The Running Magnet 2.0 Suspension Up&Down

High-tech LED lighting system for interior architecture.

Description

Fun with magnets and light. Simultaneously graphic and subtle, the Running Magnet is flexible, precise, and as creative as you. It is track lighting redesigned and elegantly refined. Light elements snap in place and connect automatically though the magic of magnets. Extruded aluminum housings create a clean 1-3/8-inch slot and preconfigured corners complete the system that can run up, around and across walls and ceilings. Finishes align perfectly, always, because Running Magnet can be easily cut on site (except Suspension Up&Down). Linear LED and accent fixtures, available in a variety of sizes, can be exchanged and repositioned quickly, without tools, with artistic results. The Running Magnet is perfect for retail displays where frequent changes are typical and absolute performance is mandatory.

Lamp

System Lamp Type	LED
Color Temperature	2700K, 3000K, 3500K*, 4000K (*See Notes)
Color Rendering	CRI90
Application	General Lighting / Accent lighting

Physical

Material	Aluminum
Ingress Protection Rating	IP20
Finishes	■ 14 Black □ 40 = White
Installation type	Suspended
Environment	Indoor
Field cuttable	No

Electrical & Control

Driver location	Remote
Driver Input Voltage	120V-277V
Driver Output Voltage	24V
Maximum Driver Wattage	Class 2 - 96W
Control	On fixture: Standard 0-10V dimming / DALI / On board

The Running Magnet 2.0 Suspension Up&Down

High-tech LED lighting system for interior architecture.

Notes

- End caps are included only with the Running Magnet feed profile.
- EC to supply site cabling from driver to track location and site UL listed enclosure.
- Wattage per linear foot is dependent upon quantity and type of light modules used.
- Spots and linear luminaires available in DALI (individually addressable), and 0-10V (from 10% up to 100%) dimming.
- All components required for the installation are included with the system with the exception of drivers and controllers
- Linear profiles available as feed profiles to connect to a driver and intermediate profiles to fill in remaining lengths.
- 3500K and other CCT available but not cataloged. Consult factory for additional color temperatures.
- Up&Down profiles are not cuttable. Linear profiles available as feed profiles to connect to a driver and intermediate profiles to fill in remaining lengths.
- Track can not be powered through corners. The corners are not fitted with indirect illumination.
- 13' of suspension aircraft cable is standard
- Cable gauge Max Distance. From driver to end of the track section (ft) Max Distance. From driver to track. Considering 26ft track (ft)

#12 awg	72	46

The Running Magnet 2.0 Suspension Up&Down

High-tech LED lighting system for interior architecture.

How To Specify

A. Select and position corners

1. Horizontal - Connect sections on flat surfaces (90° corner)

C. Drivers

Quantity of drivers determined by total wattage or light elements in section (approximately one every 10 feet). Maximum driver distance is 15'. Locate drivers nearby. Dimming hardwires into profile, bypasses driver.

B. Fill lengths between corners with Linear Housings

3.3', 4.9', 6.6' or 8.2' sections can be specified as feed or intermediate profiles. Profile can be easily cut to site to exact length and joined together.

D. Select Spot heads

Linear strips are available in five nominal lengths:

1', 2', 3', 4' and 5'.

Individual units can be adjusted from 20-100% with a built-in dimming knob and DALI and 0-10V from 10-100%

The Running Magnet 2.0 Suspension Up&Down

High-tech LED lighting system for interior architecture.

Profile

The extruded aluminum housing creates a clean 1-3/8" slot that can be run across the ceilings. Horizontal corners complete the system. The magnetic luminaires are simply installed by insertion. Linear tracks are available in two versions: power feed profiles for connecting to a driver, and intermediate profiles. End caps and connection cables are included with each power feed profile. Internal foam for opening support should not be removed until after installation.

How to specify

Light Strip Module HE

Linear High Efficiency LED can be rapidly exchanged and repositioned without tools. Light elements are quick to position and connect automatically with magnets. Built-in dimming knob dims fixture from 20-100%, DALI and 0-10V from 10-100%. Clear end caps included for continuous look when installing end-to-end.

How to Specify		ex. 03.7001.14.90

The Running Magnet 2.0 Suspension Up&Down

High-tech LED lighting system for interior architecture.

Spot Module

Accent LED Spot modules can be rapidly exchanged and repositioned without tools. Light elements are quick to position and connect automatically with magnets. Built-in dimming knob dims fixture DALI from 1-100% and 0-10V from 10-100%. Standard beam spread is 14°. Additional interchangeable lenses available in 23° and 33°, and 10° x 40° elliptical beam spread.

Table with 9 columns: CCT, CRI, Initial Lumens, Delivered Lumens, Watts, Beam Spread, Part Number, Finish, Dimming Protocol. It lists specifications for two models: 03.6303 and 03.6302.

Optional Accessories

Table with 4 columns describing optional accessories: Flood Lens Accessory 23°, Wide Flood Lens Accessory 33°, Elliptical Lens Accessory, and Extra long snoot. Each row includes a description, part number, and a corresponding image of the accessory.

The Running Magnet 2.0 Suspension Up&Down

High-tech LED lighting system for interior architecture.

Multi Spot 4

4 accent Spot LED module can be rapidly exchanged and repositioned without tools. Light elements are quick to position and connect automatically with magnets. Built-in dimming knob dims fixture (from 20-100%), DALI and 0-10V (from 10-100%). Standard beam spread is 11° additional interchangeable lenses available in 20° and 30°, and elliptical beam spread.

The Running Magnet 2.0 Suspension Up&Down

High-tech LED lighting system for interior architecture.

Workmates Small - Full Spectrum

Luminaire for use on The Running Magnet system. High-quality colour rendering Full Spectrum light source. This can rotate by 360° on the axis of its rear arm to reach any position relative to the track (from parallel to perpendicular). UGR<19. EN12464 - cd/m² @ 65°<3000 compliant. Casambi, maximum distance between fixtures: 50m.
