Our history

Founded in 2017 by CEO Jaroslaw "Jarek" Kutylowski with a vision to break down language barriers with AI, DeepL has grown to over 1,000 passionate employees around the globe. As a leader in Language AI, DeepL has been recognized by Forbes as one of the Top 50 AI Startups and ranked among the Cloud 100 list of the world's best private cloud computing companies. DeepL is supported by world-renowned investors including Benchmark, IVP, and Index Ventures.

Our mission

DeepL is on a mission to break down language barriers for individuals and businesses everywhere. Over 200,000 businesses, governments, and other organizations and millions of individuals across 228 global markets trust DeepL's Language AI platform for human-like translation in both written and spoken formats, as well as natural, improved writing. Designed with enterprise security in mind, companies around the world leverage DeepL's AI, specifically tuned for language, to transform business communications, expand markets, and improve their productivity.

Our AI solutions

Powered by one of the fastest supercomputer clusters on the planet, the DeepL Language AI platform combines sophisticated neural network and LLM technology to deliver innovative solutions to individuals and companies around the world.

Our flagship product, DeepL Translate, provides human-like translation in more than 30 languages and is consistently rated the best solution for capturing the accuracy, precision, and nuance of the original language. DeepL also offers DeepL Write Pro, an AI-powered writing assistant that empowers users to elevate their communication with real-time suggestions for word choice, phrasing, style, and tone.

In November 2024, DeepL launched its first voice translation solution DeepL Voice, with the first two products unveiled: Voice for Meetings and Voice for Conversations. DeepL Voice makes it possible to conduct virtual meetings across several languages as well as real-time translation for in-person conversations.

About DeepL

DeepL is on a mission to break down language barriers for businesses everywhere. Over 200,000 customers and millions of individuals across 228 global markets trust DeepL's Language AI platform for human-like translation in both written and spoken formats, as well as natural, improved writing. Designed with enterprise security in mind, companies around the world leverage DeepL's AI solutions, specifically tuned for language, to transform business communication, expand markets, and improve productivity. Founded in 2017 by CEO Jaroslaw "Jarek" Kutylowski, DeepL now has over 1,000 passionate employees and is supported by world-renowned investors including Benchmark, IVP, and Index Ventures.

CEO biography

Dr. Jaroslaw "Jarek" Kutylowski is the CEO and founder of DeepL, headquartered in Cologne, Germany.

Born in Poland, Jarek has an international background, spending a large part of his life in Germany. A developer at heart, he began coding at the age of 10, working on personal projects he found useful and applicable in everyday life. Jarek earned his PhD in Computer Science with an emphasis on mathematics, and prior to DeepL, worked in several tech companies.

DeepL has experienced unprecedented growth under Jarek's leadership by developing the world's most accurate machine translator, available in both live voice and written formats, and a highly-contextual AI writing assistant—further cementing DeepL as a leader in Language AI technology. DeepL's suite of language tools is used by millions of people all over the world, including hundreds of thousands of organizations and businesses in a variety of sectors.
