

Pediatric Dosing Chart

Dosage for infants and children from your healthcare professional

DOSE: Every 4 hours as needed.

Use only the dosing device (dosing syringe or dosing cup) included with the medication to help ensure an accurate dose.

Do not give more than 5 doses in 24 hours. If possible, use weight to dose, otherwise, use age.

Use products **only** as directed. Always read and follow the label on all TYLENOL® products.

Do not use with any other product containing acetaminophen.
