Emergency call out on 10/11/20, two engineers arrived on site and inspected the roller shutter, found roller shutter to be non operational and sitting at a slant, no access to motor cable after getting canopy down, engineer gained access to the shop by prising shutter out and getting in behind, this allowed the engineer access to unlock the mag lock, when attempting to operate roller shutter, engineer has noted the drive in the motor has gone, which means the shutter wont lift even with assistance

Payment due on receipt of invoice. by, credit or debit cards. BACS details –
