SEPTEMBER UPDATES

Provider Newsletter

Contents

What's going on this month

- Easier tracking of PA requests + more PA codes removed
- 10/1: Must use our new form for claims disputes
- CMS Program Integrity Rule updates

And much more!

Provider Portal Updates

This month in your portal

This month, we've added new updates to the Provider Portal to make your work with Oscar fast and easy:

- **Learn:** Find educational materials to help you record and show high-quality patient care.
- **Connect:** Reach our certified medical coders, clinical documentation specialists, and partnering clinicians.
- **Use best practices:** Browse and download our tools, guides, and Clinical Evidencing Series.

Questions or requests on specific topics? Email us at cs@hioscar.com.

Provider News Updates

New! Clinical documents & coding resources

We have a new Provider Resources page to help you document and code patient care. On this page, you can:

Many of your patients could be at risk of seeing a huge spike in their premiums — **upward of 50%** — if Congress fails to extend the enhanced premium tax credits that are set to expire on December 31. **An easy-as-4 million-people-could-lose-coverage altogether-as-a-result-of-premium hikes, and-uncompensated-care-costs-could-increase-by-over-38-billion.**

Congress can prevent millions of Americans — **your patients** — from losing their healthcare. But Congress has to act now and renew these critical subsidies in the September government funding bill. As a valued provider, you play a critical role in helping your patients maintain access to care. That's why we're asking you to raise your voice and urge Congress to act.

How you can help: Contact your U.S. Senators and Representatives and share your story. Let them know how the expiration of these vital tax credits in the September funding bill. Together, we can help protect the affordability and stability of coverage for those who need it most.

Final CMS program integrity rule

CMS has put their new Program Integrity Rule* in place. Your patients may have added several low-value bowel prep agents to the formulary: **Clenpiq, Suflave, and Plenvu.**

To support improved colonoscopy preparation and patient adherence, we have added several low-volume bowel prep agents to the formulary: **Clenpiq, Suflave, and Plenvu.**

According to ASA guidelines, low-volume prep agents are recommended to help increase the likelihood that patients will complete their pre-treatment plan. These new options not only offer a lower volume and taste better, but are also **available at $0 cost for members ages 45–75,** the recommended age range for colonoscopy screening.

Organizational Updates

More prior auth codes removed

We're excited to share some big changes that make things easier for you and your patients. Last month, we removed prior authorization requirements for more than 1,200 medical services—over 27% of our total! And we're not stopping there.

This month, we're taking over 100 more procedure codes off the list, so these services no longer need pre-approval.

We know that less paperwork means more time for you to focus on patient care. We're committed to cutting down on administrative tasks so you can do just that.

Learn More Here

Upcoming change to prior authorization process

Starting soon, claims sent without prior authorization will no longer stop in a "pending" status. They will be denied instead, following industry standards. You'll still see these updates in the 2025 Provider Manual. If you have questions, reach out to our Provider Services team at (855) 672-2755, option 4. Stay tuned for further details in our next newsletter.

Reminder: Must use our new cover forms for claim disputes by 10/1

The best way to submit your claim dispute and stay up to date on its status is through our Provider Portal. We've made necessary changes so that submitting through our portal is easier than ever before!

Beginning October 1, if you choose to submit your dispute through fax or mail, you **must** include the necessary cover sheet for it to be processed, or your dispute will be returned until the form is used.

Our claims dispute forms can be found at hioscar.com/providers/cover-forms.

How do you know which form to use?

- If you are challenging a claims determination:
  - Use the Claims Dispute Provider Form
- If you are challenging an authorization denial for medical necessity or experimental/investigational procedures:
  - Use the Clinical Appeals Provider Form
- If you are sending an additional documentation regarding an individual claim (including medical records, itemized bills, acquisition invoices):
  - Use the Claims-Related Documents Provider Form
- This form is NOT to be used for initial claim submission

We recommend saving these cover forms to your files for easy future reference. Find the documents by clicking the button below.

Provider Forms

Friendly Reminder

Appointment wait time standards

Many Americans experience long wait times for healthcare, and some even delay or skip care because they can't see a doctor promptly. These delays are linked to lower patient satisfaction, negative perceptions of care quality, and higher no-show rates. Prolonged wait times can also lead to worsening health conditions, delayed diagnoses, and potentially preventable hospitalizations.

We know you're already committed to providing timely, high-quality care to your patients. Here's a quick reminder about the appointment timeframes established by CMS for qualified health plans:

Behavioral health	Routine Primary Care	Specialty Care
appointments within	appointments within	appointments within
10 days*	15 days*	30 days*
business	business	business

We understand the demands on your time and appreciate your continued efforts to meet these important standards. Thank you for your partnership and commitment to caring for our members the way you do!

Check out the Provider Manual for more comprehensive guidelines.
