett. Verktyget är ej lämpligt för känsliga rörtyper såsom kromade och målade rör. För dem rekommenderas Fromax Nr. 75. Verktyget för dimensionen 22 mm är konstruerat med ett öra så man enkelt kan fästa det i ett skruvstäd samt en extra lång bockarm med en hävarm på 108 cm eftersom hårda kopparrör i diametern 22 mm kräver stora krafter för att övervinna dess böjmotstånd.

Svetsmaterial

Silverfosforkopparlod 2% Ag

Silverfosforkopparlod med 2% silver som används främst för koppar rördetaljer och kopparplåt. Meltolit 2P är för hårdlödning i koppar samt mässing och i viss mån stål. Produkten innehåller fosfor vilket bryter "oxiden" på grundmaterialet vid sammanfogning av kopparrör, kopparanslutningar och VVS/kyldetaljer. Vid lödning av mässingsdetaljer behövs separat flussmedel typ Meltolit 770 (VVS godkänt). Arbetstemperatur 740°C.

220025	2,0	15	1	3.390

Silvermjuklod 3,5% Ag

Silverlegerat tennlod för koppar-, mässing och stål samt rostfria legeringar som används främst för VVS och kylindustrin. Meltolit P30 95/5 är för mjuklödning i kapillär-, rör och plåtdelar. Produkten innehåller inte fosfor vilket betyder att det behövs ett mjuklods-flussmedelför att bryta oxiden på grundmaterialet vid sammanfogning av dessa metaller. Tenn/silver lodet fungerar utmärkt där mindre spalter och jämn fogpassning förekommer. Mycket lättflytande lod med bra färgöverenstämmelse med rostfritt. Produkten användes inom ordinär finmekanik och VVS och kylinstallationer etc. Smältintervall 221-230°C.

Silverlod 44% Ag

Kadmiumfritt silverlod med 44% silver som används för samtliga metaller förutom aluminium och dess legeringar. Meltolit 44 är för hårdlödning i kapillär-, rör-, plåtdelar. Produkten innehåller inte fosfor vilket betyder att det behövs ett silverlodsflussmedel, typ Meltolit 770, som bryter "oxiden" på grundmaterialet vid sammanfogning dessa metaller. Silverlodet fungerar utmärkt där större spalter och ojämn fogpassning förekommer. Produkten användes inom ordinär mekanik och hårdmetallverktyg, varvsindustri etc. Arbetstemperatur 730°C.
Längd: 500 mm

Silverlod flussbelagt 55% Ag

Kadmiumfritt flussbelagt silverlod med 55% silver som används för samtliga metaller förutom aluminium och dess legeringar. Meltolit 55SnF är för hårdlödning i kapillär-,rör- plåtdelar. Silverlodet har markant höga flyt- och vätningsegenskaper, då bra fogpassning erfordras. Produkten användes inom finmekanik, värmeväxlare och sanitära installationer etc. God färgöverenstämmelse med rostfritt. Arbetstemperatur 660°C.

Elektrod P 48P Elga

P 48P är en basisk låghydrogenhaltig allströms normalutbyteselektrod med tunt hölje, speciellt utvecklad för svetsning av rör. Den rekommenderas för svetsning av olegerade, manganlegerade och mikrolegerade stål. P 48P har en mycket stabil ljusbåge, vilket ger elektroden stor toleransbox för variationer i spaltöppningar och kantförskjutning. Den är mycket användarvänlig och säker att använda i svåra lägen. Rotsträngar blir jämna och ger en svagt konvex strängprofil. Fyllnads- och täcksträngar lägger sig jämnt mot grundmaterialet. Dessa egenskaper ger minimalt behov av slipning, vilket reducerar miljöproblem med slipdamm och buller. Det ger i slutändan en god produktivitet och sänkta kostnader.

Elektrod P 48S Elga

P 48S är en basisk normalutbyteselektrod avsedd för svetsning med likström + pol. Den är speciellt utvecklad med tanke på svetsningsegenskaperna och är mycket mjuk och stabil i ljusbågen. Dessa egenskaper gör elektroden användarvänlig och ger jämna övergångar mot grundmaterialet både i rotsträngar och fyllnadssträngar i alla lägen. P 48S är en typisk allroundelektrod och är idealisk för såväl rörsvetsning som allmänna konstruktioner. Elektroden har låg utgångsfukt och långsam fuktupptagning och är avsedd för svetsning av olegerade, manganlegerade och mikrolegerade stål.

Cromarod 308LP Elga

Cromacore DW 308LP är en rutil allströmselektrod avsedd för svetsning av 18% Cr/ 10% Ni-typ rostfria stål. Elektroden har utformats speciellt för fullt lägessvetsning vid höga svetsströmmar. Passar även för stabiliserad grader 347 och 321 om service temperaturen är under 400 °C. Cromacore DW 308LP arbetar med en mycket stabil, stänkfri båge och ger en klar, slät svetsstrång yta och självlossnande slagg. Idealisk för hög produktivitet svetsning i vertikal position.

Cromarod 316LP Drypac Elga

Cromarod 316 LP är en rutil allströmselektrod med tunt hölje speciellt utvecklad för svetsning av tunnväggiga rör (ned till 1,5 mm), vilka används inom kemi- och massaindustri. Den är avsedd för rostfria, austenitiska stål av ‘‘syrafast’’ typ, det vill säga lågkolhaltiga 19% Cr/12% Ni/3% Mo. Elektroden kan användas i alla svetslägen, tänder och återtänder mycket lätt samt brinner mjukt även på låga strömstyrkor, vilket gör den mycket användbar för svetsning enligt den så kallade droppsvetsmetoden. Cromarod 316LP rekommenderas också för rotsträngar och fyllnadssträngar i grövre godstjocklekar.

IR termometer Elma 610A

Elma 610A är en superenkel infraröd termometer med dubbelt lasersikte, som utan beröring med mätobjektet kan mäta temperaturen. Den kora reaktionstiden, ca. 0,15 sekunder, gör Elma 610A perkfekt till snabba mätningar t ex. screening av kyl-/frysskåp, mätningar på rörliga delar i maskiner samt komponenter inom elektronik området. Instrumentet levereras komplett med väska, batteri och manual.

Artikelnr	Temp omr °C	Noggrannhet	Upplösning °C	Pris
923166	-50-550	1,0% eller ±2,5°C (vad som är störst)	0,1	1.150

Digital Termometer 712 - 2 displ. Elma

Digital differenstermometer för mätning av två temperaturer samtidigt eller differenstemperaturen. Instrumentet kan visa temperatur 1 och temperatur 2 samtidigt i displayen eller differenstemperaturen tillsammans med antingen temperatur 1 eller 2. Ergonomiskt tillverkad vilket gör att man kan betjäna instrumentet med en hand. Stor tydlig display 56mmx 53mm Enkel hantering av knappsatsen. Instrumentet har funktionsknappar för T1 & T2 (T1-T2) maxvärde, hold-funktion, valfri enhet, °C/°F, belyst display och displayupplösning i 1°C eller 0,1°C. Har max/min och mäter kontinuerligt och displayen visar den högsta lägsta eller genomsnittstemperaturen under mättiden (genomsnitt max. över 9 timmar 40 min). Leverans inkl. 1 st TP-01 temp. givare. Andra k-givare betälls separat. Levereras med manual. Mått: 135x72x31 mm

LAGEREXPRESS

– tjänsten som ger dig en flygande start på morgonen!

Beställ här!

Gör som Viktor, beställ på dahl.se ...

Utkörning eller upphämtning i butik

Beställ via centrallagret och få tillgång till Sveriges bredaste sortiment inom vs och va – på lager och redo att levereras till den plats du anger; butik eller arbetsplats.

Hämta där!

... och hämta ditt material färdigpackat i butik morgonen därpå.*

* Det är olika slottider runt om i landet. Fråga din säljare vad som gäller för din butik.

Vill du veta mer?
Scanna QR-koden för mer information.

DAHL

Du har väl inte missat vår app?

Hela grossistlagret i din egen telefon, smart va?

Appen funkar via i ditt lager, i servicebilen och i butik
– ett tryggt sätt att handla i dessa tider.

Ladda ner appen här:

Available on the iPhone App Store

ANDROID APP ON Google play

Med appen kommer du även åt nödvändig produktinformation på ett enkelt sätt, scanna produktkoden och kolla bland dokumenten. Där finns allt ifrån produktblad, installationsmanualer till kvalitetsdokument.

Inte nog med det, appen funkar med administrationstjänsten Flexibla Kontoret.

Nu kan du fakturera lika enkelt som du handlar.

Läs mer om Flexibla Kontoret här:

DAHL //

Upplev NYA DAHL.SE

– branschens absolut bästa webbhandel!

SNABBARE HASTIGHET

NU GÅR DET UNDAN SKA DU SE – vi har lagt krut på att få upp hastigheten så dina order kommer in i ett huj!

ENKLARE ORDERLÄGGNING

LÄTT SKA DET VARA och det har vi tagit fasta på. Som du tänker, har vi byggt sidan. Häng med bara, så dimper din beställning ner innan du vet ordet av.

SUPER-SÖKBAR

SÖK!! Ska du bara ta med dig en enda sak från nya dahl.se – ta SÖKET.

Du kan till och med söka på kattstrypare – du hamnar ändå på Buntband. Över 40 000 synonymer och vanligt förekommande slangord ligger i systemet.

Testa oss gärna!

Dessutom finns det massor av smarta tjänster som gynnar din affär – *spana här.*
