

Psychiatry Journals 2024

2022 Journal Impact Factor*
2.3

Alcohol

Publishes biomedical research on all aspects of the actions or effects of alcohol on the nervous system or on other organ systems. Includes studies on the causes and consequences of alcohol abuse and alcoholism, and biomedical aspects of diagnosis, etiology, treatment or prevention of alcohol-related health effects. The journal also covers the neurobiological, neurobehavioral, and pathophysiological processes associated with alcohol drinking, alcohol abuse, alcohol-seeking behavior, tolerance, dependence, withdrawal, protracted abstinence, and relapse. The effects of alcohol on brain mechanisms of neuroplasticity over the life span, biological factors associated with adolescent alcohol abuse, pharmacotherapeutic strategies in the treatment of alcoholism, biological and biochemical markers of alcohol abuse and alcoholism, pathological effects of uncontrolled drinking, biomedical and molecular factors in the effects on liver, immune system, and other organ systems, and biomedical aspects of fetal alcohol spectrum disorder are also covered.

The American Journal of Geriatric Psychiatry

Official Journal of the American Association for Geriatric Psychiatry

Publishes on the diagnosis and classification of psychiatric disorders of later life, epidemiological and biological correlates of mental health of older adults, and psychopharmacology and other somatic treatments.

www.ajgponline.org | www.sciencedirect.com/journal/the-american-journal-of-geriatric-psychiatry

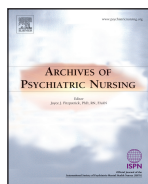

Online only

The American Journal of Geriatric Psychiatry: Open Science, Education, and Practice

An Official Journal of the American Association for Geriatric Psychiatry

Publishes research on clinical care, education, and investigation in different fields of geriatric mental health research, education, and practice with the understanding that these fields are all truly interdisciplinary at their best, and increasingly trans-disciplinary. The journals aims to improve health, health care, and health equity world-wide through high-quality, innovative, geriatric behavioral health science, education, practice, and commentary through research, educational initiatives and novel clinical practice models-all by a broad range of authors, including academicians, patients, poets, payors, policy makers, social scientists, and scholars of philosophy relevant to aging with a balance of good science and humanism at its core.

2.3

Archives of Psychiatric Nursing

Official Journal of the International Society of Psychiatric Mental-Health Nurses

Publishes original research of interest to psychiatric and mental health care nurses in its broadest perspective, including theory, practice, and research applications related to all ages, special populations, settings, and interdisciplinary collaborations in both the public and private sectors.

www.psychiatricnursing.org | www.sciencedirect.com/journal/archives-of-psychiatric-nursing

(Journal Citation Reports / Clarivate Analytics, 2022)

Asian Journal of Psychiatry

A general and comprehensive journal of psychiatry for psychiatrists, mental health clinicians, neurologists, physicians, students of mental health and those involved in mental health policy development. The journal bridges a knowledge gap between the application and transfer of research findings and clinical practice through Asia to and from the rest of the world with a focus on psychiatric research pertinent to Asia produced either within or from outside the continent. This includes preclinical, clinical, service system and policy development research relevant to psychiatry and the socio-cultural diversity of the region as it pertains to mental health.

Biological Psychiatry

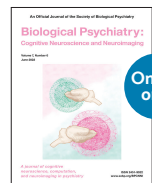

A Journal of Psychiatric Neuroscience and Therapeutics

An Official Journal of the Society of Biological Psychiatry

Publishes on the nature, causes, mechanisms and treatments of disorders of thought, emotion, or behavior through basic and clinical contributions from all disciplines and research areas relevant to the pathophysiology and treatment of major psychiatric disorders. This includes original research representing an important new lead or significant impact on the field, particularly those addressing genetic and environmental risk factors, neural circuitry and neurochemistry, and important new therapeutic approaches.

Biological Psychiatry: Cognitive Neuroscience and Neuroimaging

A Journal of Cognitive Neuroscience, Computation, and Neuroimaging in Psychiatry

An Official Journal of the Society of Biological Psychiatry

Publishes studies using the tools and constructs of cognitive neuroscience, including the full range of non-invasive neuroimaging and human extra- and intracranial physiological recording methodologies. This includes basic and clinical studies that incorporate genetic data, pharmacological challenges, and computational modeling approaches.

Biological Psychiatry: Global Open Science

An Official Journal of the Society of Biological Psychiatry

Publishes basic, translational, and clinical contributions from scientists across the world in all disciplines, research areas, and research methods relevant to the pathophysiology and treatment of major psychiatric disorders. This includes novel results of original research which represent an important new lead or significant impact on the field, including those addressing genetic and environmental risk factors, neural circuitry, neurochemistry, hormonal function, and computational understanding across the lifespan, as well as important new therapeutic approaches. Reviews, meta-analyses, and commentaries that focus on topics of key research and broad interest are also encouraged, as well as pre-registered reports.

Biomarkers in Neuropsychiatry

Publishes on neurobiologic, therapeutic and prognostic biomarkers associated with all brain disorders, neurologic and/or psychiatric. The journal covers a wide array of genetic, molecular, neuroimaging (MRI, MRS, fMRI and DTI), neurophysiological, neurochemical, endocrinological and immunological biomarkers, related to brain structure or function in all neuropsychiatric disorders and encourages interdisciplinary research collaboration across multiple scientific disciplines in an effort to facilitate the generation of breakthrough insights and novel biomarkers.

Brain Stimulation

Basic, Translational, and Clinical Research in Neuromodulation

Publishes original work across the entire field of brain stimulation, including noninvasive and invasive techniques and technologies that alter brain function using electrical, magnetic, radiowave, sound, light, focally targeted pharmacologic stimulation, or any other physical method to directly alter neural function. This includes investigations that study the effects of brain stimulation on basic processes, such as gene expression and other aspects of molecular biology, neurochemical regulation, functional brain activity, sensorimotor function, and cognitive and affective processes at the systems level. As an equal partner with this basic emphasis, the journal has strong representation of research on the therapeutic potential and adverse effects of the stimulation technologies. Research in therapeutics includes not only clinical trials, but also conceptual pieces, discussions of ethics as they pertain to this field, services research, and epidemiology.

Comprehensive Psychiatry

Comprehensive Psychiatry is an open access, peer-reviewed journal that publishes on all aspects of psychiatry and mental health with a mission to disseminate cutting edge knowledge in order to improve patient care and advance the understanding of mental illness. The Journal aims to publish high quality papers with a particular emphasis on the clinical implications of the work including an improved understanding of psychopathology.

Comprehensive Psychoneuroendocrinology

A partner journal of *Psychoneuroendocrinology*

Publishes research covering the interrelated disciplines of psychology, neurobiology, endocrinology, immunology, neurology, and psychiatry, with an emphasis on multidisciplinary studies aimed at integrating these disciplines in terms of either basic research or clinical implications. A primary goal is to highlight how a variety of psychobiological factors interact in the expression of the stress response as it relates to the development and/or maintenance of neuropsychiatric disorders.

www.sciencedirect.com/journal/comprehensive-psychoneuroendocrinology

Online Only

Deep Brain Stimulation

Official Journal of the Deep Brain Stimulation Society

Publishes on all topics in the field of deep brain stimulation (DBS), both in clinical and basic science. Topics include Ethics, Neuroscience, Neurology, Neuroradiology, Neurosurgery, Psychiatry, Neurotechnology and Engineering, Psychology, and Paramedicine. The Journal is dedicated to publishing scholarly original articles and reviews on the application of DBS in the nervous system. DBS is broadly defined and includes electrical, chemical, (electro) magnetic, optical, ultrasound based, radiowaves and other methods targeting (deep) brain areas.

Drug and Alcohol Dependence

An International Journal on Biomedical and Psychosocial Approaches

Affiliated with the College on Problems of Drug Dependence

Publishes original research, scholarly reviews, commentaries, and policy analyses in the area of drug, alcohol and tobacco use and dependence. Topics include studies of the chemistry of substances of abuse, their actions at molecular and cellular sites, in vitro and in vivo investigations of their biochemical, pharmacological and behavioural actions, laboratory-based and clinical research in humans, substance abuse treatment and prevention research, and studies employing methods from epidemiology, sociology, and economics.

Psychiatry Journals 2024

New
Journal

Drug and Alcohol Dependence Reports

Affiliated with the College on Problems of Drug Dependence

Publishes original research, scholarly reviews, commentaries, and policy analyses in the field of drug, alcohol and tobacco use, misuse and dependence. Topics include cellular and molecular actions, chemistry, pharmacology, neuroscience, epidemiology, sociology, economics, and behavioral manifestations of psychoactive substances, inclusive of studies on intervention and prevention. This broad coverage of the addictions' field provides researchers with an in-depth over encompassing knowledge base that can help inform individual research paths with the goal of improving science. Facilitating momentum in moving addiction science from the laboratory to the clinic is an important aim of its editorial team.

www.sciencedirect.com/journal/drug-and-alcohol-dependence-reports

The European Journal of Psychiatry

Publishes on all aspects of mental illness with a commitment to present new developments in the full spectrum of issues related to psychiatry and mental health, in areas linked to biological, psychological and social sciences. The journal includes basic studies and the growing application of clinical laboratory techniques in psychiatry with a particular emphasis on clinical issues related to personalized medicine, including prevention and early intervention. A new Section on Psychosomatic Psychiatry has been incorporated recently. Research is of interest to psychiatrists, psychologists, social scientists, nurses and others engaged in mental health professions, together with basic neurobiological researchers.

www.sciencedirect.com/journal/the-european-journal-of-psychiatry

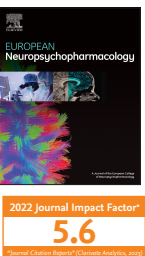

European Journal of Trauma & Dissociation

Official journal of the European Society for Trauma and Dissociation and the French Language Association of Trauma and Dissociation

Publishes scientific and clinical literature on dissociation, the dissociative disorders, posttraumatic stress disorder, complex PTSD, psychological trauma, and attachment disturbances, in order to foster exchange among researchers, clinicians and other professionals.

www.sciencedirect.com/journal/european-journal-of-trauma-and-dissociation

European Neuropsychopharmacology

The Journal of the European College of Neuropsychopharmacology

Publishes clinical and basic science contributions that advance the science and treatment of disorders of the brain and enable translation into improved treatments and enhanced public health impact in neuropsychiatry. The journal aims to narrow the gap between advances in basic knowledge and experimental techniques in neuroscience and genomics with the translation of these findings by publishing discoveries that impact our understanding of the biological bases of mental disorders and the development and improvement of treatments, with a focus on prevention and recovery.

www.sciencedirect.com/journal/european-neuropsychopharmacology

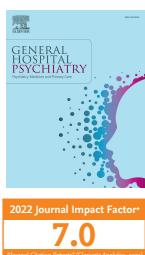

Evolution and Human Behavior

Official Journal of the Human Behavior and Evolution Society

Publishes research reports and theory in which evolutionary perspectives are brought to bear on the study of human behavior. While primarily a scientific journal, papers from scholars in the humanities are encouraged as are papers reporting on theoretical and empirical work on other species provided the relevance to humans is apparent.

www.sciencedirect.com/journal/evolution-and-human-behavior

General Hospital Psychiatry Psychiatry, Medicine and Primary Care

Publishes on the many linkages among psychiatry, medicine, and primary care. In emphasizing a biopsychosocial approach to illness and health, the journal provides a forum for professionals with clinical, academic, and research interests in psychiatry's role in the mainstream of medicine.

International Journal of Clinical and Health Psychology

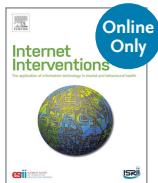

Publishes manuscripts with a basic and applied emphasis, including experimental, clinical and theoretical work contributing to the advancement of Clinical and Health Psychology. The IJCHP aims to target four core domains: clinical psychology and psychotherapy, psychopathology, health psychology and clinical neurosciences.

www.sciencedirect.com/journal/international-journal-of-clinical-and-health-psychology

International Journal of Drug Policy

Provides a forum for the dissemination of current research, reviews, debate, and critical analysis on drug use and drug policy in a global context. It seeks to publish material on the social, political, legal, and health contexts of psychoactive substance use, both licit and illicit. The journal is particularly concerned to explore the effects of drug policy and practice on drug-using behaviour and its health and social consequences. It is the policy of the journal to represent a wide range of material on drug-related matters from around the world.

Internet Interventions

The Application of Information Technology in Mental and Behavioural Health

Official Journal of the International Society for Research on Internet Interventions and the European Society for Research on Internet Interventions

Publishes research on internet interventions and related areas with a focus on the promotion of mental health and featuring the Internet and/or technologies (e.g. computers, smartphone devices, tablets, and sensors) using the Internet as an underlying technology.

Topics also include:

- Integration of Internet interventions into existing systems of care
- Internet-based epidemiology
- Descriptions of new Internet-based technologies and experiments with clinical applications
- Economics of Internet interventions (cost-effectiveness)
- Health care policy and Internet interventions
- Internet psychometrics
- Ethical issues pertaining to Internet interventions and measurements
- Human-computer interaction and usability research with clinical implications
- Systematic reviews and meta-analysis on Internet interventions

Journal of Mood & Anxiety Disorders

Official Publication of the Anxiety & Depression Association of America

Welcomes original clinical, translational, and basic research as well as synthetic review articles covering neurobiology (genetics and neuroimaging), epidemiology, experimental psychopathology, pathophysiology and treatment (psychotherapeutic, neuromodulation, and pharmacologic) aspects of mood and anxiety disorders. We encourage original research submissions from basic neuroscientists and pharmacologists as well as all clinical investigators to establish a platform for translational advances and discussion. To advance this discussion, review papers focusing on current treatment advances as well as those providing innovative and cutting-edge reviews of key areas and issues guiding mood and anxiety disorder science will be prioritized.

Journal Citation Reports[®] (Clarivate Analytics, 2022)

Journal of Psychiatric Research

Publishes papers covering four key research areas:

- Clinical studies of all disciplines relating to psychiatric illness, as well as normal human behavior, including biochemical, physiological, genetic, environmental, social, psychological, and epidemiological factors
- Basic studies pertaining to psychiatry in such fields as neuropsychopharmacology, neuroendocrinology, electrophysiology, genetics, experimental psychology, and epidemiology
- The growing application of clinical laboratory techniques in psychiatry, including imagery and spectroscopy of the brain, molecular biology, and computer sciences
- Advances in basic and clinical research methodology, including the process of “bench to bedside” transfer of new research findings.

Journal of Psychosomatic Research

Official Journal of the European Association of Psychosomatic Medicine and Affiliated with the International College of Psychosomatic Medicine

A multidisciplinary journal covering all aspects of the relationships between psychology and medicine. The broad scope ranges from basic human biological and psychological research to evaluations of treatment and services. Papers typically focus on illness or patients rather than healthy populations. Studies covering special populations, such as the elderly and children and adolescents, are also covered.

www.sciencedirect.com/journal/journal-of-psychosomatic-research

Psychiatry Journals 2024

Journal of Substance Use & Addiction Treatment (Formerly *Journal of Substance Abuse Treatment*)

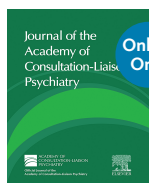

New Name, Same Journal

Publishes original research; systematic reviews and meta-analyses; and commentaries and symposia/conference proceedings that advance the care of substance use disorders (including alcohol, illicit and prescription drugs, cannabis and nicotine) and their consequences. Articles should address policies, systems of care, assessment techniques, and intervention approaches that have clear relevance for addiction treatment, harm reduction, and recovery support. There is a particular interest in addiction health services research, including the design, organization, delivery, implementation, accessibility, quality, cost, effectiveness, equity, patient experience, and workforce characteristics of interventions for persons with substance use problems in all service settings.

All articles: www.jsatjournal.com

Journal of the Academy of Consultation-Liaison Psychiatry

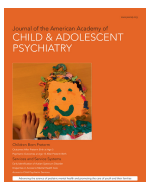

Included in Medline and the Science Citation Index!

Official Journal of the Academy of Consultation-Liaison Psychiatry

Publishes original research, review articles and clinical reports that address psychiatric aspects of medical illnesses and their management. Areas of particular interest include: the effect of co-morbid psychiatric conditions on the management of medical illness, the psychiatric management of patients with comorbid medical illness, educational content for physicians and others specializing in consultation-liaison (C-L) psychiatry, and the provision of psychiatric services to medical populations including integrated care.

Articles from January 2021: www.sciencedirect.com/journal/journal-of-the-academy-of-consultation-liaison-psychiatry

Articles Through December 2020: www.sciencedirect.com/journal/psychosomatics

2022 Journal Impact Factor* 13.3

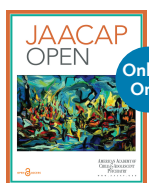

Journal of the American Academy of Child & Adolescent Psychiatry

Included in Medline and the Science Citation Index!

Official Journal of the American Academy of Child & Adolescent Psychiatry

Publishes research with a primary focus on the mental health of children, adolescents, and families. Topics include genetic, epidemiological, neurobiological, and psychopathological research; cognitive, behavioral, psychodynamic, and other psychotherapeutic investigations; parent-child, interpersonal, and family research; and clinical and empirical research in inpatient, outpatient, consultation-liaison, and school-based settings. Child and family well-being is also covered through such subjects as health policy, legislation, advocacy, culture and society, and service provisions as related to the mental health of children and families.

JAACAP Open

New Journal

Official Journal of the American Academy of Child & Adolescent Psychiatry

JAACAP *Open* publishes scientific work from a broad array of original hypothesis-testing and hypothesis-generating, and mixed methods investigations, meta-analyses, reviews, and pre-registered reports in domains relevant to child, adolescent, and family mental health such as basic, translational, clinical, epidemiologic, health policy, population science, and global health research.

www.jaacapopen.org | www.sciencedirect.com/journal/jaacap-open

2022 Journal Impact Factor* 2.7

L'Encéphale International Journal of French Psychiatry

Now Entirely in English

Publishes research articles related to mental health including new developments in diagnosis and treatment, advances in the biological underpinnings of mental, behavioral and cognitive function in clinical and general population samples.

www.sciencedirect.com/journal/lencephale

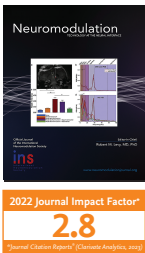

Psychiatry Journals 2024

Mental Health & Prevention

Publishes on the prevention of mental and behavioural disorders and mental ill health, and the promotion of mental well-being. The journal covers all aspects of prevention from basic research to social policy and is open to a wide range of methodologies, including qualitative and quantitative studies. The journal evaluates papers on the quality of the methodology rather than the study findings and welcomes protocol papers and negative results.

www.sciencedirect.com/journal/mental-health-and-prevention

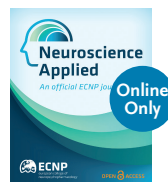

Neuromodulation Technology at the Neural Interface

International Neuromodulation Society

Publishes on the technology, science, and clinical application of devices that interface with the nervous system to treat disease, alleviate symptoms, and improve function and serves as an instrument for exchanging high-quality data, advancing science, and as a forum for debate and commentary. The journal covers an ever-expanding field including pain, headache, movement disorders, spasticity, paralysis, psychiatric and cognitive disorders, epilepsy, sensory deprivation, cardiovascular, gastrointestinal, and genitourinary disorders among others.

www.sciencedirect.com/journal/neuromodulation-technology-at-the-neural-interface

Included
in
Medline!

Neuroscience Applied An Official European College of Neuropsychopharmacology Journal

As the ability of the neurosciences to address the complexity of brain function and dysfunction increases exponentially, so do their applications in understanding, treating and preventing brain disorders. Neuroscience Applied aims to rapidly publish the best research in this area, encompassing original basic, clinical and integrative research that has translational relevance for mental health. Submissions are also welcome on mechanisms of disorders, biological, psychological and social treatments, prevention and policy that apply a neuroscientific approach to brain disorders.

www.sciencedirect.com/journal/neuroscience-applied

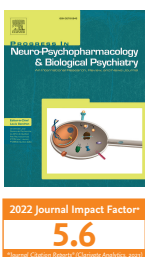

Personalized Medicine in Psychiatry Dedicated to Advancing Basic, Clinical and Therapeutic Knowledge of Personalized Medicine in Psychiatry

Serves as a resource for basic and clinical investigators, neuroscientists, psychiatrists, psychologists, residents, and medical and graduate students. The journal publishes studies of endophenotypes and biological markers, pharmacological and psychotherapeutic approaches, educational and rehabilitation concerns, and environmental and behavioral, psychological and social research, with the aim of moving toward the search for individualized treatments tailored for each patient, all with a focus on identifying predictors of response in individual patients.

in
Scopus

Progress in Neuro-Psychopharmacology & Biological Psychiatry An International Research and Reviews Journal

A multidisciplinary journal that aims to ensure the rapid publication of authoritative reviews and research papers dealing with experimental and clinical aspects of neuro-psychopharmacology and biological psychiatry.

www.sciencedirect.com/journal/progress-in-neuro-psychopharmacology-and-biological-psychiatry

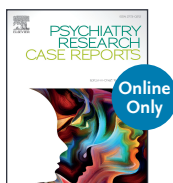

Psychiatry Journals 2024

Psychiatry Research

Publishes rapid publication, short, complete, psychiatry research reports covering biochemical, physiological, genetic, psychological, and social determinants of human behavior; assessments of human behavior and subjective states; and the evaluation of somatic and non-somatic psychiatric treatments. The journal also covers clinically related basic studies in the fields of neuropharmacology, neurochemistry, neuroendocrinology, electrophysiology, psychology, genetics, and brain imaging are published. Significant methodological advances such as instrumentation, clinical scales, and assays directly applicable to psychiatric research are also published.

www.sciencedirect.com/journal/psychiatry-research

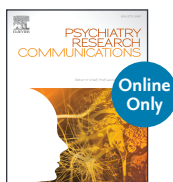

Psychiatry Research Case Reports

Psychiatry Research Case Reports publishes case reports and case series covering all aspects of psychiatry and mental health. The journal aims to disseminate cutting edge knowledge to improve patient care and advance the understanding of mental illness. As a companion title to *Psychiatry Research*, *Psychiatry Research Neuroimaging* and *Psychiatry Research Communications*, the Journal provides a global forum for clinicians and researchers to share their personal experiences through case reports.

www.sciencedirect.com/journal/psychiatry-research-case-reports

New
Journal

Psychiatry Research Communications

Publishes high quality papers “from the bench to the bedside”, including studies on the phenomenology, diagnostic methods, biopsychosocial determinants, therapeutic strategies, and animal models of psychiatric illnesses. *Psychiatry Research Communications* provides rapid publication of original research, secondary data analyses and reviews of timely topics in psychiatry. Comments about previous papers published in the journal may be submitted as Letters to the Editor.

www.sciencedirect.com/journal/Psychiatry-Research-Communications

New
Journal

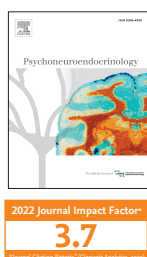

Psychiatry Research: Neuroimaging

The Official Publication of the International Society for Neuroimaging in Psychiatry

Publishes on positron emission tomography, magnetic resonance imaging, computerized electroencephalographic topography, regional cerebral blood flow, computed tomography, magnetoencephalography, autoradiography, post mortem regional analyses, and other imaging techniques. Reports concerning results in psychiatric disorders, dementias, and the effects of behavioral tasks and pharmacological treatments are featured.

www.sciencedirect.com/journal/psychiatry-research-neuroimaging

Psychoneuroendocrinology

A partner journal of *Comprehensive Psychoneuroendocrinology*

The Official Journal of the International Society of Psychoneuroendocrinology

Publishes on the interrelated disciplines of psychology, neurobiology, endocrinology, immunology, neurology, and psychiatry, with an emphasis on multidisciplinary studies aiming at integrating these disciplines in terms of basic research or clinical implications. Understanding how a variety of psychobiological factors interact in the expression of the stress response as it relates to the development and/or maintenance of neuropsychiatric illnesses is a primary goal.

www.sciencedirect.com/journal/psychoneuroendocrinology

Psychiatry Journals 2024

Revista de Psiquiatría y Salud Mental – Journal of Psychiatry and Mental Health

Official publication of the Sociedad Española de Psiquiatría (SEP) (Spanish Society of Psychiatry) and the Sociedad Española de Psiquiatría Biológica (SEPB) (Spanish Society of Biological Psychiatry) Publishes in English and Spanish

A multidisciplinary general mental health journal that covers diverse aspects on mental and behavioural disorders, their pathological processes, and their psychosocial consequences. It aims to disseminate the scientific advances in all areas associated with mental illness and health, and the promotion of mental well-being. The journal includes original basic and clinical contributions from neuroscience, clinical, therapeutic and psychosocial areas. Systematic reviews, meta-analyses, and commentaries that focus on topics of key research and broad interest are also encouraged, as well as pre-registered reports and protocols.

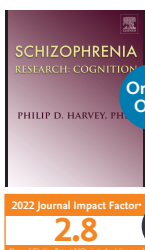

www.sciencedirect.com/journal/revista-de-psiquiatria-y-salud-mental

Schizophrenia Research A Translational Journal of the Psychosis Spectrum

Publishes novel papers that contribute significantly to the understanding of the biology and treatment of schizophrenic disorders. The journal brings together biological, clinical, and psychological research in order to stimulate the synthesis of findings from all disciplines involved in improving patient outcomes in schizophrenia.

www.sciencedirect.com/journal/schizophrenia-research

Schizophrenia Research: Cognition

Publishes on all aspects of cognition in schizophrenia, including comparison studies on schizophrenia and mood disorders and studies of different schizophrenia-related conditions. Our target topics include neurocognition, social cognition, functional capacity, and everyday outcomes as related to cognition and cognitive, affective, and social neuroscience. An emerging interest is the broad interface between cognition and technology as it applies to our target clinical populations. We are aware the editorial processing speed is crucial for authors and strive for rapid turn-around times.
