THUNDERBIRDS™
ARE GO

INTERNATIONAL RESCUE JETPACK

Build the most essential equipment in the IR kit!

STEP 1: Cut the cardboard to approximately 26cm wide and 23cm tall.

STEP 2: Use the craft knife to cut slits into the far corners of the cardboard, allowing enough space for both bottles in between.

STEP 3: Paint the cardboard black and leave to dry.

STEP 4: Take the plastic bottles outside and spray paint (taking wind direction into account). Leave to dry

STEP 5: Thread the backpack straps through the slits on the cardboard.

STEP 6: Cut flame shapes into the tissue paper. Layer red then orange and yellow, and glue inside the bottle necks.

STEP 7: Glue the plastic bottles to the cardboard, with the bottle necks and flames facing downwards.
