Artwork Guide

Insert/design your artwork. Please do not resize the template or move/delete any of the lines

Please extend background images/colour **up to but not beyond the bleed line** - this is essential for the gluing process.

When supplying Packaging artwork, please submit 2 files, one with the template visible and overlaid on your artwork so we can check that the artwork meets our specifications, and the second with the template removed leaving only what you wish to be printed. The second file will be printed

Don't forget to delete this page containing all the instructions

Export both PDF files
