**Omida VLS represents a new standard of quality and strength in the TSL (Transport, Shipping, and Logistics) industry.**

The brand emerged from the strategic merger of three road transport companies: Omida Logistics, Virtus Logistics, and Cargonite, each recognized for years for their innovation and professionalism in the market.

The integration process aimed to create a leader in road freight forwarding, combining the best practices and expertise of each entity. Through collaboration and the merging of knowledge and resources, Omida VLS delivers comprehensive solutions, stability, and operational dynamism to its clients.

**By uniting these companies, Omida VLS embodies the ambition, growth, and maturity of the OMIDA Group. The internal integration of competencies and the relentless pursuit of operational excellence position us as a strong leader in the TSL sector.**

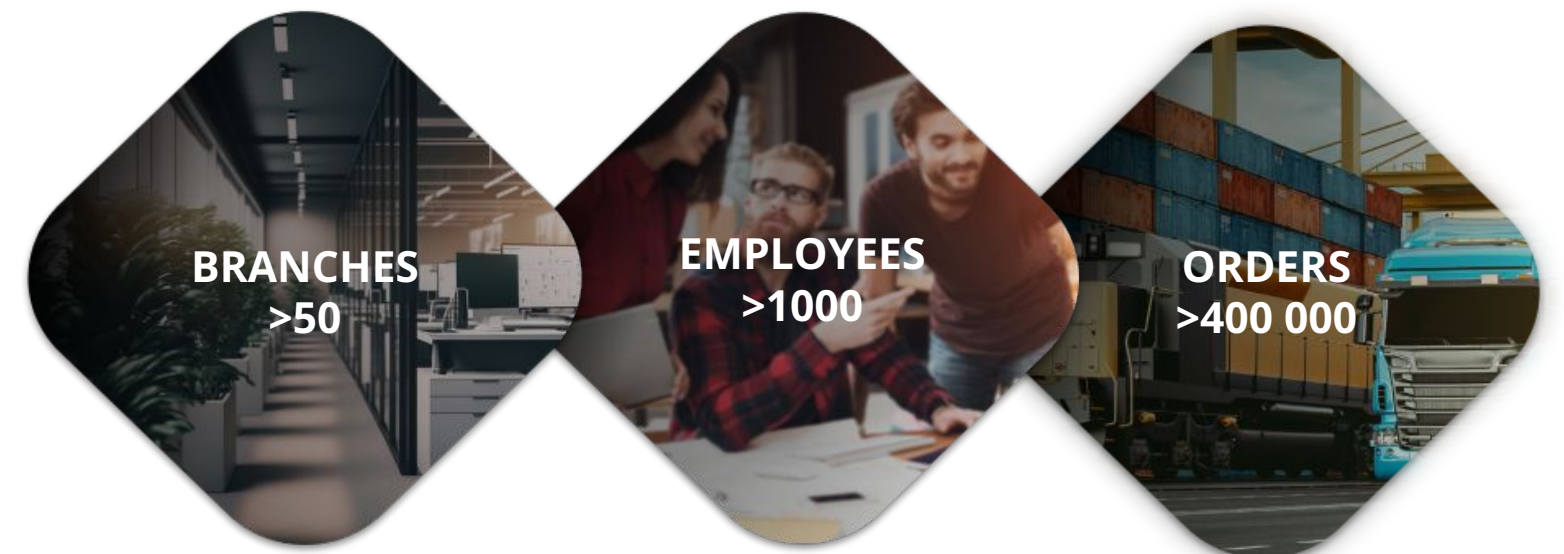

**The cooperation between our companies enables us to provide global services to every client.**

Our complementary skills and expertise allow us to deliver services regardless of the destination, type, or specifications of the transported cargo.

The structure of all operational and sales departments ensures the highest quality of service for even the most demanding clients, anywhere in Poland.

**We specialize in road transport**, focusing on modern solutions for both domestic and international routes. Investments in technological development enable us to gain a competitive edge in the business.

**Road transport is a key component of the global supply chain.**

It requires:

- precise planning,
- efficient logistics processes,
- and route optimization tailored to the cargo's requirements.

With an extensive network and years of experience, every order is executed with a focus on safety, punctuality, and cost efficiency.

**Freight forwarding and logistics at the highest level** – seamless cargo management from pickup to destination.

**Flexibility in transport modes** – full truckload, less-than-truckload, and intermodal solutions tailored to the specifics of the cargo.

**Expertise in key routes** – Germany, Belgium, the Netherlands, Spain, Italy, Slovakia, Hungary, France, Norway, Romania, Portugal, Croatia, and many more.

**Cargo safety at every stage** – we ensure the security of the entire transport process to deliver the cargo to the recipient in perfect condition.

**Cost and time optimization** – we plan routes considering the most favorable logistical conditions.

## Omida VLS Intermodal - Shaping a Green Future in Transport

We create better conditions for society and the environment through sustainable transport solutions.

Our focus is on maximizing eco-friendly transportation while maintaining the highest quality standards.

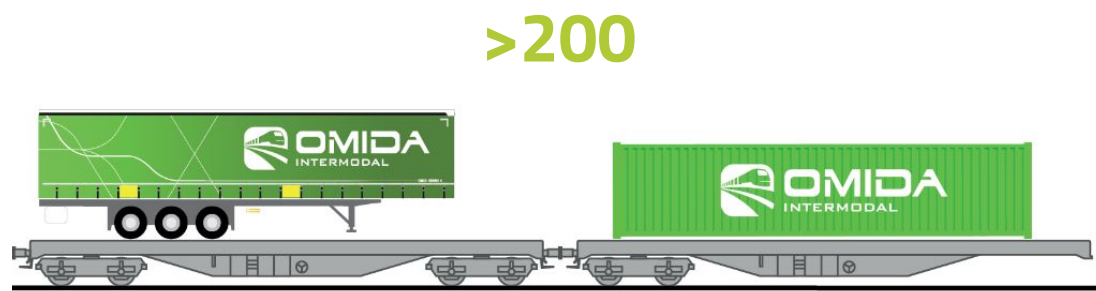

This approach is an integral part of our business strategy.

The value of our operations is measured by CO2 emission reductions, financial efficiency, and performance indicators.

This enables us to achieve sustainable development goals and lead the ecological transformation of the transport industry.

Emission  
reduction by  
1,500 tons  
annually

Over 200 intermodal units  
trailers + containers

DAYS IN A YEAR

Routes served by Omidia VLS Intermodal.

**Omidia VLS Oversize specializes in transporting oversized cargo, such as oil separators, retention tanks, agricultural machinery, long loads, and steel components.**

We operate with a team of seven experienced escorts and a fleet of seven vehicles dedicated to overseeing oversized shipments. The professionalism of our team and advanced equipment ensure the safe transport of even the most demanding shipments.

From planning to unloading, our team is fully committed to the process, minimizing the risks associated with oversized cargo transportation.

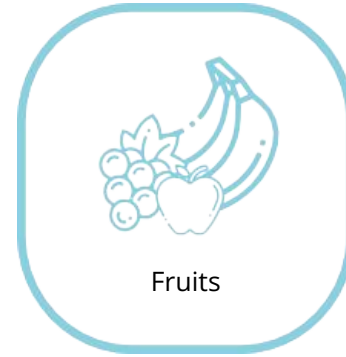

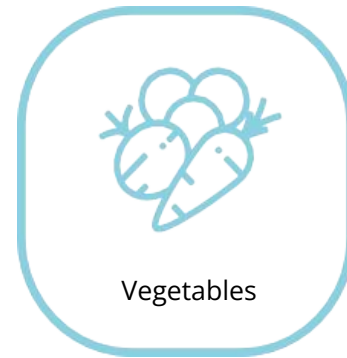

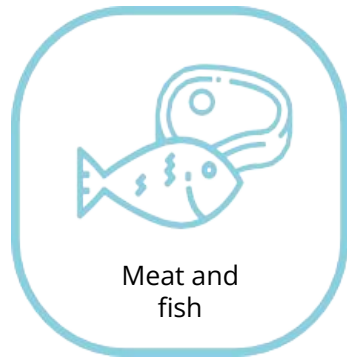

## **Military & Aeronautics Services** – Fast and Secure Air and Military Transport.

We provide **fast and secure** transportation for the military sector. With our implemented Internal Control System (ICS) and expertise in legal regulations, we successfully execute even the most demanding assignments.

- - **Transport under ICS** – ensuring safety and compliance with regulations.
- - **Oversized and specialized transport** – for cargo that requires precision and expertise.
- - **Comprehensive transportation solutions** – road, air, sea, and rail tailored to your needs.
- - **Comprehensive logistical support** – guidance on planning, documentation, and insurance.
- - **Transport escort services** – organizing convoy and securing shipments of special significance.
- - **Assistance with permits** – support in obtaining required documents and ensuring regulatory compliance.

We provide professional 24-hour service for highly demanding clients who value direct contact with a dedicated freight forwarder.

We deliver cargo across Western Europe, Scandinavia, and Southern Europe, transporting fresh products and frozen goods. Our trucks are equipped with thermographs, double floors for 66 pallets, SBS, and ADR systems. We offer both FTL and LTL transport services.

**We hold veterinary certificates, as well as ISO, GMP+, and IFS certifications.**

**The Joloda system ensures safety, space optimization, and easy loading. Omida Transport Solution is a dedicated service for printing houses and paper manufacturers.**

**Paperliner trailers** are equipped with specialized longitudinal rails and anchor points for securing wedges, enabling quick horizontal loading of paper rolls and flexible placement of rolls at any point on the trailer.

The solutions implemented in paperliner trailers are not limited to transporting paper rolls. They are ideal for transporting products such as packaging, press materials, and books, where the priorities are fast loading and unloading, damage prevention, and maximizing cargo space utilization.

**We are a member of the International Air Transport Association (IATA) and the largest global network of agents – WCA.**

**Omidia VLS Airfreight** provides top-quality air transport services, ensuring the fastest delivery of shipments worldwide.

With air freight services, your goods can reach any destination across the globe at express speed, regardless of the size, type, or frequency of shipments.

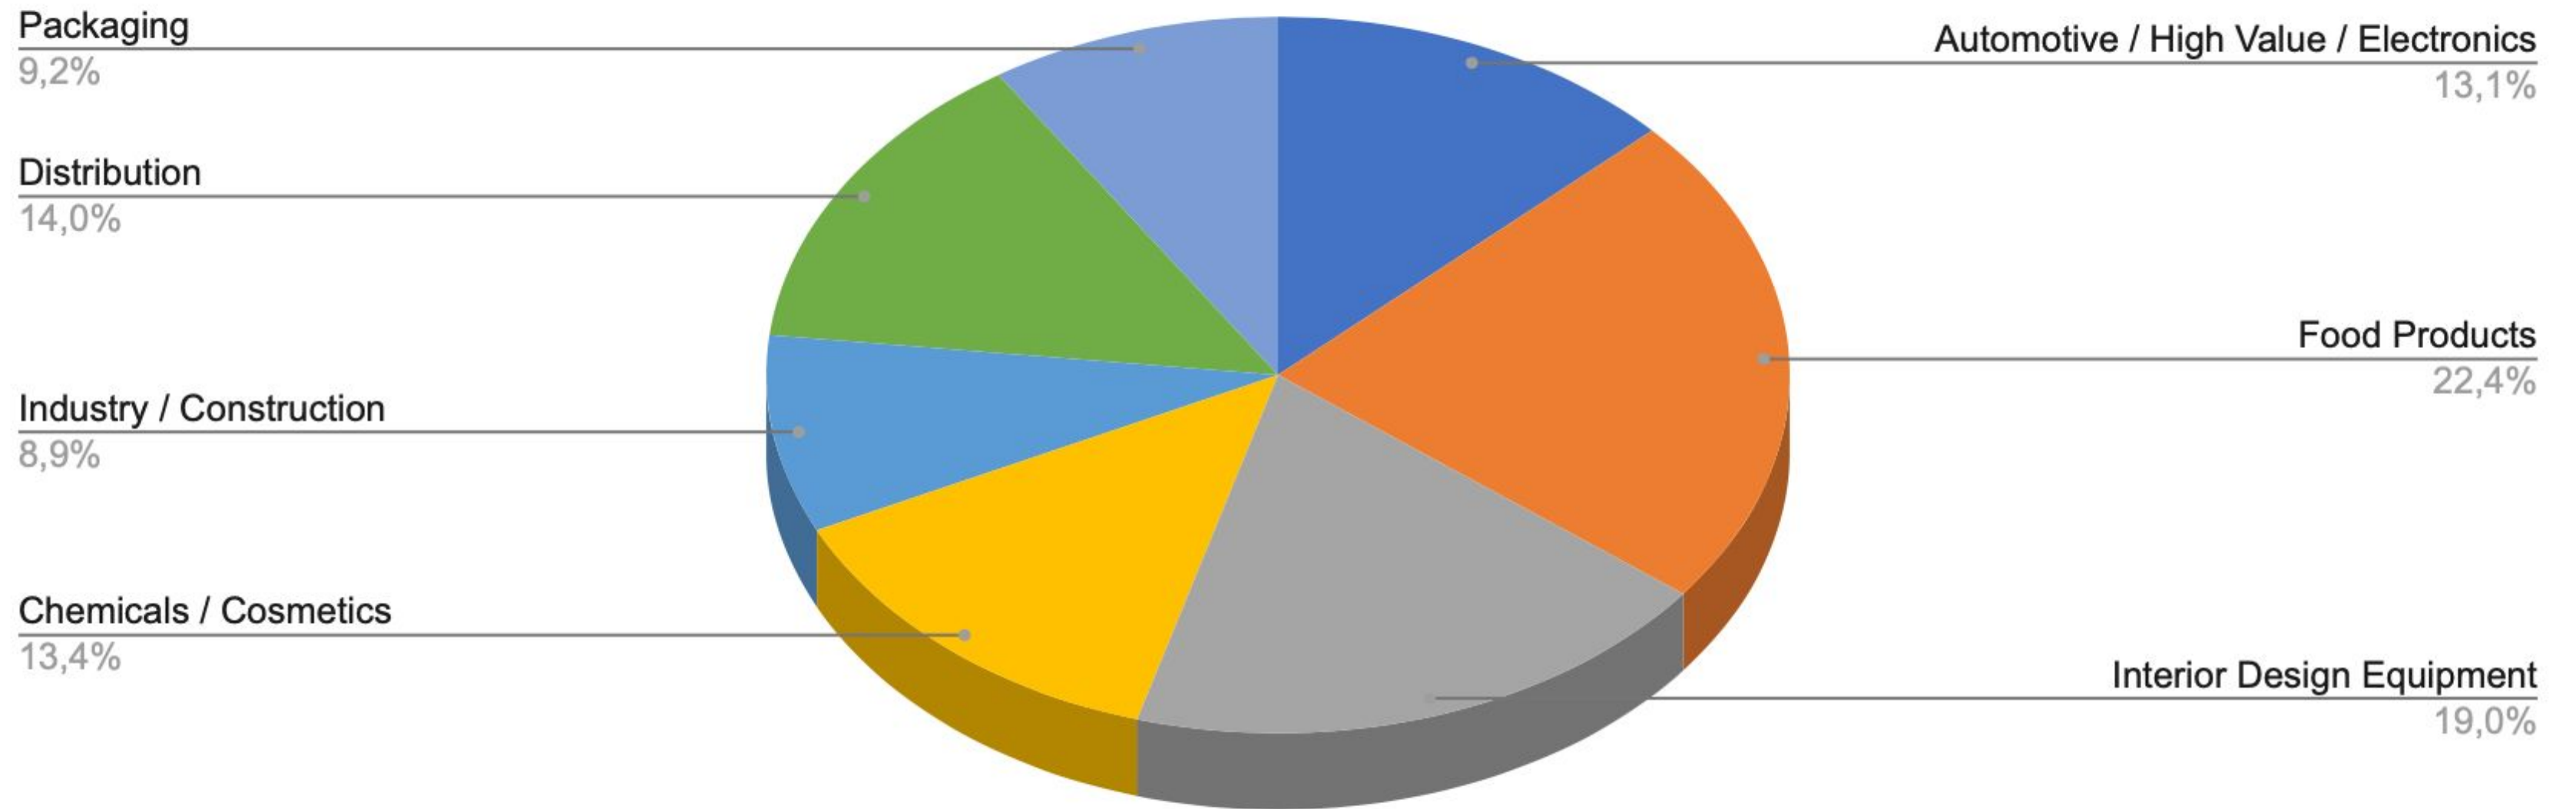

## Omida VLS Airfreight services include:

- **Airfreight – Air cargo from 100 kg** – we guarantee fast and secure transportation of goods by air, regardless of shipment size.
- **On Board Courier (OBC)** – Our courier will carry your goods onboard a flight, ensuring priority and reliable delivery.
- **Air Charte** – For special and large shipments, we offer aircraft charter services, providing fast and direct transport.
- **Next Flight Out (NFO)** – For the most urgent shipments, we provide the Next Flight Out service, ensuring immediate departure.

### Transport of goods by industry

Data collected from the top 100 serviced clients in 2024

Our company specializes in the professional handling of high-value goods transportation, including power tools, household appliances, oxygen-free copper, innovative machinery, and prototypes. Additionally, we provide transportation services for automotive parts and equipment for luxury yachts.

High Value (HV) transport requires a specialized approach, which is why our team continuously works on enhancing safety standards. **Our services are tailored to the unique requirements of HV goods, ensuring full protection and security throughout the entire transportation process.**

**We provide timely and secure transportation of food products, ensuring proper conditions, temperatures, and humidity levels.** Food transportation presents a unique challenge, as it requires punctual deliveries, advanced logistics, and appropriate conditions throughout the process.

**Omidia VLS provides transportation services tailored to the food industry.**

This type of transport accounts for various legislative and procedural requirements. Proper planning of the transport process, from pickup at the production site to final delivery to the end customer, is key to maintaining the supply chain and ensuring product freshness.

**We transport the following types of food products:**

- Dry
- Frozen
- Fresh
- Plant-based
- Animal-based
- Bulk
- Liquid

**MOKATE**

**ROL RYŻ**

**Upfield™**

**ŻYWIEC ZDRÓJ**

**Refresco**

**We have established logistics frameworks for the transportation of furniture, antiques, and serial production items.**

We specialize in transportation for the furniture industry – from large wardrobes to small interior design elements. We understand the importance of **quality and punctuality**, which is why every transport is carried out with attention to detail and the safety of the products being transported:

- **- Safe transport within the country and abroad** – we deliver furniture to any location without the risk of damage.
- **- Specialization in the furniture industry** – we transport upholstered, wooden, modular furniture, as well as kitchen, bathroom, and garden elements.
- **- Handling diverse orders** – from dressers and wardrobes to sofas, beds, tables, and shelves.

**At Omidia VLS, we ensure the safe transportation of electronics while adhering to all necessary precautions.**

The transportation of electronics requires exceptional care. Our company provides a comprehensive range of logistics, freight forwarding, and transportation services necessary for domestic and international shipments of home appliances and consumer electronics.

In recent years, there has been a noticeable increase in the import and export of household and electronic appliances.

**We organize the transport of televisions, electric and gas stoves, ovens, microwaves, ice makers, speakers, and many other products.**

For over 15 years, we have been offering our clients domestic and international transportation of large-scale equipment.

The transportation of highly delicate goods, such as ceramics, glass, or fragile items, requires exceptional precision and specialized solutions.

**We provide:**

- **Secure logistical solutions** - Use of appropriate fastening systems, cushioning, and protective packaging to minimize the risk of damage.
- **Modern fleet** - Vehicles equipped with load security systems, including anti-slip flooring and cargo spaces adapted for transporting delicate materials.
- **Expertise in handling special goods** - Transporting items with unusual shapes or large dimensions while strictly adhering to safety standards.
- **Strict process control** - Real-time cargo monitoring and dedicated loading and unloading procedures.

**We transport cosmetics, creams, powders, gels, and personal hygiene products from manufacturers to warehouses and distribution networks.**

We have an experienced team specializing in transportation services for manufacturers in the beauty industry.

We transport cosmetics across Poland and Europe, offering both transportation and storage solutions for distribution networks.

We regularly handle the transport of cosmetics, creams, powders, gels, and personal hygiene products from manufacturers to warehouses and distribution networks.

We work with both Polish and international cosmetics manufacturers. Our experienced team customizes transportation solutions tailored to the needs of the beauty industry.
