

Trend: Smart Clothing

As everyday objects become more technology-friendly and Internet-ready, clothing is no exception. Jackets, shoes, shirts, and even underwear can now not only provide protection and warmth, but they can be your GPS device, monitor your heart rate, and even automatically update your status on your favorite social network.

Smart Clothing in the Real World:

- ❖ [Smart Sunglasses with Alexa](#)
- ❖ [Heart rate sensing sports tank](#)
- ❖ [Running shoes that track your workout](#)
- ❖ [Smart yoga pants](#)

Smart Clothing in Film:

- ❖ Iron Man
- ❖ James Bond

This “networked” BLU jacket by Lunar Design uses organic fabrics containing semiconductors and has GPS built in. You can project a map onto the jacket’s sleeve through its flexible display.
